Very often we are forced to retract our staunchly held positions after confidently vouching for the truth of what are really opinions and beliefs masquerading as facts. In this book Nellie and Jacob begin by exploring how our interpretations of what we individually perceive and conceive must coincide if we are to speak meaningfully about what is in our world: tables, minds, colours, processes, etc. They consider basic ways of knowing and their relationship to what is out there and what is in our minds. They examine the validity of our inferences and predictions: why q does not follow from p as the newspaper editorial alleges, and why we can anticipate tomorrow's sunrise. They ponder the gap between the language of time and the logic of time and why now cannot be a split instant during which nothing can happen, but must be a certain period during which some things do happen. They inquire into how our moral choices relate to their perceived causes and effects, and how our lives are built around our predictions and our knowledge of apparent causes and effects. They also discuss the bodily and mental natures of their own identities, what meanings to attach to the different stages of their lives, and the possibility of life after death. The author of this book is hail from Neelam Village of Deed Circle, Lower Subansiri

District, Arunachal Pradesh and believed to be from warrior family, he did dip. In Ophthalmic Technology, BA (H) B. Sc, MA (Edu), M. Phil. & Awarded PhD (hc) from Commonwealth Vocational University, Kingdom of Tonga. He is presently working as a Optometrist in the Govt. of Arunachal Pradesh and news content contributor in RNU all India radio, itnagar as a freelancer. He is basically intrested in social work for the upliftment of down troden society. Uses high contrast illustrations to introduce young readers to different modes of transportation, from balloons and trains to submarines and rockets. Follow the life lessons of 30 remarkable women of color who are making their mark on society and culture. "When you are struggling and you start thinking about giving up, I want you to remember something ... and that is the power of hope."
-Michelle Obama (White House speech, 2017) We Go High brings together the inspiring stories, motivational quotes, and personal philosophies of 30 influential women of color who have sought to overcome challenges in their lives. From activists to scientists, artists to sporting icons, each woman's story is different-but all have in common a deep-seated resilience to fight against the prejudices and barriers to success that women of color face on a daily basis. The book features political powerhouses such as Kamala Harris and Stacey Abrams, as well as businesswomen like Arundhati Bhattacharya and Angelica Ross, and writers Michaela Coel and

Amanda Gorman. With 30 stunning, specially commissioned portraits, *We Go High* not only celebrates these remarkable women's achievements, but uncovers the personal beliefs, attitudes, and determination that drive them. Author Dan Dillon presents an entertaining look back at the high school careers of St. Louis' Baby Boomers. Vol. 2 of "So, Where'd You Go to High School?" covers the 1950s through the 1980s and features lots of trivia, fun facts, local celebrities, and hundreds of photos.

What's Keeping Your Prayers from Being Effective? Learning how to pray is one of the greatest challenges in a Christian's life. A.W. Tozer pointed out that the Church's greatest curse is unanswered prayer, and that many people do not seem bothered by that. Maybe they don't understand what answered prayer is all about. Tozer outlines this as only he can, describing the kind of prayer God answers and the kind of prayer that leaves Him silent. Ultimately, you have to ask yourself: are my prayers today more powerful and effective than they were a year ago? Our good Father wants them to be! The book opens with Jacob's Ladder and its theme of ascending into God's very presence. What better place to begin dialoging with God? Only He can teach us what is on His heart, what His will is, and what our part in it could be.

We examine trends in bank competition since the early 2000s. The Lerner index—arguably the most commonly used measure—shows evidence of a marked increase in market power in advanced economies, especially

after the global financial crisis. But other frequently used indicators of banking sector competition seem much more muted. We show that the significant drop in policy rates that occurred in the aftermath of the crisis could explain the seeming disconnect. Adjusting the Lerner index for the impact of policy rates reveals that market power has been fairly constant in advanced economies—consistent with the other signals and similar to the pattern observed in emerging markets. Can a good speech save democracy? “Anyone interested in the past, present and future of speeches and speechwriting will find [this] a fascinating read.” —The Spectator

