Southern Women Mar 26 2023 From the award-winning Southern lifestyle magazine Garden & Gun comes this rich collection of some of the South's most notable women. For too long, the Southern woman has been synonymous with the Southern belle, a "moonlight and magnolias" myth that gets nowhere close to describing the strong, richly diverse women who have thrived because of—and in some cases, despite of—the South. No more. Garden & Gun's Southern Women: More than 100 Stories of Trail Blazers, Visionaries, and Icons obliterates that stereotype by sharing the stories of more than 100 of the region's brilliant women, groundbreakers who have by turns embraced the South's proud traditions and overcome its equally pervasive barriers and challenges. Through interviews, essays, photos, and illustrations these remarkable chefs, musicians, actors, writers, artists, entrepreneurs, designers, and public servants will offer

a dynamic portrait of who the Southern woman is now. The voices of bona fide icons such as Sissy Spacek, Leah Chase, and Loretta Lynn join those whose stories for too long have been overlooked or underestimated, from the pioneering Texas rancher Minnie Lou Bradley to the Gee's Bend, Alabama, quilter Mary Margaret Pettway—all visionaries who have left their indelible mark not just on Southern culture, but on America itself. By reading these stories of triumph, grit, and grace, the ties that bind the sisterhood of Southern women emerge: an unflinching resilience and resourcefulness, an inherent love of the land, a singular style and wit. And while the wisdom shared may be rooted in the Southern experience, the universal themes are sure to resonate beyond the Mason-Dixon.

*OFF THE CHARTS! HOW TO WRITE MORE THAN 100 BOOKS IN 90 DAYS* Jun 17 2022 I have always loved to write, but I never thought I would write more than a dozen books. Difficult times bring out the best in us, and that has meant the period of the Covid-19 pandemic for many people and in particular for me, during that global crisis I have recovered the best part of me, and I remembered how much I liked writing. I had never published my books, although I always wanted to, until it only took a few words in my ears to make up my mind and start writing again, ' ' And why don't you publish your books on Amazon, it's free! ' '. That was enough to encourage me and I started some books but... it wasn't until March 29, 2021 and specifically arrived at June 27, 2021 that, during that period of retirement, I just started writing a little bit of everything, and I ended up writing more than a hundred titles, all available on Amazon. For those of you who do not know Africa, you must understand that in some African countries, the most ignorant people, that is, those people who have never read a single whole book in their lives, get up every morning and with the power of violence and the terror of

weapons, they assault the freedoms and rights of people. They do not get up every morning to work and build a better place, but to destroy and steal what belongs to the people, and that is the problem of corruption. Then, when the corrupt pretend to fight corruption, the story becomes even more tenebrous, like a fantasy movie script, and that is why we, the more intelligent ones, prefer to write. Just as a good musician can create a wonderful melody or song from a single note, so it is with literature. In this way, I have been able to develop, or rather, to perfect my creative and literary capacity, being able to produce and publish, in only three months, more than a hundred books in several languages, mainly in Spanish, English, German, Portuguese, Italian, some in French and in traditional Chinese. I have enjoyed a lot along the way because I have learned to know myself better. My literary technique is very simple, I write about whatever comes to my mind, in an organized way, with the phone, the computer and just free my mind. My books are mainly series of books on futuristic technology, science, religion and spirituality but mostly African history, and I write one or two books a day. It does not make much sense that the history of Africa is written by non-Africans, or the religion of Africa or the spirituality of Africa is written by Europeans and Americans; I am not saying it is wrong or that it is not up to everyone to write about what they like but, at least from now on, if you search for books about Africa or Equatorial Guinea on Amazon, a large percentage of the results will be part of my literary work and, in the case of Equatorial Guinea, 95% of the results about books on Amazon is, my literary work, and I have achieved that in just three months. My country, Equatorial Guinea, has the highest literacy level on the African continent, and yet it is a very little known country. Unfortunately the country is best known for corruption and abuses, but

