From the depths of Death Valley, Daniel Arnold set out to reach Mount Whitney in a way no road or trail could take him. Anything manmade or designed to make travel easy was out. With a backpack full of empty two-liter bottles, and the remotest corners of desert before him, he began his toughest test yet of physical and mental endurance. Badwater Basin sits 282 feet below sea level in Death Valley, the lowest and hottest place in the Western Hemisphere. Mount Whitney rises 14,505 feet above sea level, the highest point in the contiguous United States. Arnold spent seventeen days traveling a roundabout route from one to the other, traversing salt flats, scaling dunes, and sinking into slot canyons. Aside from bighorn sheep and a phantom mountain lion, his only companions were ghosts of the dreamers and misfits who first dared into this unknown territory. He walked in the footsteps of William Manly, who rescued the last of the forty-niners from the bottom of Death Valley; tracked John LeMoigne, a prospector who died in the sand with his burros; and relived the tales of Mary Austin, who learned the secret trails of the Shoshone Indians. This is their story too, as much as it is a history of salt and water and of the places they collide and disappear. Guiding the reader up treacherous climbs and through burning sands, Arnold captures the dramatic landscapes as only he can with photographs to bring it all to life. From the salt to the summit, this is an epic journey across America's most legendary desert. This is the history of Death Valley, where that bitter stream the Amargosa dies. It embraces the whole basin of the Amargosa from the Panamints to the Spring Mountains, from the Palmettos to the Avawatz. And it spans a century from the earliest recollections and the oldest records to that day in 1933 when much of the valley was finally set aside as a National Monument. This is the story of an illusory land, of the people it attracted and of the dreams and delusions they pursued—the story of the metals in its mountains and the salts in its sinks, of its desiccating heat and its revitalizing springs, and of all the riches of its scenery and lore—the story of Indians and horse thieves, lost argonauts and lost mine hunters, prospectors and promoters, miners and millionaires, stockholders and stock sharps, homesteaders and hermits, writers and tourists. But mostly this is the story of the illusions—the illusions of a shortcut to the gold diggings that lured the forty-niners, of inescapable deadliness that hung in the name they left behind, of lost bonanzas that grew out of the few nuggets they found, of immeasurable riches spread by hopeful prospectors and calculating con men, and of impenetrable mysteries concocted by the likes of Scotty. These and many lesser illusions are the heart of its history. The story of how Death Valley was named is rather unexpected, the people who named it survived. The forbidding landscape surely supports the name, but is the Dead Sea as aptly named? Readers find lots of interesting information like this when they pick up this book. "The sounds and smells of the battlefield almost leap out from the printed page."—Maj. Gen. John W. Barnes, U.S. Army (Ret.), New York City Tribune "Author of the well received Battle for Hue and Into Laos, [Keith William] Nolan once again captures the stark reality of combat in Vietnam. He tells the story of the 7th Marine Regiment and the 196th Brigade of the Army's 'Americal' Division as they engaged the 2d Division of the North Vietnamese Army in the mountains and valleys southwest of Da Nang. This was the first major engagement after the announcement of the U.S. withdrawal from Vietnam, and it occurred at a time when problems with drug abuse, race relations, and shifting morality were endemic in American society and the nation's military. Nolan's account not only takes in the combat operations, but also reflects some of these larger issues of the war."—USNI Proceedings A one-of-a-kind, invaluable resource for anyone who

Publisher information found on publisher's website. This Is A New Release Of The Original 1894 Edition. William Lewis Manly (1820-1903) and his family left Vermont in 1828, and he grew to manhood in Michigan and Wisconsin. On hearing the news of gold in California, Manly set off on horseback, joining an emigrant party in Missouri. Death Valley in '49 (1894) contains Manly's account of that overland journey. Setting out too late in the year to risk a northern passage through the Sierras, the group takes the southern route to California, unluckily choosing an untried short cut through the mountains. This fateful decision brings the party through Death Valley, and Manly describes their trek through the desert, as well as the experiences of the Illinois "Jayhawkers" and others who took the Death Valley route. Manly's memoirs continue with his trip north to prospecting near the Mariposa mines, a brief trip back east via the Isthmus, and his return to California and another try at prospecting on the North Fork of the Yuba at Downieville in 1851. He provides lively anecdotes of life in mining camps and of his visits to Stockton, Sacramento, and San Francisco. This Trails Illustrated topographic map for Death Valley National Park, which straddles the state lines of eastern California and western Nevada, is the perfect recreational map for this dramatic park, which encompasses the hottest, driest, and lowest places in the US. Within its three million acres you will find oceans of sand dunes, dramatic snow-capped mountains, spectacular geological formations, and breathtaking views. The map includes the entire national park area, with detailed trails and topographic information. The trails have been enhanced and road and trail mileage have been added to create a map that is an essential guide for the area. Includes UTM grids for use with your GPS unit. Death Valley is one of the hottest and driest deserts of the world! Readers are taken on an adventure through Death Valley to learn about the plants and animals that survive in this dry, hot desert landscape in this engaging nonfiction title. Featuring vivid photographs, informational text, and riveting facts about desert ecology, readers will be fascinated from beginning to end! Born in New Jersey and educated at the University of California, Corle harvested some of the legends and some possibly true tales of Death Valley. Ansel Adams photographed the arid land, the blazing bright sky, the sand hills and gaunt rocks, the sagebrush and mesquite, the desolate peaks that are Death Valley. His camera caught the form, the shape, the spirit of the desert, where a less discerning eye might see only desolation. Corle's prose and Adams' photography are combined to create a book of great beauty, preserving the spirit and face of barren wilderness.