This successor to *Complex Litigation and the Adversary System*, which was published in 1998, has been reorganized and the text completely rewritten. Most of the principal cases used in the new edition have been decided since 1998, and many of the notes discuss cases, literature, and developments that have arisen in the past decade. In the interest of creating an accessible, student-friendly text, the book has been substantially shortened through the careful editing of cases and the use of short, informative notes. At the same time, the casebook still attempts to achieve the prior casebook's comprehensive survey of the field. Hardbound - New, hardbound print book. The third edition of this casebook reflects the many developments that have occurred in aggregate litigation since 2013 while continuing to treat the subject as a coherent whole. This edition includes a short, systematic introduction to the range of different aggregation techniques and then pays detailed attention to class actions, multidistrict litigation (MDL), parens-patriae suits, bankruptcy, and arbitration. In particular, this edition features a new chapter devoted to MDL, in which topics range from selecting the transferee court, choosing what law should apply, and exploring the judicial role in examining MDL's effect on settlement and leadership selection. As before, the casebook does more than just present the law--it considers multiple perspectives on policy, litigation strategy, judicial practice, financial considerations, and empirical findings. The book fills three gaps in the market for teaching materials on the U.S. civil justice system. First, it treats "aggregate litigation" as a cohesive field of law that encompasses all devices for processing claims en masse. Second, the book confronts forthrightly the reality of our civil justice system as one geared toward settlement, not trial. From this vantage point, the casebook sees the processes for aggregate litigation as vehicles through which to achieve comprehensive, or broadly encompassing, resolution of related civil claims. Third, the book frames the legitimacy of preclusion in aggregate litigation by drawing, among other things, on conceptions of legitimacy in other settings, such as private contract and public legislation. In so doing, the casebook encourages students to see cross-cutting connections with their other courses on such topics as contracts, corporations, and administrative law. This casebook provides detailed information on legal methods. The casebook provides the tools for fast, easy, on-point

research. Part of the University Casebook Series; , it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. "This casebook...compares the law of Latin America to that of Europe, as well as the United States while introducing students to the richness and diversity of the Latin American legal tradition through cases, legal documents, and commentaries. This...book allows students to see the law in action and guides them through entire judicial decisions, demonstrating how litigation unfolds and how a different legal culture operates. It is currently the only cases and materials publication devoted to Latin American law and the issues that arise in concrete litigation south of the border."-- Designed for law school complex-litigation and remedies classes that emphasize injunctions and contempt, this casebook also serves as a tool for lawyersâ€(tm) quick, on-point research into the background and present status of these subjects. Developments in the rapidly changing law in the 25 years since publication of its predecessor, Injunctions, Second, required numerous additions and extensive revision. Part of the University Casebook Series; , it includes selected cases designed to illustrate the development of a body of law on complex litigation. Text and explanatory materials designed for law study accompany the cases. Hart & Sacks' The Legal Process: Basic Problems in the Making and Application of Law provides detailed information on the making and application of law. The casebook provides the tools for fast, easy, on-point research. Part of the University Casebook Series®, it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. Law school casebook, provides detailed on mediation and other non-building processes. The casebook provides the tools for fast, easy, on-point research. Part of the University Casebook Series®, it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. This casebook is the first to cover federal habeas corpus comprehensively, presenting post-conviction review and executive detention litigation in an accessible way. It is designed both for standalone courses on habeas corpus, and for courses focusing on post-conviction litigation, wrongful convictions, and national security detention. The first two chapters introduce students to the habeas privilege and the Suspension Clause. A four-chapter unit on post-conviction litigation carefully explores cognizability, procedural doctrines, and merits adjudication. Two chapters develop the role habeas plays in review of immigration and other types of civil detention. A substantial two-chapter unit examines habeas review of military custody. Provides detailed information on processes of dispute resolution. The casebook provides the tools for fast, easy, on-point research. Part of the University Casebook Series®, it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. Combining rigorous analysis of the professional rules of lawyer conduct with extensive interdisciplinary materials on the legal profession and ethics, this casebook offers a unique perspective on the professional challenges facing contemporary lawyers--and their opportunity to promote the public good. The book combines real-life problems, doctrinal and statutory analysis, and carefully-edited readings to offer a comprehensive and critical examination of the role of lawyers as client representatives and democratic citizens. Many of the chapters can be used as independent units for courses focusing on ethical problems in corporate practice, tax practice, family law, criminal law, and public interest law. The eighth edition also includes extensive revisions that provide new analysis of core professional rules, enhanced organizational formats, and critical additions to the case law and professional literature. Key changes include expanded