Information Technology Mar 05 2021

Information Technology: Made Simple covers the full range of information technology topics, including more traditional subjects such as programming languages, data processing, and systems analysis. The book discusses information revolution, including topics about microchips, information processing operations, analog and digital systems, information processing system, and systems analysis. The text also describes computers, computer hardware, microprocessors, and microcomputers. The peripheral devices connected to the central processing unit; the main types of system software; application software; and graphics and multimedia are also considered. The book tackles equipment, software, and procedures involved in computer communications; available telecommunications services; and data and transaction processing.

The text also presents topics about computer-integrated manufacturing; the technology of information processing and its business applications; and the impact of this technology on society in general. Students taking computer and information technology courses will find the book useful.

Casebook on General Management in Asia Pacific Dec 14 2021

This text consists of cases of European Businesses in Asia Pacific, Asian Businesses in Asia Pacific and Asian Businesses in Global Competition. It covers a wide range of topics including, human resources, corporate culture, strategic planning, cross-cultural marketing, marketing strategy, manufacturing, alliances and partnership, utilising information technologies, entry into new markets and many more. It will be relevant to many courses in the areas of general management, international management and strategy.

The phone book Jul 09 2021

Sociology for nurses 2/e Aug 10 2021 In its pursuit to bring about an awakening among students of nursing about human social behavior, this second edition of Sociology for Nurses continues to build on sociological theories that are of relevance to the nursing community. Conforming to the syllabus prescribed by the Indian Nursing Council and catering to the needs of second year B. Sc Nursing students, this book provides jargon-free explanation of even the most difficult concepts to the student's benefit.

Vietnam Economic News Apr 30 2023

Cohesion in English Aug 30 2020 Cohesion in English is concerned with a relatively neglected part of the linguistic system: its resources for text construction, the range of meanings that are

specifically associated with relating what is being spoken or written to its semantic environment. A principal component of these resources is 'cohesion'. This book studies the cohesion that arises from semantic relations between sentences. Reference from one to the other, repetition of word meanings, the conjunctive force of but, so, then and the like are considered. Further, it describes a method for analysing and coding sentences, which is applied to specimen texts.

The World Is Flat 3.0 May 27 2020 This Independence Day edition of *The World is Flat 3.0* includes an exclusive preview of *That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back*, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller "One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. *The World Is Flat 3.0* is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize-winning author of *The Lexus and the Olive Tree*.

Ad \$ Summary Apr 18 2022 Advertising expenditure data across ten media: consumer magazines, Sunday magazines, newspapers, outdoor, network television, spot television, syndicated television, cable television, network radio, and national spot radio. Lists brands alphabetically and shows total ten media expenditures, media used, parent company and

PIB classification for each brand. Also included in this report are industry class totals and rankings of the top 100 companies of the ten media.

Electrical Contacts May 07 2021 Various factors affect the performance of electrical contacts, including tribological, mechanical, electrical, and materials aspects. Although these behaviors have been studied for many years, they are not widely used or understood in practice.

Combining approaches used across the globe, *Electrical Contacts: Fundamentals, Applications, and Technology* integrates advances in research and development in the tribological, material, and analytical aspects of electrical contacts with new data on electrical current transfer at the micro- and nanoscales. Taking an application-oriented approach, the authors illustrate how material characteristics, tribological behavior, and loading impact the degradation of contacts, formation of intermetallics, and overall reliability and performance. Coverage is divided broadly into three sections, with the first focused on mechanics, tribology, materials, current and heat transfer, and basic reliability issues of electrical contacts. The next section explores applications, such as power connections, electronic connections, and sliding contacts, while the final section presents the diagnostic and monitoring techniques used to investigate and measure phenomena occurring at electrical contact interfaces. Numerous references to current literature reflect the fact that this book is the most comprehensive survey in the field. Explore an impressive collection of data, theory, and practical applications in *Electrical Contacts: Fundamentals, Applications, and Technology*, a critical tool for anyone investigating or designing electrical equipment with improved performance and reliability in mind.

