"A case against religion and a description of the ways in which religion is man-made"--Provided by the publisher. This book is a 30 Day plan for gaining more freedom from religion. "Freedom From Religion in 30 Days" (FFR) is an antidote for anti-democratic tendencies, irrationality, tribalism and intolerance. It also offers relief from the mental constraints of dogmas, creeds, and superstitions. Religion, as promoted by Christian Nationalists, obstructs and threatens our wellbeing and freedoms. Christopher Hitchens best-seller, "God Is Not Great: How Religion Poisons Everything," seems increasingly apt. In FFR, a case is made that religions poison not quite everything, but more than enough to make it a mental health and quality of life hazard. Whether you're a believer, a devout freethinker, or someone in-between, you will find each of the 30 days meets three standards: 1) engaging; 2) entertaining; and 3) informative. My goal is that FFR will hold your attention for a solid month, and benefit you even longer. WHY IT MATTERS FFR is about breaking away from the false claims and destructive effects of religion. It's also about the positive nature of a REAL wellness way to think more critically, live more exuberantly and enjoy more personal liberties. A large number of freedoms are available for the taking, once mental constraints of creeds and dogmas are eliminated. This book promotes: 1. Science-based critical thinking, using reason to guide important decisions. Few decisions are as important as what you believe about religions, especially the one in which you were indoctrinated. 2. Happiness, joy, fun, adventure, meaning and purpose in life. These are the key elements in the REAL wellness dimension of exuberance. 3. Freedom to live the kind of life you desire. This is the liberty dimension of REAL wellness. THE 30 DAY FORMAT All 30 essays address some aspect of religion as it affects mental freedoms that shape values, commitments, beliefs, behaviors and ultimately quality of life and wellbeing. The format is inspired by Wilfred Funk's, "30 Days to a More Powerful Vocabulary." Within the 30 essays are four self-evaluations focused upon reason, exuberance, personal liberties and management of stress. Over 30 topics are covered in the essays, though religion is a theme throughout. The topics, besides religion in general and Christianity in particular, include politics, heroic freethinkers, mountebanks, dubious and needed holidays, ethics, prayers, play, commandments, parenting, happiness, sexuality, doubt, aging and death. In addition to informing and entertaining, FFR advances skills and awareness needed to slow the frightful trends that threaten our national interests. THE PRISON OF BELIEF Although Christianity no longer has the power it wielded in the Middle Ages, and thus no longer engages in atrocities, such as the Inquisition's auto de fé carnival-like public executions of heretics, it has another insidious liability--it imprisons the brains of adherents, thereby diminishing our democracy and crippling our personal freedoms and opportunities for exuberant lives. James Haught put it this way: "When people accept supernatural claims of a religion, their lives are altered. They commit themselves to belief in miracles, prophecies and similar magic, which orients their view of reality. It confines them--hindering their ability to consider other possibilities. This narrowed lifestyle can be called 'the prison of belief.' This book will delight you if you're no longer willing to go along with pabulum babble in ritual blather, such as In God we trust, so help me God or God bless America. ===== TABLE OF CONTENTS DEDICATION PRAISE FOR FREEDOM FROM RELIGION FOREWORD INTRODUCTION THE 30 DAYS FOR FREEDOM FROM RELIGION Day 1 Questions To Guide A REAL Wellness Philosophy and Lifestyle Day 2 Religion and Wellbeing Day 3 Perspectives on Radical Islam and Christian Nationalism Day 4 Doubt: A Vital Quality for Effective Decision-Making Day 5 Why Catholics Should Consider Leaving the Church Day 6 An Upgrade from 10 Commandments to 10 REAL Commitments Day 7 Use Your Mind and You Will Find Nothing Fails Like Prayer Day 8 The National Day of Prayer Or a National Day of Reason Day 9 Exceptional People, the Winter Solstice and Christmas Day 10 Self-Evaluation to Estimate Your Experience of Reason Day 11 It's Difficult to be Well but, w/a Little Bit of Luck, You Might... With Bible citations provided to support each assertion, author Peter James utilizes his 4-decade long study of biblical scripture and presents a genuinely authentic "why not let the Bible speak for itself" approach to answering the questions and accusations brought up by Christopher Hitchens in his book and debates. This book will evoke feelings that are not for the faint of heart and easily offended. Starting from the introduction, the author challenges his readers to open their bibles regardless of faith or lack thereof, to take on Christopher Hitchens with scriptural evidence rather than man-made interpretation and opinion. With the absence of a religious agenda, doctrine, and personal bias, "God Is Great: Bible Rebuttal to Christopher Hitchens" will leave you questioning everything you've ever known about religion, the bible, and god. National Book Award Finalist. How did humanity originate and why does a species like ours exist on this planet? Do we