The workshop problems and design exercise develop a tem Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June) A Leader's Guide to Executing Change and Delivering Results. Governor Charlie Baker, one of the most popular governors in the United States, with a reputation for getting things done, wants to put the service back into public service: "Wedge issues may be great for making headlines," he writes, "but they do not move us forward. Success is measured by what we accomplish together. Our obligation to the people we serve is too important to place politics and partisanship before progress and results." For the Governor and his longtime associate Steve Kadish, these words are much more than political platitudes. They are at the heart of a method for

delivering results—and getting past politics—the two developed while working together in top leadership positions in the public and private sectors. Distilled into a four-step framework, *Results* is the much-needed implementation guide for anyone in public service, as well as for leaders and managers in large organizations hamstrung by bureaucracy and politics. With a broad range of examples, Baker, a Republican, and Kadish, a Democrat, show how to move from identifying problems to achieving results in a way that bridges divides instead of exacerbating them. They show how government can be an engine of positive change and an example of effective operation, not just a hopeless bureaucracy. *Results* is not only about getting things done, but about renewing people's faith in public service. Empty promises feed disengagement when instead we need confidence in our government and the services it delivers. When a mob attacked the US Capitol Building on January 6, 2021, the very core of our democracy and our sense of government were threatened. Demonstrating that government can work—the goal of this book—is vital to ensuring the future of our democracy. For those who are undertaking haymaking for the first time, this book offers wise counsel and practical advice, providing step-by-step instructions that will see the new or casual farmer through the entire process. From plowing and planting the field to cutting, baling, and storing, author Spencer Yost clearly and concisely explains what to do, citing examples and describing instructive situations from his own experience as a hay farmer. He also includes ample information of the different types of haying equipment and basic machinery maintenance. Also includes informative sidebars on seed types and sowing information; using GPS surveying to estimate planting yields; how to test hay dryness with a microwave oven, and other helpful hints. Addresses the key cotton ginning issues concerned with facilities, machinery, cleaning, ginning, drying, packaging, and waste collection and disposal as well as ancillary issues concerned with

pollution, management, economics, energy, insurance, safety, cotton classification, and textile machinery. Appendices: duties of gin personnel, portable moisture meters and pink bollworm control in gins. Glossary and index. Photos, charts, tables and graphs. Throughout the 19th century animals were integrated into staged scenarios of confrontation, ranging from lion acts in small cages to large-scale re-enactments of war. Initially presenting a handful of exotic animals, travelling menageries grew to contain multiple species in their thousands. These 19th-century menageries entrenched beliefs about the human right to exploit nature through war-like practices against other animal species. Animal shows became a stimulus for antisocial behaviour as locals taunted animals, caused fights, and even turned into violent mobs. Human societal problems were difficult to separate from issues of cruelty to animals. Apart from reflecting human capacity for fighting and aggression, and the belief in human dominance over nature, these animal performances also echoed cultural fascination with conflict, war and colonial expansion, as the grand spectacles of imperial power reinforced state authority and enhanced public displays of nationhood and nationalistic evocations of colonial empires. Fighting nature is an insightful analysis of the historical legacy of 19th-century colonialism, war, animal acquisition and transportation. This legacy of entrenched beliefs about the human right to exploit other animal species is yet to be defeated. "Peta Tait brings to the book an impressive scholarly command of the documentary material, from which she draws a range of vivid examples and revealing analyses of human-animal confrontation in popular entertainments ... The book is written with verve and clarity, and will be of interest to a wide readership in performance studies and cultural history." Professor Jane R. Goodall, Western Sydney University Peta Tait FAHA is Professor of Theatre and Drama at La Trobe University and Visiting Professor at the University of Wollongong, and author of *Wild and dangerous performances: animals, emotions,*
