This edition of ICD-O, the standard tool for coding diagnoses of neoplasms in tumour and cancer registrars and in pathology laboratories, has been developed by a working party convened by the International Agency for Research on Cancer / WHO. ICD-O is a dual classification with coding systems for both topography and morphology. The book has five main sections. The first provides general instructions for using the coding systems and gives rules for their implementation in tumour registries and pathology laboratories. Section two includes the numerical list of topography codes, which remain unchanged from the previous edition. The numerical list of morphology codes is presented in the next section, which introduces several new terms and includes considerable revisions of the non-Hodgkin lymphoma and leukaemia sections, based on the WHO Classification of Hematopoietic and Lymphoid Diseases. The five-digit morphology codes allow identification of a tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world. The alphabetical index gives codes for both topography and morphology and includes selected tumour-like lesions and conditions. A guide to differences in morphology codes between the second and third editions is provided in the final section, which includes lists of all new code numbers, new terms and synonyms added to existing code definitions, terms that changed morphology code, terms for conditions now considered malignant, deleted terms, and terms that changed behaviour code. The superb organization of The Electronics Handbook means that it is not only a comprehensive and fascinating reference, but also a pleasure to use. Some of these organizational features include: Wood as an Energy Resource analyzes how wood is seen as a possible source of alternative energy and evaluates the extent of its use. The book covers the trends of wood as fuel in different countries, including its current use, value as fuel, comparison with other fuels, supply, delivery, and transportation. Wood conversion to other forms of fuel and the deployment of advanced wood combustion and conversion systems are also discussed. The text also explains wood resource bases and supplies, as well as the future of wood as fuel. The monograph is highly recommended for experts and researchers in energy conservation as well as renewable and alternative energy sources, especially for those who want to make studies regarding this topic. The book will also be helpful for advocates and environmentalists who want to be educated and educate others about wood as source of energy and fuel. Number of Exhibits: 19 Received document entitled: EXHIBITS TO OPENING BRIEF OF APPELLANT This book is a guide to the presentation of data in visual format using IBM PCs and compatibles. It includes BASIC programs for graphics presentation of all major types of graph and chart, including 3-D. A special feature is the inclusion of colour plates illustrating the graphics that can be produced. Includes changes entitled Public bulletin. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. Engineers require sophisticated techniques to analyze and repair modern electronic systems. This book deals with the important aspects of this process for any electronic design. Signal Measurement, Analysis, and Testing offers a concise presentation of the mathematics of signal analysis and the instrumentation of signal measurement, analysis, and testing. It provides recent information, includes a thorough treatment of Fourier waveform analysis and computer-

aided analysis, and makes it easy for engineers to find the information and data they need. These reports cover the supply, demand, and price situation every week on a regional, national, and international basis for milk, butter, cheese, and dry and fluid products. The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.
