Perfectly sized at 6" X 9" 120 Pages Softcover Bookbinding Flexible Paperback Introduction to Increasing Your Income Do you want to increase your income? It's not just you. The average American worker earns just \$58,000 per year, according to Forbes. That is insufficient to pay the bills, let alone put money aside for a rainy day. Fortunately, there are several simple ways to increase your income without putting in a lot of extra work. The following four simple ways can help you earn more money: 1. Build a stock portfolio: Building a stock portfolio is one of the best strategies to make money. Stocks can yield a respectable return over time, allowing you to build up your savings and eventually your income. 2. Launch a side business: You can launch your own side business if you have the time and the creativity to do it. This is a fantastic method to increase your income and exercise your entrepreneurial skills. 3. Use online tools to create money: You can use a variety of internet resources to quickly and easily make money. For instance, you may do internet surveys to get a little

money each month. 4. Use your talents to your advantage. If you have any skills or talents that you can sell, you can earn a lot of money. You could, for instance, launch and sell advertising space, or you could provide your consulting skills. With a little bit of imagination and work, there are many methods to increase your income. So begin considering ways to raise your income, and you'll be on your way to a future filled with wealth. A person can make many choices in their life, how it turns out is what choice one makes. My sons have made some bad ones, hopefully they will learn from their mistakes. I made so many bad choices in my life; I only wish I could do them over again. But you learn by making mistakes. Sean and Danny's lives will forever be altered by their bad selections. Sean will have lost almost 6 years of watching his little girls grow up, at least Danny is only facing 15% of his 5 years. He hopefully he will be home by August of this year. No one has ever said life is easy or fair. Life is what you make it. Like Sinatra said in song, "I've got the world on a string, setting on a rainbow' , at one time that was me. I had it all, I thought there was no end to it, but a bad choice ruined it all. As I sit here pondering over my life. I truly know now, that this was for me, "The Long Journey Back". **Book description**This book is about the choices people make in life. This book is written with the hope that people will choose to make better choices for their lives. Ultimately people are responsible for the choices they make in life and the consequences of those choices. It is my hope that people who read this book will help them make the right choices for their lives, especially if they are still young. People should always weigh the pros and cons of any choice they make in life. People should learn from the good choices other people make. People should also learn from the bad choices of others and try to avoid the bad choices. In this book you will also find some poems I wrote about the vices afflicting society, especially the young people. Make your best choice

Risk adjustment is a method to offset the cost of providing health insurance for individuals--such as those with chronic health conditions--who represent a relatively high risk to insurers. Under risk adjustment, an insurer who enrolls a greater-than-average number of high-risk individuals receives compensation to make up for extra costs associated with those enrollees. In the absence of risk adjustment policies, insurers have a financial incentive to deny coverage to higher risk individuals, and to write exclusions into policies or impose unaffordable premiums for individuals with pre-existing medical conditions. Risk adjustment aims to make comprehensive insurance available to all individuals, regardless of risk, and to allow plans that insure sicker-than-average populations to charge similar average premiums as plans that insure relatively healthy populations. The risk adjustment model enacted under the Affordable Care Act

(ACA, or "Obamacare") is budget neutral. Total payments to insurers do not increase. Rather, insurers covering a relatively greater number of healthy individuals must contribute to a risk adjustment pool that funds additional payments to those insurers covering a larger portion of high-risk individuals. Risk adjustment models typically use an individual's demographic data (age, sex, etc.) and diagnoses to determine a risk score. The risk score is a relative measure of the probable costs to insure the individual. To cite a simple example, an individual with diabetes will have a higher risk score (his or her predicted healthcare costs will be greater) than an otherwise statistically identical individual without diabetes. Older individuals typically have a higher risk score than younger individuals, and those individuals with a personal or family history of certain conditions may garner a higher risk score than individuals without such a history. There are several risk adjustment models. The Centers for Medicare & Medicaid Service (CMS) risk adjustment model uses the Hierarchical Condition Category (HCC) method to calculate risk scores. This method ranks diagnoses into categories that represent conditions with similar cost patterns. Higher categories represent higher predicted healthcare costs. For example, diabetes with complications is ranked "higher" (resulting in a higher risk score and thus greater expected healthcare costs) than diabetes without complications. An individual may be included in more than one HCC. Diagnoses are reported using ICD-10-CM codes. Not every diagnosis will "risk adjust," or map to an HCC. Acute illness and injury are not reliably predictive of ongoing costs, as are long-term conditions such as diabetes, chronic obstructive pulmonary disease (COPD), chronic heart failure (CHF), multiple sclerosis (MS), and chronic hepatitis; however, some risk adjustment models may include severe conditions relevant to a young demographics (such as pregnancy) and congenital abnormalities. All risk adjustment models depend on complete and accurate reporting of patient data. CMS requires that a qualified

healthcare provider identify all chronic conditions and severe diagnoses for each patient, to substantiate a "base year" health profile for those individuals. Documentation in the medical record must support the presence of the condition and indicate the provider's assessment and plan for management of the condition. This must occur at least once each calendar year for CMS to recognize that the individual continues to have the condition. This information is used to predict costs in the following year. As such, incorrect or non-specific diagnoses can affect not only patient care and outcomes, but also reimbursement for that care, going forward. Only \$6.99! Big decisions should be talked about so all the variables are considered. The final pages are designed to facilitate discussion between teachers/parents and the child. It's particularly important to discuss "WHY" a child favors one option over another. Bring the thinking part of decision to the forefront to guide the process. Parents and teacher will find this a helpful book to read with kids. Discussion pages encourage kids to explain WHY they'd make this choice or that. Read this book with your child today to give them confidence that they can make wise choices. Please note: This is a companion version & not the original book. Sample Book Insights: #1 I began visiting six strangers who had lost something in

2015. I was fifty-five years old, and I had lost my marriage after nearly three decades. I was now living alone for the first time. I was the main caregiver for my eighty-six-year-old mother. #2 I interviewed a variety of people, from the very old to the very young, to find out what life was like for them now. I was surprised to find that every visit raised my spirits. #3 I had to give up the idea that I knew about life. It was a humbling experience, but also an energizing one. I didn't have to be the expert or critic, challenging the things they told me. Instead, I let them guide me through the world as they saw it. #4 I chose six people for my experiment. Frederick Jones, who was eighty-seven when I met him, was a World War II veteran and retired civil servant with a weak heart. He had started every day by giving thanks for another sunrise. Helen Moses, ninety, had found love in a Bronx nursing home. John Sorensen, eighty-nine, had lucked into the sweet spot in the social safety net. DIY Conflict Resolution is the first book by New York City Attorney, Mediator and Conflict Resolution Coach, Nance L. Schick. Exploring the less obvious causes of conflicts, she coaches readers to create action plans that reflect their unique beliefs, interests and values. Her process is based on proven mediation techniques and illuminates the power of compassionate "third ear" listening. As she says, "When the third eye is blind, it hinders wisdom. When the third ear is deaf, it hinders connection and resolution." Are you a credentialed professional whose business has plateaued? Are you an artist who has difficulty managing "drama queens" on your projects? Or are you the drama queen? Nance shares stories of how clients resolved conflicts with themselves and others. From body conflicts to marital discord and crime, she shows you how to keep going and keep creating the life you want--from the circumstances you have, not the ones you wish you had.
