Counterterrorism and Cybersecurity Mar 05 2021 From 9/11 to Charlie Hebdo along with Sony-pocalypse and DARPA's \$2 million Cyber Grand Challenge, this book examines counterterrorism and cyber security history, strategies and technologies from a thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from thought leaders and the make-believe of Hollywood such as 24, Homeland and The Americans. President Barack Obama also said in his 2015 State of the Union address, "We are making sure our government integrates intelligence to combat cyber threats, just as we have done to combat terrorism. In this new edition, there are seven completely new chapters, including three new contributed chapters by healthcare chief information security officer Ray Balut and Jean C. Stanford, DEF CON speaker Philip Polstra and security engineer and Black Hat speaker Darren Manners, as well as new commentaries by communications expert Andy Marken and DEF CON speaker Emily Peed. The book offers practical advice for businesses, governments and individuals to better secure the world and protect cyberspace.

Alternative Salvations May 07 2021 By considering transformative ideas and experiences which are explicitly articulated or implicitly structured in languages of religion and spirituality, *Alternative Salvations* probes concepts including 'religious', 'secular', 'spiritual', 'post-Christian', and 'post-secular', providing a series of studies which question the functionality of these broad categories. Part one draws on contemporary salvation narratives showing how current cultural forms, social practices and secular discourses are influenced by, or are interpreted through, the lens of religious and theological accounts of salvation. Examples include twelve step recovery programs, drug culture, and public policy surrounding HIV-AIDs in Kenya. Although outside traditional religious contexts, the contributors show ways in which they are not free from religious symbolism. Part two explores alternative accounts of salvation rooted in religious traditions. Established orthodoxies are confronted by contemporary critical questions, for example about gender, the status of animals, and the political dimensions of salvation. By contributing new perspectives and unique case studies, *Alternative Salvations* provides a deliberate challenge to easy binaries which often underpin contemporary and traditional discourses of salvation.

Advances in Psychology and Law Jan 27 2023 The present volume consists of up-to-date review articles on topics relevant to psychology and law, and will be of current interest to the field. Notably, the majority of these topics are currently attracting a great deal of research and public policy attention in the U.S. and elsewhere, as evidenced by programs at the American Psychology-Law Society and related conferences. Topics for the present volume include: attitudes toward the police (Cole et al.), alibis (Charman et al.), hate crimes based on gender and sexual orientation (Plumm & Leighton), the role of gender at trial (Livingston et al.), neuroimages in court (Glen), intimate partner violence (Mauer & Reppucci), post-identification feedback (Douglass & Smalarz) and individual differences in eyewitness identification (Snowden & Bornstein), veterans' wellbeing (Berthelot & Prager), and plea bargaining (Levett).

Google It Jul 21 2022 From Google search to self-driving cars to human longevity, is Alphabet creating a neoteric Garden of Eden or Bentham's Panopticon? Will King Solomon's challenge supersede the Turing test for artificial intelligence? Can transhumanism mitigate existential threats to humankind? These are some of the overarching questions in this book, which explores the impact of information awareness on humanity starting from the Book of Genesis to the Royal Library of Alexandria in the 3rd century BC to the modern day of Google Search, IBM Watson, and Wolfram|Alpha. The book also covers Search Engine Optimization, Google AdWords, Google Maps, Google Local Search, and what every business leader must know about digital transformation. "Search is curiosity, and that will never be done," said Google's first female engineer and Yahoo's sixth CEO Marissa Mayer. The truth is out there; we just need to know how to Google it!

Handbook of Forensic Sociology and Psychology Jun 20 2022 The role of behavioral and social sciences in the courtroom setting has expanded exponentially in the past few decades. It is now widely recognized that scientists in these areas provide critical contextual information for legal decision making, and that there is a reliable knowledge base for doing so. While there are many handbooks of forensic psychology, this is the first such volume to incorporate sociological findings, broadening the conceptual basis for examining cases in both the civil and criminal realms, including immigration issues, personal injury, child custody, and sexual harassment. This volume will examine the responsibilities of expert witnesses and consultants, and how they may utilize principles, theories and methods from both sociology and psychology. It will show these disciplines together can improve the identification and apprehension of criminals, as well as enhance the administration of justice by clarifying profiles of criminal behavior, particularly in cases of serial killers, death threat makers, stalkers, and kidnappers. The volume is quite comprehensive, covering a range of medical, school, environmental and business settings. Throughout it links basic ideas to real applications and their impact on the justice system.

