From the New York Times bestselling author, here is the first novel in the explosive Power of the Dog series—an action-filled look at the drug trade that takes you deep inside a world riddled with corruption, betrayal, and bloody revenge. Book One of the Power of the Dog Series Set about ten years prior to The Cartel, this gritty novel introduces a brilliant cast of characters. Art Keller is an obsessive DEA agent. The Barrera brothers are heirs to a drug empire. Nora Hayden is a jaded teenager who becomes a high-class hooker. Father Parada is a powerful and incorruptible Catholic priest. Callan is an Irish kid from Hell’s kitchen who grows up to be a merciless hit man. And they are all trapped in the world of the Mexican drug Federación. From the streets of New York City to Mexico City and Tijuana to the jungles of Central America, this is the war on drugs like you’ve never seen it. ***A NEW YORK TIMES NOTABLE BOOK*** ***LONGLISTED FOR THE MAN BOOKER PRIZE 2014*** ***PWs Best of the Year 2014*** The author of the best-selling and award-winning Netherland now gives us his eagerly awaited, stunningly different new novel: a tale of alienation and heartbreak in Dubai. Distracted by a breakup with his long-term girlfriend, our unnamed hero leaves New York to take an unusual job in a strange desert metropolis. In Dubai at the height of its self-invention as a futuristic Shangri-la, he struggles with his new position as the “family officer” of the capricious and very rich Batros family. And he struggles, even more helplessly, with the “doghouse,” a seemingly inescapable condition of culpability in which he feels himself constantly trapped—even if he’s just going to the bathroom, or reading e-mail, or scuba diving. A comic and philosophically profound exploration of what has become of humankind’s moral progress, The Dog is told with Joseph O’Neill’s hallmark eloquence, empathy, and storytelling mastery. It

is a brilliantly original, achingly funny fable for our globalized times. It's the night of the Yellow Puff-Ball Mushroom Cloud and a mysterious yellow fog is making its way across America, sowing chaos in its path. Mt. Fuji has erupted. The Euphrates has run dry. The White House is under attack by giant bears, the President is missing, and the Vice President has turned into a Bichon Frisé. It's Apocalypse Time, my friends. Soon the Beast will rise. And six unlikely women will make the perilous journey to the Pit of Nethalem, where they will stop the Beast from fulfilling his evil purpose, or die trying. The Book of Dog is a satire of startling originality: a tale of politics, religion, demon possession, motherhood, love, betrayal, and easygoing bestiality. A ridiculously plausible story set in a near-future America, it wryly explores how even the most insignificant and powerless of people, when working together, can change the world for the better. A dog can be a wonderful companion with enormous affection for you and your family. His keen senses and alertness can provide you with much-needed protection, but it is important to remember that you must be prepared to care for your pet for the next twelve or more years. Like a child, it will depend on you, not only for its health and well-being, but also for dedicated training in order to become a friendly, well-mannered dog that is a pleasure for you and others. It must also be remembered that we do not live in a dogs world but that our dogs are the ones who must learn to live in a human world. It is therefore our responsibility to adequately prepare them for the unfamiliar environment in which we place them. Society does not punish a child for pulling a dogs tail but will punish the dog for biting that child. Before a handler can train his dog, he must understand what is involved in the training process. He needs to understand what is required from him and the dog in each part of each of the different obedience exercises. He must be able to teach his dog what it is expected to know, help it as much as possible, and make it as easy as possible for the dog. He needs to know about positive reinforcement in order to get the targeted behavior to recur and to reward good behavior. Above all, he needs to know when and how much to praise and what to do when the dog is not performing a task it was taught. All this he cannot learn during the relatively short time he spends each week with the instructor at the club. Six days a week he is alone at home with his dog and needs to continue to build on the training he received at the club. He needs to remember the sequence of training