Johnny Got His Gun Jul 21 2022 The Searing Portrayal Of War That Has Stunned And Galvanized Generations Of Readers An immediate bestseller upon its original publication in 1939, Dalton Trumbo's stark, profoundly troubling masterpiece about the horrors of World War I brilliantly crystallized the uncompromising brutality of war and became the most influential protest novel of the Vietnam era. *Johnny Got His Gun* is an undisputed classic

of antiwar literature that's as timely as ever. ?A terrifying book, of an extraordinary emotional intensity.?"--The Washington Post "Powerful. . . an eye-opener." --Michael Moore "Mr. Trumbo sets this story down almost without pause or punctuation and with a fury amounting to eloquence."--The New York Times "A book that can never be forgotten by anyone who reads it."--Saturday Review

Awakening of the Soul Jan 27 2023 In 2002, Grace J. Scott began to receive messages from those beyond the grave. Grace felt it her duty to record their voices, their thoughts, and even their warnings. Awakening of the Soul is the amazing result. This intriguing collection of channeled thoughts from souls in heaven, other planetary systems, and other universes will benefit those seeking spiritual growth as well as those wanting information about preparing for upcoming Earth changes. Much of the material is packed with information and requires time to read and digest while other material is simple and easily understood. Presented in chronological order as received in reflexology sessions, the conversations are completely original, unedited, and unorganized, straight from the spirit itself. Some spirits channeled big lessons for the general public or gave messages to individuals while some explained disasters, politics, wars, dreams, and events in our daily lives. But all of the souls have one thing in common: they bring news that Earth is cleansing itself at a rapid pace, and they are here to assist us through the cleansing and beyond. Epic in scope, Awakening of the Soul is a vital tool for those looking to the future and to the fate of Earth itself.

Hands-On Functional Programming with

C++ Feb 22 2020 Learn functional programming and build robust applications using the latest functional features in C++ Key FeaturesLearn programming concepts such as loops, expressive code, and simple parallelizationUnderstand the working of Lambdas and Currying and write Pure functionsExplore event sourcing and other functional patterns to improve the efficiency of your applicationsBook Description Functional

programming enables you to divide your software into smaller, reusable components that are easy to write, debug, and maintain.

Combined with the power of C++, you can develop scalable and functional applications for modern software requirements. This book will help you discover the functional features in C++ 17 and C++ 20 to build enterprise-level applications. Starting with the fundamental building blocks of functional programming and how to use them in C++, you'll explore functions, currying, and lambdas. As you advance, you'll learn how to improve cohesion and delve into test-driven development, which will enable you in designing better software. In addition to this, the book covers architectural patterns such as event sourcing to help you get to grips with the importance of immutability for data storage. You'll even understand how to "think in functions" and implement design patterns in a functional way. By the end of this book, you'll be able to write faster and cleaner production code in C++ with the help of functional programming. What you will learnUnderstand the fundamentals of functional programmingStructure your code by understanding the building blocks of functional programmingCompare design styles in functional programming and object-oriented programming (OOP)Use the concept of currying to create new functions in C++Become skilled at implementing design patterns in a functional wayGet to grips with multithreading by means of functional programmingLearn how to improve memory consumption when using functional constructsWho this book is for This book is for C++ developers who want to learn functional programming but have little to no knowledge of the paradigm. Although no prior knowledge of functional programming is necessary, basic C++ programming experience will help you understand key concepts covered in the book.
[Longitudes and Attitudes](#) Sep 30 2020 From the Pulitzer Prize-winning New York Times columnist and bestselling author of From Beirut to Jerusalem and The Lexus and the Olive Tree comes this smart, penetrating, brilliantly informed book that is indispensable for understanding today's radically new world and America's complex place in it. Thomas L. Freidman received his third Pulitzer Prize in

2002 “for his clarity of vision, based on extensive reporting, in commenting on the worldwide impact of the terrorist threat.” In *Longitudes and Attitudes* he gives us all of the columns he has published about the most momentous news story of our time, as well as a diary of his private experiences and reflections during his post-September 11 travels. Updated for this new paperback edition, with over two years’ worth of Friedman’s columns and an expanded version of his diary, *Longitudes and Attitudes* is a broadly influential work from our most trusted observer of the international scene.

[The World Is Flat \[Further Updated and Expanded; Release 3.0\]](#) Jan 15 2022 Explores globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks-- environmental, social, and political.

[Pathwise Estimation and Inference for Diffusion Market Models](#) Jan 03 2021 Pathwise estimation and inference for diffusion market models discusses contemporary techniques for inferring, from options and bond prices, the market participants' aggregate view on important financial parameters such as implied volatility, discount rate, future interest rate, and their uncertainty thereof. The focus is on the pathwise inference methods that are applicable to a sole path of the observed prices and do not require the observation of an ensemble of such paths.

