Roman and Local Citizenship in the Long Second Century CE May 18 2022 Imperial and Local Citizenship in the Long Second Century CE offers a radical new history of Roman citizenship in the long century before Caracalla's universal grant of citizenship in 212 CE. Earlier work portrayed the privileges of citizen status in this period as eroded by its wide diffusion. Building on recent scholarship that has revised downward estimates for the spread of citizenship, this work investigates the continuing significance of Roman citizenship in the domains of law, economics and culture. From the writing of wills to the swearing of oaths and crafting of marriage, Roman citizens

conducted affairs using forms and language that were often distinct from the populations among which they resided. Attending closely to patterns at the level of province, region and city, this volume offers a new portrait of the early Roman empire: a world that sustained an exclusive regime of citizenship in a context of remarkable political and cultural integration.

Digital citizenship education Aug 21 2022 An analysis of good practices, research findings, lessons learned and resources identified across Europe in the area of digital citizenship: empowerment of children through education Most young people in Europe today were born and have grown up in the digital era. Education authorities have the duty to ensure that these digital citizens are fully aware of the norms of appropriate behaviour when using constantly evolving technology and participating in digital life. Despite worldwide efforts to address such issues, there is a clear need for education authorities to take the lead on digital citizenship education and integrate it into school curricula. In 2016, the Education Department of the Council of Europe began work to develop new policy orientations and strategies to help educators face these new challenges and to empower young people by helping them to acquire the competences they need to participate actively and responsibly in digital society. This second volume in the Digital Citizenship Education series contains the results

of a multi-stakeholder consultation to identify good practices regarding digital citizenship education and the gaps and challenges to be met in formal and informal learning contexts. It examines the role the development of digital citizenship competence plays in education, considers the types of online resources and contemporary information technologies used in educational settings, and details the administrative and legal responsibilities for school leaders, teachers, students and parents.

Citizen Internees Jan 02 2021 In the 1940s, Japanese and Japanese American internees of Redwood City, CA, had a dedicated ally: J. Elmer Morrish, a banker who kept their businesses alive, made sure their taxes were paid, and safeguarded their properties until after the end of World War II and the internees were finally released. What were Morrish's motivations for his tireless efforts to help the internees? How did the unjustly incarcerated deal with the loss of freedom in the camps, and how did they envision their future? And how did the internees both cooperate with the U.S. government and attempt to resist victimization? Citizen Internees: A Second Look at Race and Citizenship in Japanese American Internment Camps is an edited selection from a collection of more than 2,000 pieces of correspondence some of which is previously unpublished regarding the internment of Japanese and Japanese Americans from the Redwood City, CA. These primary source documents reveal the experiences and emotions of a group of imprisoned people attempting to run the necessary day-to-day tasks of the lives they were forced to leave behind as property owners, taxpayers, and proprietors. Through these letters about practical matters, readers can gain insight into the internees' changing family relations, their financial concerns, and their struggles in making decisions about an uncertain future. The book also includes essays that supply background information, analysis of the documents' contents and meaning, and historical context. "

Digital Citizenship in Schools Mar 04 2021 Students today have

always had technology in their lives, so many teachers assume their students are competent tech users – more competent, in fact, than themselves. In reality, not all students are as tech savvy as teachers might assume, and not all teachers are as incompetent as they fear. Even when students are comfortable using technology, they may not be using it appropriately. Likewise, educators of all skill levels may not understand how to use technology effectively. Both students and teachers need to become members of a digital citizenry. In this essential exploration of digital citizenship, Mike Ribble provides a framework for asking what we should be doing with respect to technology so we can become productive and responsible users of digital technologies.

The Battle for Britain Nov 12 2021 It is generally accepted that Britain was held together during the second world war by a spirit of national democratic `consensus'. But whose interests did the consensus serve? And how did it unravel in the years immediately after victory? This well observed and powerfully argued book overturns many of our assumptions about the national spirit of 1939-45. It shows that the current return to right-wing politics in Britain was prefigured by ideologies of change during and immediately after the war.