have a special place, even a destiny in the universe? Where are we going, and perhaps, the most difficult question of all, "Why?" In The Meaning of Human Existence, his most philosophical work to date, Pulitzer Prize-winning biologist Edward O. Wilson grapples with these and other existential questions, examining what makes human beings supremely different from all other species. Searching for meaning in what Nietzsche once called "the rainbow colors" around the outer edges of knowledge and imagination, Wilson takes his readers on a journey, in the process bridging science and philosophy to create a twenty-first-century treatise on human existence--from our earliest inception to a provocative look at what the future of mankind portends. Continuing his groundbreaking examination of our "Anthropocene Epoch," which he began with The Social Conquest of Earth, described by the New York Times as "a sweeping account of the human rise to domination of the biosphere," here Wilson posits that we, as a species, now know enough about the universe and ourselves that we can begin to approach questions about our place in the cosmos and the meaning of intelligent life in a systematic, indeed, in a testable way. Once criticized for a purely mechanistic view of human life and an overreliance on genetic predetermination, Wilson presents in The Meaning of Human Existence his most expansive and advanced theories on the sovereignty of human life, recognizing that, even though the human and the spider evolved similarly, the poet's sonnet is wholly different from the spider's web. Whether attempting to explicate "The Riddle of the Human Species," "Free Will," or "Religion"; warning of "The Collapse of Biodiversity"; or even creating a plausible "Portrait of E.T.," Wilson does indeed believe that humanity holds a special position in the known universe. The human epoch that began in biological evolution and passed into pre-, then recorded, history is now more than ever before in our hands. Yet alarmed that we are about to abandon natural selection by redesigning biology and human nature as we wish them, Wilson soberly concludes that advances in science and technology bring us our greatest moral dilemma since God stayed the hand of Abraham. The way of success is the way of continuous pursuit of knowledge" - Abbey Beathan "I did not, I wish to state, become a journalist because there was no other 'profession' that would have me. I became a journalist because I did not want to rely on newspapers for information." Love, Poverty and War: Journeys and Essays showcases America's leading polemicist's rejection of consensus and cliché, whether he's reporting from abroad in Indonesia, Kurdistan, Iraq, North Korea, or Cuba, or when his pen is targeted mercilessly at the likes of William Clinton, Mother Theresa ("a fanatic, a fundamentalist and a fraud"), the Dalai Lama, Noam Chomsky, Mel Gibson and Michael Bloomberg. Hitchens began the nineties as a "darling of the left" but has become more of an "unaffiliated radical" whose targets include those on the "left," who he accuses of "fudging" the issue of military intervention in the Balkans, Afghanistan and Iraq. Yet, as Hitchens shows in his reportage, cultural and literary criticism, and opinion essays from the last decade, he has not jumped ship and joined the right but is faithful to the internationalist, contrarian and democratic ideals that have always informed his work. For thousands of years, the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed, the faithful often view converting others as an obligation of their faith—and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried-and-true tradition of religious evangelism, A Manual for Creating Atheists offers the first-ever guide not for talking people into faith—but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality, and ultimately embrace reason. "A case against religion and a description of the ways in which religion is man-made"--Provided by the publisher. The New York Times bestseller – a "crystal-clear, constantly engaging" (Jared Diamond) exploration of the role that religious belief plays in our lives and our interactions For all the thousands of books that have been written about religion, few until this one have attempted to examine it scientifically: to ask why—and how—it has shaped so many lives so strongly. Is religion a product of blind evolutionary instinct or rational choice? Is it truly the best way to live a moral life? Ranging through biology, history, and psychology, Daniel C. Dennett charts religion's evolution from "wild" folk belief to "domesticated" dogma. Not an antireligious screed but an unblinking look beneath the veil of orthodoxy, Breaking the Spell will be read and debated by believers and skeptics alike. Includes never-before-collected quotes from the controversial best-selling author on hundreds of subjects--from atheism and alcoholism to Iraq and George Orwell. In god is Not Great Hitchens turned his formidable eloquence and rhetorical energy to the most controversial issue in the world: God and religion. The result is a devastating critique of religious faith god Is Not Great is the ultimate case against religion. In a series of acute readings of the major religious texts, Christopher Hitchens demonstrates the ways in which religion is man-made, dangerously sexually repressive and distorts the very origins of the cosmos. Above all, Hitchens argues that the concept of an omniscient God has profoundly damaged humanity, and proposes that the world might be a great deal better off without 'him'. In this book, we have hand-picked the most sophisticated, unanticipated, absorbing (if not at times crackpot!), original and musing book reviews of "God Is Not Great: How Religion Poisons Everything." Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all. Whether you're a lifelong believer, a devout atheist, or someone who remains uncertain about the role of religion in our lives, this insightful manifesto will engage you with its provocative ideas. With a close and studied reading of the major religious texts, Christopher Hitchens documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix. In the tradition of Bertrand Russell's Why I Am Not a Christian and Sam Harris's The End of Faith, Christopher Hitchens makes the ultimate case against religion. "This debate appeared originally in Christianity today, and is re-printed in this format with permission"--T.p. verso. "All first-rate criticism first defines what we are confronting," the late, great jazz critic Whitney Balliett once wrote. By that measure, the essays of Christopher Hitchens are in the first tier. For nearly four decades, Hitchens has been telling us, in pitch-perfect prose, what we confront when we grapple with first principles—the principles of reason and tolerance and skepticism that define and inform the foundations of our civilization—principles that, to endure, must be defended anew by every generation. "A short list of the greatest living conversationalists in English," said The Economist, "would probably have to include Christopher Hitchens, Sir Patrick Leigh-Fermor, and Sir Tom Stoppard. Great brilliance, fantastic powers of recall, and quick wit are clearly valuable in sustaining conversation at these cosmic levels. Charm may be helpful, too." Hitchens—who staunchly declines all offers of knighthood—hereby invites you to take a seat at a democratic conversation, to be engaged, and to be reasoned with. His knowledge is formidable, an encyclopedic treasure, and yet one has the feeling, reading him, of hearing a person thinking out loud, following the inexorable logic of his thought, wherever it might lead, unafraid to expose fraudulence, denounce injustice, and excoriate hypocrisy. Legions of readers, admirers and detractors alike, have learned to read Hitchens with something approaching awe at his felicity of language, the oxygen in every sentence, the enviable wit and his readiness, even eagerness, to fight a foe or mount the ramparts. Here, he supplies fresh perceptions of such figures as varied as Charles Dickens, Karl Marx, Rebecca West, George Orwell, J.G. Ballard, and Philip Larkin are matched in brilliance by his pungent discussions and intrepid observations, gathered from a lifetime of traveling and reporting from such destinations as Iran, China, and Pakistan. Hitchens's directness, elegance, lightly carried erudition, critical and psychological insight, humor, and sympathy—applied as they are here to a dazzling variety of subjects—all set a standard for the essayist that has rarely been matched in our time. What emerges from this indispensable volume is an intellectual self-portrait of a writer with an exemplary steadiness of purpose and a love affair with the delights and seductions of the English language, a man anchored in a profound and humane vision of the human longing for reason and justice. When a health scare puts him in the hospital, Eric Weiner—an agnostic by default—finds himself tangling with an unexpected question, posed to him by a well-meaning nurse. "Have you found your God yet?" The thought of it nags him, and prods him—and ultimately launches him on a far-flung journey to do just that. Weiner, a longtime "spiritual voyeur" and inveterate traveler, realizes that while he has been privy to a wide range of religious practices, he's never seriously considered these concepts in his own life. Face to face with his own mortality, and spurred on by the question of what spiritual principles to impart to his young daughter, he decides to correct this omission, undertaking a worldwide exploration of religions and hoping to come, if he can, to a personal understanding of the divine. The journey that results is rich in insight, humor, and heart. Willing to do anything to better understand faith, and to find the god or gods that speak to him, he travels to Nepal, where he meditates with Tibetan lamas and a guy named Wayne. He sojourns to Turkey, where he whirls (not so well, as it turns out) with Sufi dervishes. He heads to China, where he attempts to unblock his chi; to Israel, where he studies Kabbalah, sans Madonna; and to Las Vegas, where he has a close encounter with Raelians (followers of the world's largest UFO-based religion). At each stop along the way, Weiner tackles our most pressing spiritual questions: Where do we come from? What happens when we die? How should we live our lives? Where do all the missing socks go? With his trademark wit and warmth, he leaves no stone unturned. At a time when more Americans than ever are choosing a new faith, and when spiritual questions loom large in the modern age, MAN SEEKS GOD presents a perspective on religion that is sure to delight, inspire, and entertain. A