From Baker to Zurich, even the tiniest towns in Montana have sent players to the NFL. One of the most dominant offensive linemen of the 1940s was Anaconda's own Francis Cope, who earned All-Decade honors as a New York Giant. Elected to the Pro Football Hall of Fame in 1991, MSU alum Jan Stenerud was the league's first soccer-style kicker. Pat Donovan, who earned a Super Bowl ring with the Dallas Cowboys in the 1970s, was named by Sports Illustrated as the fourth-greatest Montana athlete of the twentieth century. Griz Doug Betters was a member of the Miami Dolphins' famed Killer Bees and the 1983 NFL defensive player of the year. From the obscure to the prominent, author Brian D'Ambrosio celebrates Big Sky Country's rich connections with America's favorite professional sports league. This volume completes Newman's monumental study of the sonata. It examines the evolution of the sonata idea from the precocious Romanticisms of Dussek before 1880 to the near exhaustion of Romantic music by the time of World War I. Thoroughly documented, illustrated by new extended lists of sonatas as well as the fullest bibliography of Romantic music literature yet published, the book is invaluable to musicians. Centering on the dynamic period of post-imperial and pre-Communist China, the book focuses on the building and city planning initiatives of Henry Murphy, a little-known American architect who initially ventured to China in 1914 to design a campus for the Yale-in-China Program, but who then found himself captivated by a professional and cultural challenge that lasted two decades: how to preserve China's rich architectural traditions while also designing new buildings using up-to-date Western technologies. Murphy's buildings were compromises -- "new wine in old bottles" as he once called them -- and the book uses those "bottles" as lenses through which to understand not only Murphy's quest to find a middle ground for his architecture in China, but also to gaze at a tumultuous society facing an uncertain future. Murphy's buildings were more than vessels for either aesthetic visions or technical expertise; inadvertently they became political emblems, as Chinese rulers such as Chiang Kai-shek and Sun Yat-sen's son called on Murphy for city planning advice to complement their hopes for urban reconstruction. There are few serious studies of Western architects in the twentieth century who practiced in non-Western contexts, and those scant studies that have been published concentrate largely on British, French or Dutch examples in colonial settings. Hence, the book makes significant contributions to the fields of both American and Chinese architectural history.
