Handbook of Metaheuristics

Apr 18 2022 This book provides both the research and practitioner communities with a comprehensive coverage of the metaheuristic methodologies that have proven to be successful in a wide variety of real-world problem settings. Moreover, it is these metaheuristic strategies that hold particular

promise for success in the future. The various chapters serve as stand alone presentations giving both the necessary background underpinnings as well as practical guides for implementation.

Qualitative Analysis of Flavor and Fragrance Volatiles by Glass Capillary Gas

Chromatography Feb 14 2022

Qualitative Analysis of Flavor and Fragrance Volatiles by Glass Capillary Gas Chromatography deals with the application of glass capillary gas chromatography to qualitative analysis of flavor and fragrance volatiles. Topics

range from gas chromatographic system requirements and retention indices to selective detectors, ancillary reactions, and gas chromatography-mass spectrometry. This text is comprised of six chapters; the first of which provides an overview of the use of glass capillary gas chromatography in qualitative analysis of flavor and fragrance volatiles. The discussion then turns to gas chromatographic system requirements with respect to columns, inlets, detectors, and temperature control. The reader is also introduced to the Kovats retention index system, which utilizes a logarithmic scale to describe the retention

behavior of a compound relative to that of the n-paraffin hydrocarbons. The use of selective detectors, such as thermal conductivity, flame ionization, nitrogen-phosphorus, electron capture, and photoionization detectors in qualitative analysis, is also considered. The final two chapters focus on ancillary reactions in glass capillary gas chromatography and general considerations in gas chromatography-mass spectrometry, including interfacing. This book is intended primarily for researchers involved in studies of the volatile constituents of fragrances, food, and natural products.

Haiti Oct 01 2020 A unique, arresting and versatile document of the traumatic earthquake which hit Haiti in 2010 and its aftermath. Encased in a cardboard box, the project comprises 16 unbound posters and a map page which draws attention to the epicentre and its rippling impact on the population of the island. The unique format allows the viewer to absorb each page individually or to hang the entire project. The visual testimony to the events of the the first days after the event are provided by award-winning photographer Ron Haviv and the essay by esteemed writer Simon Winchester.

90 Two Dec 15 2021 *90 Two*
By: Dastan Khalili *DiaVerse*, dia meaning “two” and verse for the poetic rhyme, is a brand-new style of poetry where the only rule is all stanzas must have a maximum of two words. Created by poet Dastan Khalili, the style of *DiaVerse* breathes new life into poetry. The restraint of *DiaVerse* forces poets to use the purest forms of expression. *90 Two* is ninety of Khalili’s *DiaVerse* poems, written over the last five years. He combines his poetic verses with digital artwork and imagery, each conveying a sensation of inspiration that came to life with each poem.
The Science and Technology of Unconventional Oils Nov

01 2020 This book, *The Science and Technology of Unconventional Oils: Finding Refining Opportunities*, intends to report the collective physical and chemical knowledge of unconventional oils (heavy, extra-heavy, sour/acid, and shale oil) and the issues associated with their refining for the production of transportation fuels. It will focus on the discussion of the scientific results and technology activities of the refining of unconventional oils. The presence of reactive and refractory compounds and components that negatively impact refining processing (the "bad actors") are discussed and analyzed. The commercially

available technologies, with their reported improvements and emerging ideas, concepts, and technologies, are described. This comprehensive overview constitutes the basis for establishing technology gaps, and in return sets the science and technology needs to be addressed in the future. In summary, this book incorporates the relevant knowledge of processing unconventional crude oils and of the "Bottom-of-the-Barrel" fraction, describing the related commercially available and emerging technologies to contribute to the identification of existing gaps. Relates physicochemical properties and phenomenological behavior of

unconventional oils to refining challenges Describes commercially available technologies and the problems they solve Lists recent improvements in various processes and identifies technology gaps Explains emerging new refining technologies and the problems they solve Discusses future needs and challenges, and suggests further research and development needs

The Longman Companion to Russia Since 1914 Apr 26 2020
New from the Longman Companions to History Series, Martin McCauley offers a comprehensive and up-to-date reference on every aspect of Russian history and politics since 1914 which serves as an invaluable tool to those interested in Russia. A wealth of information is presented in an accessible, reader-friendly format, with much of the material published for the first time. Materials included are: a political chronology; short essays defining key topics relating to economy, society,

religion and culture with key topics covered (i.e. agriculture, health, the press, planned economy, the Russian Orthodox Church etc.); a guide to Russian nationalities and territories including historical background; a substantial section devoted to politics including extended definitions of political terms (i.e. Leninism, Komosol, Orgburo, Rada, etc.); detailed accounts of the attempted coup of 1991 and the nine Russian Congresses of People's Deputies 1990-1993; detailed information on foreign affairs and security; an invaluable list of office holders and 80 concise biographies; and much more.
Starship Grifters Jul 30 2020