New York Times bestseller people can believe in—by "a pioneer of the new urban Christians" (Christianity Today) and the "C.S. Lewis for the 21st century" (Newsweek). Timothy Keller, the founding pastor of Redeemer Presbyterian Church in New York City, addresses the frequent doubts that skeptics, and even ardent believers, have about religion. Using literature, philosophy, real-life conversations, and potent reasoning, Keller explains how the belief in a Christian God is, in fact, a sound and rational one. To true believers he offers a solid platform on which to stand their ground against the backlash to religion created by the Age of Skepticism. And to skeptics, atheists, and agnostics, he provides a challenging argument for pursuing the reason for God. Twelve-year-old Isaveth eagerly accepts an opportunity to study at the most exclusive magical school in the city but her scholarship might prove be more a trap than a gift. The outspoken half of magic duo Penn & Teller presents an atheistic reinterpretation of the Ten Commandments, discussing why doubt, skepticism, and wonder should be celebrated and offering humorous stories from his own experiences. Religious scholar Hart argues that contemporary antireligious polemics are based not only upon conceptual confusions but upon facile simplifications of history and provides a powerful antidote to the New Atheists' misrepresentations of the Christian past. In 2007, Christopher Hitchens, Richard Dawkins, Sam Harris, and Daniel Dennett filmed a landmark discussion about modern atheism. The video went viral. Now in print for the first time, the transcript of their conversation is illuminated by new essays from three of the original participants and an introduction by Stephen Fry. At the dawn of the new atheist movement, the thinkers who became known as "the four horsemen," the heralds of religion's unraveling—Christopher Hitchens, Richard Dawkins, Sam Harris, and Daniel Dennett—sat down together over cocktails. What followed was a rigorous, pathbreaking, and enthralling exchange, which has been viewed millions of times since it was first posted on YouTube. This is intellectual inquiry at its best: exhilarating, funny, and unpredictable, sincere and probing, reminding us just how varied and colorful the threads of modern atheism are. Here is the transcript of that conversation, in print for the first time, augmented by material from the living participants: Dawkins, Harris, and Dennett. These new essays, introduced by Stephen Fry, mark the evolution of their thinking and highlight particularly resonant aspects of this epic exchange. Each man contends with the most fundamental questions of human existence while challenging the others to articulate their own stance on God and religion, cultural criticism, spirituality, debate with people of faith, and the components of a truly ethical life. Praise for The Four Horsemen "This bracing exchange of ideas crackles with energy. It's fascinating to watch four first-class minds explore a rugged intellectual terrain. . . . The text affords a different, more reflective way of processing the truly vital exchange of ideas. . . . I commend the book to those seeking an honest reckoning with their religion—and those curious about how the world looks from a rigorously naturalistic and atheistic

point of view.”—Pittsburgh Post-Gazette “The full, electrifying transcript of the one and only conversation between the quartet of luminaries dubbed the ‘four horsemen’ of the New Atheism, which took place in Washington, D.C., in 2007. Among the vast range of ideas and questions they discuss: Is it ever possible to win a war of ideas? Is spirituality the preserve of the religious? And, are there any truths you would rather not know?”—The Bookseller (UK) (starred review) Presents excerpts on the subject of religion from the writings of such notable non-believers as John Stuart Mill, Karl Marx, Charles Darwin, Mark Twain, H. L. Mencken, Albert Einstein, Richard Dawkins, and Salman Rushdie. This volume explores three trials conducted in Athens in the fourth century BCE; the defendants were all women charged with undertaking ritual activities, but much of the evidence remains a mystery. The author reveals how these trials provide a vivid glimpse of the socio-political environment of Athens during the early-mid fourth century BCE. Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. He has been both a socialist opposed to the war in Vietnam and a supporter of the U.S. war against Islamic extremism in Iraq. He has been both a foreign correspondent in some of the world's most dangerous places and a legendary bon vivant with an unquenchable thirst for alcohol and literature. He is a fervent atheist, raised as a Christian, by a mother whose Jewish heritage was not revealed to him until her suicide. In other words, Christopher Hitchens contains multitudes. He sees all sides of an argument. And he believes the personal is political. This is the story of his life, lived large. Christopher Hitchens, described in the London Observer as “one of the most prolific, as well as brilliant, journalists of our time” takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell’s *Why I Am Not a Christian* and Sam Harris’s recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope’s awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix. "Religion