Headlines from the Holy Land Nov 13 2021 Tied by history, politics, and faith to all corners of the globe, the Israeli-Palestinian conflict fascinates and infuriates people across the world. Based on new archive research and original interviews, Headlines from the Holy Land explains why this fiercely contested region exerts such a pull over leading correspondents and diplomats.

Solar Energy Jul 09 2021 Concerns about energy resources and the environmental impact of energy use will continue to be important globally. World Scientific's unique series of books on Current Energy Issues is intended, in part, as an expansion and update of the material contained in the World Scientific Handbook of Energy. Each volume will focus on related energy resources or issues and will contain a broader range of topics with more explanatory text. This Solar Energy volume covers a variety of approaches to the use of solar energy. These include large scale photovoltaic production of electricity as well as more local applications in the home and businesses. Similarly, there is an extensive discussion of large scale solar thermal electricity production and smaller scale uses such as solar water heating, home heating and cooling plus crop drying. There is also discussion of more forward-looking technologies including the production of fuels using artificial photosynthesis and the production of biomass. Contents: Introduction to Solar Energy (R Corkish, W Lipi?ski and Robert Patterson) Fundamentals of Photovoltaic Cells and Systems (Ignacio Rey-Stolle) Large-Scale Solar Thermal Plants (CSP) (Manfred Becker, Robert Pitz-Paal and Wes Stein) Large Scale Photovoltaic Power Plants (G Almonacid Puche, P G Vidal and E Muñoz-Cerón) Biomass (Anthony Turhollow) Artificial Photosynthesis (Nathan Killen and Peter K J Robertson) Small Scale PV Applications in Home and Business (Estefanía Caamaño-Martín, Miguel Ángel Egido and Jorge Solórzano) Low Temperature Solar Thermal Applications (Brian Norton, Hans Martin Henning and Daniel Mugnier) Solar Thermochemical Processes (Roman Bader and Wojciech Lipi?ski) Readership: Researchers, academics, professionals and graduate students in energy studies/research and environmental/energy economics.

Combinatorial Algorithms Jan 03 2021 This book constitutes the thoroughly refereed post-workshop proceedings of the 25th International Workshop on Combinatorial Algorithms, IWOCOA 2014, held in Duluth, MN, USA, in October 2014. The 32 revised full papers presented were carefully reviewed and selected from a total of 69 submissions. The papers focus on topics such as Algorithms and Data Structures, Combinatorial Enumeration, Combinatorial Optimization, Complexity Theory (Structural and Computational), Computational Biology, Databases (Security, Compression and Information Retrieval), Decompositions and Combinatorial Designs, Discrete and Computational Geometry, as well as Graph Drawing and Graph Theory. IWOCOA is a yearly forum for researchers in designing algorithms field to advance creativeness of intersection between mathematics and computer science. This is the first time this conference is being held in U.S.

World Congress on Engineering and Computer Science Aug 30 2020

Southern Innovator Magazine from 2012 to 2014 Dec 14 2021 Launched in May 2011, the new global magazine Southern Innovator is about the people across the global South shaping our new world, eradicating poverty and working towards the achievement of the Millennium Development Goals (MDGs). They are the innovators. Issue 1 covered the theme of mobile phones and information technology. Issue 2 covered the theme of youth and entrepreneurship. Issue 3 covered the theme of agribusiness and food security. Issue 4 covered the theme of cities and urbanization. Issue 5 covers the theme of waste and recycling. Follow the magazine on Twitter @SouthSouth1. If you would like hard copies of the magazine for distribution, then please contact the United Nations Office for South-South Cooperation in New York, USA (www.southerninnovator.org). Learn about the Global South-South Development Expo here: www.southsouthexpo.org. Also contact us about opportunities to sponsor the magazine here: southerninnovator@yahoo.co.uk. Sponsors help us to print and distribute more copies.

2014 14th International Conference on Quality Software (QSIC 2014) Apr 18 2022

Geoscience for the Public Good and Global Development Feb 22 2020 "Offers overview of applications of geosciences to sustainable development and geophilanthropic efforts worldwide, and offers advice to guide creation of development projects.

Primacy of geologic input to all development activities is highlighted along with problems that are encountered and environmental issues that must be addressed" --

2014 IEEE Healthcare Innovation Conference (HIC) Nov 25 2022 The theme of the conference is Translational Engineering in Health & Medicine Emphasis will be placed on novel innovations that have a foreseeable impact on human health and disease as well as our ability to translate those innovations to the bedside

Afghanistan at Transition Nov 01 2020 This new study covers the civil and military lessons of the war in Afghanistan as of 2015, the trends at the time of transition, and the risks inherent in the current approach to supporting Afghanistan.

