[The Semantic Web: Research and Applications](#) Sep 10 2021 This book constitutes the refereed proceedings of the 9th Extended Semantic Web Conference, ESWC 2012, held in Heraklion, Crete, Greece, in May 2012. The 53 revised full papers presented were carefully reviewed and selected from 212 submissions. They are organized in tracks on linked open data, machine learning, natural language processing and information retrieval, ontologies, reasoning, semantic data management, services, processes, and cloud computing, social Web and Web science, in-use and industrial, digital libraries and cultural heritage, and e-government. The book also includes 13 PhD papers presented at the PhD Symposium.

**Nanoscience** Aug 29 2020 The field of nanoscience continues to grow at an impressive rate, with over 10,000 new articles a year contributing to a literature of more than half a million citations. Such a vast landscape of material requires careful searching to discover the most important discoveries. The introduction of the newest Specialist Periodical Report by the Royal Society of Chemistry: Nanoscience, provides a critical and comprehensive assesment of the most recent research and opinion. With contributions from across the globe, this new series ensures readers will be well-versed in the latest research and methodologies. Some chapters will also present a special focus in emerging countries working in the field, such as India and China. Anyone practicing in any nano-allied field, or wishing to enter the nano-world will benefit from the comprehensive resource, which will be published annually.

**Transactions on Computational Collective Intelligence X** Feb 03 2021 These transactions publish research in computer-based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the Semantic Web, social networks, and multi-agent systems. TCCI strives to cover new methodological, theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies, such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This tenth issue contains 13 carefully selected and thoroughly revised contributions.

[Oxidative Stress and Redox Signalling in Parkinsons Disease](#) Apr 24 2020 Parkinson's Disease is the second most common neurodegenerative disorder affecting millions of people worldwide. In order to find neuroprotective strategies, a clear understanding of the mechanisms involved in the dopaminergic death of cells that progresses the disease is needed. Oxidative stress can be defined as an imbalance between the production of reactive species and the ability to detoxify them and their intermediates or by-products. Oxidative damage to lipids, proteins, and DNA has been detected in autopsies from individuals with Parkinson's Disease and so links can be made between oxidative stress and Parkinson's Disease pathogenesis. This book provides a thorough review of the mechanisms by which oxidative stress and redox signalling mediate Parkinson's Disease. Opening chapters bring readers up to speed on basic knowledge regarding oxidative stress and redox signalling, Parkinson's Disease, and neurodegeneration before the latest advances in this field are explored in detail. Topics covered in the following chapters include the role of mitochondria, dopamine metabolism, metal homeostasis, inflammation, DNA-damage and thiol-signalling. The role of genetics and gene-environment interactions are also explored before final chapters discuss the identification of potential biomarkers for diagnosis and disease progression and the future of redox/antioxidant based therapeutics. Written by recognized experts in the field, this book will be a valuable source of information for postgraduate students and academics, clinicians, toxicologists and risk assessment groups. Importantly, it presents the current research that might later lead to redox or antioxidant – based therapeutics for Parkinson's disease.

*Ocular Surface Disease: Cornea, Conjunctiva and Tear Film E-Book* Apr 05 2021 Ocular Surface Disease: Cornea, Conjunctiva and Tear Film incorporates current research and the latest management strategies as well as classification systems and treatment paradigms for all forms of ocular surface disease. This is the first comprehensive resource that helps you to meet ocular surface disease challenges effectively using today's best medical and surgical approaches. Get the complete, evidence-based guidance you need to provide optimal care for your patients with ocular surface disease. Implement the latest drug treatments and surgical interventions to provide better outcomes with fewer complications. Hone and expand your surgical skills by watching videos of leading experts performing advanced procedures including ocular surface transplantation techniques; amniotic membrane transplantation; pterygium surgery; lamellar keratoplasty (DALK) in ocular surface disease; and keratoprosthesis surgery. Visualize how to proceed by reviewing detailed, full-color images and consulting new classification systems and treatment paradigms for mild to severe forms of ocular surface disease. Take it with you anywhere! Access the full text, downloadable image library, video clips, and more online at expertconsult.com.