--From Amazon.com The first comprehensive study of the park, past and present, *Death Valley National Park* probes the environmental and human history of this most astonishing desert. Established as a national monument in 1933, Death Valley was an anomaly within the national park system. Though many who knew this landscape were convinced that its stark beauty should be preserved, to do so required a reconceptualization of what a park consists of, grassroots and national support for its creation, and a long and difficult political struggle to secure congressional sanction. This history begins with a discussion of the physical setting, its geography and geology, and descriptions of the Timbisha, the first peoples to inhabit this tough and dangerous landscape. In the 19th-century and early 20th century, new arrivals came to exploit the mineral resources in the region and develop permanent agricultural and resort settlements. Although Death Valley was established as a National Monument in 1933, fear of the harsh desert precluded widespread acceptance by both the visiting

public and its own administrative agency. As a result, Death Valley lacked both support and resources. This volume details the many debates over the park's size, conflicts between miners, farmers, the military, and wilderness advocates, the treatment of the Timbisha, and the impact of tourists on its cultural and natural resources. In time, Death Valley came to be seen as one of the great natural wonders of the United States, and was elevated to full national park status in 1994. The history of Death Valley National Park embodies the many tensions confronting American environmentalism. The Landon family makes a trip to Death Valley National Park accompanied by a mysterious new foster child, fourteen-year-old Leesa Sherman. The many days and years of her life had been busy, challenging and rewarding, and sometimes overwhelmingly difficult. And over the years she began to dream the dream, as many do, that she could, just once, run away and escape from it all. She dreamed of Death Valley National Park, of a winter's journey which promised her beauty, calm and a quieted mind. So when her life stress hit the tipping point, Jackie Keller left the university, packed her car and moved to the desert where she found everything she had dreamed of, plus blessings and adventures she had never envisioned. Through this true life story the reader can see the stunning beauty of this glorious national park, explore its history and share the rhythm of day-to-day life in the small community of Furnace Creek. Walk with her through a season of exploration, laughter and renewal. "For anyone who wants to rediscover his/her true self or perhaps find it for the first time, you are invited to join this middle aged professor who quit her job and went to live and work in a vast and imposing desert. It was a winter spent watching, learning, questioning and discovering things she would never have found without her self imposed exile....a beautiful true life story which Dr. Keller masterfully and artfully describes." Shelley Stokes, Ph. D. A survivor's true account of death, despair, and heroism in Death Valley in the heat of the California Gold Rush. At the height of the California gold rush in 1849, a wagon train of men, women, children, and their animals stumbled into a 130-mile-long valley in the Mojave Desert while they were looking for a shortcut to the California coast. What ensued was an ordeal that divided the camp into remnants and struck them with hunger, thirst, and a terrible sense of being lost beyond hope—until a twenty-nine-year-old hero volunteered to cross the desert to get help. This young hero, William Lewis Manly, was one of the survivors of the tragedy, and he lived to tell the tale forty-five years later in this gripping autobiography, first published in 1894. In a time of unmarked frontiers and wilderness, Manly lived the true life of a pioneer. After being hit by gold rush fever Manly joined the fateful wagon train that would get swallowed up by the barren, arid, hostile valley with its dry and waterless terrain, unearthly surface of white salts, and overwhelming heat. Assaulted and devastated by the elements, members of the camp killed their emaciated oxen for food, ran out of water, split up, and lost and buried their own kind who perished. When Manly's remaining band of ten came across a rare water hole, he and a companion, John Rogers, left the rest by the water and crossed the treacherous Panamint Mountains and Mojave Desert by themselves in search for rescue. In a true act of heroism against all odds, the two finally returned twenty-five days later with help, rescuing their compatriots, including four children, even when it seemed all hope was lost. Told at the end of the nineteenth century, Manly's compelling and stirring account brings alive to modern-day readers the unimaginable hardships of America's brave pioneers, and a chapter in Californian history that should not be forgotten. In 1926, on the advice of his doctor, former newspaperman William Caruthers, whose writings appeared in most Western magazines during a career spanning more than 25 years, retired to an orange grove near Ontario, California. Once there, he would go on to spend much of his time during the next 25 years in the Death Valley region, witnessing the transition of Death Valley from a prospector's hunting ground to a mecca for winter tourists. This book, which was first published in 1951, is William Caruthers' personal narrative of the old days in Death Valley—"of people and places in Panamint Valley, the Amargosa Desert and the big sink at the bottom of America." A wonderful read. Originally published in 1995, soon after Death Valley National Park became the fifty-third park in the US park system, *The Explorer's Guide to Death Valley National Park* was the first complete guidebook available for this spectacular area. Now in its third edition, this is still the only book that includes all aspects of the park.
