Psychology's Ghosts Aug 11 2021 This book is the product of years of thought and a profound concern for the state of contemporary psychology. Jerome Kagan, a theorist and leading researcher, examines popular practices and assumptions held by many psychologists. He uncovers a variety of problems that, troublingly, are largely ignored by investigators and clinicians. Yet solutions are available, Kagan maintains, and his reasoned suggestions point the way to a better understanding of the mind and mental illness. Kagan identifies four problems in contemporary psychology: the indifference to the setting in which observations are gathered, including the age, class, and cultural background of participants and the procedure that provides the evidence (he questions, for example, the assumption that similar verbal reports of well-being reflect similar psychological states); the habit of basing inferences on single measures rather than patterns of measures (even though every action, reply, or biological response can result from more than one set of conditions); the defining of mental illnesses by symptoms independent of their origin; and the treatment of mental disorders with drugs and forms of psychotherapy that are nonspecific to the diagnosed illness. The author's candid discussion will inspire the debate that is needed in a discipline seeking to fulfill its promises. Learning Along the Way Jan 28 2023 You will see concrete examples of how your school can move away from a one-size-fits-all professional development model to create an authentic learning environment that meets the needs of individual teachers. The book features chapters focusing on: implementing an instructional coaching model -- establishing study groups among teachers -- using

observation as a means to model effective instruction -- going deeper with discussion through the use of Critical Friends protocols -- examining various ways adults process new information -- encouraging teachers to take leadership roles -- focusing the principal's leadership around the professional development model.

A New Way to Think About Teacher Professional Learning: Aug 23 2022 In 2005 Tina Doe set out to change the way teachers learn. She has pioneered what is today known as the Teacher Professional Learning Initiative: an exciting and meaningful way through which teachers collaborate to learn. In this book Tina Doe tells the story of how schools and teachers are coming under increasing pressure to meet the new expectations that a fast changing technologically based and global world is demanding. She argues teachers have to now meet the learning needs of all

students, not just those who can "do schooling". But, as Doe outlines, the teacher education literature and anecdotes from teachers and education systems across Australia (and elsewhere) about teacher professional learning suggests there must be a better way. This book is a case study of one such approach to teacher professional learning that works.

Authentic Professional Learning Dec 23 2019 There is considerable and growing interest in professionals learning across their working lives. The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para-professional workers in advanced industrial economies. Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self-regulated manner. Of course, many other kinds of employment also demand such behaviours. However, there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health, legal and financial matters. Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision-making. Then, like all other workers, professionals are required to maintain their competence in the face of changing requirements for work. Consequently, a volume that seeks to inform how best this ongoing learning can be understood, supported and assisted is most timely and welcomed. This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning. What is proposed here is that, in contrast to programmatic approaches towards professional development, the process of continuing professional learning is a personal, complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents.

The Other May 20 2022 Do you know that feeling of "not belonging" when you have so much to say at a work meeting? Of being a "yes-girl" but getting passed up for promotions? For women of color and children of immigrants, who are the "the other" at work, there's a different threshold of belonging that creates a false feeling of inadequacy. It can lead to being overwhelmed, overworked, and overlooked. The Other shatters the unspoken expectations for you to stay in your lane and gives you the tools to build unshakable confidence and a career that excels--on your own terms.

Bestselling author and MSNBC reporter Daniela-Pierre Bravo spent many years undocumented and in the shadows as an immigrant from Chile, working odd jobs to pay her way through school. Like many other women of color she became an expert shape shifter in order to chameleon her way around professional environments that felt out of reach. When Daniela became a DACA recipient, she finally felt that she'd made it, rising through the ranks in her career. But she quickly realized that no matter how much success she achieved, she always felt she had to prove her worth as "the other." In The Other, Daniela shares her journey and those of other women to help you recognize

your power in the workplace outside of the white gaze. She drives you to reshape the way you think about career advancement without losing your sense of identity and helps you see how to use your differences as an advantage. Smart, revealing, and loaded with practical steps, The Other is a framework for how to effectively advocate for yourself, become your biggest believer, claim the spaces in your career that are rightfully yours.

The Teaching Profession Feb 23 2020 This volume contributes to debates about the teaching profession by reviewing international and national reports on its status, as well as on reforms of various education systems. It proposes a global approach to the quality of the teaching profession as a decisive ingredient of education quality, including a conception of its identity and a vision of its future. Moreover, it is suggested that professional self-regulation may be the best way to achieve higher professional and social status for teachers, since it allows educators collectively to assume the culture of the values that comprise the uniqueness and fullness of the teaching profession.

