IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge of the social sciences. This book discusses the maintenance aspect of rotating machines, which it addresses through a collection of contributions. Sharing the "hands-on" views of experienced engineers on the aspect of maintenance for rotating machines, it offers a valuable reference guide for practicing engineers in the related industries, providing them a glimpse of some of the most common problems associated with rotating machines and equipment in the field, and helping them achieve maximum performance efficiency and high machine availability. This report, the second in a series, provides rich and detailed statistics of infrastructure governance, focusing on why Indian is making so little progress. This book describes the feasibility and status of the use of alternative fuels in marine engineering, as well as the application of liquefied natural gas, biodiesel and their blends as marine fuels, and the combustion of synthetic coal-based fuels. Each chapter in the book ends with a summary, which gives the reader a quick and clear understanding of the main contents of the chapter. The book gives a lot of advice on the selection of equipment and parameters, fuel reserves and preparation for scholars related to alternative fuels in ships, and points them in the way. It contains lots of illustrations and tables and explains it in the form of chart comparison. The authors have developed mathematical models and methods for calculating the parameters of fuel systems for biodiesel fuels and liquefied natural gas. Recommendations for choosing the rational parameters of these systems are given, as are schematic solutions of the fuel systems, recommendations for selecting equipment, storing, and preparing the fuels. Application of the materials described in the book provides the SPP designers with a reliable tool for choosing rational characteristics of the fuel systems operating on alternative fuels and improving the efficiency of their application on ships. Provides evidence-based guidelines in schematic flowcharts, representing a step-by-step method of solving clinical problems in obstetrics. Clinical research has produced a continuous stream of evidence-based guidelines to guide practice in obstetrics. The guidelines are often widely scattered: this book brings together the essential guidelines in one comprehensive resource. The primary focus is on the Royal College of Obstetricians and

Gynaecologists and other UK national guidelines; however, many chapters contain a 'Guideline Comparator' box carrying information from important international guidelines. Where there are no UK guidelines, information based on international guidelines is provided; where any guidelines do not exist, available evidence and accepted norms of practice based on expert opinion are detailed. Several chapters also contain a 'what not to do' box, which should act as a source of rich debate. To assist those studying for postgraduate examinations - such as MRCOG - the information is presented in schematic flowcharts, representing a step-by-step method of approaching clinical problems and providing an easy-to-use learning resource. This Volume Is A Modernist Study Of India'S International Relations, Which Traverses Pre-Colonial, Colonial And Postcolonial Perspectives. Its Fourteen Chapters Discuss Varied Subjects Related To South Asia'S Regional And International Relations, Like: (I) The Institutionalization Of British Paramountcy In India And Its Effect On The Region'S External Relations, As Well As Indigenous Responses To Colonial Rule (Ii) The Influence Of Domestic Variables Upon India'S International Relations (Iii) The Interspersing Of Ethnic, Economic And Religious Factors In The Making Of The British Indian Empire, And Later, Of The Indian State (Iv) The Paradigms Of Nature, Culture, State-Making On The One Hand, And Political Ecology And Cultural Politics Of Natural Resources On The Other (V) The Changing Character Of Foreign Corporate Involvement In India (Vi) The Development Of Science And Technology In India And The Activities Of The Armed Forces In India (Vii) The Fostering Of Formal Arrangements Such As Saarc Or Safta In South Asia And Informal Challenges To India'S Security From Non-State Actors (Viii) The Economic, Political And Cultural Consequences Of Globalization For India During The Imperial-Colonial Phases (Ix) The Evolution, In Creative Writing, Of A Discourse On The World Outside India And On India'S Relationship With It. This Volume Will Be Of Interest To Scholars And Students Of South Asian Studies, History, Political Science And International Relations, And Defence Studies. Introduces readers to the fundamentals of formation of pollutant formation in IC engines and advances in the engine emission control that have taken place over recent years. Contributed papers presented at the 7th National Conference on Air Breathing Engines and Aerospace Propulsion, hosted at I.I.T., Kanpur. **ADVANCES IN REMOTE SENSING TECHNOLOGY AND THE THREE POLES** Covers recent advances in remote sensing technology applied to the "Three Poles", a concept encompassing the Arctic, Antarctica, and the Himalayas **Advances in Remote Sensing Technology and the Three Poles** is a multidisciplinary approach studying the lithosphere, hydrosphere (encompassing both limnosphere, and oceanosphere), atmosphere, biosphere, and anthroposphere, of the Arctic, the Antarctic and the Himalayas. The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere, biosphere, and lithosphere, while unanswered questions of the polar regions will help plan and formulate future research projects. Sample topics covered in the work include: Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution Glaciers and glacial environments, including a geological, geophysical, and geospatial survey of Himalayan glaciers Sea ice dynamics in the Antarctic region under a changing climate, the Quaternary geology and geomorphology of Antarctica Continuous satellite missions, data availability, and the nature of future satellite missions, including scientific data sharing policies in different countries Software, tools, models, and remote sensing technology for investigating polar and other environments For postgraduates and researchers working in remote sensing, photogrammetry, and landscape evolution modeling, **Advances in Remote Sensing Technology and the Three Poles** is a crucial resource for understanding current technological capabilities in the field along with the latest scientific research that has been conducted in polar areas. "Engine Emissions: Pollutant Formation and Advances in Control Technology provides an up to date reference to academics and professionals on emissions from SI and CI engine powered vehicles. - In this text, mechanism of formation of engine emissions, effect of engine design and operation variables, world wide vehicle emission standards and emission measurement and test procedures are presented. Advances in emission control technology that have taken place from those used

initially and up to the ones employed on the present day vehicles meeting the stringent emission regulations e.g., Euro 4, ULEV, SULEV standards are discussed. - Newer developments on exhaust aftertreatment such as HC adsorber systems, NO<sub>x</sub> traps and other de-NO<sub>x</sub> catalysts, and advanced engines like GDI and HCCI engines are covered in the book."--Jacket. This book presents the select proceedings of the International Conference on Recent Advancements in Mechanical Engineering (ICRAME 2020).