"My favorite read this year. A hilarious space adventure. Hard book to put down." -- Hugh Howey, author of Wool A space-faring ne'er-do-well with more bravado than brains, Rex Nihilo plies the known universe in a tireless quest for his own personal gain. But when he fleeces a wealthy weapons dealer in a high-stakes poker game, he ends up winning a worthless planet...and owing an outstanding debt more vast than space itself! The only way for Rex to escape a lifetime of torture on the prison world Gulagatraz is to score a big payday by pulling off his biggest scam. But getting mixed up in the struggle between the tyrannical

Malarchian Empire and the plucky rebels of the Revolting Front--and trying to double-cross them both--may be his biggest mistake. Luckily for Rex, his frustrated but faithful robot sidekick has the cyber-smarts to deal with buxom bounty hunters, pudgy princesses, overbearing overlords, and interstellar evangelists...while still keeping Rex's martini glass filled.

Essential Oils Natural Remedies Aug 11 2021 The essential guide to lifelong healing with essential oils. The healing potential of essential oils may be limitless, but it's difficult to know how and

where to begin when you don't have a prescription. With over 100 recipes for natural alternatives to traditional medicine, Essential Oils Natural Remedies provides a comprehensive reference to herbal healing without the hassle, expense, and frustration that comes with consulting doctors and taking prescription medication. In these pages, practitioners of all levels will learn a lifetime of herbal remedies from how to treat the urge to itch chicken pox with lavender-tea tree salve to soothing away arthritis symptoms with peppermint oil. Designed for use with any brand of essential oils, this organized and insightful guide

is the only helping hand you'll need for natural healing. Essential Oils Natural Remedies includes: 300 Home Remedies to heal and mitigate symptoms for over 170 different ailments Profiles of 75 Essential Oils plus information on medicinal uses, application methods, blending, and precautions Recipes for Any Brand allow you to make all of the recipes in this book with your preferred brand of essential oils Featuring treatments for: Allergies, Bloating, Congestion, Dry Skin, Flu, Hives, Infection, Leg Cramps, Motion Sickness, Tension Headache, Toothache, Varicose Veins, and much more! Practice herbal healing

Deep Learning May 20 2022

Although interest in machine learning has reached a high point, lofty expectations often scuttle projects before they get very far. How can machine learning—especially deep neural networks—make a real difference in your organization? This hands-on guide not only provides the most practical information available on the subject, but also helps you get started building efficient deep learning

networks. Authors Adam Gibson and Josh Patterson provide theory on deep learning before introducing their open-source DeepLearning4j (DL4J) library for developing production-class workflows. Through real-world examples, you'll learn methods and strategies for training deep network architectures and running deep learning workflows on Spark and Hadoop with DL4J. Dive into machine learning concepts in general, as well as deep learning in particular Understand how deep networks evolved from neural network fundamentals Explore the major deep network architectures, including

Convolutional and Recurrent
Learn how to map specific deep
networks to the right problem
Walk through the fundamentals
of tuning general neural
networks and specific deep
network architectures Use
vectorization techniques for
different data types with
DataVec, DL4J's workflow tool
Learn how to use DL4J natively
on Spark and Hadoop
[The Healing Intelligence of
Essential Oils](#) Jan 16 2022
Explores science's new
biological understanding of
essential oils for improved
immunity and treatment of
degenerative diseases •
Explains how essential oils
convey the complex natural
healing powers of plants,

offering scientifically proven
advantages over synthetic
drugs • Offers revolutionary
essential oil treatments to
ameliorate the side effects of
chemotherapy and other
cancer treatments as well as
for hepatitis, osteoporosis, liver
detoxification, and the
prevention of UV damage and
melanoma • Presents simple
recipes and protocols for
strengthening the immune
system; for treatment of
common ailments, such as
colds, flu, herpes, and candida;
and for pain management
Exploring science's new
biological understanding of
essential oils and their
advantages over synthetic
drugs, renowned

