Of enduring historical and contemporary interest, the anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, Cynthia Klestinec places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning, which contributed to a deeper scientific analysis of the body, and a place where students learned to behave, not with ghoulish curiosity, but rather in a civil manner toward their teachers, their peers, and the corpse. Klestinec argues that the drama of public dissection in the Renaissance (which on occasion included musical accompaniment) served as a ploy to attract students to anatomical study by way of anatomy's philosophical dimensions rather than its empirical offerings. While these venues have been the focus of much scholarship, the private traditions of anatomy comprise a neglected and crucial element of anatomical inquiry. Klestinec shows that in public anatomies, amid an increasingly diverse audience—including students and professors, fishmongers and shoemakers—*anatomists emphasized the conceptual framework of natural philosophy, whereas private lessons afforded novel visual experiences where students learned about dissection, observed anatomical particulars, considered surgical interventions, and eventually speculated on the mechanical properties of physiological functions.* *Theaters of Anatomy* focuses on the post-Vesalian era, the often-overlooked period in the history of anatomy after the famed Andreas Vesalius left the University of Padua. Drawing on the letters and testimony of Padua's medical students, Klestinec charts a new history of anatomy in the Renaissance, one that characterizes the role of the anatomy theater and reconsiders the pedagogical debates and educational structure behind human dissection. "This volume, examining the reception of ancient rhetoric, aims to demonstrate that the past is always part of the present: in the ways in which decisions about crucial political, social and economic matters have been made historically; or in organic interaction with literature, philosophy and culture at the core of the foundation principles of Western thought and values. Analysis is meant to cover the broadest possible spectrum of considerations that focus on the totality of rhetorical species (i.e. forensic, deliberative and epideictic) as they are applied to diversified topics (including, but not limited to, language, science, religion, literature, theatre and other cultural processes (e.g. athletics), politics and leadership, pedagogy and gender studies) and cross-cultural, geographical and temporal contexts"-- In addition to being a compelling family story, the book also vividly shows how extended families, like the one established by Giacomo and Maria, seem to defy the widely held beliefs

concerning the alleged disintegrative effects of industrialism and consequent prosperity on family organisation. Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs. Among the many contributors to Sports Car Market over the years, few have amassed the devoted and loyal following that John Draneas has with his monthly column, Legal Files. Thanks to a sharp mind that can reduce the most complex legal issues to their most salient points, Draneas never fails to educate and entertain with his thoughtful prose. With his unique insights and perspectives on the hobby, The Best of Legal Files is an indispensable resource for collectors and enthusiasts to learn from the mistakes made by others. The Publication Manual of the American Psychological Association is the style manual of choice for writers, editors, students, and educators in the social and behavioral sciences, nursing, education, business, and related disciplines. Investir no próprio capital humano, empreender, inovar, aprender a vida toda, ser criativo, competitivo e flexível são demandas contemporâneas, na corrida pelo sucesso profissional, financeiro, pessoal. Mas quem consegue entrar nessa corrida? Quem entra, mas não consegue avançar? É preciso pensar no precariado que é produzido nesse jogo biopolítico, produzido porque as desigualdades são necessárias para a governamentalidade neoliberal – precisa-se do trabalho "barato". Na equidade não haveria competição. Parece-me que restam poucas linhas de fuga à governamentalidade neoliberal. Se jogar o jogo neoliberal é inevitável, se o trabalho não vai mais voltar a ser seguro, é preciso que a educação profissional atente para a contingencialidade e a velocidade das transformações no mundo atual e se posicione como agenciadora da formação geral, científica e tecnológica, já na educação básica. Flexibilidade, disponibilidade 24 horas, adaptabilidade, trabalho temporário, terceirização, competição, de fato poderão não libertar as pessoas, mas tornar precária a existência de muitas delas. Entre crises, reformas e após uma pandemia, fica difícil visualizar modos de enfrentamento a todo esse contexto turbulento e incerto. Enquanto a poeira não baixa, o vendaval que arrasta muitos à precariedade – e que já se formava antes da pandemia – convoca cada um a pensar em sua intensidade, em seu processo de produção, em seus efeitos e nas possibilidades que se tem de resistir a tudo isso. Aspects of Iranian Linguistics introduces readers to recent research into various properties of a number of Iranian languages. The volume consists of twenty chapters that cover a full range of Iranian linguistics, including formal theoretical perspectives (from a syntactic and morphological point of view), typological and functional perspectives, and diachronic and areal perspectives. It also contains papers on computational linguistics and neurolinguistics, as well as the modern history of lexicography in Iran. Various Iranian languages are discussed in this volume, including Hawrami and Kermanji, two of the major dialects of Kurdish, Medieval, Classical and Modern Persian, Balochi, Taleshi and Pamir. With the exception of Persian, other Iranian languages had not received much attention in the past. Thus this work, as the first volume ever published on various aspects of these languages and their linguistic properties, is a valuable contribution to our understanding of a less commonly studied language family. The theoretical, descriptive, and applied approaches pursued by various authors in this volume, together with the colorful range of languages discussed, provide a unique perspective that is appealing to researchers in different domains of linguistics and language studies. This practical, easy-to-use manual cuts through the legalese surrounding spill reporting to provide guidance on potentially applicable requirements, including both federal and California requirements, and how to comply with them. You will get the necessary information you need on what a reportable substance is; what a reportable spill is; who must report; when the report must be made; What exceptions apply; what each report must contain; and how a report is to be made (including phone numbers and addresses). Appendices includes statutory definitions and implementing regulations; lists of hazardous substances that trigger certain reporting requirements; required reporting forms; and agency addresses. Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text

classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
