A guide for practitioners who work in long-term care settings, describing assessment tools and interventions for use with older adults in residential facilities. Paper edition (unseen), \$34.95. Annotation copyright by Book News, Inc., Portland, OR Print+CourseSmart This book describes geriatrics practice models that are used to guide the care of older adults, allowing seniors to remain at home, prevent functional disability and preserve quality of life. The models include specific interventions which are performed by health care workers to address the needs of older persons and their caregivers. These models respect patient values, consider patient safety and appreciate psychosocial needs as well. Divided into six parts that discuss hospital-based models of care, transitions from hospital to home, outpatient-based models of care and emergency department models of care, this text addresses the needs of vulnerable patients and the community. Geriatric Models of Care is an excellent resource for health care leaders who must translate these programs to address the needs of the patients in their communities. This book is a practical reference for any clinician who has struggled to care for an older adult in a home setting. The volume is written by experts in the field who describe fundamental principles and clinical approaches of geriatric home-based care and their application to specific diseases and conditions, including delirium, incontinence, falls, and chronic pain and disability. The book also details house calls for special populations, from the developmentally disabled to those afflicted with neurologic or psychiatric diseases. The volume explores house calls within the context of the US healthcare system. Geriatric Home-Based Medical Care: Principles and Practice is a valuable resource for geriatricians, geriatric nurses, primary care physicians, social workers, public health officials, and all medical professions who need tools to provide timely, compassionate, and high-quality care for their older adult patients. This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles Written by noted authorities in geriatric psychiatry, this volume is a clinically oriented guide to the diagnostic workup and treatment of psychiatric and neuropsychiatric disorders in elderly patients. The book describes in detail the neurologic and neuropsychiatric patient assessment and the use of all treatment modalities, both psychotherapeutic and pharmacologic, in elderly patients. Chapters discuss the treatment of disorders in

all clinical settings—inpatient, outpatient, emergency, primary care, assisted living, and long-term care. Algorithms for workup and treatment are included, as well as case studies and personal accounts by patients and care providers. Appendices provide drug information and additional resources. Designated a Doody's Core Title! "As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice." Score: 97, 5 stars --Doody's "This third edition holds the promise of bringing yet another level of depth and sophistication to understanding the best practices for assessment, interventions, and anticipated outcomes in our care of older adults." Evidence-Based Geriatric Nursing Protocols for Best Practice is intended to bring the most current, evidence-based protocols known to experts in geriatric nursing to the audience of students, both graduate and undergraduate, practitioners at the staff level from novice to expert, clinicians in specialty roles (educators, care managers, and advanced practice nurses), and nursing leaders of all levels. We owe a debt of gratitude to the many authors and the editors for bringing this work to us."--from the preface by Susan Bowar-Ferres, PhD, RN, CNAA-BC, Senior Vice President & Chief Nursing Officer, New York University Hospitals Center "The greatest beneficiaries of these new practice protocols, however, will be the older adults and their family members who stand to benefit from the greater consistency in care and improved outcomes from care based on the best evidence that is tempered with the expertise of advanced clinician-scholars."--from the foreword by Eleanor S. McConnell, RN, PhD, APRN, BC, Associate Professor and Director, Gerontological Nursing Specialty; Clinical Nurse Specialist, Durham Veterans Administration Medical Center; Geriatric Research, Education and Clinical Center This is the third, thoroughly revised and updated edition of the book formerly entitled Geriatric Nursing Protocols for Best Practice. The protocols address key clinical conditions and circumstances likely to be encountered by a hospital nurse caring for older adults. They represent "best practices" for acute care of the elderly as developed by nursing experts around the country as part of the Hartford Foundation's Nurses Improving Care to the Hospitalized Elderly project (NICHE). This third edition includes 17 revised and updated chapters and more than 15 new topics including critical care, diabetes, hydration, oral health care, palliative care, and substance abuse. Each chapter includes educational objectives, assessment of the problem, nursing intervention or care strategies, and references; most chapters have case studies. Meet the diverse health care needs of older adults! Explore effective ways to enhance the wellness and independence of older adults across the wellness-illness continuum, including acute, primary, and long-term care. From an overview of the theories of aging and assessment through the treatment of disorders, including complex illnesses, this evidence-based book provides the comprehensive gerontological coverage you need to prepare for your role as an Advanced Practice Nurse. With information on healthy aging, comprehensive geriatric assessment, and common symptoms and illnesses that present in older adults, this text serves as a guide for students preparing for boards, as well as a reliable source of information for practicing nurses. Five Stars "To the point resources on geriatric conditions/syndromes. Very easy to read/access the content you need...bulleted and formatted for quick reference. Helpful sections on evidence-based guidelines."