***Transcultural Experiments Oct 09 2021 Contemporary processes of globalization have had a profound impact on cultural production and dissemination both intra- and cross-culturally. The dissemination of cultures on a global scale has led to multiple and complex effects, among them the formation of radical new modes of cultural interaction, transcultural flows, and hybridized knowledges, forms not easily understandable in terms of traditional models of discrete national or ethnic cultures/subcultures. Transcultural Experiments develops new scholarly and creative strategies out of this intersection of cultural traditions, specifically in Russia***

**and the United States. Ellen E. Berry and Mikhail N. Epstein define and enact a transcultural method as an alternative to the legacies of cultural divisions and hegemony that have dominated both Western and Second Worlds. The book introduces a system of original concepts and genres of writing that will help in mapping twenty-first century global culture: 'transculture' (vs. multiculturalism), 'interference' (vs. difference), 'potentiation' (vs. deconstruction), ethics of imagination, and collective improvisation. The authors make a revolutionary argument in cultural studies that will be of profound interest to anyone concerned with finding new modes of intercultural communication between the former First and Second Worlds.**

**The Battle of Versailles Nov 10 2021 On November 28, 1973, the world's social elite gathered at the Palace of Versailles for an international fashion show. By the time the curtain came down on the evening's spectacle, history had been made and the industry had been forever transformed. This is that story. Conceived as a fundraiser for the restoration of King Louis XIV's palace, in the late fall of 1973, five top American designers faced off against five top French designers in an over-the-top runway extravaganza. An audience filled with celebrities**

***and international jet-setters, including Princess Grace of Monaco, the Duchess of Windsor, Paloma Picasso, and Andy Warhol, were treated to an opulent performance featuring Liza Minnelli, Josephine Baker, and Rudolph Nureyev. What they saw would forever alter the history of fashion. The Americans at the Battle of Versailles - Oscar de la Renta, Bill Blass, Anne Klein, Halston, and Stephen Burrows - showed their work against the five French designers considered the best in the world - Yves Saint Laurent, Hubert de Givenchy, Pierre Cardin, Emanuel Ungaro, and Marc Bohan of Christian Dior. Plagued by in-fighting, outsized egos, shoestring budgets, and innumerable technical difficulties, the American contingent had little chance of meeting the European's exquisite and refined standards. But against all odds, the American energy and the domination by the fearless models (ten of whom, in a groundbreaking move, were African American) sent the audience reeling. By the end of the evening, the Americans had officially taken their place on the world's stage, prompting a major shift in the way race, gender, sexuality, and economics would be treated in fashion for decades to come. As the curtain came down on The Battle of Versailles, American fashion was born; no longer would the world look to Europe to determine the stylistic trends of the day, from here forward, American sensibility and taste would command the world's attention. Pulitzer-Prize winning fashion journalist Robin Givhan offers a lively and meticulously well-researched account of this unique event. The Battle of Versailles is a sharp, engaging cultural history; this intimate examination of a single moment shows us how the world of fashion as we know it came to be.***

**Model American Jan 24 2023 "Katy Grannan's portraits examine the desire of her subjects to offer themselves up to the camera lens. Throughout Model American, the influence of portraiture, from classical painting to fashion advertising, can be sensed in the poses and gazes her models adopt. From escapism to self-discovery and catharsis, the motivations for posing - the projection of an idealized self into the lens of a stranger - are varied, yet the resulting images consistently reflect the intensity of the relationship between artist and model. Each image resonates with the tension of a first encounter." "In three of Grannan's five series, she photographs her models in their own surroundings or her own home, paying meticulous attention to the elements of each domestic setting: wood paneling, patterned wallpaper, and other mundane but often telling details. The subjects choose to remain clothed, to model nude, or to pause somewhere in between, working with Grannan to arrive at the pose. In Grannan's most recent series, "Sugar Camp Road" and "Mystic Lake," she moves the exercise outdoors, using municipal parks and their surrounding areas as the backdrop. Even though the parklands and roadsides that serve as her set bring the private encounters of her earlier series into the public landscape, she maintains a delicate - yet increasingly charged - sense of intimacy." "Model American: Katy Grannan is the first published collection of her work, offering over seventy of her finest images."--BOOK JACKET.**

**American Cars, 1973-1980 Jul 26 2020** The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

***Hitler's American Model Jan 12 2022*** How American race law provided a blueprint for Nazi Germany Nazism triumphed in Germany during the high era of Jim Crow laws in the United States. Did the American regime of racial oppression in any way inspire the Nazis? The unsettling answer is yes. In *Hitler's American Model*, James Whitman presents a detailed investigation of the American impact on the notorious Nuremberg Laws, the centerpiece anti-Jewish legislation of the Nazi regime. Contrary to those who have insisted that there was no meaningful connection between American and German racial repression, Whitman demonstrates that the Nazis took a real, sustained, significant, and revealing interest in American race policies. As Whitman shows, the Nuremberg Laws were crafted in an atmosphere of considerable attention to the precedents American race

