FOUNDATIONS OF NURSING, 3E provides updated and comprehensive information necessary to successfully complete a practical or vocational nursing curriculum, including basic nursing, adult health nursing and material and pediatric nursing. This book is an excellent introduction to the field of nursing and covers the health care system, communication, nursing processes, and client teaching, as well as current topics, such as HIPAA and bioterrorism. The section on adult health nursing follows the Nursing Process format, while the clinical chapters include Nursing Management sections for each disorder, emphasizing the nurse's role in providing competent client care. In addition, Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) have been identified in each Nursing Care Plan. Each chapter contains a Case Study with critical thinking questions designed to assist the reader through the nursing process and to develop a customized plan of care for the client in the scenario. Prenatal care, complications of pregnancy, birth, postpartum care, and newborn care, in addition to childrearing from birth through 18 years of age are covered in the maternal and pediatric section. NCLEX style questions have been added to each chapter to encourage student mastery of concepts. Numerous special features make this an engaging, student-friendly text, while a comprehensive instructor package provides everything needed to successfully implement the text in class. The exciting new StudyWARE CD-ROM that comes with the text provides interactive games, quizzes, activities, animations, and video clips to enrich the learning experience. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Text Explores the full-spectrum nursing model of thinking, doing, and caring and reinforces the model with critical-thinking questions and exercises in every chapter to help prepare students for practice. Uses multiple case studies per chapter to bring nursing theory to life and explain the nurse's role in today's complex healthcare system. Emphasizes the important aspects of safe and effective care to ensure better patient outcomes. Presents illustrated, step-by-step procedures with rationales that deliver all the information students need for the skills lab or clinical. Promotes effective care planning with care plans and concept care maps as well as NANDA, NIC, and NOC. Describes the research evidence related to the chapter topic and encourages further study.