steps and how to break them up into the small component parts to be mastered by the dog. And when he becomes confused, he needs help or notes to refer to! This is what I had in mind when I decided to write these notes on basic dog obedience training. There are many basic training methods from clicker training to the more traditional methods that can be used to train a dog for obedience work. The perfect training method does not exist; otherwise, we would all have had copies made and used on our dogs. No, we are all learning and improving. I have adopted an eclectic approach to dog training that is, I have, over many years, studied different training methods and selected from them what will work for most dogs. At times, however, I may use a combination of these methods, or I may shift from one method to another, depending on the training need or exercise. What is very important to me is that the reader must not only know about the best methods of teaching dogs today but must understand why a dog behaves the way it does. Above all, it must be remembered that dog training must be fun for both dog and trainer. Most dog owners do not ask much of their dogs: they ask only that the dogs obey some basic commands and that they are well behaved at home and in public. That is why all dogs should, at least, do the Canine Good Citizen test. I hope my notes will add to your knowledge of basic dog obedience training and that your trained dog will bring much joy to you and your family. Jan Meyer BA (SA), MEd DCRT (US), HP (MT) Now a major Cbeebies show! Dog loves books! It doesn't matter which books; Dog just LOVES books. They could be books about dinosaurs or aliens, Dog doesn't mind. He's just happy to be reading. Dog has his very own bookshop, although he doesn't have many customers. But that's all right, because when Dog is

surrounded by books, he is never short of friends or fun. And when someone does come into the shop, Dog knows just which books to recommend... Join Dog in his AMAZING bookshop, and see what adventures reading can take you on. The Dog Healers is truly inspiring and touches the reader on many levels. It's a dramatic novel that grabs you from the start. Communicating a stunning spiritual message that's wrapped into an adventure story, with a colorful cast of both two- and four-legged characters. This harrowing tale of love, loyalty, and enduring bonds between animals and people brings readers to a bustling South American metropolis, fertile valleys, family vineyards and majestic mountains. We move through these setting seamlessly following first Isabella, then her love Carlos, and often we discover the dogs they connect with are magical. As the skillfully healers trained in the art of Kum Nye, a practice of Tibetan dog healing, come together to create an extraordinary center to protect the canines they cherish. The journey--as well as the project--is fraught with intrigue, bad actors, danger and strife, but through it all Isabella pushes the boundaries of her bond with people and animals to see her dream come to fruition to save and connect with as many animals as she can. Nothing short of a catastrophic accident will deter her destiny in life. In the end, we learn the dogs are the true healers that lift our spirits and touch us in ways that modern medicine can't. A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions.

Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read. Distinguished poet Donald Hall and award-winning artist Barry Moser have teamed up to create a hilarious, affectionate portrait in contrasts of our companions, and often best friends, a cat and a dog. With evocative words and masterful paintings, they delineate the doginess and catlike qualities that everyone will recognize. What would you do to save a dog? Night delivers a litter of eight puppies in a poor neighborhood in Springfield, Tennessee the week before Melissa Armstrong first meets her. As a volunteer for a local nonprofit, Melissa has experience with strays and plans to rescue Night and her litter within days. But nothing goes as planned. For the next six months, Melissa and a ragtag cast of characters try to trap the mutt with nets, catchpoles, spring traps, cheeseburgers, hot dogs stuffed with Benadryl, and the dog's crying puppies. They fail so many times that Melissa is on the brink of giving up. But when she learns about the brutal way the local police department controls the overpopulation problem in Night's neighborhood, she reaffirms her promise to a dog. She vows to rescue her, no matter the consequences.

