"Counseling Persons with Parkinson's Disease offers a distinctive, practical, philosophically grounded, and person-centered approach to counseling those living with Parkinson's disease and other chronic illnesses. As a seasoned teacher of professional counselors who also lives with Parkinson's, the author demonstrates that chronic illness requires accepting and living with profound loss, but that this loss may lead to personal transformation and constructive ends, wherein one finds new hope, meaning, purpose, happiness, and passion for living. Equal parts memoir and professional resource, this book guides clinicians who give counsel, educators who teach counseling, and anyone wanting to know more about Parkinson's disease and providing support for those who live with it. Parkinson's disease; bereavement; grief, mourning; illness; counseling; task-centered; happiness"-- This one-of-a-kind manual provides direction for leading groups of people with disabilities or groups that have members with disabilities. Viewing disability as a single aspect of a multifaceted person, Drs. Bauman and Shaw share their insight and expertise and emphasize practical skill building and training for facilitating task, psychoeducational, counseling, family, and psychotherapy groups across various settings. Topics examined in Part I include common themes in groups that focus on disability; various group formats, including groups using technological platforms; issues of diversity that exist simultaneously with ability; group composition; ethical concerns; and training considerations and logistical accommodations. Part II focuses on group counseling with clients experiencing sensory, psychiatric, cognitive, and physical disabilities as well as chronic medical conditions. A list of resources, support information, and group exercises completes the book. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org Though important strides have been made in the last three decades in the research efforts on African Americans, there continues to be a lack of significant new understanding about the impact of the African American culture on the therapy process and dynamics. This volume provides an in-depth analysis of the counseling literature pertaining to African American clients. Specifically, the analysis includes a review of the different variables (client, counselor, counseling process, and assessment) that have received the bulk of research attention. This sets the stage for the presentation of a counseling model for African American clients. The authors discuss philosophical premises upon which the model is based and suggest specific counseling strategies and interventions related to the model. Case study material is integrated throughout the chapters, focusing on individual and group approaches. This volume is an important work for counseling professionals as well as for students in social work and counseling programs. Key features of the third edition: -An overview of the changing face of counseling, from emerging employment opportunities to core competencies for counselors and trainers. -A broad range of qualitative and quantitative assessment tools, with guidelines for their selection and interpretation. -A thorough review of the current edition of the Diagnostic and Statistic Manual of Mental Disorders, including strategies for multi-axial assessment. -The DO A CLIENT MAP, a comprehensive structured approach to treatment planning. -Expanded coverage of individual, family, and group interventions -An updated chapter on documentation, report writing, and record keeping, with sample reports and forms. -Brand-new chapters on career and organizational development counseling, and ethical standards for counselors. -A predictions chapter identifying trends most likely to influence the future of the field. -Case studies, models, and examples throughout. Print+CourseSmart Speech-language pathologists and audiologists receive little formal training in dealing with the emotional issues that will confront clients who have communication disorders. The families of those clients also need support in addressing emotions concomitant with communication disorders. Often, the humanistic elements of treatment are superficially addressed, if at all. How therapists deal with these issues, however, has an enormous impact on the effectiveness of their clinical efforts. Luteran addresses this lack of attention to emotions. In addition to the expertise of trained, experienced counselors, the new edition of this popular book also discusses some of today's hot topics. These topics include how to work with the chronically ill and their families and the consequences of the advent of universal screening of newborns. Both issues are having an increasing impact on the dynamics of the therapist-client relationship and require greater sensitivity to the particular needs of the clients and their families. Explains the range of faith followed by America's more than 7 million Muslims, shows the challenges of discrimination and prejudice this growing group has faced since 9/11, and guides professionals who provide the counseling these people need to remove stereotypes and recover from unjustified attacks. At a time when biological psychiatry claims that drugs and electroshock are the best methods for helping deeply disturbed persons, mental health professionals need to be reminded that psychological and social approaches to mental illnesses remain more effective, less harmful, and much more able to address the real needs of recovery, growth, and development for affected persons. Psychosocial Approaches to Deeply Disturbed Persons empowers counselors, psychiatrists, psychologists, and social workers to trust their intuitive and clinical understanding