When First Lady Michelle Obama approached the podium at the 2016 Democratic National Convention, nobody could have predicted that her rousing line “When they go low, we go high” would become the motto for the political left and an anthem for opponents of oppression worldwide. It was a speech with the kind of emotional pull rarely heard these days, joining a long list of addresses that have made history. But what was it that made this speech so great? *When They Go Low, We Go High* explores the most notable speeches in history, analyzing the rhetorical techniques to uncover how the right speech at the right time can profoundly shape the world. Traveling across continents and centuries, political speechwriter Philip Collins reveals what Thomas Jefferson owes to Cicero and Pericles; who really gave the Gettysburg Address;

and what Elizabeth I shares with Winston Churchill. In telling the stories of famous and sometimes infamous speeches—including those from Lincoln, Woodrow Wilson, JFK, Martin Luther King, Jr., Disraeli, Hitler, Elie Wiesel, Margaret Thatcher, and Barack and Michelle Obama—Collins breathes new life into words you thought you knew well, telling the story of democracy. Whether it's the inaugural addresses of presidents or the revolutionary writings of Castro, Pankhurst, and Mandela, Collins illuminates and contextualizes these moments with sensitivity and humor. When *They Go Low, We Go High* examines the power of public speaking and serves as an urgent reminder that words can change the world. "Hits on three unassailable truths: rhetoric and democracy must go hand-in-hand; democracy, for all of its flaws, is superior to tyranny; and democracy is currently under assault." —Paste "Collins . . . understands intimately the mechanics of rhetoric. He believes that we, as human beings, possess the capacity to extract ourselves from the swamp in which we have sunk." —The Times Around the world, more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families, higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture and costing of public higher education abound from

student activists, academics, parents, civil society and policy-makers. We know, from macro research, that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people, six years after they began their university studies. It traces how going to university influences not only their employment options, but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good, and it provides significant conclusions pertinent to anyone who works in and cares about universities. Proven methodologies and concurrency techniques that will help you write faster and better code with Go programming

Key Features Explore Go's profiling tools to write faster programs by identifying and fixing bottlenecks Address Go-specific performance issues such as memory allocation and garbage collection Delve into the subtleties of concurrency and discover how to successfully implement it in everyday applications

Book Description Go is an easy-to-write language that is popular among developers thanks to its features such as concurrency, portability, and

ability to reduce complexity. This Golang book will teach you how to construct idiomatic Go code that is reusable and highly performant. Starting with an introduction to performance concepts, you'll understand the ideology behind Go's performance. You'll then learn how to effectively implement Go data structures and algorithms along with exploring data manipulation and organization to write programs for scalable software. This book covers channels and goroutines for parallelism and concurrency to write high-performance code for distributed systems. As you advance, you'll learn how to manage memory effectively. You'll explore the compute unified device architecture (CUDA) application programming interface (API), use containers to build Go code, and work with the Go build cache for quicker compilation. You'll also get to grips with profiling and tracing Go code for detecting bottlenecks in your system. Finally, you'll evaluate clusters and job queues for performance optimization and monitor the application for performance regression. By the end of this Go programming book, you'll be able to improve existing code and fulfill customer requirements by writing efficient programs. What you will learnOrganize and manipulate data effectively with clusters and job queuesExplore commonly applied Go data structures and algorithmsWrite anonymous functions in Go to build reusable appsProfile and trace Go apps to reduce bottlenecks and improve efficiencyDeploy,

monitor, and iterate Go programs with a focus on performance. Dive into memory management and CPU and GPU parallelism in Go. Who this book is for: This Golang book is a must for developers and professionals who have an intermediate-to-advanced understanding of Go programming, and are interested in improving their speed of code execution. Design and configure SQL Server instances and databases in support of high-throughput applications that are mission-critical and provide consistent response times in the face of variations in user numbers and query volumes. Learn to configure SQL Server and design your databases to support a given instance and workload. You'll learn advanced configuration options, in-memory technologies, storage and disk configuration, and more, all toward enabling your desired application performance and throughput. Configuration doesn't stop with implementation. Workloads change over time, and other impediments can arise to thwart desired performance. High Performance SQL Server covers monitoring and troubleshooting to aid in detecting and fixing production performance problems and minimizing application outages. You'll learn a variety of tools, ranging from the traditional wait analysis methodology to the new query store, and you'll learn how improving performance is really an iterative process. High Performance SQL Server is based on SQL Server 2016, although most of its content can be applied to prior versions of the product. This book is an excellent complement to