aromatherapist Kurt
Schnaubelt reveals how the
effectiveness of essential oil
treatments stems from our
common biochemical and
cellular heritage with plants.
He explains how essential oils
preserve a plant's complex
natural life-supporting and
immune-building qualities,
developed through millions of
years of interaction with
animals and humans.
Reviewing recent research in
molecular, cellular, and
evolutionary biology, he shows
how the multilayered activity of
plant essences helps maintain
the integrity of our genetic
code--the reason why
pathogens cannot develop
resistance toward essential oils

as they do with antibiotics and antivirals--making essential oils a more effective and sustainable form of treatment for a variety of health problems. Laying to rest old arguments over essential oils' alleged toxicity and whether they can be ingested or used undiluted, Schnaubelt presents simple recipes and protocols for treating and preventing common ailments, such as colds, flu, herpes, and candida, as well as for pain management. Offering new essential oil treatment opportunities for hepatitis, osteoporosis, liver detoxification, and the prevention of UV damage and melanoma, he shows how

essential oils can also ameliorate the debilitating side effects of chemotherapy and other cancer treatments as well as how even home use of essential oils for relaxation or skin care can help build one's immunity and overall well-being.

JPRS Report Jul 22 2022
[Spiking Neuron Models](#) Oct 25 2022
Neurons in the brain communicate by short electrical pulses, the so-called action potentials or spikes. How can we understand the process of spike generation? How can we understand information transmission by neurons? What happens if thousands of neurons are coupled together in a

seemingly random network? How does the network connectivity determine the activity patterns? And, vice versa, how does the spike activity influence the connectivity pattern? These questions are addressed in this 2002 introduction to spiking neurons aimed at those taking courses in computational neuroscience, theoretical biology, biophysics, or neural networks. The approach will suit students of physics, mathematics, or computer science; it will also be useful for biologists who are interested in mathematical modelling. The text is enhanced by many worked examples and illustrations. There are no

mathematical prerequisites beyond what the audience would meet as undergraduates: more advanced techniques are introduced in an elementary, concrete fashion when needed.

René Hague Jun 28 2020

Tropical Deforestation and Climate Change Nov 25 2022

Tropical deforestation, fires and emissions: measurement and monitoring; How to reduce deforestation emissions for carbon credit: compensated reduction; Policy and legal frameworks for reducing deforestation emissions.

Atom-Photon Interactions Nov 13 2021 Atom-Photon Interactions: Basic Processes and Applications allows the

reader to master various aspects of the physics of the interaction between light and matter. It is devoted to the study of the interactions between photons and atoms in atomic and molecular physics, quantum optics, and laser physics. The elementary processes in which photons are emitted, absorbed, scattered, or exchanged between atoms are treated in detail and described using diagrammatic representation. The book presents different theoretical approaches, including: Perturbative methods The resolvent method Use of the master equation The Langevin equation The optical Bloch equations The dressed-atom

approach Each method is presented in a self-contained manner so that it may be studied independently. Many applications of these approaches to simple and important physical phenomena are given to illustrate the potential and limitations of each method.

Essential Oils for Beginners Dec 23 2019 A New York Times bestseller—the best way to start. What are essential oils? Which ones should you keep in your personal apothecary? And most importantly, how can you use them to heal and enhance well-being? Essential Oils for Beginners is the definitive handbook for learning all of this and more as you discover

the power of essential oils. Learn how to expertly blend essential oils and create your own aromatherapy mixes to soothe your body, mind, and home. With 85 remedies that address everything from uplifting your mood to treating an upset stomach to cosmetic uses for your hair and skin, you'll have all of the guidance you need to devote yourself to natural healing and health. Essential Oils for Beginners includes: Essential Oils 101—Learn what essential oils are and how to build your collection and store it. Cures for Mind and Body—Harness the power of essential oils for common ailments like headaches, morning sickness,

muscle pain, stress, and more. Cosmetic and Home Uses—Explore the many uses of essential oils—as an air freshener, in candles and cleaning supplies, as a bug repellent, and much more. If you're interested in natural remedies, open this book and learn everything you need to use the power of essential oils for healing.

