*Creative Selection* Oct 12 2021 \* WALL STREET JOURNAL BESTSELLER \* An insider's account of Apple's creative process during the golden years of Steve Jobs. Hundreds of millions of people use Apple products every day; several thousand work on Apple's campus in Cupertino, California; but only a handful sit at the drawing board. *Creative Selection* recounts the life of one of the few who worked behind the scenes, a highly-respected software engineer who worked in the final years of the Steve Jobs era—the Golden Age of Apple. Ken Kocienda offers an inside look at Apple's creative process. For fifteen years, he was on the ground floor of the company as a specialist, directly responsible for experimenting with novel user interface concepts and writing powerful, easy-to-use software for products including the iPhone, the iPad, and the Safari web browser. His stories explain the symbiotic relationship between software and product development for those who have never dreamed of programming a computer, and reveal what it was like to work on the cutting edge of technology at one of the world's most admired companies. Kocienda shares moments of struggle and success, crisis and collaboration, illuminating each with lessons learned over his Apple career. He introduces the essential elements of innovation—inspiration, collaboration, craft, diligence, decisiveness, taste, and empathy—and uses these as a lens through which to understand productive work culture. An insider's tale of creativity and innovation at Apple, *Creative Selection* shows readers how a small group of people developed an evolutionary design model, and how they used this methodology to make groundbreaking and intuitive software which countless millions use every day.

*Surviving Democracy* Jun 20 2022 Is democracy, in its neoliberalized form, responsible in part for bringing us to the brink of self-destruction and the policy inertia that is doing away with our chances of survival? *Surviving Democracy* probes the way democracy became neoliberalized and the role neoliberalized democracy plays in our dealings with—causing, understanding, denying, and mitigating—climate change. Defining neoliberalism as the art of exclusion through inclusion, Chien-Yi Lu treats climate change as collateral damage of the neoliberal order established to ensure upward power and wealth redistribution. Highlighting the role money played in the "free" competition of ideas between Keynes and Hayek, she investigates the resulting global structure, wherein the wealthy and powerful sit above the market and democracy, and the way this structure fundamentally contradicts with honest climate mitigation. Central to the structure is neoliberal elites' leveraging of the fluid relationship between the market and the state. Merging citizen power with consumer and investor powers is therefore imperative to the success of climate action. While expediting the bursting of the carbon bubble is an obvious answer, it is the discussion of the meat bubble that brings the book full circle, linking our survival to neoliberalism, inclusion, and democracy. *Surviving Democracy* probes the role democracy plays in our dealings with—causing, understanding, denying, and hopefully, mitigating—climate change.

*The Book of L* Oct 24 2022 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

*Catfantastic* Apr 06 2021 This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

*Surf Like a Girl* Jul 21 2022 Whether they're threading a barrel or shredding a swell, these amazing women are making enormous waves in the world of surfing. If you thought surfing was a male-dominated sport, think again. The thirty women surfers profiled in this thrilling collection can rip a wave with the best of them. Hailing from all over the world, each surfer is featured in spectacular photography and with their own inspirational words. There's American professional surfer Lindsay Steinriede on how her father's death has inspired her career; French board shaper Valerie Duprat on how she got her start "sculpting foam"; Conchita Rossler, founder of Mooana Retreat in Portugal, on connecting mind, body, and spirit; and Australian photographer Cait Miers on empowering women. You'll also meet surfers who are over sixty, who surf while pregnant, who captain boats, teach yoga, and make movies. Breathtaking photography captures these women from every angle, on and off the waves, in some of the world's most visually stunning locations. The perfect gift for surfing enthusiasts, this unique compilation of stunning pictures and hard-won wisdom proves that the thrill of catching a wave, riding it, and kicking out belongs to everyone.

*If Only the Sea Could Sleep* Dec 26 2022 One of the greatest poets of Arabic literature, Adonis's work often centres on the process of poetic creation, but his work has somehow remained highly appealing to Arab readers, and he has had, perhaps, more influence in terms of innovation and modernity than any other contemporary Arab poet. Twice he has been a finalist for the Nobel Prize. For Adonis, poetry is a vision, a leap outside of established concepts, a change in the order of things and the way we look at them."

*Parable of the Forgotten* Feb 04 2021 Jarvis Langton is an unborn-again Christian living on the fringe. He's not big on life and has tried to finish his own twice. Still, most mornings, he quite likes to sun himself at Sydney's Royal Botanic Gardens. One morning he notices something winking at him from a nearby bush. When he investigates he finds the dead body of his friend, Lady; a Thai transvestite. Jarvis is not someone with his thoughts lined up in any reasonable order. It takes him a while to work out Lady must have been murdered. It takes him longer to decide he's going to find her killer - but once he does, the premonition that finding Lady's murderer will bring him his own end, happens in an instant. "Parable of the Forgotten is a first class, no rest-stop, brilliant, whirly gig!" Dr She Mackenzie Hawke, University Of Sydney.

*Slave Stealers* Mar 17 2022 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in

1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

*Prayer, Magic, and the Stars in the Ancient and Late Antique World* Feb 16 2022 In the religious systems of ancient Mesopotamia, Egypt, and the Mediterranean, gods and demigods were neither abstract nor distant, but communicated with mankind through signs and active intervention. Men and women were thus eager to interpret, appeal to, and even control the gods and their agents. In *Prayer, Magic, and the Stars in the Ancient and Late Antique World*, a distinguished array of scholars explores the many ways in which people in the ancient world sought to gain access to--or, in some cases, to bind or escape from--the divine powers of heaven and earth. Grounded in a variety of disciplines, including Assyriology, Classics, and early Islamic history, the fifteen essays in this volume cover a broad geographic area: Greece, Egypt, Syria-Palestine, Mesopotamia, and Persia. Topics include celestial divination in early Mesopotamia, the civic festivals of classical Athens, and Christian magical papyri from Coptic Egypt. Moving forward to Late Antiquity, we see how Judaism, Christianity, and Islam each incorporated many aspects of ancient Near Eastern and Graeco-Roman religion into their own prayers, rituals, and conceptions. Even if they no longer conceived of the sun, moon, and the stars as eternal or divine, Christians, Jews, and Muslims often continued to study the movements of the heavens as a map on which divine power could be read. The reader already familiar with studies of ancient religion will find in *Prayer, Magic, and the Stars* both old friends and new faces. Contributors include Gideon Bohak, Nicola Denzey, Jacco Dieleman, Radcliffe Edmonds, Marvin Meyer, Michael G. Morony, Ian Moyer, Francesca Rochberg, Jonathan Z. Smith, Mark S. Smith, Peter Struck, Michael Swartz, and Kasia Szpakowska. Published as part of Penn State's *Magic in History* series, *Prayer, Magic, and the Stars* appears at a time of renewed interest in divination and occult practices in the ancient world. It will interest a wide audience in the field of comparative religion as well as students of the ancient world and late antiquity.
