Representing Red and Blue Apr 15 2022 What is a political representative's job, really? Are they supposed to simply figure out what "the people" want and deliver it, or are they charged to do what they think is best for their constituents -- even if that means sometimes ignoring those constituents' wishes? In *Representing Red and Blue*, David Barker and Christopher Carman explore what people think about this question, why their answers vary, and what difference it makes. They observe that the citizens of "Red America" -- religious and cultural traditionalists, including most Republicans -- often prefer lawmakers who challenge public opinion, whereas "Blue Americans," or culturally progressive Democrats, typically prefer lawmakers who follow it. What is more, these preferences filter up: lawmakers who represent progressive locales tend to pursue the policies their constituents want, whereas representatives of more traditionalistic places often behave quite differently, leaning decidedly to the Right of even most Red American voters. The fundamental reason underlying these patterns, Barker and Carman argue, is that on average, traditionalists and progressives simply do not hold the values of liberal popular democracy in equally high esteem. What all of this means is that the citizens of Red America live in a different kind of democracy than that of the citizens of Blue America -- one where they have less political say over what their government does, but one that seems to suit their tastes all the same.

Current Research in Acupuncture Dec 31 2020 Written by over 60 scientists and clinicians from the United States, mainland China, Germany, Australia, Japan, Sweden, Portugal and Hong Kong, *Current Research in Acupuncture* discusses recent advances in acupuncture research in a modern scientific language. The first 5 chapters investigate the basic mechanisms of acupuncture. Later chapters explore topics including acupuncture treatment and potential mechanisms for epilepsy, Parkinson's diseases, neurodegenerative disorders such as Alzheimer's disease, vascular cognitive impairment, aging, anxiety, polycystic ovary syndrome, pain, nerve root cervical spondylosis, stroke, inflammation, myocardial ischemia and other cardiovascular diseases. Following the translational and clinical discussions, 4 chapters present new prospects for acupuncture theories and applications. The final chapter comments on the pitfalls and problems of the previous studies and suggests direction for future research towards in-depth understanding of acupuncture, along with better application of acupuncture in modern medicine. Each chapter is written by one or more experts in the field. This unique book provides a broad perspective on the principles of acupuncture for acupuncture researchers and neuroscientists. The laboratory and clinical investigations of various acupoints and optimal conditions provide unique clues to acupuncturists for improved clinical efficacy. For a medical student, this book is a modern course in ancient Traditional Chinese Medicine, especially acupuncture. Ying Xia, the chief editor, is Professor and Vice-Chairman of the Department of Neurosurgery at The University of Texas Medical School in Houston, Texas, USA. Guanghong Ding is Professor in the Department of Mechanics and Engineering Science at Fudan University and Director of Shanghai Research Center for Acupuncture and Meridians, Shanghai, China. Gen-Cheng Wu is Professor of Neurobiology; Chairman, Department of Integrative Medicine and Neurobiology; Director, Institute of Acupuncture Research; and Director, WHO Collaborating Center for Traditional Medicine, at Shanghai Medical College of Fudan University, Shanghai, China.

