Language and Culture in EU Law Apr 22 2020 Written by distinguished legal and linguistic scholars and practitioners from the EU institutions, the contributions in this volume provide multidisciplinary perspectives on the vital role of language and culture as key forces shaping the dynamics of EU law. The broad spectrum of topics sheds light on major Europeanization processes at work: the gradual creation of a neutralized EU legal language with uniform concepts, for example, in the DCFR and CESL, and the emergence of a European legal culture. The main focus is on EU multilingual lawmaking, with special emphasis on problems of legal translation and term formation

in the multilingual and multicultural European context, including comparative law aspects and an analysis of the advantages and disadvantages of translating from a lingua franca. Of equal importance are issues relating to the multilingual interpretation of EU legislation and case law by the national courts and interpretative techniques of the CJEU, as well as the viability of the autonomy of EU legal concepts and the need for the professionalization of court interpreters Union-wide in response to Directive 2010/64/EU. Offering a good mix of theory and practice, this book is intended for scholars, practitioners and students with a special interest in the legal-linguistic aspects of EU law and their impact on old and new Member States and candidate countries as well.

Institutional Translator Training Sep 27 2020 This collection surveys the translator training landscape in international organizations on a global scale, offering a state-of-the-art view on institutional translator training

research and practical takeaways for stakeholders. The volume's focus on training brings a unique perspective to existing research on institutional translation, which has tended to single out such themes as agency, professionalism, and quality. The book is divided into three sections, with the first outlining the competences required of institutional translators, the second exploring training practices at the university level and "on the job", for novices and professionals, across a range of settings, and the third providing a synthesis of the above. Contributions draw on findings from studies in both institutional desiderata and existing training programmes from diverse geographic contexts towards situating the discussion through a global lens. In linking together competences and training practices, the book enhances collective knowledge of institutional translation and provides valuable insights for universities and institutions that work with translators on both international and national scales. This book will be key reading for scholars in translation studies, particularly those interested in institutional translation and translator training, as well as active professionals.

The Responsible Software Engineer Dec 31 2020 You might expect that a person invited to contribute a foreword to a book on the subject of professionalism would himself be a professional of exemplary standing. I am gladdened by that thought, but also disquieted. The disquieting part of it is that if I am a professional, I must be a professional something, but what? As someone who has tried his best for the last thirty years to avoid doing anything twice, I lack one of the most important characteristics of a professional, the dedicated and persistent pursuit of a single direction. For the purposes of this foreword, it would be handy if I could think of myself as a professional abstractor. That would allow me to offer up a few useful abstractions about professionalism, patterns that might illuminate the essays that follow. I shall try to do this by proposing three successively more complex models of professionalism, ending up with one that is discomfortingly soft, but still, the best approximation I can make of what the word means to me. The first of these models I shall designate Model Zero. I intend a pejorative sense to this name, since the attitude represented by Model Zero is retrograde and offensive ... but nonetheless common. In this model, the word "professionalism" is a simple surrogate for compliant uniformity.

Legal Translation in Context Dec 23 2022 What does it take to be a legal translator? What is expected of legal translation professionals in the public and private sectors? Following recent developments in the field, there is a need to take stock of professional settings, skills and related training needs. This volume offers a systematic overview of the diverse professional profiles within legal translation and the wide range of communicative situations in which legal translators play their roles as mediators. Contexts of professional practice have been classified into three main categories, which give shape to the three parts of the book: (1) legal translation in the private sector; (2) legal translation for national public institutions; and (3) legal translation at international organizations. Practical concerns within each of these settings are analysed by experts of diverse backgrounds, including several heads of institutional translation teams. Commonalities and differences between contexts are identified as a means of gaining a comprehensive understanding of this multifaceted and dynamically changing profession.
