**Global Application of Prescribed Fire** Apr 25 2020 Global Application of Prescribed Fire provides a first-hand perspective of the various methods and ways people around the world view and use prescribed fire. It covers the logistics, constraints and social dynamics surrounding the intentional use and application of fire by humans, and demonstrates how, why, when and where prescribed fire is used in different regions. Written by international experts, the book has four key objectives: explore new techniques, ideas and thoughts on how to apply prescribed fire from a global perspective; provide regional case studies covering issues that may constrain or enhance prescribed fire projects; stimulate cross-cultural conversations about how fires function in ecosystems; and relate prescribed fire to wildfire regimes with implications for protecting life and property, as well as sustaining local fire cultures and unique fire-dependent flora and fauna. Global Application of Prescribed Fire enhances our understanding and knowledge about the application of prescribed fire. This comprehensive book will provide fire practitioners, researchers, agencies and policymakers with key ecological and managerial insight of how prescribed fires are conducted around the globe.

**Policy, Belief and Practice in the Secondary English Classroom** May 07 2021 Studies of comparative classroom

practice in the teaching of secondary English are limited, especially when it comes to exploration of the day-to-day practice of English teachers in the secondary classroom. This book presents a case study analysis of secondary classroom practice in three countries: Canada, England and Scotland. Each country has had different degrees of state involvement within the secondary English curriculum over the last twenty years. England has had the highest degree of state involvement in that it has had several statutory national curricula and a variety of assessment regimes. Scotland has had a non- statutory curriculum and no national tests and Canada has had no national curriculum at all, with education being determined at province level, and each province varying its policies. The research adopts a case study approach involving both classroom observation and interviews with teachers. Through this, the authors explore the impact of state involvement on the reality of what happens in secondary English classrooms. The book invites readers to consider the applicability of the findings to their own contexts, to examine their own practice in the light of this and to consider the nature of the relationships between policy, personal belief and practice in the teaching of English.

**Cross-cultural Genre Analysis** Feb 04 2021 This unique monograph provides a theoretical and methodological account on how to do cross-cultural genre analysis with the aids of corpus tools. Cross-cultural genre analysis investigates how discourse communities from different cultural backgrounds use language to

realize a particular genre. It can shed light on genre nature as well as cultural specificities. The book suggests five specific approaches in doing cross-cultural genre analysis: Investigating genre context; Approaching genre complexity; Exploring genre nature; Exploring culture specificity; and Focusing on specific communicative functions. Each of these approaches is illustrated and demonstrated in a specific chapter with practical analyses of the genre of CSR reports. Covering linguistic analysis of CSR reports in three languages: Chinese, English and Italian, Yu provides insights into implications for both genre theories and CSR communication practice. By applying the cross-cultural perspective in corporate discourse analysis, her book demonstrates how the approach of cross-cultural genre analysis is fruitful and valuable in providing practical insights into the textual practice of CSR reporting in a globalized context. Moreover, in the final parts of the book, Yu illustrates how cross-cultural genre analysis can be applied in the didactic field of writing, translation and cross-cultural studies. This volume is a valuable reference to scholars of genre analysis, corpus-based studies, cross-cultural studies and corporate communication. Moreover, it is also useful for professionals involved in compiling CSR reports. Armed with the knowledge imparted in this book, the reader should be able to analyze other genres from a cross-cultural perspective. In particular, instructions on how to use specific corpus tools are provided in the appendices, which can give scholars basic technical knowledge to approach the field of cross-cultural genre analysis.

**New Frontiers for College Education** Dec 22 2019 The college sector is facing a growing number of new challenges caused by technological change, globalisation and the growth of mass higher education. New Frontiers for College Education considers the impact these changes have had and explores the developing role of college education in countries throughout the world. Whilst analysing the issues associated with providing high quality vocational education and training, the book also reflects on the role of colleges in widening access to both further and higher

education. Drawing together contributions from leading international academics, policymakers and practitioners, the book explores common themes across these diverse societies, as well as some of the key challenges experienced within individual countries. It considers the distinctive contributions that colleges can make in responding to these challenges through apprenticeships and other types of vocational education and training. Contributors discuss the growing emphasis on creating more integrated systems of tertiary education, recognising that colleges and universities are now expected to work more closely together and that these diverse demands can be difficult to reconcile. Providing an authoritative and timely analysis of the changing role of colleges in contemporary society, this book will be of great interest to academics, researchers and postgraduate students in the areas of further and higher education, vocational education and training, lifelong learning, and skills development. It should also be essential reading for policymakers, as well as practitioners working in colleges and other institutions of higher and further education.

**Digital English as a Lingua Franca** Dec 14 2021 Today, the

Internet has become a prime venue for social interaction through

online services where people share aspects of their daily lives,

talk about their interests with other like-minded people, and

express their opinions without formality or constraint. Against

this background, this book investigates the aesthetics of informal

text-based computer-mediated communication (CMC), such as

question-and-answer websites conceived of as a distinctive

medium of communication based on cosmopolitan brand communities that share the same field of expertise and a common interest in a particular topic. By adopting sentiment analysis in order to recognize the positive or negative semantic orientation of texts and their emotional style, the book demonstrates that the aesthetics of such informal texts written using Digital English as a Lingua Franca (DELFL) is influenced by how we associate emotions and opinions with certain linguistic aspects, such as specific words or syntactic patterns, and how we can classify linguistic expressions according to the type of opinion that they convey.

*Transformative Pedagogical Perspectives on Home Language Use in Classrooms* Feb 22 2020 Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms.

*Transformative Pedagogical Perspectives on Home Language Use in Classrooms* is a cutting-edge research publication on the

effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.

**Hodder Gibson Model** Jan 15 2022

Education in a Federal UK Feb 16 2022 Britain's two recent

referenda - on Brexit (2016) and on Scottish independence (2014)

- have raised in the public mind fundamental questions about the

future of the UK. It seems that for the first time, the public, the

media and the political elite have woken up to the fact that in

different parts of the UK, there are different histories, different aspirations and different imagined futures in relation to a whole range of vitally important political issues. But what the public debate often fails to recognise is that in many areas of public life – perhaps especially education – the UK is already a federal state and in key respects has been so for many years. The aim of this volume is therefore to take stock: to try and capture what the current state of educational policy and practice is across the whole of the UK. This has been achieved by commissioning two different papers from each of the four countries – Wales, Scotland, Northern Ireland and England. The first is an overview, exploring the distinctive history, principles and current policies of each country. The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country – the Foundation Phase for Wales, assessment policy in Scotland, ‘shared education’ initiatives in Northern Ireland and higher education policy in England. Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today. This volume was originally published as a special issue of Oxford Review of Education.

**The Routledge Research Companion to Popular Music Education** Jan 27 2023 Popular music is a growing presence in education, formal and otherwise, from primary school to postgraduate study. Programmes, courses and modules in popular music studies, popular music performance, songwriting and areas of music technology are becoming commonplace across higher education. Additionally, specialist pop/rock/jazz graded exam syllabi, such as RockSchool and Trinity Rock and Pop, have emerged in recent years, meaning that it is now possible for school leavers in some countries to meet university entry requirements having studied only popular music. In the context of teacher education, classroom teachers and music-specialists alike are becoming increasingly empowered to introduce popular music into their classrooms. At present, research in Popular Music Education lies at the fringes of the fields of music education, ethnomusicology, community music, cultural studies and popular music studies. The Ashgate Research Companion to Popular Music Education is the first book-length publication that brings together a diverse range of scholarship in this emerging field. Perspectives include the historical, sociological, pedagogical, musicological, axiological, reflexive, critical, philosophical and ideological.