Catching Dawn is a beautifully written story of how Night became Dawn, and of the other dogs who have brought joy and heartbreak, moments of transcendence and despair, and unconditional love to the author's life. Catching Dawn is also a vividly told and thoughtful reflection on the many highs and lows of caring for animals and humans in difficult circumstances; a gritty exposé

of the consequences of animal overpopulation in the rural South; and the story of how a homeless dog helps a woman move through personal grief and upheaval to rediscover the meaning of family. Are you looking for a new and meaningful way to work with your dog? Do you want to improve the lives of those who would benefit from visits with a volunteer canine "therapist"? Then think about becoming a Therapy Dog team. The 2nd edition gives you all the information you need to select, socialize and train your dog for this important and rewarding work. Learn about certification, liability, and getting started. Includes a complete course outline for teaching therapy dog classes! Shares the uplifting story of a Border Collie who recognized an unprecedented number of human words to explore her role in advancing understandings about animal intelligence, recounting how she also demonstrated an ability to use deductive reasoning and imitation. 100,000 first printing. Dog and Bear are best friends who could not be more different. Follow one of their very first adventures in this board book edition of *Bear in the Chair*. Bear is stuck on a tall chair. Dog, as usual, wants to play. But how will Bear get down? Through teamwork and ingenuity, Dog and Bear figure out a way to get Bear down in this hilarious, succinct story for board book readers. New York Times Bestselling author and artist Laura Vaccaro Seeger's many books for children include *First the Egg*, *Green*, and the *Dog and Bear* series, and have won numerous awards and citations, including two Caldecott Honors, two Theodore Geisel Honors, and the Boston Globe-Horn Book Award. Her book *I Used to Be Afraid* was published in 2015. Laura lives on Long Island with her husband, Chris, and their two sons, Drew and Dylan. Thorough research and expert guidance on natural dog and puppy care and training, from the cutting-edge monthly magazine. From the #1 bestselling author of *Inside of a Dog*—"an incredible journey into the olfactory world of man's best friend" (*O, The Oprah Magazine*), Alexandra Horowitz's follow-up to her New York Times bestseller explains how dogs experience the world through their most spectacular organ—the nose. In her "fascinating book...Horowitz combines the expertise of a scientist with an easy, lively writing style" (*The New York Times Book Review*) as she imagines what it is like to be a dog. Guided by her own dogs, Finnegan and Upton, Horowitz sets off on a quest through the cutting-edge science behind the olfactory abilities of the dog. In addition to speaking to cognitive researchers and smell experts, Horowitz visits detection-dog trainers and training centers; she meets researchers working with dogs to detect cancerous cells and anticipate epileptic seizure or diabetic shock; and she even attempts to smell-train her own nose. As we come to understand how rich, complex, and exciting the world around us is to the canine nose, Horowitz changes our perspective on dogs forever. Readers will finish this book feeling that they have broken free of their human constraints and understanding smell as never before; that they have, for however fleetingly, been a dog. And, as *The Boston Globe* says about *Being a Dog*, "becoming more doglike, not surprisingly, can make anyone's life a little more vivid." I could smell him - or rather the booze on his breath - before he even opened the door, but my sense of smell is pretty good, probably better than yours. So begins this fabulous, funny new detective novel featuring Bernie, a slightly down-at-heel PI; and his off sider, Chet, a dog - and the captivating narrator of the story. Chet may have flunke... *The Chesapeake Bay Retriever - A Complete Anthology of the Dog* gathers together all the best early writing on the breed from our library of scarce, out-of-print antiquarian books and documents and reprints it in a quality, modern edition. This anthology includes chapters taken from a comprehensive range of books, many of them now rare and much sought-after works, all of them written by renowned breed experts of their day. These books are treasure troves of information about the breed - The physical points, temperaments, and special abilities are given; celebrated dogs are discussed and pictured; and the history of the breed and pedigrees of famous champions are also provided. The contents were well illustrated with numerous photographs of leading and famous dogs of that era and these are all reproduced