The Anglo-Norman Dialect; a Manual of Its Phonology and Morphology, with Illustrative Specimens of the Literature Oct 21 2022 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: ... POSSESSIVE PRONOUNS 59. There is little that is characteristic to be noted here; variations are confined for the most part to the forms of the feminine. 1. Feminine. Frequently we find mei=meie, tu -- tue, which illustrate the loss of post-tonic e (cf. p. 63, 18,1, a); these forms are frequent in the Psalters, especially the Camb. Psalt. (as XXX, 16, en la tu main; LVI, 7, mei aneme), also in Arundel Psalt, moi oreille, mei ureisun.1 We have already spoken of the feminine article le for la (p. 110, 3); we find the possessives sa and ma replaced by se and me in our earliest texts, as Camb. Psalt. LXI, 11, se ovre; Arundel Psalt., se felonie,2 and similar cases in the Q. L. R.3 2. Miscellaneous Forms. We note in the Camb. Psalt. mis, tis (XXVI, 4, 9, 16, etc.) constantly where the Oxf. Psalt. has mes, tes. The former shows also meins (XII, 4), mieins (XVII, 34), and nod for nos (cf. above, p. 109, 51, 1). In the Arundel Psalt. we note mens, meiens, muen, ten.* In Vie Oregoire we note sis (64, 655) and soue (1730,1741). RELATIVE PRONOUNS 60. Our texts offer nothing extraordinary here; ki early makes a place for itself beside qui or chi; it is found in Cumpoz, Lois Guillaume, the Psalters, and Q. L. B. with gradually increasing frequency. In the accusative ke for que appears as early as the Camb. Psalt. and Q. L. R.5 Chardri uses ke, as well as ki, for the nominative; Koch changed the ke to ki in many cases (in which procedure Mussafia did not agree with him).6 In Boeve, the usual form for both cases is ke. > Cf. Zt. I, 569; XII, 17, 48; XI, 515. Zt. XI, 519. Schlosser, p. 8. * Zt. XI, 516, 533; XII, 5,17. 6 Matzke, p. li; Such. Litblt. XXII, 120, f.-n. 2. o Koch, p. xxxix; Zt. Ill, 595. VERBS 61. Musik in Baden-Württemberg, Band 5: Jahrbuch 1998 Aug 07 2021 1898, vor hundert Jahren, wurde an der Universität Heidelberg mit Philipp Wolfrum der erste Professor für Musikwissenschaft im Gebiet des heutigen Bundeslandes Baden-Württemberg berufen. Aus diesem Anlaß befassen sich vier Beiträge in diesem Jahrbuch mit der Geschichte der musikwissenschaftlichen Lehre in Baden und Württemberg: Thomas Schipperges mit Heidelberg, Michael Kaufmann mit Karlsruhe, Eckhard John mit der Freiburger Ära Wilibald Gurlitts sowie Gabriela Rothmund-Gaul mit dem Amt des Tübinger Universitätsmusikdirektors. Es folgen Beiträge zu regionalgeschichtlich bedeutenden Komponisten: Hans-Bruno Ernst beschäftigt sich mit Josef Anton Laucher (1737-1813); Clytus Gottwald mit Joseph Huber (1837-1886), der zur selben Zeit wie Wagner eine eigenständige musikdramatische Form entwickelte; Lee A. Rothfarb mit August Halm (1869-1929) sowie Paul Feuchte mit dem Heidelberger Richard Franck. Neben weiteren Aufsätzen enthält der Band, wie stets, die Musikbibliographie Baden-Württemberg, die Rubrik "Neue und restaurierte Orgeln" sowie einen umfangreichen Rezensionsteil zu Neuerscheinungen."

Manual on Codes: International codes Aug 27 2020

Integrated Pest Management in the Global Arena Jan 12 2022 This book presents experiences and successful case studies of integrated pest management (IPM) from developed and developing countries and from major international centres and programmes. It contains 39 chapters by many contributors addressing themes such as: emerging issues in IPM, including biotechnology, pesticide policies and socioeconomic considerations (8

chapters); country experiences from Africa, Asia, North and South America, Europe, Australia and New Zealand (20 chapters); and regional and international experiences, including those of FAO, USAID, ICIPE, CIRAD, the World Bank and CGIAR Systemwide IPM Program (9 chapters). This book will be of significant interest to those working in the areas of crop protection, entomology and pest management.

The Iowa Academic Contest Apr 03 2021

The Elements of Statistical Learning Oct 09 2021 During the past decade there has been an explosion in computation and information technology. With it have come vast amounts of data in a variety of fields such as medicine, biology, finance, and marketing. The challenge of understanding these data has led to the development of new tools in the field of statistics, and spawned new areas such as data mining, machine learning, and bioinformatics. Many of these tools have common underpinnings but are often expressed with different terminology. This book describes the important ideas in these areas in a common conceptual framework. While the approach is statistical, the emphasis is on concepts rather than mathematics. Many examples are given, with a liberal use of color graphics. It should be a valuable resource for statisticians and anyone interested in data mining in science or industry. The book's coverage is broad, from supervised learning (prediction) to unsupervised learning. The many topics include neural networks, support vector machines, classification trees and boosting---the first comprehensive treatment of this topic in any book. This major new edition features many topics not covered in the original, including graphical models, random forests, ensemble methods, least angle regression & path algorithms for the lasso, non-negative matrix factorization, and spectral clustering. There is also a chapter on methods for "wide" data (p bigger than n), including multiple testing and false discovery rates. Trevor Hastie, Robert Tibshirani, and Jerome Friedman are professors of statistics at Stanford University. They are prominent researchers in this area: Hastie and Tibshirani developed generalized additive models and wrote a popular book of that title. Hastie co-developed much of the statistical modeling software and environment in R/S-PLUS and invented principal curves and surfaces. Tibshirani proposed the lasso and is co-author of the very successful *An Introduction to the Bootstrap*. Friedman is the co-inventor of many data-mining tools including CART, MARS, projection pursuit and gradient boosting.

Statistical Power Analysis for the Behavioral Sciences Jul 26 2020 Statistical Power Analysis is a nontechnical guide to power analysis in research planning that provides users of applied statistics with the tools they need for more effective analysis. The Second Edition includes: * a chapter covering power analysis in set correlation and multivariate methods; * a chapter considering effect size, psychometric reliability, and the efficacy of "qualifying" dependent variables and; * expanded power and sample size tables for multiple regression/correlation.

