Dictionary of Economics Aug 11 2021 Provides detailed definitions of 2,500 economy-related words and phrases

Sharing the Costs of Higher Education Oct 13 2021 The educational and living costs of undergraduate studies and the ways these costs are shared among parents, students, taxpayers, and philanthropists/donors are considered for five countries: the United States, the United Kingdom, the Federal Republic of Germany, France, and Sweden. Five policy issues that are linked to how costs are shared by parents, students, and the general taxpayer are identified, including the participation in higher education by low-income and other previously excluded groups. The five country profiles and comparative analysis consider: the out-of-pocket costs faced by students and parents; the expected parental contribution, if any, and how it is derived; the expected student contribution, from savings, work, or loans; the taxpayer-borne contribution (e.g., need-based grants, loan subsidies); trends and issues regarding the

sharing of higher education costs within each country; problems or issues common to all five countries; and each country's structure and governance of higher education. Appended materials describe the concept of "purchasing power parity," as well as concepts for separating subsidized loans into a "true loan" and an "effective grant." (SW)

Delivering Health Care in America Jan 04 2021

Delivering Health Care in America, Second Edition provides readers with a comprehensive understanding of the basic structures and operations of one of the largest sectors of the U.S. economy. With the most current data, legislation and overall system changes reflected, the second edition covers the conceptual basis for the system; its historical origins; the structures of ambulatory care, inpatient care, and other important services structures; the translation of these structures into health services themselves; and the manifestations of their impact on costs and quality. The text includes learning objectives, review questions and key terminology.

Economic Vulnerability in International Relations Dec 23 2019 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume, Michael Kort describes the wartime circumstances and thinking that form the context for

the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.

Lent and Lost Mar 06 2021

Genres of the Credit Economy Apr 26 2020 How did banking, borrowing, investing, and even losing money—in other words, participating in the modern financial system—come to seem like routine activities of everyday life? Genres of the Credit Economy addresses this question by examining the history of financial instruments and representations of finance in eighteenth- and nineteenth-century Britain. Chronicling the process by which some of our most important conceptual categories were naturalized, Mary Poovey

explores complex relationships among forms of writing that are not usually viewed together, from bills of exchange and bank checks, to realist novels and Romantic poems, to economic theory and financial journalism. Taking up all early forms of financial and monetary writing, Poovey argues that these genres mediated for early modern Britons the operations of a market system organized around credit and debt. By arguing that genre is a critical tool for historical and theoretical analysis and an agent in the events that formed the modern world, Poovey offers a new way to appreciate the character of the credit economy and demonstrates the contribution historians and literary scholars can make to understanding its operations. Much more than an exploration of writing on and around money, *Genres of the Credit Economy* offers startling insights about the evolution of disciplines and the separation of factual and fictional genres.

Assessing Tax Reform Jan 22 2020

Building Credible Central Banks Jul 22 2022 A credible central bank can effectively lead the process of financial sector reform in a developing country. This book discusses central banking issues and offers a clear path to building credible central banks in emerging economies.

Economic Breakdown & Recovery Mar 25 2020

This study of macroeconomics combines treatment of opposing theories with a presentation of evidence to point the way toward a reconstructed macro research and policy programme.

Cowardly Capitalism Sep 23 2022 Let's start out this review by stating up front that we disagree with Daniel Ben-Ami's assertion that a preoccupation with risk measurement and management is a detriment to the global economy. With that out of the way, we can say that Ben-Ami presents a unique analysis of the modern global economy that is not at all without merit. His contention that lagging growth is a greater peril to the world's economy than financial instability is reasonable and backed up by ample evidence and illustration. And his position that increased regulation could be doing more harm than good will be embraced by all free traders. On the basis of these discussions alone, getabstract recommends this book to anyone thinking seriously about international financial systems. But this book is perhaps most useful as a starting point for debate, which it will certainly generate in the mind of any informed reader. While you might quibble with Ben-Ami's conclusions - as we do with his assertion that the threat of the 1990s financial crises was overblown - you will not be bored.