SMTA International Conference 2014 Jul 29 2020

SIPRI Yearbook 2015 Jul 21 2022 The SIPRI Yearbook is known worldwide as an authoritative and independent source of data and analysis for politicians, diplomats, journalists, scholars, students and citizens on armaments, disarmament and international security. It provides an overview of developments in international security, weapons and technology, military expenditure, the arms trade and arms production, and armed conflicts, along with efforts to control conventional, nuclear, chemical and biological weapons. The first edition of the SIPRI Yearbook was released in 1969, with the aim of producing 'a factual and balanced account of a controversial subject-the arms race and attempts to stop it'. This 46th edition of the SIPRI Yearbook covers developments during 2014 including: DT Essays on the conflicts in Syria, Iraq and Ukraine, as well as studies on the relationship of gender equality to peace and armed conflict, and the diversity of peace and war in Africa DT East Asian and European security, as well as global and regional trends in peace operations, and development challenges in fragile states DT Military expenditure, arms production and international arms transfers DT World nuclear forces, with an overview of each of the nine nuclear-armed states DT Iran's nuclear programme and multilateral arms control and disarmament DT Implications of the Ebola outbreak and the challenge of addressing CBW issues in conflict zones DT The Arms Trade Treaty, multilateral arms embargoes and export control regimes as well as a 10-year overview of patterns of armed violence, a summary of the Global Peace Index, and extensive annexes on arms control and disarmament agreements, international security bodies and events in 2014.

Development Challenges, South-South Solutions: May 2014 Issue Apr 25 2020 Development Challenges, South-South Solutions is the monthly e-newsletter of the United Nations Office for South-South Cooperation in UNDP (www.southerninnovator.org). It has been published every month since 2006. Its sister publication, Southern Innovator magazine, has been published since 2011.

2014 IEEE Military Communications Conference (MILCOM 2014) Mar 05 2021

Latino Immigrant Youth and Interrupted Schooling Jan 27 2023 This book offers an innovative look at the pre- and post-migration educational experiences of immigrant young adults with a particular focus on members of the Latino community.

Combining quantitative data with original interviews, this book provides an engaging and nuanced look at a population that is both ubiquitous and overlooked, challenging existing assumptions about those categorized as 'dropouts' and closely examining the historical contexts for educational interruption in the chosen subgroup. The combination of accessible prose and compelling new statistical data appeals to a wide audience, particularly academic professionals, education practitioners and policy-makers.

Distributed Computing May 27 2020 This book constitutes the proceedings of the 28th International Symposium on Distributed Computing, DISC 2014, held in Austin, TX, USA, in October 2014. The 35 full papers presented in this volume were carefully reviewed and selected from 148 full paper submissions. In the back matter of the volume a total of 18 brief announcements is presented. The papers are organized in topical sections named: concurrency; biological and chemical networks; agreement problems; robot coordination and scheduling; graph distances and routing; radio networks; shared memory; dynamic and social networks; relativistic systems; transactional memory and concurrent data structures; distributed graph algorithms; and communication.

Advanced and Refractory Ceramics for Energy Conservation and Efficiency Jun 08 2021 This volume contains a collection of 19 papers from the 11th International Symposium on Ceramic Materials and Components for Energy and Environmental Applications (CMCEE-11), June 14-19, 2015 in Vancouver, BC, Canada. Papers were presented in the below five symposia from Track 2 on the topic of Ceramics for Energy Conservation and Efficiency: Advanced Ceramics and Composites for Gas Turbine Engines Advanced Refractory Ceramic Materials and Technologies Advanced Ceramic Coatings for Power Systems Energy Efficient Advanced Bearings and Wear Resistant Materials Advanced Nitrides and Related Materials for Energy Applications

137th Audio Engineering Society Convention 2014 Oct 12 2021

Political Manipulation and Weapons of Mass Destruction Mar 25 2020 Concerns about CBRN (Chemical, Biological, Radioactive, Nuclear) weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9/11. This book provides a chronological account of al Qaeda's efforts to acquire a CBRN weapon capability, and the evolution of the al Qaeda leadership's approach to actually using CBRN weapons, set against the context of the politicisation of the threat of CBRN terrorism in US security debates. Ben Cole explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda's approach to CBRN weapons, and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies, particularly the 2003 invasion of Iraq. He assesses the relative success of the al Qaeda leadership's political approach to CBRN weapons, together with the relative success of efforts by the US, UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes. Shedding new light on al Qaeda's tactics and strategy, this book will be essential reading for scholars of terrorism and extremism studies.

Transforming US Intelligence for Irregular War Aug 22 2022 When Joint Special Operations Command deployed Task Force 714 to Iraq in 2003, it faced an adversary unlike any it had previously encountered: al-Qaeda in Iraq (AQI). AQI's organization into multiple, independent networks and its application of Information Age technologies allowed it to wage war across a vast landscape. To meet this unique threat, TF 714 developed the intelligence capacity to operate inside those networks, and in the words of commander Gen. Stanley McChrystal, USA (Ret.) "claw the guts out of AQI." In Transforming US Intelligence for Irregular War, Richard H. Shultz Jr. provides a broad discussion of the role of intelligence in combatting nonstate militants and revisits this moment of innovation during the Iraq War, showing how the defense and intelligence communities can adapt to new and evolving foes. Shultz tells the story of how TF 714 partnered with US intelligence agencies to dismantle AQI's secret networks by eliminating many of its key leaders. He also reveals how TF 714 altered its methods and practices of intelligence collection, intelligence analysis, and covert paramilitary operations to suppress AQI's growing insurgency and, ultimately, destroy its networked infrastructure. TF 714 remains an exemplar of successful organizational learning and adaptation in the midst of modern warfare. By examining its innovations, Shultz makes a compelling case for intelligence leading the way in future campaigns against nonstate armed groups.