performance tuning books focusing on SQL queries, and provides the other half of what you need to know by focusing on configuring the instances on which mission-critical queries are executed. Covers SQL Server instance-configuration for optimal performance Helps in implementing SQL Server in-memory technologies Provides guidance toward monitoring and ongoing diagnostics What You Will Learn Understand SQL Server's database engine and how it processes queries Configure instances in support of high-throughput applications Provide consistent response times to varying user numbers and query volumes Design databases for high-throughput applications with focus on performance Record performance baselines and monitor SQL Server instances against them Troubleshoot and fix performance problems Who This Book Is For SQL Server database administrators, developers, and data architects. The book is also of use to system administrators who are managing and are responsible for the physical servers on which SQL Server instances are run. What do films such as *The Breakfast Club*, *Dead Poets Society*, and *Freedom Writers* have to teach us about American culture? Robert Bulmans *Hollywood Goes to High School* takes the reader on a fascinating journey through the high school film genre. Skillfully blending sociological theory and film analysis, Bulmans always accessible writing delightfully challenges the reader to think critically about American individualism and class inequality. Bulmans insightful sociological

analysis of 177 new and classic high school films explores the complex ways in which Americans make sense of social class, education, gender and adolescence. Suitable for the beginning and advanced student, *Hollywood Goes to High School* is an essential piece of reading for a variety of courses in sociology, education, communication, anthropology, American studies, and film studies. For more from Robert Bulman read his analysis of *McFarland USA* starring Kevin Costner on Sociological Cinema here: <http://www.thesociologicalcinema.com/blog/is-kevin-costners-mcfarland-usa-a-white-savior-film-well-yes-and-no>. LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use. This is book 2 of the Evelina series. Things get even hot. Raised stakes and a matter of life or death. Mankind's existence rest on the shoulders of one woman. The Omega. The first woman has become the last woman. The only true seal. What if it was all planned before this world was created? To save all humanity, mankind must find the only true key; the Omega. On the other hand, to restore the lost kingdom of darkness, the devil must find the most wanted catalyst; The Omega. When everyone's fate is in your hands what are the risks to yourself? It is a dash against

time as total obliteration of the losing team is imminent and inevitable. It is a story of courage, steadfast and honor in the face of death. When loyalty is tested to breaking points. When the person you are to protect is the same person you must kill to save humanity from extinction? Some choices are meant for gods as humans are too weak and unequipped to handle such traumatic experiences. One man's quest to solve God's Dilemma, but at what cost? One lady's quest to clear her name and enjoy life like every woman out there, but with what is at stake will the evil regime turn a blind eye? And at what expense? On the edge of the seat from the word go. A MUST READ. Going Postal examines the phenomenon of rage murder that took America by storm in the early 1980's and has since grown yearly in body counts and symbolic value. By looking at massacres in schools and offices as post-industrial rebellions, Mark Ames is able to juxtapose the historical place of rage in America with the social climate after Reaganomics began to effect worker's paychecks. But why high schools? Why post offices? Mark Ames examines the most fascinating and unexpected cases, crafting a convincing argument for workplace massacres as modern day slave rebellions. Like slave rebellions, rage massacres are doomed, gory, sometimes inadvertently comic, and grossly misunderstood. Going Postal seeks to contextualize this violence in a world where working isn't—and doesn't pay—what it used to.

Part social critique and part true crime page-turner, *Going Postal* answers the questions asked by commentators on the nightly news and films such as *Bowling for Columbine*. A poignant, fierce reflection on the power and spirit of girls and girls-at-heart from celebrated actress Kathryn Hahn and New York Times bestselling illustrator Brigitte Barrager. The editor of *Hugs from Obama* presents this photographic celebration of the former first lady's elegance and strength in *Go High: The Unstoppable Presence and Poise of Michelle Obama*. Featuring more than 50 full-color photographs illustrating her warmth, wisdom, and belief in a bright future, this one-of-a-kind collection highlights Michelle Obama's compassion, verve, and dynamic approach to unifying people from all walks of life. Each picture is accompanied by some of her most compelling words—inspirational quotes sharing her earnest expression that the United States of America is a place of unity, fairness, vitality, and optimism. A perfect gift book for mothers and graduates, *Go High* revisits the beloved first lady's heartfelt embrace of the American people, and her persistent encouragement to always lift one another up, reach higher, and rise to the occasion. NATIONAL BESTSELLER • NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE • ROXANE GAY'S AUDACIOUS BOOK CLUB PICK Shortlisted for the The Ursula K. Le Guin Prize for Fiction "Moving and thought-provoking . . . offering psychological insights in lyrical prose while seriously

