For years, editorial and commercial photographer Zack Arias has been a respected and trusted voice in the photography industry. Known for his photography, his teaching, and his ability to connect with photographers, Zack has long had an "open door" approach to discussing his career—the ups and the downs—and in so doing has provided a straightforward and candid look inside the industry. By consistently showing great work and offering helpful advice, he has built a large, loyal readership that looks to him for guidance in navigating the currents of a difficult and dynamic industry. Now, Zack finds yet another way to cut through the noise and offer truly valuable information to those struggling to make their way through the twists and turns of an ever-changing landscape. In

Photography Q&A, Zack answers over 100 questions that he fielded directly from the public. These are questions that range across all aspects of the photo industry: gear, marketing, street photography, vision, pricing, branding, light, models, work/life balance, technical advice, and much more. From how to “put yourself out there” and start to get jobs, to how to get paid for those jobs when the client is slow to cut the check—and everything in between—Photography Q&A answers many of the pressing questions that photographers are asking, but until now have not been addressed. The book also includes intermittent “Visual Intermission” sections—where Zack discusses individual images that were milestones in his development as a photographer—as well as worksheets on topics such as pricing and costs that help photographers to “know their numbers.” With all this material, and with insightful, honest answers that come straight from Zack’s experience as a photographer who has seen it all (or at least a lot of it), Photography Q&A is an essential resource for any photographer looking for the real answers to the real questions in the industry today. Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light—but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as “in-between” lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe’s instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn’t via his let’s-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated—not to mention the wit and humor of a clearly warped (if gifted) mind. “Imagine your dream job as a National Geographic photographer. This inspirational how-to photography book helps you get a step closer. These stunning and evocative photos, drawn from National Geographic’s thriving online photography community, “Your Shot” --with 400,000 members in 196 countries--provide inspiration for photographers of all skill levels”-- Capturing the grandeur of landscapes or mood of a certain natural light is challenging but often the simple details of a texture or color evade photographers most of all. In *Close Up Photography in Nature*, best-selling authors and nature photography pros, John and Barbara Gerlach, share the tips and techniques necessary to successfully photograph the beauty all around you. The Gerlachs are celebrated teachers who understand a photographer’s mind so they begin this book with a brief overview of the fundamentals before delving into some of the more advanced and unique challenges of close up photography. Topics covered include: advanced flash techniques specific for close up shooting, as well as a discussion on focus stacking strategies and tilt-shift lenses for getting maximum depth-of-field. The Gerlachs also discuss their strategy of mixing flash with natural light when shooting close up, which opens up all sorts of photographic possibilities – opening up shadows, creating shadows, separating the subject from the background, reducing contrast between the subject and the background, improving the color rendition, shooting sharper images, and much more. This book will change the way you see the world as well as the way you share it through your work! the world through your work! This new entry in the *From Snapshots to Great Shots* series will teach readers everything they need to know about photographing their pets.