to the highest quality. Books used include: My Dog And I by H. W. Huntington (1897), Dogs Of The World by Arthur Craven (1931), Hutchinson's Dog Encyclopaedia by Walter Hutchinson (1935) and many others. Readers 21-30 continue to build step-by-step on the information learnt in Readers 1-20. Every Reader is only slightly more advanced than the one before it, meaning your student will be able to cope with the new material. In this way, progress is smooth, steady and free of anxiety. Reader 21 teaches the new sound ch. As usual, we use it many times throughout the story to make it more memorable: e.g. chop, chin and lunch. Notice how the Readers gradually grow in complexity. By this stage, children are already starting to read with confidence. Dogs are truly one of God's finest creatures, a marvelous gift for us humans. In the perfect follow-up to A Prince among Dogs, Callie Smith Grant compiles a delightful collection of true stories that celebrate the dogs in our lives. These stories will touch our hearts, renew our spirits, and show us how God made these wonderful creatures for unique purposes. Readers will love these uplifting glimpses into the lives of ordinary and extraordinary dogs and the people who love them. The stories are warm, captivating, and ideal for a good curl-up-and-read or a perfect gift for any dog lover. South Florida's renowned Dog Trainer CARLOS PUENTES shares his real life experiences and proven techniques that will put you back in the driver's seat and in control of your dog. He will show you how to counteract behavior problems by using Basic Obedience Commands. No more pulling you down the street if your dog has learned to Heel by your side or acting aggressively if he has to go Down and Stay. He won't jump up on you or guests if he obeys Sit and Stay. Put an end to running after your dog if he really has learned to come. But these things can only come to be if YOU really are training your dog. Carlos Puentes takes you step by step through proper obedience training, which has helped several dog owners solve many of their dog problems for over 14 years. The Author cautions readers at the specific moments when most dog owners fall short of training their dogs and raises the question when necessary Who's Training Whom? He's trained dogs for top notch executives, celebrities and professional athletes including Major League Baseball players Bobby Estalella of the San Francisco Giants and Magglio Ordonez of the 2006 American League Champions Dertoit Tigers, John Casablancas owner of world renowned John Casablancas Modeling Agency, Fernando Arau the host of the national morning TV show Diespierta America on Telemundo. Just to name a few. By the time you finish reading this book the answer to the books title Who's Training Whom? will clearly be: YOU training your dog! "Thank you for making my dog which was semi/nuts into the best and obedient dog I could have ever imagined. Thanks to you myself, my wife and baby will be able to enjoy without worry .The training was the best, explained and taught thoroughly. Thank you so much Bobby." -Bobby Estalella Major League Baseball Player San Francisco Giants "Working with Carlos to prepare our puppy Valentine to become part of our family, has been a great experience. Mr. Puentes showed a lot of patience with us humans who have such a problem understanding that we must learn discipline, if we want our pets to behave!" -John Casablancas John Casablancas's Modeling If being around you is a positive experience for your dog and she connects it with her name, she will come when you call her. This pet owner got an instant result, but he was teaching his German Shepherd the wrong lesson. The lesson taught was to fear him. Sometimes owners confuse respect with fear. -CARLOS PUENTES Covering both classical modalities of echocardiography and newer techniques, Clinical Echocardiography of the Dog and Cat shows how to assess, diagnose, and treat canine and feline heart disease. A clinical approach demonstrates how these modalities may be used to acquire images, and then how you can recognize and identify patterns, relate them to different diseases, and manage patient care with those findings. The print book includes a companion website with 50 videos of cardiac ultrasound exams and procedures. Written by veterinary cardiology specialists and echocardiographers Eric de Madron, Valerie Chetboul, and Claudio

Bussadori, this indispensable echocardiology resource is ideal for general practitioner veterinarians as well as specialists, including cardiologists and radiologists. Dedicated coverage of canine and feline echocardiography emphasizes a more in-depth discussion of cardiac ultrasound, including the newest ones such as Tissue Doppler and speckle tracking imaging, and transesophageal and 3D echocardiography. A practical, clinical approach shows how these echocardiographic modalities are not just research tools, but useful in diagnosing and staging heart disease in day-to-day practice. Book plus website consolidates offers current information into a single cohesive source covering classical modalities and newer techniques, as well as updates relating to normal echocardiographic examinations and values. 50 videos on the companion website demonstrate how to perform echocardiography procedures, illustrating points such as swirling volutes, color flow display of blood flows, dynamic collapses secondary to pericardial effusion, and tumors flicking in and out of the echocardiographic field. A section on presurgical assessment helps you assess risk and prepare for catheter-based correction of cardiac defects - accurate measurements and proper device selection are key to a successful procedure. Over 400 full-color illustrations and 42 summary tables help you achieve precise, high-quality imaging for accurate assessment, including photographs of cadaver animal specimens to clarify the relationship between actual tissues in health and disease and their images. 