of how to help seriously disturbed people through humane, caring approaches. Psychosocial Approaches to Deeply Disturbed Persons introduces mental health professionals to an array of psychological and social alternatives that are available for helping patients considered "psychotic" or very emotionally disturbed. Focusing on psychological and social approaches to helping people who become labeled "psychotic" or who carry serious psychiatric diagnoses, contributors show mental health professionals psychological, social, and spiritual alternatives for approaching or treating these individuals. Readers learn about: a successful model for nonmedical, non-drug residential treatment centers utilizing the artwork of psychotic patients case histories of psychoanalytic therapy group therapy to help families with a "schizophrenic" member improve communication Re-evaluation Counseling (RC) with disturbed individuals psychoanalytically-oriented therapy World Health Organization research which demonstrates the positive effect of extended family and social relationships and the negative effect of modern biopsychiatric treatment research demonstrating the efficacy of psychotherapy with persons labeled "schizophrenic" These chapters combined with a review of empirical studies demonstrate to readers the efficacy of psychotherapy with psychotic patients. Students or experienced professionals in any of the mental health fields, including psychotherapy, counseling, clinical psychology, clinical social work, and Re-evaluation Counseling will find Psychosocial Approaches to Deeply Disturbed Persons a necessity for most effectively and humanely treating clients with serious psychiatric diagnoses. A guide for people interested in the fascinating field of pastoral counselling. A mix of standard psychological counselling and religious teachings. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. Rehabilitation professionals have long recognized that the needs of people who are blind or visually impaired are unique and require a special knowledge and expertise for the provision and coordination of effective rehabilitation services. Contributions to this text from more than 25 experts provide essential information on subjects such as functional, medical, vocational and psychological assessments; demographic and cultural issues; placement and employment issues; and the rehabilitation team. Each chapter includes a Learning Activities section that can be used in class assignments or during in-service training. Sample forms, such as a Job Analysis Worksheet, a Comprehensive Vocational Evaluation System Protocol, an Individualized Written Rehabilitation Program, and a Work Environment Visual Demands Report are included in the appendices. An extensive glossary provides easy access to clear definitions of terms. Organized around the 2016 Council for Accreditation of Counseling and Related Educational Programs (CACREP) Standards, Counseling Individuals Through the Lifespan introduces readers to the fundamentals of the counseling process during each stage of human development. Topics such as the client-counselor relationship, counseling theory, research, and interventions are addressed with a focus on caring for the total person within their environment and

culture in today's diverse world. Emphasizing the importance of self-reflection, chapters include case illustrations and guided practice exercises to further the development of successful, ethical 21st century counselors. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides. Learn more. In this scholarly book, Thorne and Lambers have gathered together significant contributions to the advancement of person-centred theory and practice from leading exponents of the approach in Austria, Belgium, Germany, The Netherlands, Norway and the United Kingdom.... I found the book both stimulating and challenging. The insight it offers into working with "difficult" clients is invaluable and the sections on theory stretched me in my understanding of the approach. I strongly recommend it to anyone from within or without the person-centred tradition who wants to achieve a real understanding of the approach "post Rogers" and get to grips with the vibrancy and vitality of person-centred thought in Europe' - Counselling, The Journal of Resilience is a human trait that is key to understanding how people successfully cope with crisis and trauma. This book explains the inner self-healing processes of resilient people and helps people training in the helping professions to learn to use these processes in working with their clients. Counseling Criminal Justice Offenders, Second Edition takes a practical view of offenders, their problems, and the difficulties counselors face working with them in criminal justice settings. Author Ruth E. Masters examines criminal justice counseling on an individual and group basis and in a variety of settings such as prisons, probation and parole agencies, diversion programs, group homes, halfway houses, prerelease facilities, and U.S. jails. The book also explores the many faces of offenders — young, old, male, female, and across many cultures. The Second Edition of Counseling Criminal Justice Offenders recognizes that individuals who counsel offenders in the criminal justice system often have not had the extensive training of a licensed psychologist and this text is designed to provide readers with an understanding of the counseling process. The book explores practical knowledge of legal principles, appropriate and effective counselor attitudes, and the past and present protocols of American corrections. Primarily designed for criminal justice students taking correctional counseling courses, Counseling Criminal Justice Offenders, Second Edition is also