Math Expressions Common Core combines elements of standards-based instruction with the best traditional approaches. Through drawings, conceptual language, and real-world examples, it helps students make sense of mathematics. NSF-funded\* and research-based, Math Expressions is proven to be effective in raising student achievement. Put your students on the path to becoming lifelong learners-and lovers-of all things math with our trusted Common Core math curriculum. This research-based K-6 program is built to provide instruction on the Common Core Standards, and includes special emphasis on the Mathematical Practices and Learning Progressions at every grade level. Based on the NSF-funded Children's Math Worlds project and over 10 years of research, Math Expressions is proven to be effective in raising student achievement. Hands-on and inquiry driven, Math Expressions Common Core teaches students how to represent solutions and explain their answers. This approach helps develop problem-solving and reasoning skills. The strong emphasis in Math Expressions on representation and discussion opens up the world of mathematics to all learners. Every lesson includes intervention, on-level, and challenge differentiation to support classroom needs. - Publisher. TestSoup's Parent Guide is specifically designed for parents who are looking to push their students to the next level with challenging math problems and concepts. We have compiled a collection of materials that have been designed to build upon the understandings and skills taught in the 5th grade Common Core math to push their thinking to the next level. You can use this eBook to learn about the skills they can work on to challenge themselves as well as do practice problems together. Premium Content Aligned to the Common Core Our eBook Study Guide helps students master Common Core Standards and push themselves with more challenging problems. Mini-lessons on every Common Core strand. Practice questions and answers aligned with new Common Core standards. Overviews of each strand within the Common Core that will tell you what you need to know, what you will be learning, and what you should expect to see in the Common Core. Great for teachers, parents, and students who are new to the Common Core! Superior User Interface Bookmark pages you want to revisit Make notes with our easy-to-use annotations tool Highlight important passages or questions with our highlight tool Adjust font size Skip to the last page read, or navigate using our table of contents Intuitive hyperlinks allow for intuitive and efficient navigation Content Outline Lessons, vocabulary, practice problems & explanations, as well as a description of what you and your student should expect from the new common core standards, for each of the following: Expressions & Equations Creating & solving expressions with whole number exponents Creating & solving expressions based on written descriptions Creating equivalent expressions Identifying equivalent expressions Creating expressions using variables to represent unknown numbers in word problems Solving equations & inequalities Using variables to write & solve equations for real world situations Writing inequalities to represent real life situations Determining relationships between variables in order to solve word problems Geometry Finding the area of polygons Finding the area of right rectangular prisms Drawing polygons in a coordinate plane Using 2d nets to represent 3d shapes & find surface area The Number System Dividing fractions Multiplying multi-digit numbers Adding, subtracting, multiplying & dividing decimals Finding greatest common factors and least common multiples Using positive & negative numbers to represent opposite values or directions Rational numbers as part of the number line Ordering & absolute value of positive & negative numbers Finding the distance between 2 points on a coordinate plane Ratios & Proportions Understanding ratios & using them to describe relationships Using unit rates to describe relationships between 2 quantities Using ratios to solve real world problems Statistics & Probability Identifying & creating statistical questions Describing the distribution of data with center, spread, or overall shape Describing the distribution of data with measures of center and measures of variability Recognizing & generating graphs to represent statistical data Summarizing data sets in relation to the question asked Math Expressions is a comprehensive standards-based K-5 mathematics curriculum that offers new ways to teach and learn mathematics. Combining the most powerful elements of reform mathematics with the best of traditional approaches, Math Expressions uses objects, drawings, conceptual language, and real-world situations to help students build mathematical ideas that make sense to them. - Publisher. The purpose of this book is to supply students with supplemental learning tools for working with expressions and equations. This workbook is meant to complement standard curriculum. By working with the Problem Solving Maps, students will learn an alternate approach to solving math problems that will apply to both current challenges and future learning. In Expressions and Equations, students expand their previous knowledge of arithmetic to include basic algebraic expressions. Students will learn and evaluate whole-number exponents. They will generate and identify expressions, equations, and inequalities with variables. Students will also learn to write and solve equations as well as express equivalency. Students will learn to interpret dependent and independent variables while demonstrating quantitative relationships between these variables. The Problem Solving Maps will provide a consistent framework for students to think strategically about their work and apply consistent principles to solving these problems.