The Startup Community Way Jul 30 2020 The Way Forward for Entrepreneurship Around the World We are in the midst of a startup revolution. The growth and proliferation of innovation-driven startup activity is profound, unprecedented, and global in scope. Today, it is understood that communities of support and knowledge-sharing go along with other resources. The importance of collaboration and a long-term commitment has gained wider acceptance. These principles are adopted in many startup communities throughout the world. And yet, much more work is needed. Startup activity is highly concentrated in large cities. Governments and other actors such as large corporations and universities are not collaborating with each other nor with entrepreneurs as well as they could. Too often, these actors try to control activity or impose their view from the top-down, rather than supporting an environment that is led from the bottom-up. We continue to see a disconnect between an entrepreneurial mindset and that of many actors who wish to engage with and support entrepreneurship. There are structural reasons for this, but we can overcome many of these obstacles with appropriate focus and sustained practice. No one tells this story better than Brad Feld and Ian Hathaway. The Startup Community Way: Evolving an Entrepreneurial Ecosystem explores what makes startup communities thrive and how to improve collaboration in these rapidly evolving, complex environments. The Startup Community Way is an explanatory guide for startup communities. Rooted in the theory of complex systems, this book establishes the systemic properties of entrepreneurial ecosystems and explains why their complex nature leads people to make predictable mistakes. As complex systems, value creation occurs in startup communities primarily through the interaction of the "parts" - the people, organizations, resources, and conditions involved - not the parts themselves. This continual process of bottom-up interactions unfolds naturally, producing value in novel and unexpected ways. Through these complex, emergent processes, the whole becomes greater and substantially different than what the parts alone could produce. Because of this, participants must take a fundamentally different approach than is common in much of our civic and professional lives. Participants must take a whole-system view, rather than simply trying to optimize their individual part. They must prioritize experimentation and learning over planning and execution. Complex systems are uncertain and unpredictable. They cannot be controlled, only guided and influenced. Each startup community is unique. Replication is enticing but impossible. The race to become "The Next Silicon Valley" is futile - even Silicon Valley couldn't recreate itself. This book: Offers practical advice for entrepreneurs, community builders, government officials, and other

stakeholders who want to harness the power of entrepreneurship in their city Describes the core components of startup communities and entrepreneurial ecosystems, as well as an explanation of the differences between these two related, but distinct concepts Advances a new framework for effective startup community building based on the theory of complex systems and insights from systems thinking Includes contributions from leading entrepreneurial voices Is a must-have resource for entrepreneurs, venture capitalists, executives, business and community leaders, economic development authorities, policymakers, university officials, and anyone wishing to understand how startup communities work anywhere in the world

This book describes design practice in landscape architecture by women in the first half of the 20th century.

Positioning for Professionals Nov 13 2021 "It's not the best companies that prevail in the marketplace, but rather the best brands. The goal of business strategy is not just to be better, but different. Learn how to build a differentiating value proposition by clearly and carefully defining your brand boundaries: Calling, Competencies, Customers, and Culture. Positioning for Professionals shows how a well-defined value proposition can help professional service firms create their own success instead of copying the success of others, including such concepts as: How and why professional service brands become homogenized. Why standing for everything is the same as standing for nothing. Why there's no such thing as full service. Deep and narrow as a strategic

imperative. Why it's better to be a profit leader than a market leader. Differentiation and price premiums. How to map your brand on the matrix of relevance and differentiation. How to define a value proposition that will make your firm intensely appealing to the customers who want you for what you do best. Based on the proven premise that the most profitable business strategy is not to aim at the center of the market, but rather at the edges, Positioning for Professionals is written for leaders, managers, and other senior executives of service companies in with a particular emphasis on professional service firms."--

REFERRALS, The Professional Way Nov 25 2022 It's Time For The TRUTH! One of the greatest lies you've ever been told in your career is, "Referrals are easy. All you have to do is ask for them!" In fact, getting referrals from your top clients and centers of influence like accountants and attorneys may be the most difficult thing you ever do. If you are like most advisors, you've been using the same worn out techniques for decades and they don;t work. Even worse, they may be sending your best people the wrong message about you, your business and your stature as a professional. It's time to learn a new way...a powerful process for making referrals a core part of your business. No more "begging for names" or clever conversational Kunf Fu. No more clumsy and aggressive techniques that make you look like a slick salesman. Welcome to the new world of the professional referral where your understanding of the client will bring your entire business up to a new level of success and enjoyment.