How I Wish I Had Taught Maths Jun 08 2021 "e;I genuinely believe I have never taught mathematics better, and my students have never learned more. I just wish I had known all of this twelve years ago."e;Craig Barton is one of the UK's most respected teachers of mathematics. In his remarkable new book, he explains how he has delved into the world of academic research and emerged with a range of simple, practical, effective strategies that anyone can employ to save time and energy and have a positive impact on the long-term learning and enjoyment of students. Craig presents the findings of over 100 books and research articles from the fields of Cognitive Science, Memory, Psychology and Behavioural Economics, together with the conversations he has had with world renowned educational experts on his Mr Barton Maths Podcast, and subsequent experiments with my students and colleagues.

Globalizing Torture Mar 29 2023 Following the terrorist attacks of September 11, 2001, the Central Intelligence Agency embarked on a highly classified program of secret detention and extraordinary rendition of terrorist suspects. The program was designed to place detainee interrogations beyond the reach of law. Suspected terrorists were seized and secretly flown across national borders to be interrogated by foreign governments that used torture, or by the CIA itself in clandestine 'black sites' using torture techniques. This report is the most comprehensive account yet assembled of the human rights abuses associated with secret detention and extraordinary rendition operations. It details for the first time the number of known victims, and lists the foreign governments that participated in these operations. It shows that responsibility for the abuses lies not only with the United States but with dozens of foreign governments that were complicit. More than 10 years after the 2001 attacks, this report makes it unequivocally clear that the time has come for the United States and its partners to definitively repudiate these illegal practices and secure accountability for the associated human rights abuses.

The Great Utopia May 27 2020 "In this volume, which accompanies the largest exhibition ever mounted at the Guggenheim Museum, twenty-one essays by eminent scholars from Germany, Great Britain, Russia, and the United States explore the activity of the Russian and Soviet avant-garde in all its diversity and complexity. These essays trace the work of Malevich's Unovis (Affirmers of the New Art) collective in Vitebsk, which introduced Suprematism's all-encompassing geometries into the design of textiles, ceramics, and indeed whole environments; the postrevolutionary reform of art education and the creation of Moscow's Vkhutemas (Higher Artistic-Technical Workshops), where the formal and analytical principles of the avant-garde were the basis of instruction; the debates over a "proletarian art" and the transition to Constructivism, "production art," and the "artist-constructor"; the organization of new artist-administered "museums of artistic culture"; the "third path" in non-objective art taken by Mikhail Larionov; the return to figuration in the mid-1920s by the young artists - and former students of the avant-garde - in Ost (the Society of Easel Painters); the debates among photographers, in the late 1920s and early 1930s, on the superiority of the fragmented or continuous image as a representation of the new socialist reality; book, porcelain, fabric, and stage design; and the evolution of a new architecture, from the experimental projects of Zhivskul'ptarkh (the Synthesis of Painting, Sculpture, and Architecture Commission) to the multistage competition, in 1931-32, for the Palace of Soviets, which "proved" the inapplicability of a Modernist architecture to the Bolshevik Party's aspirations."

Code-Switching as a Pedagogical Tool in Bilingual Classrooms May 19 2022 Presenting a mixed methods study conducted in a bilingual mathematics classroom in Zimbabwe, this text reveals the semantic pedagogical functions and linguistic forms of code-switching during STEM instruction. Code-Switching as a Pedagogical Tool in Bilingual Classrooms offers a detailed analysis of code-switching in the context of educational linguistics, and reveals ten major pedagogical techniques which illustrate how teachers use code-switches to engage students and provide guidance, clarification, discipline, and recaps during individual and whole-class interactions. Chapters highlight that code-switching can be used in a targeted manner to harness the cognitive potential of bilingual speakers and enhance instruction. Ultimately, the text identifies implications for teacher education, language policy, and educational leadership more broadly, and demonstrates intersections with key areas including functional, critical, and cultural literacy. This text will benefit researchers, academics, and educators with an interest in bilingualism, applied linguistics, and secondary education more broadly. Those specifically interested in multicultural education, sociolinguistics and educational policy will also benefit from this book.

The Blood Contingent Feb 28 2023 This innovative social and cultural history explores the daily lives of the lowest echelons in president Porfirio Díaz's army through the decades leading up to the 1910 Revolution. The author shows how life in the barracks—not just combat and drill but also leisure, vice, and intimacy—reveals the basic power relations that made Mexico into a modern society. The Porfirian regime sought to control and direct violence, to impose scientific hygiene and patriotic zeal, and to build an army to rival that of the European powers. The barracks community enacted these objectives in times of war or peace, but never perfectly, and never as expected. The fault lines within the process of creating the ideal army echoed the challenges of constructing an ideal society. This insightful history of life, love, and war in turn-of-the-century Mexico sheds useful light on the troubled state of the Mexican military more than a century later.