—Ben, Online Reviewer Should be titled "GET THIS BOOK NOW!" "GREAT book for my new job...I've been an NP to college students and in urgent care, but this is the first time I've been a nurse practitioner for a geriatric house call practice and this book is perfect. I am really enjoying the format, the timely and research backed treatment protocols and the compassionate, well written style for advising anyone in the business of taking care of old folks! This is a must-read for all medical people but is especially suited to a Geriatric NP or Family Practice NP who see elderly patients regularly."—Online Reviewer Expanded, Revised & Updated! Thoroughly updated to reflect the art and the science of care of the older adult as well as the newest evidence and changes in health care Expanded! Coverage of LGBTQ+ and transgender issues in Chapter 2 Body systems chapters covering common disorders in the older adult Coverage of psychosocial issues that can affect the health and wellness of the older adult, family, and society. Polypharmacy information to guide you through the complexity of prescribing for older adults taking multiple medications "Signal Symptoms" feature to help you quickly target potential differential diagnoses Strength of Recommendation Taxonomy (SORT), a patient-centered approach to grading evidence in medical literature which provides a direct reference to evidence-based practice recommendations for clinicians to consider in the care of older adults In-text case studies to provide further practice and review This book serves as a comprehensive reference for the basic principles of caring for older adults, directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections, each with chapters that target the skills and knowledge necessary for achieving competency. Each of the 45 chapters follow a consistent format for ease of use, beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also includes brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to physicians of the future. Written by expert educators and clinicians in geriatric medicine, Geriatric Practice is key resource for students in geriatric medicine, family and internal medicine, specialties, hospice and nursing home training, and all clinicians studying to work with aging patients. Many elderly patients suffer from psychiatric conditions that result from--or are made worse by--existing medical conditions. This new edition integrates clinical expertise needed to evaluate and treat psychiatric, medical and neurologic disorders in the older patient. Both scientific foundations of and clinical approaches to psychiatric disease are discussed by a range of experts who rely on evidence-based clinical guidelines and outcomes data. Most chapters include case studies that illuminate the approaches to diagnosis and treatment. The book's five sections include basic principles of evaluation and treatment for specific disorders; appendices offer further insight into pharmacotherapy and neuroanatomic foundation of psychiatric diseases. Print+CourseSmart Geriatric Forensic Psychiatry: Principles and Practice is one of the first texts to provide a comprehensive review of important topics in the intersection of geriatric psychiatry, medicine, clinical neuroscience, forensic psychiatry, and law. It will speak to a broad audience among varied fields, including clinical and forensic psychiatry and mental health professionals, geriatricians and internists, attorneys and courts, regulators, and other professionals working with the older population. Topics addressed in this text, applied to the geriatric population, include clinical forensic evaluation, regulations and laws, civil commitment, different forms of capacity, guardianship, patient rights, medical-legal issues related to treatment, long term care and telemedicine, risk management, patient safety and error reduction, elder driving, sociopathy and aggression, offenders and the adjudication process, criminal evaluations, corrections, ethics, culture, cognitive impairment, substance abuse, trauma, older

