Traditionally grand ducal Tuscany and its cultural politics have been viewed through the lens of absolutism. Based on a wide range of newly found sources and building on recent revisionist scholarship, this study uses the universities of Pisa and Siena to expose the contradictions and the

tensions which characterised the grand duchy. Setting the universities against the diplomatic, military, administrative, economic, ecclesiastical, and cultural development of the grand duchy, it shows how innovation mixed with tradition and local privileges were not only upheld but extended significantly. This book tells the story of the principal European intellectual professions from the demise of the ancien régime to the rise of the European Union. A historical study which applies sociological concepts it creates a European-scale picture of the professions spanning over two centuries of change. Uniting the legal, medical, engineering and accounting professions it provides a comparative historical and sociological exploration of 'Professional Europe'. Inspired by Bourdieu it rejects theories of professionalization drawing instead upon the sociology of crisis and theories on the decline of the professions to introduce among others, the topic of the intellectual professions' relationship with the fascist and authoritarian regimes. Detailed, well defined and critical in its application *Professional Men, Professional Women* also examines the role of women within the professions and includes a devoted chapter conducting a twofold comparison between countries and professions. *Waiting for the End of the World?* addresses the archaeological, architectural, historical and geological evidence for natural disasters in the Middle Ages between the 11th and 16th centuries. This volume adopts a fresh interdisciplinary approach to explore the many ways in which environmental hazards affected European populations and, in turn, how medieval communities coped and responded to short- and long-term consequences. Three sections, which focus on geotectonic hazards (Part I), severe storms and hydrological hazards (Part II) and biophysical hazards (Part III), draw together 18 papers of the latest research while additional detail is provided in a catalogue of the 20 most significant disasters to have affected Europe during the period. These include earthquakes, landslides, tsunamis, storms, floods and outbreaks of infectious diseases.

Spanning Europe, from the British Isles to Italy and from the Canary Islands to Cyprus, these contributions will be of interest to earth scientists, geographers, historians, sociologists, anthropologists and climatologists, but are also relevant to students and non-specialist readers interested in medieval archaeology and history, as well as those studying human geography and disaster studies. Despite a different set of beliefs relating to the natural world and protection against environmental hazards, the evidence suggests that medieval communities frequently adopted a surprisingly 'modern', well-informed and practically minded outlook. *Mirrors of Heaven or Worldly Theaters? Venetian Nunneries and Their Music* explores the dynamic role of music performance and patronage in the convents of Venice and its lagoon from the sixteenth century to the fall of Venice around 1800. Examining sacred music performed by the nuns themselves and by professional musicians they employed, author Jonathan E. Glixon considers the nuns as collective patrons, of both musical performances by professionals in their external churches-primarily for the annual feast of the patron saint, a notable attraction for both Venetians and foreign visitors-and of musical instruments, namely organs and bells. The book explores the rituals and accompanying music for the transitions in a nun's life, most importantly the ceremonies through which she moved from the outside world to the cloister, as well as liturgical music within the cloister, performed by the nuns themselves, from chant to simple polyphony, and the rare occasions where more elaborate music can be documented. Also considered are the teaching of music to both nuns and girls resident in convents as boarding students, and entertainment-musical and theatrical-by and for the nuns. *Mirrors of Heaven*, the first large-scale study of its kind, contains richly detailed appendices featuring a calendar of musical events at Venetian nunneries, details on nunnery organs, lists of teachers, and inventories of musical and ceremonial books, both manuscript and printed. A

companion website supplements the book's musical examples with editions of complete musical works, which are brought to life with accompanying audio files. "As the sixteenth century opened, members of the patriciate were increasingly withdrawing from trade, desiring to be seen as "gentlemen in fact" as well as "gentlemen in name." The author considers why this was so and explores such wide-ranging themes as attitudes toward wealth and display, the articulation of family identity, the interplay between the public and the private, and the emergence of characteristically Venetian decorative practices and styles of art and architecture. Brown focuses new light on the visual culture of Venetian women - how they lived within, furnished, and decorated their homes; what spaces were allotted to them; what their roles and domestic tasks were; how they dressed; how they raised their children; and how they entertained. Bringing together both high arts and low, the book examines all aspects of Renaissance material culture."--BOOK JACKET. The aim of this book is to reconstruct the violent nature of the March on Rome and to emphasise its significance in demarcating a real break in the country's history and the beginning of the Fascist dictatorship. This aspect of the March has long been obscured: first by the Fascists' celebratory project, and then by the ironic and reductive interpretation of the event put forward by anti-Fascists. This volume focuses on the role and purpose of Fascist political violence from its origins. In doing so, it highlights the conflictual nature of the March by illustrating the violent impact it had on Italian institutions as well as the importance of a debate on this political turning point in Italy and beyond. The volume also examines how the event crucially contributed to the construction of a dictatorial political regime in Italy in the weeks following Mussolini's appointment as head of the government. Originally published in Italian, this book fills a notable gap in current critical discussion surrounding the March in the English language.