Rock Mass Stability Around Underground Excavations in a Mine Mar 14 2022 Stability of underground excavations is of great importance to an operating mine because it ensures the safety of the working people and operating equipment, and successful ore production. Due to the complex geological conditions and mine constructions, and variability and uncertainty in estimating rock mass mechanical properties, the assessment of rock mass stability for an underground mine is extremely challenging and difficult. Tackling of this difficult problem is not covered in detail in any of the textbooks currently available in the rock mechanics literature. This monograph aims to cover this gap in the rock mechanics and rock engineering field. This monograph provides detailed procedures for the stability assessment and support design for an underground mine case study. It covers the background of the mine site including the monitored deformation data, the state-of-art methodologies for the stability analysis of rock masses around underground excavations, performed laboratory tests, estimation of the rock mass properties, a brief theory and background of the 3-D Distinct Element Code (3DEC), and numerical modeling of underground rock mass stability including investigation of the effectiveness of rock supports. The

monograph is an excellent reference for the senior undergraduates, graduate students, researchers and practitioners who work in the Underground Rock Mechanics and Rock Engineering area in the Mining Engineering, Civil Geotechnical Engineering and DEM (Distinct Element Method) Numerical modeling.

The New Practical Shorthand Manual - A Complete And Comprehensive Exposition Of Pitman Shorthand Adapted For Use In Schools, Colleges And For Home Instruction Sep 20 2022 Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Teachers' Manual to Accompany the Problem and Practice Arithmetics Dec 23 2022

Convex Optimization Mar 02 2021 Convex optimization problems arise frequently in many different fields. This book provides a comprehensive introduction to the subject, and shows in detail how such problems can be solved numerically with great efficiency. The book begins with the basic elements of convex sets and functions, and then describes various classes of convex optimization problems. Duality and approximation techniques are then covered, as are statistical estimation techniques. Various geometrical problems are then presented, and there is detailed discussion of unconstrained and constrained minimization problems, and interior-point methods. The focus of the book is on recognizing convex optimization problems and then finding the most appropriate technique for solving them. It contains many worked examples and homework exercises and will appeal to students, researchers and practitioners in fields such as engineering, computer science, mathematics, statistics, finance and economics.

Hybrid Energy Systems Oct 29 2020 Hybrid Energy Systems: Strategy for Industrial Decarbonization demonstrates how hybrid energy and processes can decarbonize energy industry needs for power and heating and cooling. It describes the role of hybrid energy and processes in nine major industry sectors and discusses how hybrid energy can offer sustainable solutions in each. Introduces the basics and examples of hybrid energy systems Examines hybrid energy and processes in coal, oil and gas, nuclear, building, vehicle, manufacturing and industrial processes, computing and portable electronic, district heating and cooling, and water sectors Shows that hybrid processes can improve efficiency and that hybrid energy can effectively insert renewable fuels in the energy industry Serves as a companion text to the author's book Hybrid Power: Generation, Storage, and Grids Written for advanced students, researchers, and industry professionals involved in energy-related processes and plants, this book offers latest research and practical strategies for application of the innovative field of hybrid energy.

Bandit Algorithms May 24 2020 A comprehensive and rigorous introduction for graduate students and researchers, with applications in sequential decision-making problems.

Bulletin Sep 08 2021

Heat Pump Technology Feb 19 2020 Designed as a text or a reference, this book covers the practical fundamentals, recommended service, and startup procedures for heat pump systems.

Probabilistic Robotics May 04 2021 An introduction to the techniques and algorithms of the newest field in robotics. Probabilistic robotics is a new and growing area in robotics, concerned with perception and control in the face of uncertainty. Building on the field of mathematical statistics, probabilistic robotics endows robots with a new level of robustness in real-world situations. This book introduces the reader to a wealth of techniques and algorithms in the field. All algorithms are based on a single overarching mathematical foundation. Each chapter provides example

implementations in pseudo code, detailed mathematical derivations, discussions from a practitioner's perspective, and extensive lists of exercises and class projects. The book's Web site, www.probablistic-robotics.org, has additional material. The book is relevant for anyone involved in robotic software development and scientific research. It will also be of interest to applied statisticians and engineers dealing with real-world sensor data.

Theory and Practice of Tunnel Engineering Jun 24 2020 Tunnel construction is expensive when compared to the construction of other engineering structures. As such, there is always the need to develop more sophisticated and effective methods of construction. There are many long and large tunnels with various purposes in the world, especially for highways, railways, water conveyance, and energy production. Tunnels can be designed effectively by means of two and three-dimensional numerical models. Ground-structure interaction is one of the significant factors acting on economic and safe design. This book presents recent data on tunnel engineering to improve the theory and practice of the construction of underground structures. It provides an overview of tunneling technology and includes chapters that address analytical and numerical methods for rock load estimation and design support systems and advances in measurement systems for underground structures. The book discusses the empirical, analytical, and numerical methods of tunneling practice worldwide.

