Inside the Law Sep 11 2021 Vikki Petraitis took to writing true crime because, unlike crime fiction, it was so raw and it told the story of real people, real grief, real loss, real horror. A school teacher by day, Vikki had no idea that writing one book about one unsolved murder would give her a second career that has run alongside her chosen profession for 25 years. She has researched, investigated and written about real Australian crimes, from the well-known to the obscure; and interviewed countless police, crime scene professionals, victims, survivors and families. She did ride-alongs with members of Victoria Police so she could learn about their most memorable cases, and found herself right there with them when a serial killer's third victim was found. Vikki spent time with the dog squad learning how the four-legged police officers are trained to work with their two-legged partners. And she's become biographer to two well-known former cops, and to one of the many victims of institutional child abuse. Her career as a true crime writer has resulted in 13 books and counting, with subjects and titles as diverse as *The Frankston Serial Killer*, *Crime Scene Investigations*, *Forensics*, *Cops*, *Once a Copper: Brian 'the Skull' Murphy*, and the one that started it all - *The Phillip Island Murder*. *Inside the Law* is Vikki's life in crime; a collection of her favourite, personally influential, most memorable stories with a fresh narrative thread of the why, when and how she came to write them.

The Car Show May 08 2021 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Snapshot Jan 22 2020 It takes months for Australian social psychologist Janine McQuarrie to succumb to her husband's pressure to attend spouse-swapping parties, but eventually she gives in. Then, driving with her young daughter one day, she gets out of her car to ask directions and is shot

and killed. The little girl escapes when the gunman's pistol misfires. Inspector Hal Challis of the Crime Investigation Unit is assigned the case, but his efforts are thwarted by his boss. The dead woman was Superintendent McQuarrie's daughter-in-law, and he seems to be more interested in protecting his son than in finding his daughter-in-law's murderer. Who might have a motive to kill this attractive young wife and mother? One of her clients? One of the swingers she'd gotten together with at a party? Or, the obvious suspect, her husband?