3* Doody's Star Rating® CHOICE Magazine 'Recommended' (May 2020) As of 2018, pet obesity in the US affects an estimated 55.8 percent of dogs and 59.5 percent of cats, resulting in secondary conditions such as arthritis, diabetes mellitus, kidney disease, and certain forms of cancer. A complete and balanced diet accompanied by regular exercise is fundamental to optimize health and longevity in companion animals, meaning overweight pets have reduced quality of life and shorter life expectancy. Seeking to address this major modern-day problem, this book provides a comprehensive review of obesity in small animal medicine. Reviews epidemiology and how animal- and human-specific factors contribute to excess weight gain. Discusses the metabolic effects and inflammatory mediators associated with adiposity. Looks at various disease states and how they relate or develop as a result of obesity. Reviews different modalities to determine body composition to diagnose obesity. Offers a clinical approach to managing obesity with diet including discussion on the nutrients of concern for therapeutic weight loss diets. Veterinarians seeking to provide weight management services in practice will find clinically-applicable information from expert authors from both academic and practice backgrounds. Chapters cover topics ranging from epidemiology and pathophysiology of obesity to evaluation of body composition, and nutritional and behavioral management. The book also explores the role of exercise in managing obesity and looks at the management of co-morbidities. Finally, the authors present a range of case studies to demonstrate these topics in real-life practice. An accessible and richly illustrated introduction to the natural history of dogs—from evolution, anatomy, cognition, and behavior to the relationship between dogs and humans As one of the oldest domesticated species, selectively bred over millennia to possess specific behaviors and physical characteristics, the dog enjoys a unique relationship with humans. More than any other animal, dogs are attuned to human behavior and emotions, and accordingly play a range of roles in society, from police and military work to sensory and emotional support. Selective breeding has led to the development of more than three hundred breeds that, despite vast differences, still belong to a single species, *Canis familiaris*. The Dog is an accessible, richly illustrated, and comprehensive introduction to the fascinating natural history and scientific understanding of this beloved species. Ádám Miklósi, a leading authority on dogs, provides an appealing overview of dogs' evolution and ecology; anatomy and biology; behavior and society; sensing, thinking, and personality; and connections to humans. Illustrated with some 250 color photographs, The Dog begins with an introductory overview followed by an exploration of the dog's prehistoric origins,

including current research about where and when canine domestication first began. The book proceeds to examine dogs' biology and behavior, paying particular attention to the physiological and psychological aspects of the ways dogs see, hear, and smell, and how they communicate with other dogs and with humans. The book also describes how dogs learn about their physical and social environments and the ways they form attachments to humans. The book ends with a section showcasing a select number of dog breeds to illustrate their amazing physical variety. Beautifully designed and filled with surprising facts and insights, this book will delight anyone who loves dogs and wants to understand them better. "Now in its 7th edition, this popular, must-have text remains the only encyclopedic resource for veterinary internal medical problems. The internationally acclaimed "gold standard" offers unparalleled coverage of pathophysiology, diagnosis, and treatment of diseases affecting dogs and cats, as well as the latest information on the genome, clinical genomics, euthanasia, innocent heart murmurs, hyperbaric medicine, home prepared and raw diets, obesity, botulism, artificial pacing of the heart, cancer vaccines, and more. The 7th edition combines the convenience of a two-volume printed textbook with the enhanced functionality of a regularly updated Expert Consult website that enables you to electronically search your entire book and study more efficiently. With instant access to the most reliable, up-to-date information available, you'll always be at the forefront of veterinary care!" -- Book Jacket. An adorable and hilarious collection of dog photographs. Every dog owner knows too well the fun and misery of bath time: the wriggles, the poignant looks, the playful splashes. WET DOG, by photographer Sophie Gamand, is a stunning and touching capture of this intimate moment. Elevating dog photography to the status of art, these expressive portraits of our canine friends mirror our very own human emotions. Perfect for fans of Big Nate, Diary of a Wimpy Kid, and the previous Stick Dog books, Tom Watson's hilarious series continues, and Stick Dog gets a...girlfriend?! Well, not before Stick Dog's day spins out of control first. As he and his friends work to rescue a hyper Karen from a really deep hole, Poo-Poo catches a scent. It's meat! Marvelous meat! And it's in a big truck. But there's more than meat in that truck. There's also a new dog. And when Stick Dog sees her, his heart feels funny. Stick Dog needs to rescue Karen and track down that meat truck. It will take all Stick Dog's smarts, problem-solving skills, and patience to save his friend—and feed his gang. But he just might need some help this time... It's another