Proposal Planning and Writing Jul 10 2021

Annotation Nationally known grants experts Lynn Miner, Jeremy Miner, & Jerry Griffith have thoroughly revised & expanded their excellent self-help book, which is designed for first-time proposal writers & planners, or for those who are without easy access to sources & materials. The authors use a concise, straightforward approach, relying on proven examples of how to find grants & how to plan, write, & submit proposals that get results. They also share their streamlining techniques for submitting more proposals in less time & provide a list of the most likely reasons proposals are rejected. New to this edition is greatly expanded coverage of computerized grantseeking, including World Wide Web resources. Also new is a discussion of effective writing techniques.

From New Era to New Deal Sep 11 2021 In popular imagery, Herbert Hoover is often stereotyped as a 'do-nothing' president who offered only nineteenth-century slogans for the greatest economic catastrophe in twentieth-century American history. Nothing could be further from the truth. This study examines the properties of an innovative approach to economic growth and stability formulated by Hoover and his associates during his years as secretary of commerce

(1921-9) and inspects his deployment of this strategy from the White House following the Great Crash in the autumn of 1929. Attention is then focused on Hoover's attempts to reformulate his macro-economic programme as the depression deepened in late 1931 and 1932. Archival materials provide arresting insights into Hoover's aspirations for a new institution - the Reconstruction Finance Corporations - as a vehicle for stimulating investment through a novel form of 'off-budget' financing. To complement the discussion of Hoover's theories of economic policy in their various manifestations, the views of contemporary economists on problems of the day are surveyed.

Federal Aid to Chicago Feb 02 2021

Campaigns, Congress, and Courts Dec 03 2020

Campaigns, Congress, and Courts presents a political history of the passage, judicial interpretation, and administration of federal campaign finance law from 1907 to the present. The volume focuses on the post-Watergate years and analyzes the ideological and partisan conflicts which shape congressional and public debate over how, or whether, to regulate political money. The book opens with an account of the first law, then moves to the Watergate period while explaining the background of the 1970's reforms.

Subsequent chapters examine the origin and passage of legislation through case studies, focusing on congressional debates and roll call votes; analyze the arguments of reformers and their opponents in court battles over these laws; demonstrate how the press and public opinion effect the legislative climate; assess the creation of the Federal Election Commission, its quasi-judicial role, and the political cross pressures to which it is subject; and explain the rise of labor and business PACs.

Public Goods May 20 2022 A wide-ranging survey of the theory and evidence on public goods, presenting the main literature on public goods, both theoretical and empirical, in a systematic manner. The breadth and depth of the book's coverage extends the existing literature in many ways.

Mathematics of Finance Aug 23 2022 Simple interest; Bank discount; Compound interest; Ordinary annuities; Other annuities certain; Amortization and sinking funds; Bonds; Life insurance; Stocks.

International Classification of Financial Reporting Dec 27 2022 With the growing integration of the international economy the international differences in financial reporting practices have never been so important in multinational business. Recent reforms in

International Accounting Standards, combined with the continuing European harmonization, have placed this topic high on the current agenda of both researchers and of business analysts actively concerned with international accounting practice. This new, updated edition of Christopher Nobes' *International Classification of Financial Reporting* examines the causes and nature of the differences between financial reporting practices in different countries, charting all the many significant developments to have taken place through the 1980s. The relevant research published during this period is discussed, alongside the effects of the regulatory changes that have taken place. Improvements in the existing system of classification in financial reporting are proposed in the light of the accelerated process of harmonization currently taking place. The resulting volume is an indispensable source for academics and professionals in international accounting and for all who are engaged in the process of European harmonization.

A History of Money Jan 16 2022 Introduces monetary history: money as coin, the development of credit and banking, and inconvertible paper money.

