The unanticipated arrest of General Augusto Pinochet in London on October 16, 1998 served to punctuate the twenty-fifth anniversary of the most cataclysmic event in Chilean history -- a violent coup d'etat that abruptly ended decades of democratic rule. A steadily increasing series of explorations, interviews, and images in the popular press and media has begun to unearth the horrors of the dictatorship and its defenders and to reevaluate the stories of the democratically elected Allendists the coup had brutally purged. Based on interviews and analysis of a generation of young leaders of the Chilean political elite who came to power with Allende's election in 1970, *When the Romance Ended* focuses on how Allende's followers conceptualize and justify their political objectives and programs through the course of their political victory, violent defeat, and gradual return to politics during Chile's redemocratization process. Examining the 1960s generation's program of revolutionary social transformation, as well as the integral role the group played in the return to democracy in Chile, Hite explores what happens to the political identities of leaders such as these in a context of traumatic political upheaval and change. Chambers, Nuangjamnong, and their contributors look at how the development of the beer industry in East Asia presents a unique opportunity for understanding the region's political economy. Asia is both the world's largest beer-consuming and beer-producing region, and the fastest growing beer market. Per-capita consumption is lower than Europe, but catching up fast. Beer consumption is also widely understood to correlate closely with economic growth and urbanization, much more so than other alcoholic beverages like spirits. With ten country case studies from both Northeast and Southeast Asia, the contributors to this volume look at the history of beer production and consumption across East Asia through a lens of historical institutionalism and political economy. In doing so they not only examine the development of the beer industry in the region but also what it tells us about the countries themselves. They ask questions such as: To what extent have state versus societal actors influenced the path of beer production? How has beer production changed? Was there a critical juncture at which beer production abruptly changed course? A valuable resource for students and scholars of modern East Asian History, and particularly those with a focus on colonial history, industrial history, and state-society relations. In this latest Hite Report the friendship between women and the societal definitions of such friendship are examined: what are the limits, does it include sex, its historical context, and other pressing issues. With high profile stars such as Madonna and Ellen de Generis very publically exploring the nature of female friendship and women everywhere questioning its nature, Dr Hite's extensively researched findings couldn't be more timely. This book points out the safety and health concerns as well as the regulatory requirements for safe material handling. Many material handling venues are discussed from cranes to industrial robots. This diverse approach to material handling safety will be of interest to those who are responsible for safety or having material handling as a major component of their operation. Because warehouses typically contain no dangerous machines or high-risk operations, employers and employees often develop a false sense of safety and security. With this book, you will learn how to proactively develop formal safety programs and reduce the number of safety incidents and losses that occur in your warehouse environment. Warehouse Safety discusses such topics as the nature of warehouse operations and safety statistics and examines the components of an effective safety program, including meetings, job safety observation, and safety incentives. It focuses on the high hazard work areas and situation present in warehouses and the equipment and training that managers should invest in to prevent injury and loss. Author George Swartz addresses a number of preventative measures, including fixed fire systems and fire safety, materials storage, handrailing and ladders, employee training, forklifts, methods for lockout/tagout procedures, dock hazards and safeguards, and more. Gift from Rick Hite. The purpose of this book is to introduce, discuss, illustrate, and evaluate the colorful palette of analytical techniques that can be applied to the analysis of household survey data, with an emphasis on the innovations of the past decade or so. Most of the chapters begin by introducing a methodological or policy problem, to motivate the subsequent discussion of relevant methods. They then summarize the relevant techniques, and draw on examples – many of them from the authors’ own work – and aim to convey a sense of the potential, but also the strengths and weaknesses, of those techniques. This book is meant for graduate students in statistics, economics, policy analysis, and social sciences, especially, but certainly not exclusively, those interested in the challenges of economic development in the Third World. Additionally, the book will be useful to academics and practitioners who work closely with survey data. This is a book that can serve as a reference work, to be taken down from the shelf and perused from time to time. In bright light, it is easier to take a beautiful photograph with your DSLR. When the sun starts to go down or you are shooting indoors, a whole new skill set is needed. This new addition to the successful Field Guide Series will help you shoot what potentially could be the most lovely image without the help of natural light. No more harsh flash photographs with dreary backgrounds and no more blurry night shots that were exposed too long. Opening with a section on the qualities of different kinds of low light, the book then deals with ways of overcoming gloomy situations, whether you are shooting hand-held or on a tripod. Post-production fixes are also covered, allowing you to turn difficult shots into real works of art. When the angel Ebol comes down to the land of Korasan to help the forester's sixteen-year-old daughter, Lydia, he finds himself involved in romance, political intrigues, and other escapades. Based on replies to a survey completed by over 3,000 children and adults in 16 countries--50 percent from the U.S.--Hite's report concludes that recent changes in the family--especially increased divorce rates--do not signal a crisis. Instead, they are evidence that the family is finally being democratized.