tail-wagging, food-craving adventure for these hilarious hungry hounds. Throw in some puppy love (!) and this Stick Dog adventure is unlike any ever before. Other favorites in the series include Stick Dog Wants a Hot Dog, Stick Dog Chases a Pizza, and many more! Tracking is a great way to channel your dogs energy and challenge their mind. There are different avenues of tracking from sports trials (earning titles), to search and rescue (professional working dogs), to dogs who only participate for fun and energy release. Tracking as a dog sport is intended to exercise the mind and body of your dog. Tracking is an ideal activity for dogs which have high drive (motivation and energy for a task) and require a means for release. Any breed of dog can do tracking and many dogs will excel at tracking where they have failed at other dog sports. Tracking challenges your dog with a task, they utilize their innate physical and mental abilities to the fullest extent, as nature had intended. In this book, we focus on Tracking as a sport or for fun. We use techniques and methods used by professional tracking and trailing dog handlers. We cover everything from laying your first track, progressing your training and troubleshooting. Learn about scent, how it moves and how it is affected by the environment so that you can start to understand your dogs behaviour and support them. Understanding scent also makes it easier for you to make well planned practice tracks for you and your training partners. Published in hardcover as What the dog knows: the science and wonder of working dogs by Simon & Schuster, New York, c2013. You see a working dog in a cape and you wonder: Can I pet him? How did he get to be so well-trained? Is he happy? In Let the Dogs Speak! four puppies tell their

funny, suspenseful, and heartwarming tales of just how it all goes down as they train for the opportunity to be service dogs for Canine Companions for Independence(r). Follow Hudson, Parker, Ross and Mars on their journeys, with each puppy providing a uniquely hilarious spin on things. Which of the four dogs will make it? Readers can't help but root for the pups to succeed and graduate as service dogs. "Woof! These stories will touch your heart!" - Hanlee, Canine Companions Hearing Dog "A must read for all Working Breed dogs like myself " - Meeshka, Siberian Husky - Meeshka World "Wow! I never knew there were other dogs that worked to help peoples and didn't just herd the sheepie things!" Bet Ramstead, Border Collie - North Wapiti Kennels "These experiences helped me with my own challenges with my humans. A book for all working dogs AND non-working dogs. I think even cats would enjoy it." - Harley, Guide Dogs for the Blind, Puppy in Training "I love this book! It tastes like chicken." - Micron, Canine Companions Change of Career dog, Raising a Super Dog "All members of our pack agree that this is a book that all humans should share with their dogs! And vice versa!" - Turbo, Siberian Husky - World of Turbo "This book is to working dogs what The First 48 is to police work." Pella, Canine Companions Facility Dog, Aurora Colorado Police Department "I can't wait for the movie version. I do cameos." - Blaze III, Canine Companions Breeder Dog, Santa Rosa, Ca.

When Mina takes in an abandoned kitten in the outskirts of Fairbanks, Alaska, her team of sled dogs raise the kitten to pant like a dog, play fetch like a dog, and even want to become a sled dog herself. Clicker starts out as a little abandoned puppy who finds a wonderful home with Mr. and Mrs. Farmer. He becomes a valuable companion and assistant to Mr. Farmer who just calls him Dog. Dog earns name and his fame in this story of Dog and the mountain lion. This book began by providing documents on different areas of dog training, behavior and management to my clients. As I started to put documents together I soon realized that a book was beginning to take shape. This is a starting point of building dog understanding with people and their dogs. A complete guide to choosing, raising, feeding, training, and caring for your dog. A lengthy section on home obedience training. Special illustrated sections. The dog has captured the Jewish imagination from antiquity to the contemporary period, with the image of the dog often used to characterize and demean Jewish populations in medieval Christendom. This book discusses the cultural manifestations of the relationship between dogs and Jews, from ancient times onwards. Dog has a magic key, and when his boy Joe and Joe's Mom are sleeping, Dog sneaks out and has adventures. During his travels, Dog goes around the world, back in time and to the Moon! Dog always learns something new. Like most moms, Joe's Mom has no idea about Dog's magic and she always wakes up to find something 'odd' has happened to Dog while she has been sleeping. The 'Dog Has A Key' series of books for early childhood to early reader, are for fun, but they stem from a little boy's questions and observations of the world and his Dog's attempts to help him and his friends find answers and understanding. Each story has a 'Big Word' that we can learn from. 'Dog Goes To The Moon' is the first book in the 'Dog Has A Key' Series, and introduces us to Dog and his family. Dog uses his magic key to go to the Moon. Dog discovers how it feels to be treated unfairly because he is different. Can Dog overcome this problem and make friends with the Mood Dogs? The Big Word associated with this story is: Discrimination...

