The Cadillac Story Oct 21 2022 The Cadillac story is more than the story of a car company. It is, in many ways, the story of the American automobile industry itself—which, as much as any industry, drove America's growth in the twentieth century and defined who we are as a people. For generations of Americans, Cadillac epitomized expansive prosperity. This illustrated history of Cadillac presents all the triumphs and failures of the marque's last sixty years; from the good times, through the disastrous 1980s, and up to the current reconstitution of the brand.

Auto Opium Mar 26 2023 The automobile continues to be the privileged product of the culture of mass consumption, yet there has been little scholarly attention to what concerns consumers most - the appearance of cars. *Auto Opium* is the first comprehensive history of the profession and aesthetics of American automobile design. The author reveals how the appearance of vehicles became an integral part of the system of mass production and mass consumption forged in the struggles of American society. The book traces the development of automobile design, from the first utilitarian cars around the turn of the century to the most modern of symbol-laden cultural icons. The author shows that the aesthetic qualities of vehicles were shaped by the social conflicts generated by the process of mass production. These conflicts became channeled into the realm of mass consumption, where working Americans demanded beautiful, stylish, and constantly improving cars to compensate them for the deprivations of mass production. Creating a unique blend of business, social, and cultural history, *Auto Opium* connects the social struggles of America to the organizational struggles of designers and the marketplace struggles of firms.
