From the 1860s through the early  
twentieth century, Great Britain saw the  
rise of the department store and the  
institutionalization of a gendered sphere  
of consumption. *Come Buy, Come Buy*  
considers representations of the female  
shopper in British women's writing and  
demonstrates how women's shopping  
practices are materialized as forms of  
narrative, poetic, and cultural  
inscription, showing how women writers

emphasize consumerism as productive of pleasure rather than the condition of seduction or loss. Krista Lysack examines works by Christina Rossetti, Mary Elizabeth Braddon, George Eliot, and Michael Field, as well as the suffragist newspaper *Votes for Women*, in order to challenge the dominant construction of Victorian femininity as characterized by self-renunciation and the regulation of appetite. *Come Buy, Come Buy* considers not only literary works, but also a variety of archival sources (shopping guides, women's fashion magazines, household management guides, newspapers, and advertisements) and cultural practices (department store shopping, shoplifting and kleptomania, domestic economy, and suffragette shopkeeping). This wealth of sources reveals unexpected relationships between consumption, identity, and citizenship, as Lysack traces a genealogy of the woman shopper from dissident domestic spender to aesthetic salonière, from curious shop-gazer to political radical. A year-by-year guide to the Porsche 911, including technical specs, replacement parts price lists, media reviews, and each model's known strengths and weaknesses. Purchased goods and services are an increasingly large proportion of public and private enterprise budgets. Historically,

purchased goods and services have accounted for less than a third of an enterprise's budget, but today many enterprises spend more than two-thirds of their budgets on purchased goods and services. Similarly, the Air Force and the Department of Defense (DoD) spend nearly half their budgets for purchased goods and services and an additional sixth on weapon procurement (with only a third going to military and civilian personnel costs). (See pp. 1-6.) Because of the growing importance of purchasing, many enterprises have sought to develop supply strategies for their purchased goods and services. This monograph is intended as a resource for procurement personnel developing supply strategies for the Air Force or DoD. It does not analyze current military procurement practices but rather synthesizes academic, business, and professional literature on developing and applying supply strategies. Its core is a synthesis of nearly a dozen different processes found in the literature.