coverage of how the lawyer-client relationship begins and ends; important updates to the materials on confidentiality, conflicts of interest, and market regulation; recent media clips; and new research on access to justice, diversity and inclusion , lawyer well being and legal education. The book proposes a fundamentally new way of teaching contract law: it simultaneously presents a more systematic and coherent elaboration of contract doctrine than other contacts casebooks and develops a more rigorous interdisciplinary approach to thinking about law generally. The aim of the book is to present a doctrinally integrated, interdisciplinary approach to contract law in a rigorous, open, and systematic fashion. This casebook replaces the conventional approach with an effort to elaborate the doctrinal structure of contract law in an orderly way and, at the same time, to introduce students in a systematic way to a wide range of methods of legal analysis. The materials in the book therefore present a holistic account of contract law, in which doctrines from various areas of the law are linked together, and the relations among them explained. The explanations sound both in traditional doctrinal legal analysis and in ideas taken from economics, sociology, and philosophy. Mullenix's Mass Tort Litigation: Cases and Materials reflects two concepts: First, that the seminal, core cases and materials relating to mass tort litigation still remain viable precedents after 25 years. Second, that courts are still struggling to find solutions to the resolution of this complex litigation. In addition to the seminal cases relating to Agent Orange, Dalkon Shield, DES, and asbestos litigation, the casebook is updated with materials relating to breast implants, tobacco, medical devices, and pharmaceutical litigation. The updated casebook is suitable for advanced courses in tort litigation, complex procedure, class action litigation, and dispute resolution offerings. This is a completely new trusts and estates casebook and takes a new approach in its material and structure. The book includes a toolbox section, introducing students early on to the basics of wills, trusts, powers, joint tenancies, life insurance, and miscellaneous other forms. Thus, this book organizes material around planning properly, rather than around litigation. The book also covers barriers to succession, such as the rule against perpetuities, slayer statutes, revocation, and litigation (mental capacity, no-contest clauses, and the like). Rather than including long and lightly edited cases, this book utilizes several case squibs that illustrate different factual scenarios for each legal issue followed by the court's decision and reasoning. The book also includes many statutes with lengthy analyses of the different types of statutes using the UPC as the primary model. The author also includes practice points, tax tips, and technology traps throughout the entire book. There are numerous problems throughout the materials, with the answers located at the back of the book. The most respected casebook on the subject, this sophisticated classic provides a fairly detailed overview and then in-depth coverage of the major problem areas, giving law students a solid and complete grounding. Retaining prior editions' range and depth of coverage, while undergoing a thorough rewriting to make it ever more smooth and logical, the tenth edition covers such major new cases as *Tombly* and *Iqbal*, and it fully incorporates the new rules of December 2009. This versatile coursebook can serve the most profound civil procedure course as well as a modern compact course with as few as three semester hours--thanks to its flexible structure, it fosters diverse teaching methods. This casebook provides the most complete treatment available of constitutional tort actions under 42 U.S.C. § 1983 and *Bivens*. The elaborate and increasingly controversial doctrines of official immunity are examined in detail, as is the possibility of direct governmental liability under *Monell v. Dept. of Social Services*. The Fifth Edition also provides complete coverage of the Civil Rights Attorney's Fees Award Act and its implications for constitutional tort litigation. The book also explores the relation of § 1983 to the Eleventh Amendment, to the potential overlap with federal habeas corpus, to the application of doctrines of preclusion, and to conflicts between state and federal law. It also provides an introduction to other Reconstruction Civil Rights Acts (§§ 1981, 1982, and 1985), to modern statutes such as Title VII and Title IX (which add sex discrimination to previously prohibited grounds of discrimination), and to structural reform litigation in schools and prisons. Hardbound - New, hardbound print book. The third edition of this innovative administrative law casebook retains and enhances its unique features: Focus on five representative agencies to provide students with a more holistic understanding of agencies and provide context. Use of a consistent unit design that maximizes student learning and facilitates the use of the book with a wide variety of teaching styles, including traditional methods and the "flipped" classroom. Incorporation of cutting-edge cases and problems that focus on the practical application of administrative law doctrines. By focusing on five important and representative agencies (the EPA, NLRB, SSA, IRS, and FCC), the book addresses two key problems for teaching and learning administrative law: (1) students' lack of familiarity with agencies and what they do; and (2) the difficulty of understanding new and different agencies and their organic statutes for each new administrative law case. Extended treatment of these five agencies, including one chapter for each agency that focuses on its use of a particular kind of agency action (rulemaking, policymaking adjudication, mass adjudication, informal action, and enforcement) provides students with a more complete picture of what agencies do and how they do it. Because the principal cases and problems involve the same five agencies throughout the book, the need to learn about new agencies and understand new organic statutes is greatly reduced, enabling students and teachers to focus on the administrative law issues in the cases. The book uses a consistent "unit" format throughout. Each unit covers a