General Transcription is a new opportunity for anyone who desires to have their own business. However, there is a lack of style guides available for transcriptionists who are not working in a medical or legal field. Every individual and company offering general transcription

services has their own preferences, their own rules. There are no standards. The goal of this guide is to set basic standards of formatting, grammar, and punctuation as it pertains to general transcription. The General Transcription Style Guide answers questions such as: Should I indicate laughter or other noises in a transcript? How do I indicate words that I can't quite hear? What punctuation marks should I never use in a transcript? The General Transcription Style Guide is based on the personal experience of a general transcriptionist who has worked with private individuals and companies for four years. The guide is based on common transcription needs and preferences of a variety of clients. It can be used for both verbatim and non-verbatim transcription. This guide is not exclusive. All transcription companies and private clients may have their own preferences. Always follow the preferences of your client or the company you are subcontracting for. A Performer's Guide to Medieval Music is an essential compilation of essays on all aspects of medieval music performance, with 40 essays by experts on everything from repertoire, voices, and instruments to basic theory. From NPR comes the definitive guide to podcasting—featuring step-by-step advice on how to find a unique topic, tell the best stories, and engage the most listeners, as well as the secrets that will take your pod to the next level. Whoever you are, whatever you love, there's a podcast audience waiting for you, and in today's booming audio storytelling landscape, it's never been easier to share your voice with the world. But while the barrier to entry for podcast production is relatively low (just the cost of a mic and a laptop), the learning curve is steep—and quality matters. That's where NPR comes in. In NPR's Podcast Start Up Guide, Glen Weldon draws on NPR's extensive educational materials and army of talent—from recognizable hosts, such

as Guy Raz (How I Built This), Gene Demby (Code Switch), Linda Holmes (Pop Culture Happy Hour), and Yowei Shaw (Invisibilia), to indispensable behind-the-scenes players, such as producers, engineers, and editors—to guide aspiring podcasters through the conception, creation, and launch of a podcast. "Transcribing Oral History offers a comprehensive guide to the transcription of qualitative interviews, an often richly debated practice within the oral history field. Based upon the author's personal experience as a freelance transcriptionist and interviews with more than 30 professionals working around the world in the oral history and qualitative research fields, it is an indispensable guide for those involved in interviews and transcription at any level of an oral history project, including historians, transcriptionists, interviewers, project administrators, archivists, researchers and students"-- Imagine a common movie scene: a hero confronts a villain. Captioning such a moment would at first glance seem as basic as transcribing the dialogue. But consider the choices involved: How do you convey the sarcasm in a comeback? Do you include a henchman's muttering in the background? Does the villain emit a scream, a grunt, or a howl as he goes down? And how do you note a gunshot without spoiling the scene? These are the choices closed captioners face every day. Captioners must decide whether and how to describe background noises, accents, laughter, musical cues, and even silences. When captioners describe a sound—or choose to ignore it—they are applying their own subjective interpretations to otherwise objective noises, creating meaning that does not necessarily exist in the soundtrack or the script. Reading Sounds looks at closed-captioning as a potent source of meaning in rhetorical analysis. Through nine engrossing chapters, Sean Zdenek demonstrates how the choices captioners make affect the way deaf and hard of hearing viewers experience media. He draws on hundreds of real-life examples, as well as interviews with both professional captioners and regular viewers of closed captioning. Zdenek's analysis is an engrossing look at how we make the audible visible, one that proves that better standards for closed captioning create a better entertainment experience for all viewers. This book discusses the different ways that recordings can be transcribed and the functions that the texts may perform. It is also a

hands-on guide to how transcripts are prepared and how transcribers should deal with unclear, confusing, or ungrammatical speech.