poisons everything." So say Christopher Hitchens and the entire cast of New Atheists. Thus, if you want to make the world a better place, the New Atheists would recommend getting rid of religion. But John Gravino disagrees. In *The Immoral Landscape*, John Gravino argues that the real problem with the world is not religion; it is human nature. And the problem with our human nature is located in our minds. The key to making the world a better place, therefore, depends on the healing of the human mind. But how exactly do we go about the important business of healing our minds? The world of science has been amazingly successful in so many areas, but the one glaring exception to the nearly flawless track record of the sciences is in the study of mental disorder. While science has been able to find cures for so many physical diseases, a cure for mental illness has proven elusive. John Gravino offers an explanation. Science is unable to cure the mind because the mind is a fundamentally different organism. The human mind is spiritual, not physical; and thus, it obeys the spiritual laws of the universe. If you want to make the world a better place, John Gravino argues that getting rid of religion—the true source of the spiritual laws of the universe—is the worst thing you can do. In *The Immoral Landscape*, John Gravino presents his case, based on empirical evidence, that the only thing that can save the world is true religion because only true religion has the power to heal the human mind. And what is that true religion? It is true Christianity, of course! This book is a real game-changer for sure. It will knock you out! You can follow John Gravino online at newwalden.org. An analysis of the challenge that India's poison culture posed for colonial rule and toxicology's creation of a public role for science. There are many different Poisons in the world today like everyday things we have lying around. Good examples would be drain cleaner, antifreeze, Toilet bowl cleaner and many others. Things like these we wouldn't think of drinking, but there are spiritual poisons that we drink every day and think nothing of the fact that they are killing us spiritually. @page { margin: 0.79in } p { margin-bottom: 0.1in; line-height: 120% } a:link { so-language: zxx } I was one who was digesting this poison for almost forty years until one day my eyes were opened, and I told myself, no more. I quit letting people feed it to me and refused to take it. You might be wondering what this poison is? How can we drink spiritual poison? And why would we do this anyway? It is getting close to forty years now since I started writing a book entitled “Poison Comes in More than Bottles.” I started writing it when all I had was an old typewriter, and all I knew how to do was use two fingers to type. A lot has changed since then. I now have a computer, and I learned how to type with all my fingers. But that is not all that changed. My whole outlook is entirely different on this subject, and I hope that this writing is in that kind of spirit. Going back almost forty years, I was a very bitter person because I was giving poison in small doses for so long and when I discovered this it made me enraged with those who were responsible for giving me this poison. But time has changed all this. My bitterness is gone, and it has changed to pity for those who are blind to what they are doing. Those responsible are being deceived into thinking they are doing it for God when the truth is their enemies are making them do it, and some day they are going to find this out. But by then it will be too late. That's why I feel sad and not anger. When I went back and read the old manuscript for the book, I could see my anger and bitterness in my writings. A lot has changed since then, and my attitude was one of them, and I now feel it is time to expose those who did this to me but in a spirit of love not hate. Those that were responsible are still dispensing this poison to others that I care about and love. Even as I write this, my heart is heavy, and I figure it is time to expose them before I see others die spiritually from this poison and that is what this writing is all about. @page { margin: 0.79in } p { margin-bottom: 0.1in; line-height: 120% } a:link { so-language: zxx } When starting to do the rewrite of the original book that I started writing some years ago the first thing I did was to do a search on the Internet to see if anyone else had written something on this subject, this was done to make sure there weren't repeats. I did a Google search and typed in “Spiritual Poison.” It came up with all kinds of stuff, but nothing about what I wanted to write about on this topic. There were other writings, but only small articles so with out anymore delay let us start. Man has been creating gods for the last 40 000 years in order to make sense of himself and to explain life as it was primitively perceived before science developed, knowledge expanded and with it our factual understanding of where we come from, who we are and how we came to be here on our little blue planet. Not a single god had anything to do with creating you or anything at all for that matter. Not even your god, the one you were brought up and indoctrinated with. This book is an attempt to firstly explain how the universe was formed. How planets, and eventually us, evolved over a period of 13.73 