[Money and Finance After the Crisis](#) Sep 29 2020 Money and Finance After the Crisis provides a critical multi-disciplinary perspective on the post-crisis financial world in all its complexity, dynamism and unpredictability. Contributions illuminate the diversity of ways in which money and finance continue to shape global political economy and society. A multidisciplinary collection of essays that study the geographies of money and finance that have unfolded in the

wake of the financial crisis Contributions discuss a wide range of contemporary social formations, including the complexities of modern debt-driven financial markets Chapters critically explore proliferating forms and spaces of financial power, from the realms of orthodox finance capital to biodiversity conservation Contributions demonstrate the centrality of money and finance to contemporary capitalism and its political and cultural economies

**The Militant Middle Ages** Apr 17 2022 In *The Militant Middle Ages* Tommaso di Carpegna Falconieri delves into common perceptions of the Middle Ages and how these views shape current political contexts, offering a new lens for scrutinizing contemporary society through its instrumentalization of the medieval past.

**Understanding and Managing Threats to the Environment in South Eastern Europe** Jul 08 2021 This volume presents reflections on a variety of environmental issues in South-Eastern Europe from diverse contemporary scientific disciplines. The contributions address many crucial issues including national environmental policies, economic instruments for preventing crimes against the environment, international waste trafficking, threats to air, water and soil due to mining, management of dump areas, environment protection and food safety from a perspective of public health. The book will be a useful resource for researchers, developers and decision makers interested in the stability and sustainable development of the South-Eastern European countries.

**Nanoengineering** Oct 11 2021 *Nanoengineering: Global Approaches to Health and Safety Issues* provides a global vision on the impact of engineered nanomaterials both for the consumer/general public and in occupational settings. The book also presents a hint on what can be expected for the future from nanomaterials and their effects on our lives, both at home and at work. In addition, users will find valuable information on nanomaterials' irreplaceable value and their risks for health, safety, and environmental issues. Case studies illustrate key points and provide information on important processes. Provides a global vision on the different aspects related to nanosafety and a synthesis of the information available Gives all the information required for precision decision-making in a single book, offering both general public and occupational aspects Contains separate chapters on each subject written by world-renowned contributors Presents a complete vision of the problem, with perspectives on global approaches Includes case studies that illustrate important processes

**Remote Sensing of the Terrestrial Water Cycle** Jan 14 2022 *Remote Sensing of the Terrestrial Water Cycle* is an outcome of the AGU Chapman Conference held in February 2012. This is a comprehensive volume that examines the use of available remote sensing satellite data as well as data from future missions that can be used to expand our knowledge in quantifying the spatial and temporal variations in the terrestrial water cycle. Volume highlights include: - An in-depth discussion of the global water cycle - Approaches to various problems in climate, weather, hydrology, and agriculture - Applications of satellite remote sensing in measuring precipitation, surface water, snow, soil moisture, groundwater, modeling, and data assimilation - A description of the use of satellite data for accurately estimating and monitoring the components of the hydrological cycle - Discussion of the measurement of multiple geophysical variables and properties over different landscapes on a temporal and a regional scale *Remote Sensing of the Terrestrial Water Cycle* is a valuable resource for students and research professionals in the hydrology, ecology, atmospheric sciences, geography, and geological sciences communities.

**Transnational Environmental Crime** Feb 15 2022 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature. The topics covered range from pollution and waste to biodiversity and wildlife crimes, and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change. The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it. Differential victimisation and contemporary developments in environmental law enforcement are also considered. Collectively, these essays lay the foundations for a criminology that is forward looking, global in its purview, and that deals with the key environmental issues of the present age.

**Overhauling America's Healthcare Machine** May 26 2020 Dr. Doug Perednia reveals how government and insurance company-created complexity is tearing apart the U.S. healthcare system and presents a new model for healthcare reform that will actually work. Leading physician, healthcare expert, and entrepreneur Perednia identifies specific inefficiencies and worthless administrative overhead that is making healthcare inaccessible or unaffordable for millions, driving providers from practice, and adding over half a trillion dollars annually to healthcare spending. Next, he shows how to design a far simpler system: one that delivers care to everyone by drawing on the best of both market efficiency and public "universality." Recent "health care reform" involved 2,000+ pages of complex, special interest-friendly legislation--including 168 new federal committees, program cuts, and higher taxpayer costs. Perednia offers a better way: a logical, comprehensive, and non-partisan and apolitical approach that gives providers and their patients more medical and financial security, enhances competition, would save some \$570 billion annually--and still gives individual patients real freedom. This plan isn't wishful thinking: *Overhauling America's Healthcare Machine* backs it up with detailed logic and objective calculations. Even after the recent endless debate about healthcare, the system is still broken--and unless it's fixed, it will break us all. Perednia shows how to finally fix it: once and for all.