This book is pitched at the level of senior undergraduate students undertaking research at honors year, and postgraduate candidates undertaking Master’s or PhD degree by research. From a research perspective, this book reaches out to academic researchers from backgrounds as diverse as mathematics and probability, econometrics and statistics, and computational mathematics and optimization whose interest lie in analysis and modelling of financial market data from a multi-disciplinary approach. Additionally, this book is also aimed at financial market practitioners participating in capital market facing businesses who seek to keep abreast with and draw inspiration from novel approaches in market data analysis. The first two chapters of the book contains introductory material on stochastic analysis and

the classical diffusion stock market models. The remaining chapters discuss more special stock and bond market models and special methods of pathwise inference for market parameter for different models. The final chapter describes applications of numerical methods of inference of bond market parameters to forecasting of short rate. Nikolai Dokuchaev is an associate professor in Mathematics and Statistics at Curtin University. His research interests include mathematical and statistical finance, stochastic analysis, PDEs, control, and signal processing. Lin Yee Hin is a practitioner in the capital market facing industry. His research interests include econometrics, non-parametric regression, and scientific computing.

Chamorro-English Dictionary Mar 25 2020

The Chamorro-English Dictionary provides an alphabetical listing of as many Chamorro words as could be collected, spelled according to the principles adopted by the Marianas Orthography Committee in February 1971. Each word is given a fairly comprehensive definition in English, and, in many cases, sample sentences have been included to illustrate usages in context. Cross-references are provided among Chamorro words that are semantically related. An English-Chamorro finder list, based on selected words in the English definitions, is also provided.

Sea Creatures Coloring Book For Kids May

19 2022 A FUN BOOK TO COLOR, INSPIRED BY

SEA CREATURES. Coloring and dedicating

oneself to artistic and creative works generally

develops hand-eye coordination, trains the mind

to recognize shapes and orient oneself in space, promotes good relationships with others (think of a four-handed colored drawing), develops the patience and a sense of innovation. Designed for children, it contains easy to color level illustrations. But let the children cheerfully color the many little animals that populate the oceans. The book contains: Over 50 Coloring Illustrations + the name of the sea creature to color. Format suitable for drawing 8.5 * 11 Flexible cover. Let your child discover the world by playing. Buy the book now.

The Dreams That Stuff Is Made Of Jun 27 2020 "God does not play dice with the universe." So said Albert Einstein in response to the first discoveries that launched quantum physics, as they suggested a random universe that seemed to violate the laws of common sense. This 20th-century scientific revolution completely shattered Newtonian laws, inciting a crisis of thought that challenged scientists to think differently about matter and subatomic particles. *The Dreams That Stuff Is Made Of* compiles the essential works from the scientists who sparked the paradigm shift that changed the face of physics forever, pushing our understanding of the universe on to an entirely new level of comprehension. Gathered in this anthology is the scholarship that shocked and befuddled the scientific world, including works by Niels Bohr, Max Planck, Werner Heisenberg, Max Born, Erwin Schrodinger, J. Robert Oppenheimer, Richard Feynman, as well as an introduction by today's most celebrated scientist, Stephen Hawking.

Southeast Asian Transformations Jun 20 2022 Southeast Asia is one of the most dynamic regions in the world. This volume offers a timely approach to Southeast Asian Studies, covering recent transitions in the realms of urbanism, rural development, politics, and media. While most of the contributions deal with the era of post-independence, some tackle the colonial period and the resulting developments. The volume also includes insights from Southern India. As a tribute to the interdisciplinary project of Southeast Asian Studies, this book brings together authors from disciplines as diverse as area studies, sociology, history, geography, and journalism.

The End of the World is Flat Apr 25 2020 A satirical comedy featuring Christopher Columbus, a tech billionaire, and a global delusion. Mel Winterbourne is the founder of a small, single-issue charity in the obscure field of mapmaking. Its success in achieving modest aims attracts the attention of handsome tech billionaire Joey Talavera, who evicts Mel and hijacks her charity for his own ends: to convince the world that the earth is flat. Although his chances of doing so seem slim, Flat Earthery is an idea whose time has come. With the historical reputation of Christopher Columbus in free-fall, old-style 'globularism' becomes heretical for a new generation of angry, anti-Establishment free-thinkers. Teachers, politicians, and celebrities face ruin if they refuse to sign up to the new orthodoxy. For Mel, something must be done. Teaming up with a pariah tabloid journalist and a faded writer of gross-out movie comedies, she sets out to challenge Talavera and his deranged beliefs. Will history and the billionaire's own family origins be their unexpected ally? Using his trademark mix of history and satire to poke fun at modern foibles, Simon Edge is at his razor-sharp best in a caper that may be much more relevant than you think.