billion years based on facts, derived from science, verified, peer-reviewed and corroborated and by also coming to the same conclusions using vastly different methods as opposed to creationist fairytales and superstition. If you understand the basics of evolution, then the second part in which Islam and Christianity are exposed for what they are, may give you some perspective of how ‘religion poisons everything’, in the words of the late great Christopher Hitchens. This book, is not only a consciousness raiser regarding the delusion that religion imposes and the biblical past and current violence it perpetually perpetrates, despite its desperate claims to the contrary, but also hopefully, will help to eradicate its theocratically, skewed fundamentalism where extremism finds its wings. It's a book about truth. It is about morality and intellectual honesty and unveiling the mask of religion and exposing the delusion of blind faith through reason. Exposing these religions with their ‘cult like’ delusional inaccuracies cannot be underestimated. Our future, as a species, depends on it. In the words of Stephen Roberts: ‘When you understand why you dismiss all the other possible gods, you will understand why I dismiss yours.’ Put your belief in people and love. Imaginary gods do not deserve them. Quote “The amount of research that went into this book is prodigious – exceeding what I have seen in volume and scope in all of the PhD theses that I edited over the years!” Editor’s comment. "This collection of essays brings together some of the finest pieces Hitchens published over the last two decades for the first time in one book, addressing with characteristic wit and erudition the subjects he is best known for, including: the case against God, faith and religious observance; the case for intervention in Iraq; indictments of towering political figures like Bill and Hillary Clinton, Tony Blair, and Henry Kissinger; and celebrations of the writers and thinkers whose work meant most to him"-- On June 8, 2010, while on a book tour for his bestselling memoir, *Hitch-22*, Christopher Hitchens was stricken in his New York hotel room with excruciating pain in his chest and thorax. As he would later write in the first of a series of award-winning columns for *Vanity Fair*, he suddenly found himself being deported "from the country of the well across the stark frontier that marks off the land of malady." Over the next eighteen months, until his death in Houston on December 15, 2011, he wrote constantly and brilliantly on politics and culture, astonishing readers with his capacity for superior work even in extremis. Throughout the course of his ordeal battling esophageal cancer, Hitchens adamantly and bravely refused the solace of religion, preferring to confront death with both eyes open. In this riveting account of his affliction, Hitchens poignantly describes the torments of illness, discusses its taboos, and explores how disease transforms experience and changes our relationship to the world around us. By turns personal and philosophical, Hitchens embraces the full panoply of human emotions as cancer invades his body and compels him to grapple with the enigma of death. *MORTALITY* is the exemplary story of one man's refusal to cower in the face of the unknown, as well as a searching look at the human predicament. Crisp and vivid, veined throughout with penetrating intelligence, Hitchens's testament is a courageous and lucid work of literature, an affirmation of the dignity and worth of man. Did food poisoning cause the Black Plague, the Salem witch-hunts, and other significant events in human history? In this pathbreaking book, historian Mary Kilbourne Matossian argues that epidemics, sporadic outbursts of bizarre behavior, and low fertility and high death rates from the fourteenth to the eighteenth centuries may have been caused by food poisoning from microfungi in bread, the staple food in Europe and America during this period. "A bold book with a stimulating thesis. Matossian's claims for the role of food poisoning will need to be incorporated into any satisfactory account of past demographic trends."--John Walter, *Nature* "Matossian's work is innovative and original, modest and reasoned, and opens a door on our general human past that historians have not only ignored, but often did not even know existed."--William Richardson, *Environmental History Review* "This work demonstrates an impressive variety of cross-national sources. Its broad sweep also reveals the importance of the history of agriculture and food and strengthens the view that the shift from the consumption of mold-poisoned rye bread to the potato significantly contributed to an improvement in the mental and physical health of Europeans and Americans."--Naomi Rogers, *Journal of American History* "This work is a true botanical-historical tour de force."--Rudolf Schmid, *Journal of the International Association of Plant Taxonomy* "Intriguing and lucid."--William K. Beatty, *Journal of the American Medical Association* In *God Is Not Great: How Religion Poisons Everything* (2007), journalist Christopher Hitchens argues that religious faith is not necessary for humanity's progress. In fact, faith in supernatural beings has slowed scientific advancement,

