Case Competencies in Orthopaedic Surgery E-Book Dec 21 2019 Case Competencies in Orthopaedic Surgery is a centralized, easy-access guide to preparing for cases most commonly encountered during training. Written by expert author teams consisting of both attending surgeons and residents, it follows a technique-based format and design that summarizes the surgical steps, from room set-up to closure, of all cases relevant to the 15 categories of "Orthopaedic Surgery Case Minimums" as determined by the ACGME. Forty "technique-based chapters" boast an outline format with minimal text, high-definition intraoperative figures, and original illustrations. Each chapter contains easy-to-use tables outlining the surgical steps, essential equipment, technical pearls, and common pitfalls of each case. Includes coverage of today's hot topics in orthopaedic surgery, such as fractures, arthroscopy, arthroplasty, "bread and butter" pediatric cases, and basic subspecialty cases (spine, foot and ankle, oncology, hand, shoulder, and more). Lists CPT and ICD 9/10 codes to help with case logging.

ICD-10-CM Official Guidelines for Coding and Reporting - FY 2021 (October 1, 2020 - September 30, 2021) May 26 2020 These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

CPT/ICD 9 Cross-Reference for Orthopaedic Surgery 1998 Nov 24 2022

CPT/ICD-9 Cross-Reference for Orthopaedic Surgery, 2002 Dec 25 2022 The CPT/ICD-9 Cross-Reference for Orthopaedic Surgery, 2002 edition, includes more than 1,450 CPT codes and their corresponding ICD-9 codes to help the orthopaedic surgeon code each musculoskeletal procedure correctly.