a vital resource for any Criminal Justice, Social Work, Psychology, or Counseling practitioner interfacing with offenders. This is the first book to explore the experiences of people of color in counseling from the perspective of individuals who are practicing counselors and were previously clients in counseling themselves. Marbley conducted a research study in which she interviewed eight individuals representing each of the major groups of color in the United States - African American, Asian and Asian American, Hispanic/Latino, and American Indian – to obtain the stories of their experiences in their own words. These stories provide insight into the problems in and failures of counseling services provided to people of color. She quotes extensively from these interviews throughout the book, using the voices of the participants to highlight these shortcomings and personalize her discussion of the issues they have faced. A chapter is devoted to each of the groups of color, as well as one to counseling issues related to gender. These chapters provide an overview of the literature on the historical experiences of these groups in mental health and a discussion of the counselors' experiences, and conclude with implications and recommendations for counseling and psychotherapy with these groups. Information from follow-up interviews conducted 12 years after the original ones are also provided to compare and contrast the participants' responses to their earlier ones. Marbley concludes with a look at the need for a social justice movement within the mental health field in order to improve the experiences of and outcomes for people of color. This volume presents a state of the art account of the clinical specialty of mental health care of deaf people. Drawing upon some of the leading clinicians, teachers, administrators, and researchers in this field from the United States and Great Britain, it addresses critical issues from this specialty such as Deaf/hearing cross cultural dynamics as they impact treatment organizations Clinical and interpreting work with deaf persons with widely varying language abilities Adaptations of best practices in inpatient, residential, trauma, and substance abuse treatment for deaf persons Overcoming administrative barriers to establishing statewide continua of care University training of clinical specialists The interplay of clinical and forensic responses to deaf people who commit crimes An agenda of priorities for Deaf mental health research Each chapter contains numerous clinical case studies and places a heavy emphasis on providing practical intervention strategies in an interesting, easy to read style. All mental health professionals who work with deaf individuals will find this to be an invaluable resource for creating and maintaining culturally affirmative treatment with this population. Featuring an outstanding group of the leading theorists and researchers from the fields of multicultural psychology and counseling, this book begins with chapters on how the interplay of such variables of class, gender, and race interact in the development of an individual in a pluralistic society. It then presents theories on how to integrate issues of class, gender and race into counseling theory. Culture and Identity by Anita Jones Thomas and Sara E. Schwarzbaum engages students with autobiographical stories that show the intersections of culture as part of identity formation. The easy-to-read stories centered on such themes as race, ethnicity, gender, class, religion, sexual orientation, and disability tell the real-life struggles with identity development, life events, family relationships, and family history. The Third Edition includes an expanded framework model that encompasses racial socialization, oppression, and resilience. New discussions of timely topics include race and gender intersectionality, microaggressions, enculturation, cultural homelessness, risk of journey, spirituality and wellness, and APA guidelines for working with transgendered individuals. This may be the most practical and user-friendly guide to treating religious persons ever published. Mental health professionals from all backgrounds will benefit from the author's detailed yet manual-focused approach to help overcome emotional distress. & In the Fifth Edition, you'll find chapters on psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, and cognitive-behavior therapies - and, new to this edition, family systems therapy; ethical issues in counseling practice, including dual relationships, the role of codes of ethics, and guidelines for making ethical decisions; tables and other integrating materials to help you compare and contrast the nine approaches; and coverage of the DSM-IV and of the role of diagnosis and testing, as well as guidelines for applying each of the theories from a multicultural perspective. Adolescent Counselling Psychology: Theory Research and Practice provides a thorough introduction to therapeutic practice with young people. As an edited text, it brings together some of the leading authorities on such work into one digestible volume. The text is divided into three major sections. The first provides a context to therapeutic work with young people. This outlines the historical background to such work, the types of settings in which individuals work and the allied professions that they will encounter. Following on from this, the second section introduces the psychology of adolescence and provides an overview of the research into youth counselling. Finally, the third section considers more applied issues. Initially the infrastructure of counselling services is discussed before moving on to reflect upon pluralistic therapeutic practice. To end, the ways in which outcomes may