There are three rules for being best friends with a mafia princess: 1. Don't ask any personal questions. 2. Don't show up at her house unannounced. 3. Don't ever, ever let anyone know you're friends. For three years, I followed the rules. Vicky and I met once a week at the diner where I worked. I was her slice of normalcy, she was the one person I could confide in. It might have been unconventional, but it worked for us. One night, all hell broke loose and I got caught up in a battle of bloodshed where we almost lost our lives. I ended up face to face with Vicky's dangerous older brothers. Anthony, William, and Nicholas Civella--the made men of the Kansas City Mob. After fighting for my life and proving myself worthy, they brought me into their deadly world. It was glamorous but twisted. Torture, death, and crime followed me everywhere I went, chiseling away at parts of me until I wasn't the same anymore. Slowly, I betrayed my best friend, and fell in love. Chances are they'll ruin me. This thing between us has deadly consequences. But in this criminal world, I'm learning that the rules don't apply when you're the boss. A riveting true-life tale of newspaper noir and Japanese organized crime from an American investigative journalist who "pulls the curtain back on ... [an] element of Japanese society that few Westerners ever see" (San Francisco Examiner). Now a Max Original Series on HBO Max Jake Adelstein is the only American journalist ever to have been admitted to the insular Tokyo Metropolitan Police Press Club, where for twelve years he covered the dark side of Japan: extortion, murder, human trafficking, fiscal corruption, and of course, the yakuza. But when his final scoop exposed a scandal that reverberated all the way from the neon soaked streets of Tokyo to the polished Halls of the FBI and resulted in a death threat for him and his family, Adelstein decided to step down. Then, he fought back. In Tokyo Vice he delivers an unprecedented look at Japanese culture and searing memoir about his rise from cub reporter to seasoned journalist with a price on his head. The most comprehensive Yup'ik dictionary in existence, the second edition of this important work now adds extensive research on Central Alaskan Yup'ik, enhancing the forty years of research done by Steven A. Jacobson on the Yup'ik language and dialects. Over these decades, Jacobson has combed through records of explorers, linguists, missionaries, and anyone who has come in contact with the actively migratory Yup'ik people. Combined with information from native Yup'ik speakers, that research has led to a richly detailed dictionary that covers the entire language and all its dialects. The dictionary also offers sections on Yup'ik spelling, early vocabulary, demonstrative words, and important intersections of Yup'ik language and culture such as the kayak, dogsled, parka, and old-style dwellings. This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his

supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

Perfect the Skills to Excel as a Manager

An engagement crisis, a management skill shortage, a retention problem—call it what you will, today's research and workplace insights emphasize that many employees leave managers. . . not companies. Good managers know they need to deliver results to be successful. But great ones? They understand the essence of managing encompasses something more: making connections, embodying the right skills, and developing their direct reports. They also realize managing well takes practice. With Focus on Them, you'll get the tools and know-how to excel as a manager.

Edited by the Association for Talent Development's own management authority Ryan Changcoco, research expert Megan Cole, and content developer Jack Harlow, this book explores ATD's new management framework—the ACCEL model. Each chapter, written by a leader in management and talent development, focuses on one of the five skills all managers need:

- Accountability (Timothy Ito)
- Communication (Ken O'Quinn)
- Collaboration (Winsor Jenkins)
- Engagement (Hunter Haines)
- Listening and assessing (Michele Nevarez)

By investing in your own development—boosting your ACCEL skills—you signal to your employees that you're serious about their development and learning, too. Becoming a manager isn't climbing a mountain. By focusing on the basics, you can transform from a results-oriented manager to the super people manager your employees need.

From James DeMonaco, the writer/director of The Purge film franchise, comes the provocative and terrifying last stand of a lone outpost of women in the wake of a deadly pandemic. Allie Hilts was still in high school when a fire at a top-secret research facility released an air-borne pathogen that quickly spread to every male on the planet, killing most. Allie witnessed every man she ever knew be consumed by fearsome symptoms: scorching fevers and internal bleeding, madness and uncontrollable violence. The world crumbled around her. No man was spared, and the few survivors were irrevocably changed. They became disturbingly strong, aggressive, and ferocious. Feral. Three years later, Allie has joined a group of hardened survivors in an isolated, walled-in encampment. Outside the guarded walls the ferals roam free, and hunt. Allie has been noticing troubling patterns in the ferals' movements, and a disturbing number of new faces in the wild. Something catastrophic is brewing on the horizon, and time is running out. The ferals are coming, and there is no stopping them.