The Politics of Jacksonian Finance Nov 25 2022
Paying for Presidents Nov 13 2021 In this volume, Anthony Corrado analyzes alternatives for legislative action to ensure public financing for the 1996

campaign.

Local Public Finance in Japan Feb 26 2023

A Random Walk Down Wall Street Jun 20 2022 For those who would rather forgo costly appointments with a personal financial adviser, this instructive and readable volume is a better bet than ever--with new chapters on financial objectives at any age and turning the odds of success in favor of the individual investor.

The Political Economy of James Buchanan Aug 30 2020 A survey of the political economy of James Buchanan seeking to explain his theories in detail and evaluate them in depth, covering topics such as the constitution and its failure, democracy, operational rules for the constitution and economics.

Who Shall Live? Oct 25 2022 "Victor Fuchs draws on his understanding of the strengths and limitations of economics and his intimate knowledge of health care institutions to help readers understand the problems every nation faces in trying to allocate health resources efficiently and equitably. Six papers dealing with national health insurance, poverty and health, and other policy issues, including his 1996 presidential address to the American Economic Association, accompany the original 1974 text."--

Hospital Capital Formation in the 1980s Jan 28 2023

Diagnostic Ultrasound Jun 28 2020

Ultrasound imaging is one of the most important and widely used diagnostic tools in modern medicine, second only to the conventional x-ray. Although considered a mature field, research continues for improving the capabilities and finding new uses for ultrasound technology while driving down the cost of newer, more complicated procedures such as intravascular ultrasound.

Diagnostic Ultrasound: Imaging and Blood Flow Measurements presents new developments, fundamental physics, instrumentation, system architecture, biological effects of ultrasound, and clinical applications that reflect this initiative. Keeping mathematical derivations to a minimum, this book begins with an overview of the field, the strengths and weaknesses of the technology, and its role relative to other imaging modalities. The book proceeds to describe the fundamental physics involved, a detailed examination of the transducer, conventional imaging approaches, and Doppler measurements. The following chapters explore new developments such as flow, displacement, contrast, harmonic, intracavity, and 4-D imaging. The author concludes by reviewing current status and standards on bioeffects along with a unique chapter on measuring ultrasonic properties of tissues that can be found nowhere else. Emphasizing the engineering and signal processing aspects of

ultrasound technology rather than taking a clinical perspective, *Diagnostic Ultrasound: Imaging and Blood Flow Measurements* encourages and enables further advances in this established yet dynamic field.

Funding Evil Jul 30 2020 A roadmap illustrating how terrorist organizations--especially Islamist terror organizations--are funded, and draws a parallel between terrorists and organized crime, identifying their common activities such as money laundering, fraud, market manipulation, and smuggling. [book cover].

Electronic Banking Oct 01 2020 A thorough explication of electronic banking systems and their importance, use, and problems. Surveys the range of consumer and corporate banking services available, from obtaining cash to making purchases, paying bills, transfers by wire, and cash management, as well as behind-the-scenes explanations of new product strategies and major developments in the industry. Nearly 100 tables and exhibits.

Financing Development in Latin America Jun 08 2021 Textbook on methods of raising capital resources and the problem of resource allocation to achieve a high level of investment and economic growth in Latin America - focuses on the problem of savings, in both the private sector and public sector, and attempts to explain why such a large proportion of the economic

surplus is diverted into relatively unproductive uses. Annotated bibliography pp. 246 to 253 and statistical tables.

Confessions of a Subprime Lender Nov 01 2020

Former subprime lender Richard Bitner once worked in an industry that started out helping disadvantaged customers but collapsed due to greed, lack of financial control and willful ignorance. In *Confessions of a Subprime Lender: An Insider's Tale of Greed, Fraud, and Ignorance*, he reveals the truth about how the subprime lending business spiraled out of control, pushed home prices to unsustainable levels, and turned unqualified applicants into qualified borrowers through creative financing. Learn about the ways the mortgage industry can be fixed with his twenty suggestions for critical change.