be assessed in such work are described. In covering such a wide territory this text acts as an essential resource to practicing counselling psychologists and other mental health professionals. It provides a foundation to the work that individuals are undertaking in this arena and advocates that individuals enter into therapeutic work in a critically informed way. At the heart of such considerations is the need to utilise psychological theory alongside research findings to inform therapeutic decision making. This work meets a long-standing need in the helping professions by being the first and only comprehensive book on how counselors and psychotherapists can work with clients around values, goal-setting, decision-making and action planning. Helping clients determine their priorities, set goals, make decisions, and take action to improve their lives are common tasks for virtually all helping professionals when engaging with clients. This is the process known as "values clarification" (or "Values Clarification"). While counselors and psychotherapists widely practice values clarification-some knowingly, others unaware-they typically do so with a limited understanding of its theory, methods and various applications. This book demonstrates, with great precision, case studies, and hundreds of clinical examples, how counselors and psychotherapists in many fields can ask good clarifying questions, conduct clarifying interviews, and employ dozens of values clarification strategies with individuals, couples, families, and groups. To illustrate how values clarification can be used to explore a myriad of counseling topics, the examples throughout the text are often grouped around more specific applications for marriage and family counseling, career counseling, substance abuse and recovery counseling, geriatric counseling, grief counseling, pastoral counseling, financial counseling, school counseling, rehabilitation counseling, counselor/clinical education and supervision, health counseling, and personal growth. There are clear descriptions of what values clarification is and is not, theory and research, multicultural and diversity issues, and how counselors and therapists can handle value and moral conflicts with clients. Values clarification is compared and contrasted to other approaches to counseling and psychotherapy, including person-centered, cognitive-behavioral, reality therapy-choice theory, existential, individual psychology, solution-focused, narrative, motivational interviewing, acceptance and commitment therapy, appreciative inquiry, life coaching, and positive psychology. Offers practical advice on helping older individuals choose second careers, plan their retirement, or prepare for death. Annotation Critiques existing theoretical approaches and practices of philosophical counseling and presents a new model. This book provides insight into the primary issues faced by older adults; the services and benefits available to them; and the knowledge base, techniques, and skills necessary to work effectively in a therapeutic relationship. Dr. Kampfe offers empirically and anecdotally based strategies and interventions for dealing with clients' personal concerns and describes ways counselors can advocate for older people on a systemic level. Individual and group exercises are incorporated throughout the book to enhance its practicality. Topics covered include an overview of population demographics and characteristics; counseling considerations and empowering older clients; successful aging; mental health and wellness; common medical conditions; multiple losses and transitions; financial concerns; elder abuse; veterans' issues; sensory loss; changing family dynamics; managing Social Security and Medicare; working after retirement age; retirement transitions, losses, and gains; residential options; and death and dying. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org. This landmark handbook brings together the fundamentals of counselling children and young people theory, research, skills and practice. It addresses what every successful trainee or practitioner needs to know in a way that is comprehensive, accessible and jargon-free. Divided into four parts, it covers: theory and practice approaches, including chapters on child development, person-centred, psychodynamic, CBT, Gestalt approaches, and more counselling process, including chapters on the therapeutic relationship, skills, groupwork, supervision practice issues, including chapters on law and policy, ethics, diversity, challenging behaviour practice settings, including chapters on health and social care settings, school and education, multi-agency and collaboration. Each chapter includes a chapter introduction and summary, reflective questions and activities, helping trainees to cement their learning. With chapters contributed by leading experts and academics in the field, this book is essential reading for trainees and practitioners working with children and young people. This current and comprehensive handbook will guide educators, students, and clinicians in developing the awareness, knowledge, and skills necessary to work effectively with LGBTQI+ populations. Twenty-five chapters written by experts in the field provide direction for working with clients in an authentic, ethical, and affirmative manner that is

