"The Washington Manual Subspecialty Consult Series is designed to provide quick access to the essential information needed to evaluate a patient on a subspecialty consult service - each manual has been completely reviewed, revised, and follows the format and template of The Washington Manual of Medical Therapeutics, 33/e. We believe the revised outline format will provide information in a more logical and readily accessible format. The content has been updated to reflect advancing technologies and therapeutics. The objective is for the reader to obtain a synopsis of symptoms, signs, and problems encountered in their daily workflow in a bulleted format for quick salient points. References to a more descriptive source have been provided, along with a second color to support quick access, and web resources for physicians and patients"--Provided by publisher. 'TRB's Airport Cooperative Research Program (ACRP) Report 54: Resource Manual for Airport In-Terminal Concessions provides guidance on the development and implementation of airport concession programs. The report includes information on the airport concession process; concession goals; potential customers; developing a concession space plan and concession mix; the Airport Concessions Disadvantaged Business Enterprise (ACDBE) program; and concession procurement, contracting, and management practices"--Publisher's description.