led to human rights violations, and facilitated the creation of totalitarian regimes... Purchase this in-depth summary to learn more. Why does God exist? How have the three dominant monotheistic religions—Judaism, Christianity, and Islam—shaped and altered the conception of God? How have these religions influenced each other? In this stunningly intelligent book, Karen Armstrong, one of Britain's foremost commentators on religious affairs, traces the history of how men and women have perceived and experienced God, from the time of Abraham to the present. The epic story begins with the Jews' gradual transformation of pagan idol worship in Babylon into true monotheism—a concept previously unknown in the world. Christianity and Islam both rose on the foundation of this revolutionary idea, but these religions refashioned 'the One God' to suit the social and political needs of their followers. From classical philosophy and medieval mysticism to the Reformation, Karen Armstrong performs the near miracle of distilling the intellectual history of monotheism into one superbly readable volume, destined to take its place as a classic. Praise for History of God “An admirable and impressive work of synthesis that will give insight and satisfaction to thousands of lay readers.”—The Washington Post Book World “A brilliantly lucid, splendidly readable book. [Karen] Armstrong has a dazzling ability: she can take a long and complex subject and reduce it to the fundamentals, without oversimplifying.”—The Sunday Times (London) “Absorbing . . . A lode of learning.”—Time “The most fascinating and learned study of the biggest wild goose chase in history—the quest for God. Karen Armstrong is a genius.”—A.N. Wilson, author of Jesus: A Life "Art of Mentoring" series

In the book that he was born to write, provocateur and best-selling author Christopher Hitchens inspires future generations of radicals, gadflies, mavericks, rebels, angry young (wo)men, and dissidents. Who better to speak to that person who finds him or herself in a contrarian position than Hitchens, who has made a career of disagreeing in profound and entertaining ways. This book explores the entire range of "contrary positions"-from noble dissident to gratuitous pain in the butt. In an age of overly polite debate bending over backward to reach a happy consensus within an increasingly centrist political dialogue, Hitchens pointedly pitches himself in contrast. He bemoans the loss of the skills of dialectical thinking evident in contemporary society. He understands the importance of disagreement-to personal integrity, to informed discussion, to true progress-heck, to democracy itself. Epigrammatic, spunky, witty, in your face, timeless and timely, this book is everything you would expect from a mentoring contrarian. 2016 Winner of the Gospel Coalition Book Awards

At the time of his death, Christopher Hitchens was the most notorious atheist in the world. And yet, all was not as it seemed. “Nobody is not a divided self, of course,” he once told an interviewer, “but I think it’s rather strong in my case.” Hitchens was a man of many contradictions: a Marxist in youth who longed for acceptance among the social elites; a peacenik who revered the military; a champion of the Left who was nonetheless pro-life, pro-war-on-terror, and after 9/11 something of a neocon; and while he railed against God on stage, he maintained meaningful—though largely hidden from public view—friendships with evangelical Christians like Francis Collins, Douglas Wilson, and the author Larry Alex Taunton. In *The Faith of Christopher Hitchens*, Taunton offers a very personal perspective of one of our most interesting and most misunderstood public figures. Writing with genuine compassion and without compromise, Taunton traces Hitchens’s spiritual and intellectual development from his decision as a teenager to reject belief in God to his rise to prominence as one of the so-called “Four Horsemen” of the New Atheism. While Hitchens was, in the minds of many Christians, Public Enemy Number One, away from the lights and the cameras a warm friendship flourished between Hitchens and the author; a friendship that culminated in not one, but two lengthy road trips where, after Hitchens’s diagnosis of esophageal cancer, they studied the Bible together. *The Faith of Christopher Hitchens* gives us a candid glimpse into the inner life of this intriguing, sometimes maddening, and unexpectedly vulnerable man. “If everyone in the United States had the same qualities of loyalty and care and concern for others that Larry Taunton had, we’d be living in a much better society than we do.” ~ Christopher Hitchens

For several decades, Michael Coogan's introductory course on the Old Testament has been a perennial favorite among students at Harvard University. In *God and Sex*, Coogan examines one of the most controversial aspects of the Hebrew Scripture: What the Old Testament really says about sex, and how contemporary understanding of those writings is frequently misunderstood or misrepresented. In the engaging and witty voice generations of students have appreciated, Coogan explores the language and social world of the Bible, showing how much innuendo and euphemism is at play, and illuminating the sexuality of biblical figures as well as God. By doing so, Coogan reveals the immense gap between popular use of Scripture and its original context. *God and Sex* is certain to provoke, entertain, and enlighten readers.