Коммерсантъ 21-2014 Oct 24 2022

Ежедневная общенациональная деловая газета.российская ежедневная общественно-политическая газета с усиленным деловым блоком. Выпускается Издательским домом «Коммерсантъ». Периодичность - шесть раз в неделю (с понедельника по субботу).

Visualizing the Street Feb 04 2021 *Visualizing the Street* investigates the social and cultural significance of new developments at the intersection of visual culture and urban space.

Handbook of Biometric Anti-Spoofing Sep 23 2022 This authoritative and comprehensive handbook is the definitive work on the current state of the art of Biometric Presentation Attack Detection (PAD) - also known as Biometric Anti-Spoofing. Building on the success of the previous, pioneering edition, this thoroughly updated second edition has been considerably expanded to provide even greater coverage of PAD methods, spanning biometrics systems based on face, fingerprint, iris, voice, vein, and signature recognition. New material is also

included on major PAD competitions, important databases for research, and on the impact of recent international legislation. Valuable insights are supplied by a selection of leading experts in the field, complete with results from reproducible research, supported by source code and further information available at an associated website. Topics and features: reviews the latest developments in PAD for fingerprint biometrics, covering optical coherence tomography (OCT) technology, and issues of interoperability; examines methods for PAD in iris recognition systems, and the application of stimulated pupillary light reflex for this purpose; discusses advancements in PAD methods for face recognition-based biometrics, such as research on 3D facial masks and remote photoplethysmography (rPPG); presents a survey of PAD for automatic speaker recognition (ASV), including the use of convolutional neural networks (CNNs), and an overview of relevant databases; describes the results yielded by key competitions on fingerprint liveness detection, iris liveness detection, and software-based face anti-spoofing; provides analyses of PAD in fingervein recognition, online handwritten signature verification, and in biometric technologies on mobile devices includes coverage of international standards, the E.U. PSDII and GDPR directives, and on different perspectives on presentation attack evaluation. This text/reference is essential reading for anyone involved in biometric identity verification, be they students, researchers, practitioners, engineers, or technology consultants. Those new to the field will also benefit from a number of introductory chapters, outlining the basics for the most important biometrics.

InfoWorld Mar 29 2023 InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

My Grandma Sep 11 2021 This book is about history as it is explored through a grandmother's photo album.

Sprinkler Hydraulics Dec 02 2020 This is the foremost guide to hydraulically designing sprinkler systems for commercial and residential buildings. Sprinkler Hydraulics, Third Edition includes the latest developments in automatic sprinkler design, as well as going beyond the

NFPA 13 Standard to explain everything needed to know to professionally design a system. Sprinkler Hydraulics, Third Edition explains flow phenomena to help the reader evaluate calculated sprinkler systems. Starting with a general discussion of the mathematics involved, the discussion proceeds to define sprinkler density, including several examples which explain how to determine discharge areas. • Includes the latest developments in automatic sprinkler design, as well as going beyond the NFPA 13 Standard to explain everything needed to know to professionally design a system; • Starting with a general discussion of the mathematics involved, the discussion proceeds to define sprinkler density, including several examples which explain how to determine discharge areas; • Explains flow phenomena to help the reader evaluate calculated sprinkler systems.

Food Anxiety in Globalising Vietnam Aug 22 2022 This open access book approaches the anxieties inherent in food consumption and production in Vietnam. The country's rapid and recent economic integration into global agro-food systems and consumer markets spurred a new quality of food safety concerns, health issues and distrust in food distribution networks that have become increasingly obscured. This edited volume further puts the eating body centre stage by following how gendered body norms, food taboos, power structures and social differentiation shape people's ambivalent relations with food. It uncovers Vietnam's trajectories of agricultural modernisation against which consumers and producers manoeuvre amongst food self-sufficiency, security and abundance. Food Anxiety in Globalising Vietnam is explicitly about 'dangerous' food - regarding its materiality and meaning. It provides social science perspectives on anxieties related to food and surrounding discourses that travel between the local and the global, the individual and society and into the body. Therefore, the book's lens of food anxiety matters for social theory and for understanding the embeddedness and discontinuities of food globalizations in Vietnam and beyond. Due to its rich empirical base, methodological approaches and thematic foci, it will appeal to scholars, practitioners and students alike.--