From Subject to Citizen Feb 03 2021 From Subject to Citizen offers an original account of the Second Empire (1852-1870) as a turning point in modern French political culture: a period in which thinkers of all political persuasions combined forces to create the participatory democracy alive in France today. Here Sudhir Hazareesingh probes beyond well-known features of the Second Empire, its centralized government and authoritarianism, and reveals the political, social, and cultural advances that enabled publicists to engage an increasingly educated public on issues of political order and good citizenship. He portrays the 1860s in particular as a remarkably

intellectual decade during which Bonapartists, legitimists, liberals, and republicans applied their ideologies to the pressing problem of decentralization. Ideals such as communal freedom and civic cohesion rapidly assumed concrete and lasting meaning for many French people as their country entered the age of nationalism. With the restoration of universal suffrage for men in 1851, constitutionalist political ideas and values could no longer be expressed within the narrow confines of the Parisian elite. Tracing these ideas through the books, pamphlets, articles, speeches, and memoirs of the period, Hazareesingh examines a discourse that connects the central state and local political life. In a striking reappraisal of the historical roots of current French democracy, he ultimately shows how the French constructed an ideal of citizenship that was "local in form but national in substance." Originally published in 1998. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. Citizenship education May 06 2021 In light of the recommendations of the Crick report on citizenship education ('Education for citizenship and the teaching of democracy' which can be downloaded at http://www.qca.org.uk/downloads/6123_crick_report_1998.pdf) published in September 1998, the subject was introduced into the school curriculum in 2002, on a compulsory basis for secondary schools and as part of the non-statutory framework for primary schools. The Committee's report assesses the progress made during the last four years to deliver quality citizenship programmes and examines the barriers that exist to its successful implementation. It finds that, when well done, citizenship education motivates and inspires young people, but the quality and extent of these programmes are still inconsistent across the country. This patchiness needs to be tackled head-on, and progress accelerated, requiring strong support from the DfES and Ministers as well as action from those on the ground. The Committee welcomes the Government's decision to accept the recommendations of the report by Sir Keith

Ajegbo which highlighted the need for citizenship curriculum to have a closer focus on issues of identity, diversity and belonging. More can be done to disseminate between settings good practice information about approaches that are working in other institutions, particularly in relation to 'whole-school' (or college) approaches that develop opportunities for active citizenship, although it is essential that programmes are locally-owned and relevant to the particular context. The development of the workforce is also important to the success of citizenship education, and although the expansion of the Continuing Professional Development (CPD) citizenship certificate programme is welcome, more resources are needed to develop capacity in initial teacher training places for citizenship education.

At Home in Two Countries Mar 28 2023 Read Peter's Op-ed on Trump's Immigration Ban in The New York Times The rise of dual citizenship could hardly have been imaginable to a time traveler from a hundred or even fifty years ago. Dual nationality was once considered an offense to nature, an abomination on the order of bigamy. It was the stuff of titanic battles between the United States and European sovereigns. As those conflicts dissipated, dual citizenship continued to be an oddity, a condition that, if not quite freakish, was nonetheless vaguely disreputable, a status one could hold but not advertise. Even today, some Americans mistakenly understand dual citizenship to somehow be "illegal", when in fact it is completely tolerated. Only recently has the status largely shed the opprobrium to which it was once attached. At Home in Two Countries charts the history of dual citizenship from strong disfavor to general acceptance. The status has touched many; there are few Americans who do not have someone in their past or present who has held the status, if only unknowingly. The history reflects on the course of the state as an institution at the level of the individual. The state was once a jealous institution, justifiably demanding an exclusive relationship with its members. Today, the state lacks both the capacity and the incentive to suppress the status as citizenship becomes more like other forms of membership. Dual citizenship allows many to formalize sentimental attachments. For others, it's a new way to game the international system. This book explains why dual citizenship was once so reviled, why it is a fact of life after globalization, and why it should be embraced today.

