When the Blue Shift Comes Aug 09 2021 In the far future, Earth is about to be swallowed by a black hole in this sweeping SF epic from one of the masters of the genre. In a time so far from our own that we cannot comprehend it, humanity has spread amongst the stars and changed in more ways than we can count. But they have never forgotten their birthplace - Earth. But now Earth stands on the brink of catastrophe, at risk of being swallowed by a black hole. One man, Hanosz Prime, ruler of his world, is determined to visit Earth before it is destroyed. His abdication from his throne and his wanderlust are to prove the beginning of a much longer journey - one that will see him fall in love, meet the Oracles of Earth and perhaps, if he is very lucky, provide a means to save the cradle of humanity. Originally started by Robert Silverberg more than 20 years ago but never completed, Hanosz's story is taken up by Alvaro Zinos-Amaro. Silverberg hand-picked Zinos-Amaro to complete the book, and provided

notes and guidance. The result is a remarkable collaboration between one of the masters of SF and one of the most exciting new voices in the genre.

Introduction to Planning History in the United States May 26 2020 This book is an introduction to the history of the city planning profession in the United States, from its roots in the middle of the nineteenth century to the present day. The work examines important questions of American planning history. Why did city planning develop in the manner it did? What did it set out to achieve and how have those goals changed? Where did planning thrive and who were its leaders? What have been the most important ideas in planning and what is their relation to thought and social development? By answering these questions, this book provides a general understanding for further study of the extensive literature of planning and urban history. Donald A. Krueckeberg divides this work into three historical periods: an initial period of independent but gradually converging concepts of a planned city; a second period of national organization, experimentation, and development; and a third period of implementation of planning ideas in nearly all levels and areas of urban policymaking. Krueckeberg begins with revealing the origins of modern planning in the movements for sanitary reform, civic art and beautification, classical revival in civic design, and neighborhood settlements and housing

reform. A second section covers the institutionalization of the profession; the rise of zoning and comprehensive planning; influential figures of the period; and the new communities program of the New Deal. The book contains case studies and focuses on the role of the planner and the effectiveness of the profession.

Krueckeberg concludes with a bibliography of planning history in the United States.