The Printers' Manual Feb 26 2023 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will

see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. The Maisky Diaries Mar 18 2022 The terror and purges of Stalin's Russia in the 1930s discouraged Soviet officials from leaving documentary records let alone keeping personal diaries. A remarkable exception is the unique diary

assiduously kept by Ivan Maisky, the Soviet ambassador to London between 1932 and 1943. This selection from Maisky's diary, never before published in English, grippingly documents Britain's drift to war during the 1930s, appeasement in the Munich era, negotiations leading to the signature of the Ribbentrop-Molotov Pact, Churchill's rise to power, the German invasion of Russia, and the intense debate over the opening of the second front. Maisky was distinguished by his great sociability and access to the key players in British public life. Among his range of regular contacts were politicians (including Churchill,

Chamberlain, Eden, and Halifax), press barons (Beaverbrook), ambassadors (Joseph Kennedy), intellectuals (Keynes, Sidney and Beatrice Webb), writers (George Bernard Shaw, H. G. Wells), and indeed royalty. His diary further reveals the role personal rivalries within the Kremlin played in the formulation of Soviet policy at the time. Scrupulously edited and checked against a vast range of Russian and Western archival evidence, this extraordinary narrative diary offers a fascinating revision of the events surrounding the Second World War. *Airachnid Attacks!*. Jun 08 2021 Roll out with Optimus Prime,

Bumblebee and the rest of the heroic Autobots as they battle the evil Decepticons. When Arcee is ambushed by her arch-enemy, Airachnid, will she be able to save both herself and her partner, Jack? Meanwhile, the Bots need to find a cure when Optimus Prime is struck down with Cybionic plague.

An Introduction to the Old Testament in Greek Mar 30 2023

Concepts in Thermal Physics
Apr 06 2021 This text provides a modern introduction to the main principles of thermal physics, thermodynamics and statistical mechanics. The key concepts are presented and

new ideas are illustrated with worked examples as well as description of the historical background to their discovery. Sixty Five Hours Dec 03 2020 Cameron Fletcher and Lucas Hensley are advertising executives who have Sixty Five Hours to pull together the campaign of their careers. Sixty Five Hours to get along. Sixty Five Hours to not kill each other. Sixty Five Hours to fall in love. ** First published in 2012. New Cover in 2019 - No additional content has been added.

Security and Territoriality in the Persian Gulf Jan 04 2021 This study presents the story of successes and failures of the treatment of security matters

pertaining to territorial and boundary affairs in the maritime areas of the Persian Gulf, and at the same time provides an example of the impact of territoriality on world-wide maritime security.

Master Clinicians on Treating the Regressed Patient Jan 22 2020

Structures of Capital Sep 11 2021 Although market importance is acknowledged, this work's emerging theme is the need to account for the ways in which multiple forms of social organization -- elite groups, communities & government structures -- influence economic processes.

Fundamentals of Psychology Mar 25 2020 Fundamentals of

Psychology: An Introduction focuses on issues that cut through the artificial boundaries commonly held in the study of behavior. The book reviews the nature of the organism in terms of basic neurology, including the neurological organization of the central nervous system and the general features of brain development. The author also examines the normal course of development of the visual systems. He discusses fixed patterns of behavior and the developmental processes that include emotional behavior, self-control, language use, perceptual, and cognitive development. The author then explains the use of statistical

concept in psychological research, as well as the psychological methods of inquiry that involves variable manipulation and observation of effects. The author also discusses learning and motivation theory including the theories of Pavlov, Skinner, and Premack. He discusses the organism as an information processor using short- and long-term memory, and the mind as having physical aspects such as brain codes and a brain structure known as the corpus callosum. This book is helpful for psychiatrists, psychologists, behavioral scientists, students and professors in psychology. *City Stages* Aug 30 2020 In

every major city, there exists a complex exchange between urban space and the institution of the theatre. *City Stages* is an interdisciplinary and materialist analysis of this relationship as it has existed in Toronto since 1967. Locating theatre companies ? their sites and practices ? in Toronto?s urban environment, Michael McKinnie focuses on the ways in which the theatre has adapted to changes in civic ideology, environment, and economy. Over the past four decades, theatre in Toronto has been increasingly implicated in the civic self-fashioning of the city and preoccupied with the consequences of the changing urban political economy. *City*

Stages investigates a number of key questions that relate to this pattern. How has theatre been used to justify certain forms of urban development in Toronto? How have local real estate markets influenced the ways in which theatre companies acquire and use performance space? How does the analysis of theatre as an urban phenomenon complicate Canadian theatre

historiography? McKinnie uses the St. Lawrence Centre for the Arts and the Toronto Centre for the Performing Arts as case studies and considers theatrical companies such as Theatre Passe Muraille, Toronto Workshop Productions, Buddies in Bad Times, and Necessary Angel in his analysis. City Stages combines primary archival research with the scholarly literature emerging

from both the humanities and social sciences. The result is a comprehensive and empirical examination of the relationship between the theatrical arts and the urban spaces that house them.

Introduction to the Septuagint May 27 2020

"Examines the origins, language, textual history, and reception of the Greek Old Testament"--