exploring speculative conceits." – New York Times Book Review "Haunting and luminous . . . Beautiful and lucid science fiction. An astonishing debut." – Alan Moore, creator of Watchmen and V for Vendetta Recommended by New York Times Book Review • Los Angeles Times • NPR • Wall Street Journal • Entertainment Weekly • Esquire • Good Housekeeping • NBC News • BuzzFeed • Business Insider • Bustle • Goodreads • The Millions • The Philadelphia Inquirer • Minneapolis Star-Tribune • San Francisco Chronicle • The Guardian • PopSugar • Literary Hub • and many more! For fans of Cloud Atlas and Station Eleven, a spellbinding and profoundly prescient debut that follows a cast of intricately linked characters over hundreds of years as humanity struggles to rebuild itself in the aftermath of a climate plague—a daring and deeply heartfelt work of mind-bending imagination from a singular new voice. In 2030, a grieving archeologist arrives in the Arctic Circle to continue the work of his recently deceased daughter at the Batagaika Crater, where researchers are studying long-buried secrets now revealed in melting permafrost, including the perfectly preserved remains of a girl who appears to have died of an ancient virus. Once unleashed, the Arctic plague will reshape life on Earth for generations to come, quickly traversing the globe, forcing humanity to devise a myriad of moving and inventive ways to embrace possibility in the face of tragedy. In a theme park designed

for terminally ill children, a cynical employee falls in love with a mother desperate to hold on to her infected son. A heartbroken scientist searching for a cure finds a second chance at fatherhood when one of his test subjects—a pig—develops the capacity for human speech. A widowed painter and her teenaged granddaughter embark on a cosmic quest to locate a new home planet. From funerary skyscrapers to hotels for the dead to interstellar starships, Sequoia Nagamatsu takes readers on a wildly original and compassionate journey, spanning continents, centuries, and even celestial bodies to tell a story about the resilience of the human spirit, our infinite capacity to dream, and the connective threads that tie us all together in the universe. "Epic . . . Sequoia Nagamatsu is a writer whose imagination is matched only by his compassion, the kind we need to light our way through the dark." — Chloe Benjamin, New York Times bestselling author of *The Immortalists*

"Wondrous, and not just in the feats of imagination, which are so numerous it makes me dizzy to recall them, but also in the humanity and tenderness with which Sequoia Nagamatsu helps us navigate this landscape. . . . This is a truly amazing book, one to keep close as we imagine the uncertain future." — Kevin Wilson, New York Times bestselling author of *Nothing to See Here*

* Cutting-edge information on how to prevent, diagnose, and treat altitude illness and hypoxia in everyday life * Interweaves fascinating

research discoveries with dramatic first-person accounts * Authored by a celebrated mountaineer and physician who pioneered research in the field From the time of his historic expedition to Nanda Devi in the high Himalaya, Charles Houston, M.D., was fascinated by the effects of altitude on the human body. Why do people get sick in the mountains? What are the symptoms of hypoxia -- lack of sufficient oxygen -- that also occurs in everyday life, sometimes chronically due to disease? How can we decrease the incidence of illness and death? This edition incorporates current research on the effects of altitude on humans, and Houston (now deceased) joined forces with an educator and a medical writer in a text made even more accessible for the average reader while retaining the depth of material of particular use to the medical community. This edition of this seminal text added chapters on vision and the eye at altitude, chronic and subacute altitude illness, and the limits to work at altitude (with implications for athletic training). It presents information on genetics and gender differences and more on flight and space travel, on understanding and treating sea-level hypoxic illnesses, and on who can (or should not) go to high altitude, and much more. With an expanded glossary of terms. Yearbook for Copley High School in Copley, Summit County, Ohio. Presents information on high-altitude or mountain sickness, which occurs when a person goes to high altitude, provided by the American

Heart Association. Discusses the causes and symptoms of high-altitude sickness.