**Peace through Tourism** May 18 2022 *Peace through tourism* refers to a body of analysis which suggests tourism may contribute to cross-cultural understanding, tolerance and even peace between communities and nations. What has been largely missing to date is a sustained critique of the potential and capacities of tourism to foster global peace. This timely volume fills this void, by providing a critical look at tourism in order to ascertain its potential as a social force to promote human rights, justice and peace. It presents an alternative characterisation of the possibilities for peace through tourism: embedding an understanding of the phenomenon in a deep grounding in multi-disciplinary perspectives and envisioning tourism in the context of human rights, social justice and ecological integrity. Such an approach engages the ambivalence and dichotomy of views held on peace tourism by relying on a pedagogy of peace. It integrates a range of perspectives from scholars from many disciplinary backgrounds, non-governmental organisations (NGOs), tourism industry operators and community, all united by an interest in critical approaches to understanding peace through tourism. Additionally diverse geo-political contexts are represented in this book from the USA, India, Japan, Israel, Palestine, Kenya, the Koreas, Indonesia, East Timor and Indigenous Australia. Written by leading academics, this groundbreaking book will provide students, researchers and academics a sustained critique of the potential and capacities of tourism to foster global peace.

**The Oxford Handbook of Clinical Psychology** Feb 21 2020 The exponential growth of clinical psychology since the late 1960s can be measured in part by the extensive literature on the subject. The field has come to be defined as much by its many topics as its many voices. The *Oxford Handbook of Clinical Psychology* synthesizes these decades of literature in one volume. In addition to core sections on topics such as training, assessment, diagnosis, and intervention, the handbook includes chapters devoted to emerging issues in the clinical field, including health care reforms, cultural factors, and technological innovations and challenges. Each chapter offers a review of the most pertinent literature, outlining issues and identifying possibilities for future research.

**Advances in Visual Computing** May 06 2021 It is with great pleasure that we present the proceedings of the 6th International Symposium on Visual Computing (ISVC 2010), which was held in Las Vegas, Nevada. ISVC provides a common umbrella for the four main areas of visual computing including vision, graphics, visualization, and virtual reality. The goal is to provide a forum for researchers, scientists, engineers, and practitioners throughout the world to present their latest research findings, ideas, developments, and applications in the broader area of visual computing. This year, the program consisted of 14 oral sessions, one poster session, 7 special tracks, and 6 keynote presentations. The response to the call for papers was very good; we received over 300 submissions for the main symposium from which we accepted 93 papers for oral presentation and 73 papers for poster presentation. Special track papers were solicited separately through the Organizing and Program Committees of each track. A total of 44 papers were accepted for oral presentation and 6 papers for poster presentation in the special tracks.

**Engaging the Muslim World** Jun 26 2020 With clarity and concision, Juan Cole disentangles the key foreign policy issues that America is grappling with today--from our dependence on Middle East petroleum to the promotion of Islamophobia by the American right--and delivers his informed advice on the best way forward. Cole's unique ability to take the true Muslim perspective into account when looking at East-West relations make his insights well-rounded and prescient as he suggests a course of action on fundamental issues like religion, oil, war and peace. With substantive recommendations for the next administration on how to move forward in key countries such as Iraq, Pakistan, Afghanistan, and Iran, *Engaging the Muslim World* reveals how we can repair the damage of the disastrous foreign policy of the last eight years and forge ahead on a path of peace and prosperity. Cole argues: \* Al-Qaeda is not a mass movement like

fascism or communism but rather a small political cult like the American far right circles that produced Timothy McVeigh. \* The Muslim world is not a new Soviet Bloc but rather is full of close allies or potential allies. \* There can be no such thing as American energy independence, we will need Islamic oil to survive as a superpower into the next century. \* Iran is not an implacable enemy of the U.S.--it can and should be fruitfully engaged, which is a necessary step for American energy security since Tehran can play the spoiler in the strategic Persian Gulf. \* America's best hope in Iraq is careful, deliberate military disengagement, rather than either through immediate withdrawal or a century-long military presence--in other words, both the Democrat and Republican presidential candidates are wrong.

*Minerals Yearbook, Volume III: Area Reports: International: Asia and the Pacific* Jan 26 2023 The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development. The Minerals Yearbook includes chapters on approximately 90 commodities and over 175 countries. This volume of the Minerals Yearbook provides an annual review of mineral production and trade and of mineral-related government and industry developments in more than 175 foreign countries. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook.