professionals, high risk behavior, and forensic mental health training and research. Understanding the relationship between clinical issues, laws and regulations, and managing risk and improving safety, will help to serve the growing older population. Principles and Practice of Geriatric Surgery presents the fundamentals of surgical care for the fastest growing segment of the US population, providing a vital integration of operative strategies with the physiological changes of aging. Among the topics covered are the endocrine system, otolaryngology, respiratory system, cardiovascular system, GI system, hepatobiliary system, urogenital system, soft tissue and musculoskeletal system, neurosurgery, and transplantation. A multidisciplinary resource that combines the latest research with the best practices for working with older adults The Handbook of Gerontology: Evidence-Based Approaches to Theory, Practice, and Policy provides an essential source of important theoretical and applied information on gerontology for all mental health professionals interested in optimizing the health and well-being of older adults. Interdisciplinary and incorporating the most current evidence-based practices in its focus, this timely book considers the many factors that affect the way this growing population experiences the world-and provides a positive and proactive guide to administering care. Integrating the latest research findings with important practice implications for working with an older client population, the Handbook of Gerontology draws on a multidisciplinary team of expert contributors who provide coverage and insight into a diverse range of topics, including: A global perspective on aging Elder abuse Family caregiving Parenting grandchildren Depression Substance abuse Alzheimer's disease Successful aging and personality Biological and cognitive aspects and theories of aging An exceptional resource for practitioners, researchers, policymakers, and students, the Handbook of Gerontology is essential reading for anyone who works with older adults. This definitive guide encompasses past, present, and future issues of theory, research, and practice in areas of interest and specialization in aging, and represents current trends of thought on gerontology, the science of and associated practices with the elderly. This volume is a collection of articles dealing with the psychological, social, and cultural domains affecting older people and contains general biomedical understandings and practical/clinical applications. The contributors broadly outline some of the most relevant academic issues, including cross-cultural perspectives on age and aging; past and future trends in life expectancy with underlying explanations; innovations and advances in research design and methodology in the study of the aging process and the effects of age as a variable; and past and current theoretical perspectives on the psychology and sociology of aging. Some pertinent concerns for practitioners and clinicians are addressed, such as successful counseling therapies with older adults and changes in social work and rehabilitation practice with the elderly. The thought-provoking chapters provide a wide-sweeping, multidisciplinary review of a rapidly expanding field of interest and represent a definite desire among the contributors to evolve a theoretical apparatus and a related, applied arena of endeavor. This important work on a significant and timely issue of concern will broaden our understanding and awareness of the rising number of positive efforts within gerontological studies now being derived from diverse disciplinary roots. The reader will find articles on subjects of particular interest, such as the Biology of Aging, the Psychology of Adult Development and Aging, Rehabilitation of the Elderly, and Social Work and Aging. An extraordinarily detailed reference, this work will be a valuable resource for gerontologists, social workers, psychologists, and doctors specializing in geriatrics. This book is designed for clinicians, policy makers, and other professionals engaged in developing programs for the mental health needs of our aging population. By identifying and describing existing models of excellence in geriatric psychiatry practice from a variety of settings and geographic locations, this task force report will both inspire and instruct as to how these paradigms can be used for future system development. Concise and valuable information on complex issues in service delivery for the elderly is provided from seven different countries. Selected Models of Practice in Geriatric Psychiatry presents various settings in which psychiatrists treat elderly patients and describes for each setting \* targeting and identification of patients\* common clinical problems\* approaches to treatment\* physical plant and staffing requirements\* administrative issues\* reimbursement sources Explore how community-based networks can effectively meet the needs and problems of sick, elderly people and their caregivers! Social Work in Geriatric Home Health Care: The Blending of Traditional Practice with Cooperative Strategies explores how social workers, aides, nurses, administrators, and policy makers can cooperatively work by maintaining appropriate health records in order to keep the elderly living at home. Based on the author's twenty-five years of social work experience in geriatric home care case management, this book explores improved ways to organize home health care by use of cooperative strategies in order to assist older individuals in living independent lives at home. Complete with informative case studies and interviews, you will explore useful examples of geriatric social work practice through Concerned Home Managers for the Elderly, (COHME) a nonprofit, licensed home health care agency. Social Work in Geriatric Home Health Care examines many crucial geriatric care and case management issues of concern to geriatric social workers, including: offering meaningful and fulfilling work as a home health care aide providing high-quality training and ongoing education for home care aides creating a cooperative environment by encouraging staff, social workers, and nurses to share expertise with the case management