EDC/HRE Volume II: Growing Up in Democracy - Lesson Plans for

Primary Level on Democratic Citizenship and Human Rights Jun 26 2020 Growing up in democracy is addressed to teachers who want to integrate Education for Democratic Citizenship (EDC) and Human Rights Education (HRE) in their daily subject teaching. Nine teaching units of approximately four lesson plans each give step-by-step instructions and include student handouts and background information for teachers. The complete manual provides a full school year's curriculum for students in primary school (grades 4 to 6), but as each unit is also complete in itself the manual allows great flexibility in use. It is therefore also suitable for textbook editors, curriculum developers, teacher trainers, student teachers and beginning teachers. The objective of EDC/HRE is to teach children to become active citizens who are willing and able to participate in the democratic community. Therefore, EDC/HRE strongly emphasise action and task-based learning. The school community is conceived as a sphere of authentic experience where young people can learn how to participate in democratic decision making and may take responsibility at an early age. Key concepts for EDC/HRE are taught as tools of life-long learning.

Between Two Nations Jul 28 2020 Immigrants come to the United States from all over Latin America in search of better lives. They obtain residency status, find jobs, pay taxes, and they have children who are American citizens by birth; yet decades may go by before they seek citizenship for themselves or become active participants in the American political process. Between Two Nations examines the lack of political participation among Latin American immigrants in the United States to determine why so many remain outside the electoral process. Michael Jones-Correa studied the political practices of first-generation immigrants in New York City's multiethnic borough of Queens. Through intensive interviews and participant observation, he found that immigrant participation was stymied both by lack of encouragement to participate and by the requirement to renounce former citizenship, which raised the fear of never being able to return to the country of origin. The hesitation to naturalize as American citizens can extend over decades, leaving immigrants adrift in a political limbo. Between Two Nations is the first qualitative study of how new immigrants assimilate into American political life. Jones-Correa reexamines assumptions about Latino politics and the diversity of Latino populations in the United States, about the role of informal politics in immigrant communities, and about gender differences in approaches to political activity.

The Palgrave International Handbook of Education for Citizenship and Social Justice Jan 14 2022 This state-of-the-art, comprehensive Handbook is the first of its kind to fully explore the interconnections between social justice and education for citizenship on an international scale. Various educational policies and practices are predicated on notions of social justice, yet each of these are explicitly or implicitly shaped by, and in turn themselves shape, particular notions of citizenship/education for citizenship. Showcasing current research and theories from a diverse range of perspectives and including chapters from internationally renowned scholars, this Handbook seeks to examine the philosophical, psychological, social, political, and cultural backgrounds, factors and contexts that are constitutive of contemporary research on education for citizenship

and social justice and aims to analyse the transformative role of education regarding social justice issues. Split into two sections, the first contains chapters that explore central issues relating to social justice and their interconnections to education for citizenship whilst the second contains chapters that explore issues of education for citizenship and social justice within the contexts of particular nations from around the world. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of Education, Sociology, Social Policy, Citizenship Studies and Political Science.

Quality of Nationality Index 2nd Edition Mar 24 2020 The Henley & Partners - Kochenov Quality of Nationality Index (QNI) ranks the objective value of world nationalities as legal statuses of attachment to states. It looks at two groups of factors: the internal (scale of the economy, human development, and peace and stability) and the external (visa-free travel and the ability to settle and work abroad, weighing the quality and also the diversity of destinations). The 2nd Edition, updated with 2016 data, gives a global, dynamic overview of the quality of all the nationalities in the world, providing a sketch of contemporary trends in citizenship and migration regulation worldwide.

Soul of a Citizen Oct 31 2020 Soul of a Citizen awakens within us the desire and the ability to make our voices heard and our actions count. We can lead lives worthy of our convictions. A book of inspiration and integrity, Soul of a Citizen is an antidote to the twin scourges of modern life--powerlessness and cynicism. In his evocative style, Paul Loeb tells moving stories of ordinary Americans who have found unexpected fulfillment in social involvement. Through their example and Loeb's own wise and powerful lessons, we are compelled to move from passivity to participation. The reward of our action, we learn, is nothing less than a sense of connection and purpose not found in a purely personal life. Soul of a Citizen has become the handbook for

budding social activists, veteran organizers, and anybody who wants to make a change—big or small—in the world around them. At this critical historical time , Paul Loeb's completely revised edition—and inspiring message—is more urgently important than ever.
