*Color Harmonies Jun 05 2021 Because theories of visual perception have traditionally concentrated on form, artists have generally dealt with the problem of color through their own observation and intuition. In Color Harmonies, Augusto Garau systematically investigates the role of both color and form in visual perception and presents an original theory of the aesthetic relations among colors. Garau, a painter who teaches the psychology of form, pays particular attention to the way colors behave when organized in patterns. His theory of color combination addresses two principal compositional elements: the relations between figure and ground and the phenomenon of transparency. Garau meticulously analyzes the use of color in paintings by masters such as Cézanne, Picasso, and Matisse to show how his theory applies to actual works of art. Containing*

*Keys to Successful Color Jul 26 2020 "You will learn how to paint the colors of the seasons and the times of the day, how to observe and record color, and how to harmonize and design the colors you see into a dramatic statement—in short, how to use color successfully. After a brief introduction to the book, Caddell describes his materials and tools, paints, and color theories, and demonstrates how he paints a typical landscape. Then, using 26 paintings covering all the seasons and the times of the day, and all reproduced in full color, Caddell describes the particular problems he faced when painting each scene. Each problem is shown in two details. In the first detail, Caddell illustrates the key by analyzing how most students typically solve the problem, and then he compares it with his own solution. Each solution gives you an other important key to using color successfully in your landscape paintings! In the last part of the book, Caddell compares four photographs with the landscape paintings they inspired, showing you how to transform nature's beauty into art."--BOOK JACKET.*

It's easy to say you love someone or dislike something. You can even draw things to help people understand these feelings, like a heart or a frowning face. But artists can say the same thing with colors and shapes. It's like a secret language, a code that is very easy to understand once you know how. Why do you think nearly every country uses the color red on their stop signs? There is a good reason. Red is a color that grabs attention and alerts us to possible danger. Why are many toys made from circles? Is it because circles are softer? You already use the ideas of color and shape in your everyday life. Everybody does. We just need to learn to use these ideas to show our feelings when we make art. This book will help you learn about these ideas and use them to create art with secrets in them. We call that expressionism. With these ideas you can paint a face and use color to show how you feel about that person. You could also paint a face of a person and not even draw the eyes, nose, and mouth. By using colors and shapes that show what the person is like, we can say*