coordinators who are responsible for placing the geriatric patient at home or in a special care facility involving the client in the management of his or her own health care creating concise, one-page reports for each home visit by using a "One-Sheet" to help you extract case assessments and plans for your geriatric client in a readily accessible format dealing with state regulatory authorities and the general trend in home health care to place the elderly in nursing homes paying careful attention to financial and administrative problems within your organization while striving to remain true to your original mission of providing at-home care Social Work in Geriatric Home Health Care will help you explore a different way of organizing home health care for the sick and elderly at a time when the percentage of people over sixty-five who will require care is rapidly increasing. This important book works to improve the case management of geriatric people and challenges home health care workers and legislators to become more progressive in their thinking about the direction in which geriatric health care should move at the turn of the century. With this vital book, you will gain insight into organized and cooperative methods of providing home health care for the elderly and find improved methods for managing your geriatric cases to give your clients optimum care. Containing 41 new chapters covering new infections, treatments, approaches to care, and end of life care, Pathy’s Principles and Practice of Geriatric Medicine includes expanded sections on acute stroke, dementia, cardiovascular disease and health, respiratory diseases, and training. To capture an international perspective this new text has contributions from a global editorial team. Broadly speaking there are two kinds of professional practice skills relevant to the burgeoning field of gerontological human service: clinical modalities and macro strategies. This book identifies seven essential approaches to clinical gerontology, including five of the most important macro skills that all professionals in the field will need to acquire, and it presents each of them in a single collection intended to serve as a basic text and reference work for academic and in-service training. Each contributor to this volume speaks with recognized expertise on his/her preferred subject, while mindful of the larger purpose of the collection as a whole. In a concluding chapter, Dr. Kim draws on his own long and successful experience in obtaining financial support for his programs and provides a wealth of useful information on the preparation of grant proposals and the conduct of other fundraising activities. Serving the Elderly is adaptable to the uses of a wide variety of geriatric health care providers, from students and trainees in social work, clinical psychology, and other care-giving professions to already established practitioners who are branching out in gerontology. This book takes a fresh look at how caring for Medicare beneficiaries can lead to success in today’s healthcare marketplace. Using examples from highly successful practice models, the book will take the reader through the key components necessary to run a profitable geriatric practice. The author, who co-founded what became one of the largest geriatric private practices in the country, discusses each part of the continuum of care from the perspective of the provider-client relationship, highlighting the importance of business cultures in this environment. The text also features an overview of payment models, starting with traditional fee-for-service, insurance (Medicare HMO’s), and finishing with the concept of bundled payment models that have been heralded as the future of physician reimbursement. Finally, this book focuses on the practical aspects of business planning, budgeting and hiring and concludes with chapters about the key challenges faced by a geriatric practice, focusing on provider productivity, coding and billing, and dealing with potential competition in the marketplace. The Business of Geriatrics is the ultimate business guide for primary care physicians, geriatricians, residents, medical students, healthcare administrators, policymakers, business and medical administrative students, and practice managers. Gerontological Practice for the Twenty-first Century meets the need for state-of-the-art information on practice approaches with older patients that are age-specific and empirically based, blend "micro" and "macro" views, and reflect

current themes in the aging and social work fields. The book is designed as a text for students and as a professional resource for practitioners. Clearly written, the book offers an expert and comprehensive review of the current literature and focuses on issues relating to the most vulnerable older people. Gerontological Practice for the Twenty-first Century also features case illustrations throughout and brief end-of-chapter questions for review. The book has four parts. Part 1 reviews current and classic theories of aging and proposes an original framework for an integrative approach to practice with older people that incorporates both individual and policy-level interventions. The approach is based on current themes such as a life course perspective, heterogeneity, diversity, and inequality. Part 2 covers such common and important psychological problems among older individuals, as anxiety, depression, suicide, substance abuse, and dementia, and describes