tailored to their individual strengths, needs, and identity. The book is divided into four sections, which explore the science behind gender and affectional orientation; developmental issues across the life span and treatment issues; the specialized needs of nine distinct populations; and the intersectionality of ethnicity and overlapping identities, the role of religion, and counselor advocacy. To further a deeper understanding of the content, each chapter contains an "Awareness of Attitudes and Beliefs Self-Check," a case narrative relating to the material covered, questions for discussion, and a list of online resources. The book concludes with an extensive glossary of terms, both preferred and problematic, which counselors working with these communities should understand and use appropriately. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org

Leaving Home presents a method of family therapy at the stage when children are leaving home. It includes a special classification of young people with problems, and tackles family orientation, the therapist support system, the first interview, apathy, troublemaking, a heroin problem, a chronic case, and resolved and unresolved issues. Visit www.haley-therapies.com for additional resources by Jay Haley, including live videos of the pioneering therapist in action. A specialist in online psychological help establishes a relationship with a person experiencing problems or suffering from mental disorders through various forms of internet communication. Online help can assume the form of a short intervention, consultation, psychoeducation or psychotherapy. Oneu2019s attitude towards online psychological help is considered to be a. Becoming Visible offers cutting-edge psychological perspectives on bisexual and queer identities and the cultural and mental health issues facing bisexual, lesbian, gay, queer, and questioning individuals and their partners. Essential for any professional seeking to provide "best practice" services to this population, Becoming Visible addresses the therapeutic needs of bisexuals at every stage of the life cycle. This volume explores why some people resist identity labels and what bisexual men and women consider exemplary and harmful in their therapeutic experiences. It also helps practitioners distinguish between the stresses brought on by being part of a sexual minority and the clinical symptoms that indicate serious mental health issues. It includes research on ethnic minority bisexuals, youth, elders, gender-variant individuals, and bisexuals engaging in alternative lifestyles and sexual practices such as polyamory and BDSM. Edited by a psychologist who specializes in sexual-orientation and gender-identity issues and with contributions from scholars and professionals from multiple disciplines, the book embraces perspectives from the empirical to the phenomenological, and outlines both scientific and practice-based approaches to the subject while carefully considering the psychological, cultural, and spiritual dimensions of the issues confronting bisexual men and women. Becoming Visible is a crucial step in the improved mental health and well-being of bisexuals, transgender individuals, and other sexual minorities. This book offers a path toward awareness and compassion for those who seek to understand, treat, and empower this underserved and frequently misunderstood group of mental health clients. This friendly, hands-on book emphasizes improving counseling skills and offers practical advice about how to become a more effective counselor. The book presents a six-step skills model and incorporates running dialogue from actual counseling sessions with a patient called "Erikka" to demonstrate each step. The methods outlined would be of value not only to counselors but also to psychologists, marriage and family therapists, nurses, and other human service professionals. Discover comprehensive coverage of leading research and theory in career psychology with the newest edition of a canonical work The newly revised and thoroughly updated third edition of Career Development and Counseling retains many features of the celebrated second edition, including in-depth coverage of major theories of career development, interventions and assessment systems across the life span, and the roles of diversity, individual differences, and social factors in career development. This new edition also covers essential new material on emerging topics like: The future of work and preparing people for work in the new economy The psychology of working theory Working with older adults and retirees Working with the unemployed and underemployed Calling, work meaning, career adaptability, and volition This book illuminates scientifically informed career practices from an interdisciplinary perspective, engaging readers with concrete strategies and practical tips for working with clients of all kinds. Drawing on vocational, industrial, organizational, and personality psychology, Career Development and Counseling is ideal for graduate students at the masters and doctoral levels in counseling, counseling psychology, counselor education, and educational psychology. This is the first book to focus on commonly occurring client issues and explore how to work with them from a person-centred perspective. Extensive case studies translate person-centred theory into effective practice, enabling therapists to work successfully with clients presenting a variety of different problems including: - Post Traumatic Stress - Depression - Panic and Anxiety - Drug and Alcohol Issues - Eating difficulties - Self harm - Childhood Sexual Abuse Each chapter covers the origin and meaning of the difficulty, the person-centred therapeutic approach and process, and the outcomes. Drawing from a combined 50 years of experience in the field, Paul Wilkins and Janet Tolan bring together leading person-centred therapists to address how and why each problem can be eased by means of working with the person. This book should be on the desk of every counselling and psychotherapy trainee, and is recommended reading for other practitioners of health and social care working with these client groups.
