**Quantity Surveying Practice** Sep 21 2022 Quantity Surveying Practice: The Nuts and Bolts is a practical guide to quantity surveying in building construction. Due to the increasing expectations of quality and performance from project clients, quantity surveyors must improve their professional skills to solve a variety of intricate problems and disputes confronting the demanding construction market. This practical book focuses on the basic concepts underlying the technical aspects of quantity surveying and contains many worked examples together with useful figures and real-life cases to help readers digest and understand the essentials and become better professionals as a result. This book is organised and structured into seven chapters. Chapter 1 is about the estimation of construction costs. Chapter 2 gives an overview of tendering and tender documentation. Chapter 3 examines the procedure of tender examination and the approach to contract award. Chapter 4 reviews the whole process of an interim valuation from the submission

of a payment application by the contractor to the issuance of an interim valuation by the quantity surveyor, identifying the key issues within the process. Chapter 5 examines the topic of construction claims. Chapter 6 addresses the cost control and monitoring in connection with construction projects. Chapter 7 is about dispute management and three commonly used dispute resolution mechanisms, namely mediation, adjudication and arbitration are introduced. This book is essential reading for students on quantity surveying and construction management programmes, as well as the APC candidates pursuing the professional quantity surveying pathway. It is also a useful reference for practicing quantity surveyors.

*The Architect's Guide* Apr 23 2020

The Architect in Practice Mar 23 2020 The Architect in Practice was first published in 1952. Originally written by a quantity surveyor and an architect it has remained, through its nine editions, a leading textbook used in the education of architects world-wide. While the format of the book has developed, the message and philosophy remains the same as the original: to provide the student of architecture and the young practitioner with a readable guide to the profession, outlining an architect's duties to client and contractor, the key aspects of running a building contract, and the essentials of management, finance and drawing office procedure. The tenth edition follows in that tradition. The authors, still an architect and a quantity surveyor, have brought the text fully up to date. Major revisions in this edition include: Revised sections on Planning and the Building Regulations Changes to the education of architects in the UK have been detailed Discussion of the new ARB Architects Code: Standards of Professional Conduct and Practice which came into force in January 2010 The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 (SFA/99) has been updated The latest RIBA Standard Agreement 2010 (S-10-A) is now discussed All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts Now also includes reference to education, registration and CPD requirements of the Royal Institute of the Architects of Ireland The tenth edition of The Architect in Practice will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession.
