Materials Relating to the Campaign to Amend to State Constitution to Levy an Ad Valorem Tax to Support the University of California Feb 21 2020 Includes articles by officials of the university, alumni circulars, student activities and circulars (with some photographs), news releases, and newspaper clippings.

California Civil Procedure Dec 25 2022 The case selection reinforces the perspective of a practitioner choosing knowledgably between state and federal court. The casebook addresses procedures unique to California practice that are not generally presented in the first-year course in civil procedure. Contains information on many state/federal differences in pleading, discovery, right to jury, alternative dispute resolution, res judicata, and appeals.

California Wills and Trusts May 26 2020 This casebook focuses on California law and, with respect to trust material, the focus is on traditional trust doctrines, with the more salient California doctrines discussed where appropriate. "California Wills and Trusts" has numerous examples throughout, as well as notes that are often combinations of comments, examples, and broad questions based on note material. In addition, the analytical material covered in the earlier chapters is supplemented with dedicated problems. All pertinent statutory material is included in the text, so there is no need for a statutory supplement. The authors bring an interesting blend of backgrounds to the material Wendel contributes a traditional academic approach and Popovich incorporates his academic experience and hands-on practice in the field. The unique blend of theoretical and practitioner-oriented note material aids student learning and application. --

Material Dreams Mar 16 2022 In *Material Dreams*, Starr turns to one of the most vibrant decades in the Golden State's history, the 1920s, when some two million Americans migrated to California, the vast majority settling in or around Los Angeles. Although he treats readers to intriguing side trips to Santa Barbara and Pasadena, Starr focuses here mainly on Los Angeles, revealing how this major city arose almost defiantly on a site lacking many of the advantages required for urban development, creating itself out of sheer will, the Great Gatsby of American cities. He describes how William Ellsworth Smyth, the Peter the Hermit of the Irrigation Crusade, propounded the importance of water in Southern California's future, and how such figures as the self-educated, Irish engineer William Mulholland (who built the main aqueducts to Los Angeles) and George Chaffey (who diverted the Colorado River, transforming desert into the lush Imperial Valley) brought life-supporting water to the arid South. He examines the discovery of oil ("Yes it's oil, oil, oil / that makes LA boil," went the official drinking song of the Uplifters Club), the boosters and land developers, the evangelists (such as Bob Shuler, the Methodist Savanarola of Los Angeles, and Aimee Semple McPherson), and countless other colorful figures of the period. There are also fascinating sections on the city's architecture (such as the remarkably innovative Bradbury Building and its eccentric, neophyte designer, George Wyman), the impact of the automobile on city planning, the great antiquarian book collections, the Hollywood film community, and much more. By the end of the decade, Los Angeles had tripled in population and become the fifth largest city in the nation. In *Material Dreams*, Kevin Starr captures this explosive growth in a narrative tour de force that combines wide-ranging scholarship with captivating prose.

**Cases and Materials on California Community Property** Feb 27 2023 Traces the historical development of the community property concept. Also introduces basic classification principles, including limitations on the classification process. The remaining chapters deal with the consequences flowing from the classification of property as community or separate, including management and control rights and responsibilities, creditors' rights, and distribution of property on the termination of the community. The 9th Edition contains a new section dealing with same-sex unions and domestic partnership legislation. Further ramifications and problems are explored in the notes to the cases.

California Cases and Materials on Administrative Law and Procedure Jul 28 2020

California Contract Law Jul 20 2022 This casebook, written by a lawyer who has taught the contracts course in a California law school for twenty years, provides a convenient way for a contracts instructor to integrate California law into a general contracts course curriculum. Comprehensive in its scope, this book can be used either as a stand-alone casebook or as a supplement to a principal casebook in a law school contracts course. It compares and contrasts the principles and rules of general contract law with the specific California statutes and case law in the field of contracts. The California appellate courts have long been a major influence on the field of substantive contract law, shaping the field of contracts beyond the state's borders. Primary sources of cases and statutes are tied together with concise, easy to understand explanations of the rules of contract law. Smith combines, in a single source, the leading California cases, specific California statutes, and sample legal forms, producing a valuable resource for practicing lawyers and paralegals as well as law students and

paralegal students.

**California Wills and Trusts** Oct 31 2020 This casebook focuses on California law and, with respect to trust material, the focus is on traditional trust doctrines, with the more salient California doctrines discussed where appropriate. California Wills and Trusts has numerous examples throughout, as well as "notes" that are often combinations of comments, examples, and broad questions based on note material. In addition, the analytical material covered in the earlier chapters is supplemented with dedicated problems. All pertinent statutory material is included in the text, so there is no need for a statutory supplement. The authors bring an interesting blend of backgrounds to the material -- Wendel contributes a traditional academic approach and Popovich incorporates his academic experience and hands-on practice in the field. The unique blend of theoretical and practitioner-oriented note material aids student learning and application.?