Paving the way towards authentic chemistry teaching - A contribution to teachers' professional development May 08 2021 Ein angemessenes Verständnis über Naturwissenschaften stellt eine Schlüsselkomponente naturwissenschaftlicher Grundbildung dar. Für die entsprechende unterrichtliche Gestaltung spielen die Vorstellungen der Lehrkräfte über Naturwissenschaften eine entscheidende Rolle und anwendbares Meta-Wissen gilt als zu erreichende Qualifikation im Lehramtsstudium. Im vorliegenden Forschungsprojekt wird im Rahmen von qualitativen Studien erhoben, welche Vorstellungen Lehramtsstudierende über 'Chemie als Naturwissenschaft' besitzen und wie die Studierenden unterstützt werden können, ein fundiertes Verständnis zu entwickeln und dieses praktisch zu transformieren. Auf Grundlage der Ergebnisse wird ein Modul für die Lehrerbildung entwickelt, das den Weg bereitet, authentisch (über) Chemie zu unterrichten. An adequate understanding about science represents one key component of scientific literacy. Teachers' conceptions about science play a crucial role for the design of appropriate lessons and applicable meta-knowledge is considered as a qualification to be achieved during university teacher education. In this thesis, qualitative studies are conducted to evaluate which pre-conceptions about 'chemistry as a science' teacher students possess and how students can be supported in developing an informed understanding as well as in practically transforming it. On the basis of the results a module for teacher education is developed which paves the way for authentic chemistry teaching.

Career Change Dec 15 2021 Are you tired of asking "What should I do with my life?" Are you sick of your job? Don't worry, I know how you feel! I used to start every working week saying "I hate my job" and spend every Friday night drinking too much to drown my misery. I was a cubicle worker in large corporates, going to pointless meetings, writing endless documents no one would read, testing computer systems that would soon be obsolete. Every day, my soul and my creativity died a little. Maybe you feel the same? Well, life is too short to just exist on the edge of breakdown, and there is a better way of living. You need to discover what you love to do and then make that

your job, your life's work. This book will take you through understanding the way you feel now as well as how to improve your current situation immediately so you can create enough space to work on breaking out and doing what you truly love. It also contains the career change process I used to go from management consultant to full-time author-entrepreneur. It's time to change your career and your life.

*Strategize to Win Apr 18 2022 The Wall Street powerhouse and author of *Expect to Win* offers a new way to conceptualize career strategies and gives us proven tools for successful change. Whether we're starting out, striving toward a promotion, or looking for a new opportunity, the working world isn't what it used to be. Wall Street veteran Carla Harris knows this, and in *Strategize to Win* she gives readers the tools they need to get started; get "unstuck" from bad situations; redirect momentum; and position themselves to manage their careers no matter the environment. With her trademark galvanizing advice, Harris identifies and clarifies issues that are often murky, offering lessons on: Identifying and making the most of your work profile (are you a Good Soldier? a Leader? an Arguer?); preparing for a career change without going back to school or taking a step down: honing three essential skills industry leaders possess (and how to get them); tuning into unspoken cues; and thriving through change. Introducing a new way of planning one's career in five-year units, *Strategize to Win* distills battle-tested and step-by-step tools that Carla has used to launch and sustain her own successful career and help others move forward, recover from setbacks, and position themselves for success.*

Professional Learning: Gaps and Transitions on the Way from Novice to Expert Dec 27 2022 About the Book Series The idea for the Book Series "Innovation and Change in Professional Education" (ICPE) was born in 1996. While working on another publication in this area, we noticed that professional educators faced similar problems without even knowing from each other. It was this observation that resulted in examining the possibilities for a new publication platform about professional education with input from different professions. We wanted to develop a publication source that would bring together educators and researchers to exchange ideas and knowledge about theory, research and professional practice. But we were not only striving for a book series informing readers about important themes in the professions. A second goal was to focus on processes of change and innovation. We were heavily involved in innovations going on in our institutions, and were convinced that a better understanding was needed in a wide range of issues critically important to the future of professional education. It was our belief that scholarly publications about innovation processes may support fundamental change in professional education. ICPE reflects our view that professional education deserves such a publication platform. It aims to approach critical questions of educational innovations, and to examine dynamics of educational change in various professional domains in the context of innovation processes. The books will include contributions from frontline practitioners, leading researchers, or distinguished scholars in professional education, delivering reports of empirical or theoretical research, reviews, interpretations of evaluation studies, or descriptions of innovative approaches.