particular topic and includes (1) a clear and comprehensive discussion of the basic doctrine governing the topic; (2) a principal case or cases to illustrate the application of the doctrine and highlight key issues; (3) a discussion of related matters to explore additional issues and connections between topics; and (4) a detailed administrative law problem requiring the application of the doctrine in context. This unique structure and design facilitates the use of the book with a variety of teaching methods, including the Socratic method, lecture and discussion, and the problem method. Because it combines clear exposition, illustrative principal cases, and comprehensive problems, the book is also an ideal tool for teachers who want to flip their classrooms. This unit structure also enhances the flexibility of the book, allowing teachers easily to select topics for coverage and determine the depth of coverage they wish to provide. The third edition has been thoroughly updated to provide cutting edge treatment of emerging administrative law issues and developments, including the reinvigoration of separation of powers, the erosion of *Chevron* deference, and constraints on agency guidance documents. The third edition also reflects changes designed to enhance the book's effectiveness as a teaching and learning tool, such as

increased use of primary administrative law materials, improvements to problems, and new principal cases. Hardbound - New, hardbound print book. E. C. Abbott was a cowboy in the great days of the 1870's and 1880's. He came up the trail to Montana from Texas with the long-horned herds which were to stock the northern ranges; he punched cows in Montana when there wasn't a fence in the territory; and he married a daughter of Granville Stuart, the famous early-day stockman and Montana pioneer. For more than fifty years he was known to cowmen from Texas to Alberta as "Teddy Blue." This is his story, as told to Helena Huntington Smith, who says that the book is "all Teddy Blue. My part was to keep out of the way and not mess it up by being literary.... Because the cowboy flourished in the middle of the Victorian age, which is certainly a funny paradox, no realistic picture of him was ever drawn in his own day. Here is a self-portrait by a cowboy which is full and honest." And Teddy Blue himself says, "Other old-timers have told all about stampedes and swimming rivers and what a terrible time we had, but they never put in any of the fun, and fun was at least half of it." So here it is—the cowboy classic, with the "terrible" times and the "fun" which have entertained readers everywhere. First published in 1939, *We Pointed Them North* has been brought back into print by the University of Oklahoma Press in completely new format, with drawings by Nick Eggenhofer, and with the full, original text. Ginsburg's casebook provides detailed information on legal methods and the tools for fast, easy, on-point research. Part of the University Casebook Series®, it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. This updated casebook serves a course in introduction to legal reasoning. It is designed to initiate students in the legal methods of case law analysis and statutory interpretation. In a course of this kind, students should acquire or refine the techniques of close reading, analogizing, distinguishing, positing related fact patterns, and criticizing judicial and legislative exposition and logic. Law students' introduction to law can be unsettling: the sink or swim approach favored by many schools casts students adrift in a sea of substantive rules, forms and methods. By contrast, the Legal Methods course seeks to acquaint students with their new rhetorical and logical surroundings before, or together with, the students' first encounters with the substance of contracts, torts, or other first year courses. This approach may not only be user friendly; it should also prompt students to take a critical distance from the wielding of the methods. In this way, students may avoid (or at least broaden) the tunnel vision that so often afflicts beginning law students. To view or download the 2019 Supplement to this book, click here. This casebook focuses on the constitutional and statutory doctrines necessary to litigate 4th, 8th, and 14th Amendment claims, 1st Amendment religion claims that arise in prison, and the 11th Amendment defense. Every chapter places students in roles as practitioners handling simulated law practice problems; provides a doctrinal overview; includes exercises, visual aids, and questions to guide student reading; and includes materials that help students reflect on their professional roles. The second edition has new Supreme Court and circuit court authority, new jury instructions, and new exercises to help students become practice-ready and is adaptable for a 2-, 3-, or 4-credit course or for a Section 1983 constitutional clinic. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the McGeorge School of Law, University of the Pacific. Reviews of the First Edition: "This new casebook admirably fills a significant need in the teaching of constitutional litigation. For many years, law teachers of this important topic have either had to generate their own materials or choose among some few standard case books. Now, Professor Ricks has authored a new and quite different casebook. Professor Ricks approaches the constitutional and statutory materials from several perspectives: doctrinal development, legislative responses, litigation decisions, and practical considerations that inform the litigation and decision making in this area. Included in each substantive chapter are the social and political contexts of the constitutional issues, leading Supreme Court and Circuit Court opinions, excerpts from oral arguments on major cases in the Supreme Court, legislative initiatives, expert reports, jury instructions, representative pleadings, and even interviews with leading civil rights litigators. As an example, the chapter on prisoner rights litigation includes the leading cases, but also provides a rich mix of materials from litigation files, investigative reports from public interest organizations, and legislative hearings. Professor Ricks also provides thoughtful questions and innovative simulations that will encourage students to think through these problems from the