Adoption and Impacts of Zero Tillage as a Resource Conserving Technology in the Irrigated Plains of South Asia Jul 06 2021 The recent stagnation of productivity growth in the irrigated areas of the Indo-Gangetic Plains of South Asia has led to a quest for resource conserving technologies that can save water, reduce production costs and improve production. The present synthesis of two detailed country studies confirmed widespread adoption of zero tillage (ZT) wheat in the rice-wheat systems of India's Haryana State (34.5% of surveyed households) and Pakistan's Punjab province (19%). The combination of a significant "yield effect" and "cost-saving effect" makes adoption worthwhile and is the main driver behind the rapid spread and widespread acceptance of ZT in Haryana, India. In Punjab, Pakistan, adoption is driven by the significant ZT-induced cost savings for wheat cultivation. Thus, the prime driver for ZT adoption is not water savings or natural resource conservation but monetary gain in both sites. Water savings are only a potential added benefit. ZT adoption for wheat has accelerated from insignificant levels from 2000 onwards in both sites. Geographic penetration of ZT is far from uniform, suggesting the potential for further diffusion, particularly in Haryana, India. Diffusion seems to have stagnated in the Punjab study area, and further follow-up studies are needed to confirm this. The study also revealed significant dis-adoption of ZT in the survey year: Punjab, Pakistan 14 percent and Haryana, India 10 percent. Better understanding the rationale for dis-adoption merits further scrutiny. Our findings suggest that there is no clear single overarching constraint but that a combination of factors is at play, including technology performance, technology access, seasonal constraints and, particularly in the case of Punjab, Pakistan, the institutional ZT controversy. In terms of technology performance, the relative ZT yield was particularly influential: dis-adopters of ZT reporting low ZT yields as a major contributor to farmer disillusionment in Punjab, Pakistan and the lack of a significant yield effect in Haryana, India. In neither site did the ZT-induced time savings in land preparation translate into timelier establishment, contributing to the general lack of a yield increase. Knowledge blockages, resource constraints and ZT drill cost and availability all contributed to nonadoption. This suggests that there is potential to further enhance access to this technology and thereby its penetration. The study highlights that in both Haryana, India and Punjab, Pakistan ZT has been primarily adopted by the larger and more productive farmers. The structural differences between the adopters and non-adopters/dis-adopters in terms of resource base, crop management and performance thereby easily confound the assessment of ZT impact across adoption categories. This calls for the comparison of the ZT plots and conventional tillage plots on adopter farms. ZT-induced effects primarily apply to the establishment and production costs of the wheat crop. Both the Haryana, India and Punjab, Pakistan studies confirmed significant ZT-induced resource-saving effects in farmers' fields in terms of diesel and tractor time for wheat cultivation. Water savings are, however, less pronounced than expected from on-farm trial data. It was only in Haryana, India that

there were significant ZT-induced water savings in addition to significant yield enhancement. The higher yield and water savings in Haryana, India result in significantly higher water productivity indicators for ZT wheat. In both sites, there are limited implications for the overall wheat crop management, the subsequent rice crop and the rice-wheat system as a whole. The ZT-induced yield enhancement and cost savings provide a much needed boost to the returns to, and competitiveness of, wheat cultivation in Haryana, India. In Punjab, Pakistan, ZT is primarily a cost-saving technology. Based on these findings the study provides a number of recommendations for research and development in South Asia's rice-wheat systems.

NexGen Technologies for Mining and Fuel Industries (Volume I and II) Apr 22 2020 The papers in these two volumes were presented at the International Conference on “NexGen Technologies for Mining and Fuel Industries” [NxGnMiFu-2017] in New Delhi from February 15-17, 2017, organized by CSIR-Central Institute of Mining and Fuel Research, Dhanbad, India. The proceedings include the contributions from authors across the globe on the latest research on mining and fuel technologies. The major issues focused on are: Innovative Mining Technology, Rock Mechanics and Stability Analysis, Advances in Explosives and Blasting, Mine Safety and Risk Management, Computer Simulation and Mine Automation, Natural Resource Management for Sustainable Development, Environmental Impacts and Remediation, Paste Fill Technology and Waste Utilisation, Fly Ash Management, Clean Coal Initiatives, Mineral Processing and Coal Beneficiation, Quality Coal for Power Generation and Conventional and Non-conventional Fuels and Gases. This collection of contemporary articles contains unique knowledge, case studies, ideas and insights, a must-have for researchers and engineers working in the areas of mining technologies and fuel sciences.