From the beginning of human memory, dogs have been living with virtually every human society on earth. Of all the animals, the dog has long maintained the closest relationship with man. In First Friend, Katharine M. Rogers explores the history of that relationship - from what is known about how it first came about - and how it developed through the centuries. From work-mate to beloved pet, from the ancient world to modern times, First Friend is a charming, compelling work exploring that closest of interspecies bonds. Featuring all kinds of dogs - big, small, graceful, cute, funny - The Book of the Dog is a cool and quirky collection of dog art and illustration by artists around the world. Interspersed through the illustrations are short texts about

the artists and different breeds, paying homage to man's best friend. Beautifully designed and packaged, the book will appeal to dog lovers of all ages. This endearing friendship story about a boy and his dog from a Pulitzer Prize-winning writer gently explores a timeless question: who's really in charge? Meet Sid. He's an ordinary kid. He's far from perfect. But to Murphy, Sid's faithful dog, Sid is the whole world. Murphy thinks Sid is the absolute best—and that he's in charge of everything. Sid loves Murphy right back, but he can't help but wonder what Murphy would think if he realized the truth: Sid's just a kid, and Murphy's just a dog, and neither one can control the world. This deceptively simple picture book is the perfect start to a discussion about a subject seldom seen in children's books—the nonthreatening feel of a world based on fact and reason, and not faith. Dogs as an assistive aid for people with disabilities date as far back in time as the first century CE. Today, dogs are used in various settings to help and assist humans. 'Assistance dogs' is an umbrella term for guide dogs, hearing dogs and service dogs. They are custom trained to help and support their owners in their everyday life and thereby give them greater independence. Dogs who perform dog-assisted interventions are another type of working dog, where the dog and the owner work together as a team visiting people with various needs in different settings such as hospitals and nursing homes. These visits aim to strengthen people's inner motivation, using the dog as an external motivator. There is a lack of evaluations of working dogs in the health technology assessment context, and in the health economic evaluation context. Hence, there is a need for structured analyses that include both the short and long-term effects and the costs of assistance dogs and dog-assisted interventions. The overall aim of this thesis is to explore and assess the use of assistance dogs and dog-assisted interventions. The research questions were investigated using a variety of methods. In paper I, inferential statistical analysis was used to analyse patient-reported outcomes measures. In paper II, a thematic content analysis was employed to explore the experiences of service and hearing dogs. To study the long-term cost-effectiveness of physical service dogs and diabetes alert dogs, a decision analytic model was used in paper III. The input data in studies I, II, and III was obtained from the Service and Hearing Dog Project. In paper III, the data was also supplemented with information from published literature and expert opinions. Paper IV investigated the effects and cost-effectiveness of dog-assisted interventions, and takes the form of a systematic review. Paper I showed that a service or hearing dog may have positive impact on its owner's health-related quality of life, well-being and activity level. Paper II showed that owners of service or hearing dogs experienced both positive physical and psychosocial effects from their dog. Negative experiences were also identified, for example being denied access to public places and negative attitudes from other people. Paper III showed that physical service dogs and diabetes alert dogs are cost-effective in comparison with regular companion dogs, resulting in both lower costs and a gain in QALYs. The one-way sensitivity analysis did not change the results, but the probabilistic sensitivity analysis showed that the results were uncertain. Synthesizing the results