there is much more to the country than that. The corrupt are not very intelligent, for if they were corrupt they simply would not steal, but would create wealth, abundance and prosperity, and that is my great concern with politicians, the corrupt, and those who are both. That is why in my books I talk a lot about corruption, and I hope that the thieves learn something, instead of spending their lives fabricating stories, because neither the people nor the world are fools, only the corrupt are fools. Not everybody wants to be a politician, and not everybody likes corruption; but where corruption prevails, when you are not a thief, you are an enemy of thieves, because you cannot be friends, since you do not think alike: the corrupt thinks he has the right over everybody's property, and the honest thinks that is stupidity. The corrupt has all the money in the world and has never worked a day in his life, and the honest works every day to earn his bread and his living, so not everyone has the same mental capacity, but something very curious happens when mediocrity reigns. The danger of the mediocre is that they do not know or believe that different people and personalities also have different levels of intellectuality, and it is precisely that capacity that transforms the world and countries, from generation to generation and not steal and steal from generation to generation. The mediocre only think about the present and filling their accounts abroad, the farther away the better. But for those of us who see this continent called Africa suffer, we believe that the world already deserves something different, and a continent with countries that stand out for the capacity of their people and not for the power of thieves. That is why, perhaps, I can even consider myself a Revolutionary, because no one who accepts disorder as a path for the future of a continent that must be free and has to be free, deserves to be called African. Maybe that is why many of those who accumulate

money from Africa to go far away have two or three or four passports. But some of us, we are only Africans, and we have no intention of going anywhere, and with the world we only share the pain of seeing Africa suffer for so long, because nobody wants that anymore, but only corrupt alone do not understand it. All intelligent people are enemies of corruption. I have always spoken and thought this way, and I have always expressed myself this way, in public and in private, before the public media whenever I could, and whoever knows me knows what I think of corruption and the feeling between me and the corrupt is mutual. I never write about anything that I cannot defend or say face to face, and that is called integrity, and that is why I am not a politician nor am I interested in politics, because it only serves for mediocrity, while the real problems are never solved, because the mediocre does not even know where to start. That is why today, to celebrate the satisfaction of seeing the first 1000 downloads in only 27 days of the already 281 books (including the various versions and electronic formats, soft and hard cover, as well as the various languages), and that is why I am writing these lines. I consider myself a very humble person, because humility is something that is carried inside the heart and is transmitted with contact to the outside Only by trying, knowing, or talking to a person you can really know how he/she is, but spying and falsifying, lying and inventing only shows your own ignorance and low level of mental capacity. I thank the almost two thousand people mainly from the United States, Germany, Mexico, Spain, Brazil, Italy, Japan, India, Canada, United Kingdom, France, Netherlands and Australia who have downloaded any of my books in the last ninety days, and the more than one thousand people who have bought any of my books on Amazon just in this month of June, 2021. I do not write to offend or hurt anyone's feelings, but the truth is always objective, and I always try to write with the

truth. In my country we use the vulgar term 'No To So So Mot', to qualify the importance of the facts and their veracity. When any honest Ecuadorian Guinean speaks, writes, dances, sings or feels, he does it for his country, for better or worse. This book is for those who love reading, writing, and knowing how to live in peace with oneself and with the world, that is, to be happy. Happiness is a choice even in the midst of hell. It is true that the environment, especially if it is a hostile and oppressive environment, always tries to create all possible levels of unhappiness so that one somehow gives up but that is precisely what all the inhabitants of the oppressed peoples of the world share, the certainty that doing what one likes for the good of the majority is always the greatest expression of Freedom and the struggle for justice and peace. And not everyone is a politician, because politics is a profession that does not interest everyone. Thank you for reading these lines. 27.06.2021 Javier Clemente Engonga,

A brief historical note accompanies the descriptions and examples of several of the families together with a mix of routine exercises and problems as well as some thought provokers to solve. *Number Treasury*<sup>3</sup> especially aims to stimulate further study beyond the scope of the introductory treatment given in the book. Sol Lewitt: Not to Be Sold for More Than \$100 Dec 23 2022 Among LeWitt's great contributions to art was the invention of his own economic model. Not to Be Sold For More Than \$100 presents a comprehensive overview of conceptualist pioneer Sol LeWitt's numbered R Series drawings, which he created from approximately 1971 to 1979. As early as 1967, LeWitt had started making cut, folded and torn works, which he intended would always sell for \$100. "His wall drawings were already selling for thousands of dollars, so he wanted to have some artwork that everybody could buy," notes Jason Rulnick. This body of work consists of over 800 folded, torn and cut paper works, including cut maps, reproductions, and manipulated silver gelatin photographs. Thanks to extensive research throughout various private and public collections around the world, this volume includes over 100 color plates, along with an index/description of all 870 known works, information that has been made

available through the artist's day books and journals uncovered (in the studio) by Veronica Roberts. In the high-flying commerciality of the contemporary art world, LeWitt's intention and foresight for this body of work resonates more than ever today.