With Feral, writer/director James DeMonaco and acclaimed novelist Brian Evenson have created a challenging and entertaining novel of timely horror and exhilarating suspense.

If you could be the first to lay eyes upon a planet orbiting a distant star, would you go? If it meant that when you returned home—if you returned home—everyone you knew would have been dead for centuries, would you still go? The members of the Polaris Project knew what they were giving up when they volunteered to fly to the star named Angel-21, but the allure of being the first explorers to leave the Solar System far outweighed the risks. As it turned out, the most dangerous thing they faced wasn't the mission ... it was the homecoming. Eight hundred years have passed and Earth is nothing like they thought it would be. As Commander Markus Brentwood scrambles to uncover the mystery of what's happened to Earth in their absence, he also must contend with an increasingly dysfunctional crew and a damaged ship that's flying on borrowed time. What should have been a joyous return home after a long, hard mission has turned into a race to see which nightmare would kill them first.

Award-winning journalist Stephen Petranek says humans will live on Mars by 2027. Now he makes the case that living on Mars is not just plausible, but inevitable. It sounds like science fiction, but Stephen Petranek considers it fact: Within twenty years, humans will live on Mars. We'll need to. In this sweeping, provocative book that mixes business, science, and human reporting, Petranek makes the case that living on Mars is an essential back-up plan for humanity and explains in fascinating detail just how it will happen. The race is on. Private companies, driven by iconoclastic entrepreneurs, such as Elon Musk, Jeff Bezos, Paul Allen, and Sir Richard Branson; Dutch reality show and space mission Mars One; NASA; and the Chinese government are among the many groups competing to plant the first stake on Mars and open the door for human habitation. Why go to Mars? Life on Mars has potential life-saving possibilities for everyone on earth. Depleting water supplies, overwhelming climate change, and a host of other disasters—from terrorist attacks to meteor strikes—all loom large. We must become a space-faring species to survive. We have the technology not only to get humans to Mars, but to convert Mars into another habitable planet. It will likely take 300 years to “terraform” Mars, as the jargon goes, but we can turn it into a veritable second Garden of Eden. And we can live there, in specially designed habitations, within the next twenty years. In this exciting chronicle, Petranek introduces the circus of lively characters all engaged in a dramatic effort to be the first to settle the Red Planet. How

We'll Live on Mars brings firsthand reporting, interviews with key participants, and extensive research to bear on the question of how we can expect to see life on Mars within the next twenty years. This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. - Solving flex-fuel design and engine power problems

The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

Philip Marlow and Lew Archer would recognize a kindred spirit in Jimmy Gage, reporter for SLAP magazine, troublemaker by trade and inclination, and the hero of Robert Ferrigno's sinuous new crime novel. While taking part in a Hollywood scavenger hunt, Jimmy meets Garret Walsh, a bad-boy movie maker in the truest sense: He's just been released from prison after serving seven years for the murder of a teenaged girl. But Walsh claims he was framed and is writing a screenplay to prove it. He wants Jimmy to help him peddle it, sight unseen. The next time Jimmy sees the director, he's floating face-down in a koi pond and "The Most Dangerous Screenplay in Hollywood" has disappeared. Is Walsh a casualty of bad habits or has somebody crossed him off a list? And is Jimmy next? Combining nerve-shredding suspense and heat-seeking satire, Scavenger Hunt is an addictive read.

Huysmans, and you'll get some idea of this disturbing, decadent first novel."—Publishers Weekly

Gwynn and Raule are rebels on the run, with little in common except being on the losing side of a hard-fought war. Gwynn is a gunslinger from the north, a loner, a survivor . . . a killer. Raule is a wandering surgeon, a healer who still believes in just—and lost—causes. Bound by a desire to escape the ghosts of the past, together they flee to the teeming city of Ashamoil, where Raule plies her trade among the desperate and destitute, and Gwynn becomes bodyguard and assassin for the household of a corrupt magnate. There, in the saving and taking of lives, they find themselves immersed in a world where art infects life, dream and waking fuse, and splendid and frightening miracles begin to bloom . . . "The plot, with its stories-within-stories and its offhand descriptions of wonders and prodigies, brings to mind the works of Italo Calvino and Jorge Luis Borges."—Locus