appropriate, evidence-based interventions. Part 3 considers the social psychological picture by discussing working with older families, end-of-life care, bereavement, and work and retirement. Part 4 focuses on core sociopolitical issues in the lives of older people: economic policy, poverty, health policy, quality-of-life concerns, and social services. Current, authoritative, and original, this single-volume gerontology resource will be of valuable use to graduate students and practitioners. Sleep disorders cause considerable morbidity and distress in the aging population. By highlighting the clinical diagnosis and management of sleep disorders, this volume provides a valuable resource for all those involved in health care of older individuals. The changes in sleep patterns that occur during normal aging are described, followed by authoritative chapters on the presentation of various age-related sleep disorders. The book deals with the range of therapeutic measures available for managing these disorders and gives insight to potential areas of research that have emerged in the last few years, such as the study of circadian rhythms in later life, sleep patterns associated with co-morbidities and the use of quality-of-life measurement tools to determine sleep quality as we age. This volume is relevant to sleep disorders specialists, psychiatrists, geriatricians and gerontologists, and any professionals and researchers working in the interdisciplinary areas of sleep and aging. Designated a Doody's Core Title! "Caring for the older adult population is a challenge and the goal of nursing practice is to help preserve or restore an older adult's function and maximize their well-being and quality of life. This book is a wonderful resource for assisted living clinicians and nurses who wish to serve this population. It is well written, easy to read, and well organized so it can be used as a textbook for nursing students in geriatric nursing." Score: 94, 4 stars --Doody's "This book, written by and for nurses across the spectrum of nurse providers (advanced practice nurses, delegating nurses, and the direct care workforce), covers all aspects of management as well as the many common clinical problems and syndromes we encounter among older adults. Further, this book proposes wonderful assessment and intervention material that will help the entire health care team keep residents within their AL communities through early recognition and management of acute illnesses. Kudos to our nursing colleagues for editing this publication and may it serve as the useful guide for AL residents across the country." --John B. Murphy, MD President, American Geriatrics Society Professor of Medicine and Family Medicine Warren Alpert Medical School of Brown University This book provides a comprehensive overview of both management activities and clinical competencies for assisted living nurses. The authors provide practical guidelines and decision-making models to help nurses address both the large- and small-scale challenges of their daily practice. With Assisted Living Nursing, readers can gain the essential problem-solving and task management skills critical to their daily work. The contributors cover a wide range of topics, including: Management Ethics in nursing practice Regulatory oversight and reimbursement Organizational culture Leadership theories and styles Conflict resolution Finance and budget management Risk assessment Clinical Practice Admission-transfer-discharge assessment Infection Control Cultural aspects of care Geriatric clinical syndromes and disorders Palliative and hospice care principles Rehabilitation/restorative nursing Theories of aging Ultimately, this book serves as the definitive, one-stop resource, addressing virtually every topic of interest to assisted living nurses. The geriatric population is expected to double by 2020. The new fourth edition of Practice of Geriatrics will equip you with the knowledge you need to provide effective care for this growing patient population. With revised and up-to-date content throughout, this essential reference will keep you abreast of the latest clinical protocols and management challenges in geriatric care. As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, Case Studies in Gerontological Nursing for the Advanced Practice Nurse presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to ageism, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, Case Studies in Gerontological Nursing for the Advanced Practice Nurse is a key resource for all those dedicated to improving care for older adults. The third edition describes significant practice issues and challenges facing gerontological social workers, working with the fastest growing demographic cohort in North America. Insightful and creative practitioners provide current accounts and case examples from their work in a variety of settings. The material includes both micro and macro practice and offers a focus on advanced specialty practice while also providing an advanced generalist model. All the chapters have been rewritten and updated by adding related additional readings and websites. Six new chapters have been added on sensory impairment, HIV/AIDS, elder abuse, community-assisted living, rural elderly, retirement, and volunteerism. "Social Work Practice with the Elderly" offers an exciting collection of well-crafted readings and will be useful for any social work student at the undergraduate or graduate level. It will also be a valuable