[Sicherheit in vernetzten Systemen](#) Nov 30 2020 Im Namen der DFN-CERT Services GmbH und des Programm-Komitees präsentieren wir Ihnen den Konferenzband zur 24. DFN-Konferenz "Sicherheit in vernetzten Systemen" in Hamburg. Seit 1994 jährlich stattfindend, hat er sich mit seiner betont technischen und wissenschaftlichen Ausrichtung als eine der größten deutschen Sicherheitstagungen etabliert. In diesem Band finden Sie die Langfassungen der ausgewählten Beiträge bzw. der Redner auf der Tagung. Die Beiträge befassen sich u.a. mit den Risikomanagement, Sensibilisierung, sicheres Identity-Management und Angriffe auf Gebäudeautomatisierungen.

[Handbook of Research on Technologies for Improving the 21st Century Workforce: Tools for Lifelong Learning](#) Nov 23 2022 As the 21st century has seen, lifelong learning has become more important as many countries have emerged into "learning societies". With these learning societies, adult and community education, along with new technologies, play a major role in shaping and reshaping their economic, political, and cultural realities. Handbook of Research on Technologies for Improving the 21st Century Workforce: Tools for Lifelong Learning addresses how technologies impact the combination of workforce education and adult learning. This comprehensive collection of research from leading authorities and front line faculty seeks to equip adult learners/employees with the right knowledge and skills to continue to contribute to the economy given the importance of the essential role of technologies.

[Congressional Record](#) Dec 20 2019 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

[Design Considerations in the Use of 5000 Series Aluminum Alloys](#) Jan 13 2022 This report presents information concerning the general nature of the series of aluminum alloys containing magnesium as the main alloying element; discusses the individual forms in which they are offered to users by aluminum producers, and recommends specific alloys and tempers for each form; and indicates aspects of stress corrosion cracking, arc welding, and forming which the design engineer should consider.

[Standard Methods for the Examination of Water and Wastewater](#) May 05 2021 "The signature undertaking of the Twenty-Second Edition was clarifying the QC practices necessary to perform the methods in this manual. Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

[Advances in the Use of NOAA AVHRR Data for Land Applications](#) Apr 28 2023 An up-to-date, detailed set of notes covering all aspects of NOAA AVHRR data collection, pre-processing, analysis and application. Includes many FTP sites, e-mail addresses and URL locations. Some chapters address particular aspects of the NOAA AVHRR system, such as radiometric calibration and geometric correction, while others provide general information of interest to any remote sensing study, such as radiative transfer modelling and atmospheric correction. The publication of a book that covers all important aspects of the treatment and understanding of the data in one volume makes the work a convenient, informative 'recipe book' that is sure to become a favourite for all users of NOAA AVHRR data.

[Use of Novel Techniques to Quantify Phenotypes in Biological Treatment Process](#) Aug 20 2022 This research attempts to evaluate nitrification treatment performance in combined carbon/nitrogen municipal wastewater reactors using traditional physical/chemical methods and modern molecular techniques. Bench scale activated sludge reactors were operated at different SRTs under varying DO levels and temperatures over a 21-month period. Real-time PCR assays were used to determine cell concentrations of total bacterial 16S rDNA, a gross measure of biomass content, the amoA gene, a measure of ammonia-oxidizing bacteria (AOB), and the Nitrospira 16S rDNA gene, a measure of nitrite-oxidizing bacteria (NOB). As expected, gravimetric biomass and total bacterial 16S rDNA levels increased with increasing SRT. Ammonia oxidation rates and N. oligotropha-type AOB concentrations did not follow similar trends with respect to changes in SRT, temperature, and DO nor were they highly correlated. The concentration of available nitrite and SRT were positively correlated with Nitrospira cell densities, while DO concentration and temperature were negatively correlated with NOB levels. The percentage of the total population comprised of AOB and NOB obtained with the real-time PCR assays were compared to predicted values estimated from design equations using typical kinetic parameters. While the percentages of NOB measured using the real-time PCR assay corresponded very well with the predicted values, the measured percentages of AOB were much lower than those estimated from the design equations, suggesting that N. oligotropha-type AOB were not the dominant ammonia-oxidizing species in these reactors. [How Colleges Use Data](#) Sep 09 2021 What does a culture of evidence really look like in higher education? The use of big data and the rapid acceleration of storage and analytics tools have led to a revolution of data use in higher education. Institutions have moved from relying largely on historical trends and descriptive data to the more widespread adoption of predictive and prescriptive analytics. Despite this rapid evolution of data technology and analytics tools, universities and colleges still face a number of obstacles in their data use. In How Colleges Use Data, Jonathan S. Gagliardi presents college and university leaders with an important resource to help cultivate, implement, and sustain a culture of evidence through the ethical and responsible use and adoption of data and analytics. Gagliardi provides a broad context for data use among colleges, including key concepts and use cases related to data and analytics. He also addresses the different dimensions of data use and highlights the promise and perils of the widespread adoption of data and analytics, in addition to important elements of implementing and scaling a culture of evidence. Demystifying data and analytics, the book helps faculty and administrators understand important topics, including:

- How to define institutional aspirations using data
- Equity and student success
- Strategic finance and resource optimization
- Academic quality and integrity
- Data governance and utility
- Implicit and explicit bias in data
- Implementation and planning
- How data will be used in the future

How Colleges Use Data helps college and university leaders understand what a culture of evidence in higher education truly looks like.
