Débuts: An Introduction to French Student Edition Dec 02 2020 Welcome to Débuts: a completely integrated film-based introductory course for learning French language and culture. The film narrative of *Le Chemin du retour* is what drives the scope and sequence of vocabulary and grammar, the presentation of culture, and the development of reading and writing. A two-hour feature-length film, *Le Chemin du retour* is the story of a young television journalist, Camille Leclair, and her pursuit of the truth about her grandfather's mysterious past. Through Camille's quest, students learn language and culture in the functional context provided by the story. The textbook/film package grew out of the authors' conviction that language learning is more than just learning skills: it is also a process in which understanding of culture must surely occupy a central position. Therefore, Débuts and *Le Chemin du retour* emphasize the importance of cultural awareness and understanding, not only of French and Francophone culture, but also of the student's own culture. In addition, the Débuts program contains both literary and cultural readings, as well as a playlist of Francophone songs, to provide even more authentic input to students on current or provocative topics, allowing for more student interaction in class. There is also CourseSmart eTextbook version of this title available. Students can save up to 50% off the cost of a print book, reduce their impact on the environment, and access powerful web tools for learning. Faculty can also review and compare the full text online without having to wait for a print desk copy. For maximum portability, e Textbooks can be viewed on an iPhone or iPod Touch, and they can be printed.

A Land Remembered Apr 06 2021 *A Land Remembered* has become Florida's favorite novel. Now this Student Edition in two volumes makes this rich, rugged story of the American pioneer spirit more accessible to young readers. Patrick Smith tells of three generations of the MacIveys, a Florida family battling the hardships of the frontier. The story opens in 1858, when Tobias and Emma MacIvey arrive in the Florida wilderness with their son, Zech, to start a new life, and ends in 1968 with Solomon MacIvey, who realizes that his wealth has not been worth the cost to the land. Between is a sweeping story rich in Florida history with a cast of memorable characters who battle wild animals, rustlers, Confederate deserters, mosquitoes, starvation, hurricanes, and freezes to carve a kingdom out of the Florida swamp. In this volume, meet young Zech MacIvey, who learns to ride like the wind through the Florida scrub on Ishmael, his marshtackie horse, his dogs, Nip and Tuck, at this side. His parents, Tobias and Emma, scratch a living from the land, gathering wild cows from the swamp and herding them across the state to market. Zech learns the ways of the land from the Seminoles, with whom his life becomes entwined as he grows into manhood. Next in series >> See all of the books in this series

Computer Age Statistical Inference, Student Edition Jan 15 2022 The twenty-first century has seen a breathtaking expansion of statistical methodology, both in scope and influence. 'Data science' and 'machine learning' have become familiar terms in the news, as statistical methods are brought to bear upon the enormous data sets of modern science and commerce. How did we get here? And where are we going? How does it all fit together? Now in paperback and fortified with exercises, this book delivers a concentrated course in modern statistical thinking. Beginning with classical inferential theories - Bayesian, frequentist, Fisherian - individual chapters take up a series of influential topics: survival analysis, logistic regression, empirical Bayes, the jackknife and bootstrap, random forests, neural networks, Markov Chain Monte Carlo, inference after model selection, and dozens more. The distinctly modern approach integrates methodology and algorithms with statistical inference. Each chapter ends with class-tested exercises, and the book concludes with speculation on the future direction of statistics and data science.

Used by students, lawyers, and judges alike and cited in thousands of New York cases, it discusses such topics as statutes of limitations, personal jurisdiction, appearance, venue, parties, papers, pleadings, motion practice, accelerated judgment, provisional remedies, disclosure, pretrial incidents, judgment, arbitration, and res judicata. The hornbook addresses pitfalls for practicing attorneys and judges. To eliminate the gap between what a student learns in law school and what a new lawyer actually needs to know in practice, the book starts from scratch on subjects, rather than assuming knowledge.
