An updated edition of the blockbuster bestselling leadership book that took America and the world by storm, two U.S. Navy SEAL officers who led the most highly decorated special operations unit of the Iraq War demonstrate how to apply powerful leadership principles from the battlefield to business and life. Sent to the most violent battlefield in Iraq, Jocko Willink and Leif Babin's SEAL task unit faced a seemingly impossible mission: help U.S. forces secure Ramadi, a city deemed "all but lost." In gripping firsthand accounts of heroism, tragic loss, and hard-won victories in SEAL Team Three's Task Unit Bruiser, they learned that leadership—at every level—is the most important factor in whether a team succeeds or fails. Willink and Babin returned home from deployment and instituted SEAL leadership training that helped forge the next generation of SEAL leaders. After departing the SEAL Teams, they launched Echelon Front, a company that teaches these same leadership principles to businesses and organizations. From promising startups to Fortune 500 companies, Babin and Willink have helped scores of clients across a broad range of industries build their own high-performance teams and dominate their battlefields. Now, detailing the mind-set and principles that enable SEAL units to accomplish the most difficult missions in combat, Extreme Ownership shows how to apply them to any team, family or organization. Each chapter focuses on a specific topic such as Cover and Move, Decentralized Command, and Leading Up the Chain, explaining what they are, why they are important, and how to implement them in any leadership environment. A compelling narrative with powerful instruction and direct application, Extreme Ownership revolutionizes business management and challenges leaders everywhere to fulfill their ultimate purpose: lead and win. Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database. CPT(R) 2022 Professional Edition is the definitive AMA-authored resource to help healthcare professionals correctly report and bill medical procedures and services. Steal this book Broad in scope and with global appeal The Oxford Textbook of Old Age Psychiatry, second edition is the definitive resource on old age psychiatry. It comprehensively provides the latest knowledge on the science and practice of treating later life mental disorders, focusing on the health and social issues that arise around ageing, dementia, co-morbidity, dependency, and the end of life in progressively ageing societies across the world. Published in previous incarnations as the much loved Psychiatry in the Elderly, this core resource for all old age psychiatrists, trainees, and other clinical professionals treating older people's mental health, has been fully revised, updated, and significantly expanded. Twelve months inclusive access to the online version, including the full text (which can be browsed by the contents list, index, or searched), links from references to external sources (via PubMed, ISI, and CrossRef), and the ability to download all figures and illustrations into PowerPoint ensures that it remains the leading text on old age psychiatry in the field. Maintaining the classic combination of comprehensive coverage, clear writing style, and the provision of authoritative and up-to-date information from earlier editions, this highly respected volume covers the underpinning basic science, both the neurobiological and social varieties, clinical practice, and specific disorders, as well as providing information on psychiatric services for older people, and medico-legal and ethical issues that often present hard challenges for those treating older patients. Taking a global approach by highlighting both the common burdens and the differences in management from country to country and with a much expanded cast of contributors providing a truly international perspective, The Oxford Textbook of Old Age Psychiatry, second edition includes information on all the latest improvements and changes in the field. New chapters are included to reflect the development of old age care; covering palliative care, the ethics of caring, and living and dying with dementia. Existing chapters have also been revised and updated throughout and additional information is included on brain stimulation therapies, memory clinics and services, and capacity, which now includes all mental capacity and decision making. Providing extensive coverage and written by experts the field, the second edition of the Oxford Textbook of Old Age Psychiatry is an essential resource; no old age psychiatrist, trainee, or anyone working in the field of mental health care for older people should be without a copy on their bookshelf. For graduate level courses in Operations Management or Business Processes. A structured, data-driven approach to understanding core operations management concepts. Anupindi shows how managers can design and manage process structure and process drivers to improve the performance of any business process. The third edition retains the general process view paradigm while providing a sharper, more streamlined presentation of the development of ideas in each chapter—all of which are illustrated with contemporary examples from practice. This sourcebook presents the most important metal-working and shearing processes - and their related machines and tooling - in a concise form supplemented by ample illustrations, tables and flow charts. Practical examples show how to calculate forces and strain energy of the processes and the specific parameters of the machines, and exercises help readers improve understanding. Because much production today is automated using modern Computer Numerical Control engineering, the book covers automated flexible metal forming and handling systems. Carefully translated from the eighth revised German-language edition, Metal Forming Practise offers a valuable reference tool for students, engineers and technicians. Based on a Navy SEAL's inspiring graduation speech, this #1 New York Times bestseller of powerful life lessons "should be read by every leader in America" (Wall Street Journal). If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, "What starts here changes the world," he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves—and the world—for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments. "Powerful." --USA Today "Full of captivating personal anecdotes from inside the national security vault." --Washington Post "Superb, smart, and succinct." --Forbes
