Slow to rise in the literary world, Octavia Estelle Butler cultivated musings on earth's future, reaching massive critical acclaim in the process. This companion will complement book club discussions and classroom lessons for the closest possible readings of Butler's science fiction and her texts on racism and pollution. A maven of speculative fiction so prescient that it hovers between tocsin and prophecy, Butler survives through her print stories, essays, novels and musings on individualism and compromise. This book guides the reader on a variety of Butler pieces, from her most obscure titles to her historical entries and pieces that speculate upon science, metaphysics, linguistics, psychology, writing and religion. The text serves as a guide through the depths of Octavia Butler's works and reinforces the reasons for which her name so often appears on reading lists for higher learning. Whenever we envision a world without war, without prisons, without capitalism, we are producing speculative fiction. Organizers and activists envision, and try to create, such worlds all the time. Walidah Imarisha and adrienne maree brown have brought twenty of them together in the first anthology of short stories to explore the connections between radical speculative fiction and movements for social change. The visionary tales of Octavia's Brood span genres—sci-fi, fantasy, horror, magical realism—but all are united by an attempt to inject a healthy dose of imagination and innovation into our political practice and to try on new ways of understanding ourselves, the world around us, and all the selves and worlds that could be. The collection is rounded off with essays by Tananarive Due and Mumia Abu-Jamal, and a preface by Sheree Renée Thomas. PRAISE FOR OCTAVIA'S BROOD: "Those concerned with justice and liberation must always persuade the mass of people that a better world is possible. Our job begins with speculative fictions that fire society's imagination and its desire for change. In adrienne maree brown and Walidah Imarisha's visionary conception, and by its activist-artists' often stunning acts of creative inception, Octavia's Brood makes for great thinking and damn good reading. The rest will be up to us." —Jeff Chang, author of *Who We Be: The Colorization of America* "Conventional exclamatory phrases don't come close to capturing the essence of what we have here in Octavia's Brood. One part sacred text, one part social movement manual, one part diary of our future selves telling us, 'It's going to be okay, keep working, keep loving.' Our radical imaginations are under siege and this text is the rescue mission. It is the new cornerstone of every class I teach on inequality, justice, and social change....This is the text we've been waiting for." —Ruha Benjamin, professor of African American Studies at Princeton University and author of *People's Science: Bodies and Rights on the Stem Cell Frontier* "Octavia once told me that two things worried her about the future of humanity: The tendency to think hierarchically, and the tendency to place ourselves higher on the hierarchy than others. I think she would be humbled beyond words that the fine, thoughtful writers in this volume have honored her with their hearts and minds. And that in calling for us to consider that hierarchical structure, they are not walking in her shadow, nor standing on her shoulders, but marching at her side." —Steven Barnes, author of *Lion's Blood* "Never has one book so thoroughly realized the dream of its namesake. Octavia's Brood is the progeny of two lovers of Octavia Butler and their belief in her dream that science fiction is for everybody.... Butler could not wish for better evidence of her touch changing our literary and living landscapes. Play with these children, read these works, and find the children in you waiting to take root under the stars!" —Moya Bailey and Ayana Jamieson, *Octavia E. Butler Legacy* "Like [Octavia] Butler's fiction, this collection is cartography, a map to freedom." —dream hampton, filmmaker and Visiting Artist at Stanford University's Institute for Diversity in the Arts Walidah Imarisha is a writer, organizer, educator, and spoken word artist. She is the author of the poetry collection *Scars/Stars* and facilitates writing workshops at schools, community centers, youth detention facilities, and women's prisons. adrienne maree brown is a 2013 Kresge Literary Arts Fellow writing science fiction in Detroit, Michigan. She received a 2013 Detroit Knight Arts Challenge Award to run a series of Octavia Butler-based writing workshops. All 1600 & 1800 Series 2 (inc.MV) with 2WD & 4WD. Distributed by the University of Nebraska Press for the University of Idaho Press Octavia Bassett, a beautiful young heiress from Bloody Gulch, Nevada, unexpectedly descends upon her aunt in the sleepy village of Slowbridge, England. As a young woman raised haphazardly by her father in the Wild West of the 1870s, she finds their customs unnecessarily fastidious and difficult to understand. Prophecy, Populism, Propaganda in the 'Octavia' Everyone is calling for smart growth...but what exactly is it? In *The Smart Growth Manual*, two leading city planners provide a thorough answer. From the expanse of the metropolis to the detail of the window box, they address the pressing challenges of urban development with easy-

to-follow advice and broad array of best practices. With their landmark book *Suburban Nation*, Andres Duany and Jeff Speck "set forth more clearly than anyone has done in our time the elements of good town planning" (*The New Yorker*). With this long-awaited companion volume, the authors have organized the latest contributions of new urbanism, green design, and healthy communities into a comprehensive handbook, fully illustrated with the built work of the nation's leading practitioners. "The Smart Growth Manual is an indispensable guide to city planning. This kind of progressive development is the only way to fully restore our economic strength and create new jobs, new industries, and a renewed ability to compete in the first rank of world economies." -- Gavin Newsom, Mayor of San Francisco "Authors Andres Duany, Jeff Speck, and Mike Lydon have created *The Smart Growth Manual*, a resource which not only explains the overarching ideals of smart growth, but a manual that takes the time to show smart growth principles at each geographic scale (region, neighborhood, street, building). I highly recommend [it] as a part of any community participant's or urban planner's desktop references." -- LocalPlan.org Planetizen Top 10 Books – 2010 On the ninth annual list of the ten best books in urban planning, design and development: "The goal of *The Smart Growth Manual* is clear from page 1: to create a guidebook for smart growth following the pattern of the Charter for New Urbanism. Duany, Speck and Lydon have achieved that in spades (the Charter is included in the appendix, in case we missed the connection). It even clears up some of the architectural arguments that attach themselves to New Urbanists, such as this segment of Section 14.1, Regional Design; 'While new buildings should not be compelled to mimic their historic predecessors, designers should pay attention to local practices regarding materials and colors, roof pitches, eave lengths, window-to-wall ratios, and the socially significant relationship of buildings to their site and the street; these have usually evolved in intelligent response to local conditions.' In addition to making the old 'traditional vs. modern' argument irrelevant, Duany, Speck and Lydon have truly managed to boil down the best parts of current practices into a highly readable, portable book." A collection of short stories by a celebrated African American female science fiction author includes the award-winning title story, "Bloodchild," a parable about the treatment of women throughout history The presentation of this course has been made simple for anyone conducting a marriage workshop. From Nebula Award-winning author Jack McDevitt comes the eighth installment of the Alex Benedict series featuring Gabe triumphantly reuniting with Alex and Chase to retrieve a possible alien artifact—which may lead them to solve the greatest archaeological mystery of their careers. After being lost in space for eleven years, Gabe has returned, and is trying to find a new life for himself after being presumed dead—just as Alex and Chase are relearning how to live and work with him. But when a seemingly alien artifact goes missing from Gabe's old collection, a mystery is uncovered concerning its origins and it grants everyone an opportunity to dive into solving it as a team, once again. When a lead on the artifact is tied to a dead pilot's sole unrecorded trip, another clue leads to one of the greatest mysteries of the age: the infamous disappearance of a team of scientists aboard a space station orbiting a black hole—the Amelia Earhart of their time. With any luck, Alex, Chase, and Gabe may be on the trail of the greatest archaeological discovery of their careers. Nebula Award winner Jack McDevitt, who Stephen King has called "the logical heir to Isaac Asimov and Arthur C. Clarke," has created another terrific science fiction mystery in his beloved Alex Benedict series. A maintenance and repair manual for the DIY mechanic.