**laws had to offer. German praise for American practices, already found in Hitler's Mein Kampf, was continuous throughout the early 1930s, and the most radical Nazi lawyers were eager advocates of the use of American models. But while Jim Crow segregation was one aspect of American law that appealed to Nazi radicals, it was not the most consequential one. Rather, both American citizenship and antimiscegenation laws proved directly relevant to the two principal Nuremberg Laws—the Citizenship Law and the Blood Law. Whitman looks at the ultimate, ugly irony that when Nazis rejected American practices, it was sometimes not because they found them too enlightened, but too harsh. Indelibly linking American race laws to the shaping of Nazi policies in Germany, Hitler's American Model upends understandings of America's influence on racist practices in the wider world.**

**Acyclic Models May 04 2021 Acyclic models is a method heavily used to analyze and compare various homology and cohomology theories appearing in topology and algebra. This book is the first attempt to put together in a concise form this important technique and to include all the necessary background. It presents a brief introduction to category theory and homological algebra. The author then gives the background of the theory of differential modules and chain complexes over an abelian category to state the main acyclic models theorem, generalizing and systemizing the earlier material. This is then applied to various cohomology theories in algebra**

***America suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting, and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, Continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced in the mother country and joined forces with like-minded Americans to develop a revolutionary system of wildlife conservation. In time, and surviving the close scrutiny and hard ongoing debate of open, democratic societies, this series of conservation practices became known as the North American Model of Wildlife Conservation. In this book, editors Shane P. Mahoney and Valerius Geist, both leading authorities on the North American Model, bring together their expert colleagues to provide a comprehensive overview of the origins, achievements, and shortcomings of this highly successful conservation approach. This volume • reviews the emergence of conservation in late nineteenth-early twentieth century North America • provides detailed explorations of the Model's institutions, principles, laws, and policies • places the Model within ecological, cultural, and socioeconomic contexts • describes the many economic, social, and cultural benefits of wildlife restoration and management • addresses the Model's challenges and limitations while pointing to emerging opportunities for***

**The North American Wildlife Conservation Model (NAM) is the driver of a strong anthropocentric stance, which has legalized an ongoing, annual exploitation of hundreds of millions of wild animals, who are killed in the United States through trapping, hunting and other lethal practices. Increasingly, the American public opposes the killing of wild animals for recreation, trophies and profit but has little—if any—knowledge of the Model. The purpose of this book is to empower the public with knowledge about the NAM's insufficiencies and to help expedite the shift from lethal to compassionate conservation, an endeavour urgently needed particularly under the threats of climate change, human population growth and accelerating plant and animal species extinctions. With a focus on trapping, this**

**book exposes the NAM's belief in human supremacy and its consequences for wild animals and their ecosystems, the same value that is driving the ongoing global destruction of nature and accelerating species extinction. Motivated by a deep concern for wild animals who suffer and whose lives are extinguished each year by 'sportsmen and women', this book exposes the violent treatment of wild animals inherent in governmental-promoted hunting and trapping programs, while emphasizing the importance of empathy and compassion for other animals in conservation and in our lives.**

**Models of Influence Aug 19 2022 New York Times Bestseller Nigel Barker—fashion authority, photographer, and host of Oxygen's *The Face*—presents 50 of the most influential models from the 1940s to today through a wealth of full-color photographs from the world's most renowned fashion photographers and an anecdotal text that reveals each woman's indelible place in the pantheons of fashion and popular culture. Interweaving 200 gorgeous photographs and informative and entertaining anecdotes, *Models of Influence* profiles 50 women who have made an unforgettable impression on fashion, the modeling industry, and our notions of beauty. Eight chronological chapters, each of which spotlight an era, feature the stories and images of women who made their mark. These include Lisa Fonssagrives-Penn, Dovima, and Dorian Leigh, who reigned during modeling's golden age in the 1950s; Twiggy, Veruschka, and Jean Shrimpton, who embodied the free spirit of the 1960s; and Lauren Hutton, Iman, and Janice Dickinson, models who revolutionized the notion of beauty in the 1970s. Barker profiles those who've become**

Also included are models who brought us into the twenty-first century, and those who are leading the way into the future, from Gisele Bündchen, Daria Werbowy, Liya Kebede, and Coco Rocha to Cara Delevingne, Karlie Kloss, Lara Stone, Joan Smalls, and Kate Upton. Nigel Barker showcases each model's incandescent style—that special something that sets her apart, whether it's her unique physicality, a daring approach to image-making, or a particular energy that reflects the zeitgeist. Here, too, are models who broke the mold in their respective eras and turned the standard notion of beauty on its head. Stunning in its breadth and beauty, comprising some of the finest fashion images over the last 70 years, Models of Influence is a celebration of fashion and a group of unforgettable women who have helped shape and change modern culture.***

***Political Activists in America Feb 19 2020 Through vivid portrayals of political activists, this book offers a fresh analysis of why people become involved in politics. Based on interviews with environmental, social justice and pro-life activists, the book argues, contrary to both popular opinion and the main approaches of political science, that active involvement in politics can be deeply fulfilling. The identity construction approach is the core of the book's argument and shows how activists value political involvement for themselves. The book argues against***

In contrast, the identity construction approach sees political activism as enabling activists to become somebody whom they would otherwise have been unable to become. It analyses the model's legacy in the "Anglosphere," its acceptance, rejection, proliferation in France and Europe - the EU often emulating and disseminating neoliberal processes and techniques via hard and soft law -, its scope, its spread throughout EU countries characterised by "illiberalism," highlighting the model's need to adapt. It fills a historiographical gap regarding a concept which remains acutely topical.**
