**Introducing Machiavelli** Sep 26 2020 Illustrated guide to the crucial Italian philosopher and author of *The Prince*. 'Machiavellian' is a popular byword for treachery and opportunism. Machiavelli's classic book on statecraft, *The Prince*, published over 400 years ago, remains controversial to this day because of its electrifying frankness as a practical guide to power. Is it a how-to manual for dictators, a cynical philosophy of 'the end justifies the means', or a more complex and subtle analysis of successful government? Machiavelli was a loyal servant of the Florentine republic. His opposition to Medici despotism led him to torture on the rack and exile, and yet he chose as his model for the Prince the most notorious tyrant, Cesare Borgia. *Introducing Machiavelli* traces the colourful life of this paradoxical realist whose clear-sighted patriotism made him the first truly modern political scientist. Machiavelli is seen as central to the postmodern debate on Civil Society. This book brings the creative turbulence of Renaissance Italy to life, and presents a compelling portrait of a key figure of European political history.

**Remediation Manual for Contaminated Sites** Jan 23 2023 To ask the right question, one needs to have some idea of what the answer might be. So it is with remediation. There is no such thing as too much information when it comes to characterizing a site, as information can aid in selecting the best remediation options. Unfortunately, the collection of data for making an informed decision is often costly, forcing professionals to make decisions on incomplete data. The lack of accurate data can also lead to the wrong remediation method selections, unwanted surprises, and extra expense. Based on the author's more than 40 years of experience working on environmental projects, Remediation Manual for Contaminated Sites provides a practical guide to environmental remediation and cleanups. It presents a broad overview of the environmental remediation process, distilled into what one needs to know to evaluate a specific challenge or solve a remediation problem. The text offers guidance on tasks that range from managing consultants and contractors to gathering data, selecting a suitable remediation technology, and calculating remediation costs. The book includes remediation strategies for a variety of contaminants and examines a wide range of technologies for the remediation of water and soil, including excavation, wells, drainage, soil venting, vapor stripping, incineration, bioremediation, containment, solidification, vitrification, and phytoremediation. Written as a down-to-earth reference for professionals faced with the challenges of remediating a contaminated site, this book is also useful as a primer for students and those new to the field. It includes numerous figures, photographs, tables, and helpful checklists.

*La Harpe's Post* Aug 26 2020 This major contribution to contact period studies points to the Lasley Vore site in modern Oklahoma as the most likely first meeting place of Plains Indians and Europeans more than 300 years ago. In 1718, Jean-Baptiste Bénard, Sieur de la Harpe, departed St. Malo in Brittany for the New World. La Harpe, a member of the French bourgeoisie, arrived at Dauphin Island on the Gulf coast to take up the entrepreneurial concession provided by the director of the French colony, Jean Baptiste LeMoyne de Bienville. La Harpe's charge was to open a trading post on the Red River just above a Caddoan village not far from present-day Texarkana. Following the establishment of this post, La Harpe ventured farther north to extend his trade market into the region occupied by the Wichita Indians. Here he encountered a Tawakoni village with an estimated 6,000 inhabitants, a number that swelled to 7,000 during the ten-day visit. Despite years of ethnohistoric and archaeological research, no scholar had successfully established where this important meeting took place. Then in 1988, George Odell and his crew surveyed and excavated an area 13 miles south of Tulsa, along the Arkansas River, that revealed undeniable association of Native American habitation refuse with 18th-century European trade goods. Odell here presents a full account of the presumed location of the Tawakoni village as revealed through the analysis of excavated materials from nine

specialist collaborators. In a strikingly well-written narrative report, employing careful study and innovative analysis supported by appendixes containing the excavation data, Odell combines documentary history and archaeological evidence to pinpoint the probable site of the first European contact with North American Plains Indians.