resource for those in other helping professions who work side by side with social workers in this field: nurses, physiotherapists, music and art therapists, psychologists, physicians, recreational therapists, speech and language therapists, and clergy. The protocols in this thoroughly updated edition address key clinical conditions and circumstances likely to be encountered by a hospital nurse caring for older adults. They represent "best practices" for acute care of the elderly as developed by nursing experts around the country as part of the Hartford Foundation's Nurses Improving Care to the Hospitalized Elderly project (NICHE). New to this edition are chapters on evaluating practice guidelines and measuring quality and outcome of care. Although the protocols were developed for acute care, they can be easily modified to work in other practice settings, such as the nursing home or home care. This book is designed to present the clinical geriatric trends within general internal medicine and family practice, which practitioners often encounter in caring for their older adult patients. Chapters focus on increasingly difficult clinical decisions that practitioners have to make in caring for older adults, who often experience medical

complications due to memory loss, physical disability, and multiple chronic conditions. Written by experts in geriatric medicine, each of these chapters start with the most up-to-date clinical geriatric research and provide specific examples or case studies on how to use this information to address the clinical needs of older adult patients. In addition, there is a set of concise “take-home points” for each chapter that are easy to commit to memory and implement in clinical care of aging patients. As the only book to focus on current trends in geriatric research and evidence-based eldercare practice, *Clinical Trends in Geriatric Medicine* is of great value to internists, family practitioners, geriatricians, nurses, and physician assistants who care for older adults. The fourth edition of the highly acclaimed *Principles and Practice of Geriatric Medicine* provides an account of the fundamental changes associated with ageing, which are essential to our understanding and management of the elderly sick population. The title has been extensively revised and updates to reflect the enormous changes in treatment options and medical conditions emerged since publication of the third edition. Written by worldwide experts of international repute, this is the most up-to-date and comprehensive single reference source currently available. *Principles & Practice of Geriatric Medicine, Fourth Edition* incorporates: More than 30 new chapters, including: Preventive geriatrics, Anorexia of Aging, Managements of Weight Loss, Dehydration, Vitamins and Minerals in the Elderly, Cancer and Aging, Mild Cognitive Impairment, Treatment of Behavioral Disorders, The Older Patient with Down's Syndrome, Drug Abuse in Older People, Breast Cancer, Women's health A truly global perspective, including new chapter on: Care of the elderly in Israel: old age in a young land, Geriatric Medicine in China, Geriatric medicine education in Europe, Geriatrics from the European Union Perspective, India, Day Hospitals, Perspectives from Latin America The title will be indispensable for all those involved in the treatment of older patients: Gerontologists to keep up-to-date with the latest developments in the field General practitioners and specialists in health policy and community care, who increasingly have to deal with a significant number of older people. Academic researchers in geriatric medicine, who are in need for an all encompassing reference work Medical registrars (UK) / residents (US) in order to pass their exams Teachers of Geriatric Medicine Hospital libraries with increasing budgets to spend on much needed resource in this growing field. Professionals within the pharmaceutical industry in order to monitor treatment options and new prescription developments. Medical care of the elderly today challenges the practitioner to break away from narrow diagnostic labelling and view the whole picture of disease in old age. In an excellent problem-oriented approach, *Geriatric Medicine* offers a complete overview for practitioners. The main portion of the text deals with the common diseases of old age; important aspects such as physiology, demography, and health care delivery are discussed in separate chapters. Social and legal aspects in the major English-speaking countries receive adequate attention. All of the contributors have at some time been connected with the University Department of Geriatric Medicine in Cardiff and attest to a positive and dynamic approach in geriatric medicine, an approach that has international validity and relevance. *Mental Health Practice in Geriatric Health Care Settings* emphasizes the major research and clinical findings realized in five years of research on mental health issues in older urban medical patients, many of whom represent minority groups. Chapters cover the high comorbidity of health and mental health problems in geriatric patients, neuropsychological (or cognitive) assessment, depression, alcohol abuse in health care settings, emerging behavioral medicine issues, and family relations and their tie to medical settings. As a practitioner, you'll find this book helps your practice by representing the first assessment and treatment techniques normed and validated on minority elderly.