Career Leap Aug 30 2020 Adapt you career to the shifting paradigm of work, employment and success The word "career" doesn't mean what it used to. People entering the workforce today will have an estimated 17 employers and five careers in their lifetimes — and already many existing roles are being automated away, with many more to follow. No profession, industry or geography is

immune, and employees need to change their idea of what it means to be employed. The rise of freelancing and the gig economy means flexibility and independence, but also less security — with trends showing it is the way of the future. You cannot future-proof your job, but you can future-proof your career. Career Leap shows you what you need to know, how you need to change and how you can prepare for the inevitable tides of change. This book sheds light on the choices you make, and the steps you can take to reignite, reshape and liberate your career. You'll develop the confidence you need to take decisive action, sharpen your skills and become the agile, adaptive professional we will all need to be. The 10-step Career Reinvention Cycle helps you assess the status quo and determine where you need to go, and then gives you a solid framework for making a move when the time is right. Future-proof your career with the new laws for success Undertake a health check of your career and make deliberate career choices Design, build, and execute your influence and career strategy Be equipped to take control and leap ahead with your career. No matter your role, it is imperative that you make every day in your career count. Make the critical decisions, take clear actions and, above all, stay ahead of the pack. Career Leap gives you the insight, confidence and knowledge you need to move up as you leap forward.

Bullshit Jobs May 27 2020 From bestselling writer David Graeber—“a master of opening up thought and stimulating debate” (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled “On the Phenomenon of Bullshit Jobs.” It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “Clever and charismatic” (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

The Way of Medicine Feb 26 2023 Today's medicine is spiritually deflated and morally adrift; this book explains why and offers an ethical framework to renew and guide practitioners in fulfilling their profession to heal. What is medicine and what is it for? What does it mean to be a good doctor? Answers to these questions are essential both to the practice of medicine and to understanding the moral norms that shape that practice. *The Way of Medicine* articulates and defends an account of medicine and medical ethics meant to challenge the reigning provider of services model, in which clinicians eschew any claim to know what is good for a patient and instead offer an array of "health care services" for the sake of the patient's subjective well-being. Against this trend, Farr Curlin and Christopher Tollefsen call for practitioners to recover what they call the *Way of Medicine*, which offers physicians both a path out of the provider of services model and also the moral resources necessary to resist the various political, institutional, and cultural forces that constantly push practitioners and patients into thinking of their relationship in terms of economic exchange. Curlin and Tollefsen offer an accessible account of the ancient ethical tradition from which contemporary medicine and bioethics has departed. Their investigation, drawing on the scholarship of Leon Kass, Alasdair MacIntyre, and John Finnis, leads them to explore the nature of medicine as a practice, health as the end of medicine, the doctor-patient relationship, the rule of double effect in medical practice, and a number of clinical ethical issues from the beginning of life to its end. In the final chapter, the authors take up debates about conscience in medicine, arguing that rather than pretending to not know what is good for patients, physicians should contend conscientiously for the patient's health and, in so doing, contend conscientiously for good medicine. *The Way of Medicine* is an intellectually serious yet accessible exploration of medical practice written for medical students, health care professionals, and students and scholars of bioethics and medical ethics.

In Harm's Way: Professional Health Care Workers at Risk Sep 23 2022 In 2014 CBC television and radio investigated the treatment of staff at a high-risk adolescent treatment/corrections centre in British Columbia, Canada. This is a government run facility that put their staff in "Harms Way". WorkSafeBC (The Workers Compensation Board of BC) and the BC Nurses Union cited them for failure to protect their staff. Despite the notoriety of this extreme example, staff indicated they are skeptical that recommended changes will be implemented. This example illustrates the intransigence of some management groups in changing unsafe practices. This book is about the safety of professional health care professionals, therapists and counsellors and their workplaces and how organizations fail to perform their "due diligence" and ethical responsibilities in protecting their employees. It defines the conditions of Secondary Traumatic Stress, Compassion Fatigue, Vicarious Trauma and outlines historical influences, and the role of organizations in creating and perpetuating unsafe workplaces. Dr. Hall's book is uncompromising and thorough in its approach and reveals the inconsistencies in the care of caregivers and the illusion of safety that many professional health care workers work under. She maintains in her book that workplace injuries are costly and entirely preventable and the responsibility, although shared, largely lies with the organizations that employ these workers. These professionals, their clients, their families, and society bear the cost of unsafe workplaces. She also uncovers the socio/political/economic factors that impact this highly preventable situation and offers examples of organizations that are working for change. In summary, Dr. Hall's book is a revealing expose of the workplaces of the people that care for the most vulnerable, sick, and marginalized clients.