from the review in paper IV showed that dog-assisted interventions for therapeutic purposes led to minor to moderate effects in psychiatric conditions. Dog-assisted interventions as an activity had minor to moderate effects on cognitive disorders, and dog-assisted interventions for support purposes were beneficial in different types of medical interventions. Studies of cost-effectiveness were lacking. To conclude, assistance dogs are valuable and may be cost-effective for use as assistive aids and dog-assisted interventions render minor to moderate effects in certain situations in healthcare settings. Användning av hundar som hjälpmedel för personer med funktionsnedsättning går att spåra ändå tillbaka till första århundradet e.Kr. Idag används hundar i människans tjänst i en mängd olika sammanhang. Assistanthundar är ett samlingsbegrepp för ledarhundar, signalhundar och servicehundar. De är specialutbildade för att hjälpa och stödja sina ägare i deras vardag och på så vis ge dem möjlighet till att leva ett mer självständigt liv. Hundar som utför

hundassisterade interventioner är en annan typ av tjänstehund, men deras jobb är inte att hjälpa sin ägare. Istället arbetar hundar som utför hundassisterade interventioner och deras ägare som ett team. Tillsammans besöker de personer med olika behov i olika miljöer som exempelvis sjukhus eller äldreboende. De arbetar med att stärka motivationen hos personerna de träffar. Idag saknas det övergripande utvärderingar som tittar på olika aspekter av den här typen av hundar. Det saknas även utvärderingar som specifikt studerar effekter och kostnader av assistanshundar och hundassisterade interventioner. Det finns därför ett behov av strukturerade analyser som inkluderar både kort- och långsiktiga effekter samt kostnader för denna typ av hundar och interventioner. Det övergripande syftet med denna doktorsavhandling är att utforska och utvärdera användningen av assistanshundar och hundassisterade interventioner. Frageställningarna studeras med ett brett urval av metoder. I studie I analyseras patientrapporterade utfallsmått med statistiska metoder. I studie II genomförs en tematisk innehållsanalys för att undersöka förarnas upplevelser av service- och signalhundar. För att analysera den långsiktiga kostnadseffektiviteten av fysiska servicehundar och alarmerande diabeteshundar i studie III konstrueras en beslutsmodell. Datamaterialet i studie I, II och III hämtas från service- och signalhundsprojektet. I studie III kompletteras data med information från publicerad litteratur och med expertutlåtande. I studie IV studeras effekterna och kostnadseffektiviteten av hundassisterade interventioner genom en systematisk litteraturoversikt. Studie I visade att en service- eller signalhund kan ha en positiv inverkan på deras ägares hälsorelaterade livskvalitet, välbefinnande och aktivitetsnivå. Resultaten från de tematiska analyserna i studie II påvisade att ägare av en service- eller signalhund upplevde både positiva fysiska och psykosociala effekter av sin hund. Negativa erfarenheter av hunden identifierades också, till exempel att hunden begränsade möjligheten att vistas i offentliga miljöer och andra personers negativa attityder. Studie III visade att fysiska servicehundar och alarmerande diabeteshundar är kostnadseffektiva i jämförelse med vanliga sällskapshundar, de var både kostnadsbesparande och innebar en QALY-vinst. Känslighetsanalyser av specifika parametrar påverkade inte resultaten, men den probabilistiska känslighetsanalysen visade att resultaten var osäkra. Resultaten från den systematiska litteraturoversikten i artikel IV visade att hundassisterad interventioner som ges i terapeutiskt syfte hade små till måttliga effekter vid psykiatriska tillstånd. Hundassisterade aktiviteter hade små till måttliga effekter vid kognitiva störningar och hundassisterade interventioner som gavs som stöd vid olika typer av medicinska insatser var fördelaktiga. Studier gällande kostnadseffektivitet av hundassisterade interventioner saknades. Sammanfattningsvis, assistanshundar som hjälpmedel ger positiva effekter i flera dimensioner för sina ägare och är sannolikt kostnadseffektiva. Hundassisterade interventioner uppvisar små till måttliga effekter i vissa situationer i hälso- och sjukvården.