perspectives of the lawyers, inmates, prison officials, judges, and legislators. The world of constitutional litigation is far broader than case law. Professor Ricks has captured the multi-dimensional aspects of this field and has produced a casebook that will greatly enhance teaching, learning and practice of constitutional litigation." -- David Rudovsky, Founding Partner, Kairys, Rudovsky, Epstein & Messing, and Senior Fellow at the University of Pennsylvania Law School "Sarah Ricks has created an incredibly useful, contextually-based casebook that tells the story of constitutional litigation from many different perspectives. Students go behind the scenes and come to understand litigation from reading not only case law, but from examining briefs, oral arguments, pleadings, and expert opinions. For professors and students who want more from legal education than the unadorned case-method approach can provide, Professor Ricks has compiled a set of materials that brings the case law to life. Teaching and learning about constitutional litigation will be a much richer experience thanks to her efforts." -- Karen Blum, Professor of Law, Suffolk University Law School "This book does careful justice to an area of constitutional law that is often overlooked - domestic violence. By featuring in the Due Process chapter the Castle Rock case in which the Supreme Court with a stroke of the pen virtually eviscerated mandatory arrest around the country, and excerpts from the Supreme Court briefs, it demonstrates the risks as well as the potential in looking to courts to advance women's protections." -- Joan S. Meier, Esq., Professor of Clinical Law Director, Domestic Violence Legal Empowerment and Appeals Project George Washington University Law School "...the focus is on practice -- not law school theory. Unlike so many texts which just focus on Supreme Court cases, this case book includes cases from the lower court courts as well as excerpts from briefs. The book includes simulations which involve realistic situations... [and] actually helps students to learn to practice law and not just to read cases." -- Mitchell H. Rubinstein, Adjunct Law Prof Blog (lawprofessors.typepad.com/adjunctprofs) "...Professor Ricks has, in fact, offered a trenchant account of how civil rights law is a catalogue of public morality and a registry of social consciousness; how any civil rights doctrine, whether significant or minor, whether honored or abused, reveals something about the people who adopted it and the ideas they profess to hold dear; and how civil rights litigation is not merely (or indeed mainly) a contest over the technical requirements of judicial, legislative and administrative rules but a reflection of American society's ideas of justice, fairness, power, equality and democracy. But above all this: Professor Ricks has managed to accomplish in this textbook, with prose at once clearheaded and lyrical, in a format at once straightforward and complex, and with materials at once conventional and unexpected, the difficult and seemingly contradictory task of pointing the way to the future of the casebook while at the same time proving herself a true intellectual heir to Langdell's original vision of the case method." -- Aderson Bellegarde François, Howard University School of Law "[T]he text avoids a bare recitation of theory, but rather focuses on the skills practicing lawyers need. This is not to say that the text lacks a thorough doctrinal foundation: it provides the necessary background on the historical, political, and social context of constitutional litigation to provide the reader with context as to how the law has evolved." -- Stephen Tucker and Rachel Feuerhammer, Rutgers Journal of Law & Public Policy "[This] book improves upon the old casebook model in two important ways. First, it places each case in a broader context that helps explain the doctrinal developments that might otherwise feel counterintuitive or arbitrary to students who limit their study of the subject to the four corners of the opinions. ...Second, the book emphasizes the advocate's role in shaping the development of constitutional law." -- Nicholas J. Wagoner, Circuit Splits Blog Steiner, Vagts and Koh's Documentary Supplement to Transnational Legal Problems, Materials and Text, Fourth Edition, provides detailed information on transnational legal problems law. The casebook provides the tools for fast, easy, on-point research. Part of the University Casebook Series; , it includes selected cases designed to illustrate the development of a body of law on a particular subject. Text and explanatory materials designed for law study accompany the cases. This updated casebook serves a course in introduction to legal reasoning. It is designed to initiate students in the legal methods of case law analysis and statutory interpretation. In a course of this kind, students should acquire or refine the techniques of close reading, analogizing, distinguishing, positing related fact patterns, and criticizing judicial and legislative exposition and logic. Law students' introduction to law can be unsettling: the sink or swim approach favored by many schools casts students adrift in a sea of substantive rules, forms and methods. By contrast, the Legal Methods course seeks to acquaint students with their new rhetorical and logical surroundings before, or together with, the students' first encounters with the substance of contracts, torts, or other first year courses. This approach may not only be user friendly; it should also prompt students to take a critical distance from the wielding of the

methods. In this way, students may avoid (or at least broaden) the tunnel vision that so often afflicts beginning law students. The fifth edition features a substantially revised chapter on statutory interpretation. It not only highlights recent Supreme Court decisions, but also confronts students with statutory texts to construe independently of judicial exposition. The chapter also includes new sections on ordinary meaning, the use of dictionaries and corpus linguistics, and temporal problems in statutory interpretation. "This casebook for a basic bankruptcy course takes a deal-oriented finance approach to bankruptcy, with a focus on business bankruptcy. The [reader] will not only learn the major elements of bankruptcy and corporate reorganization in chapter 11 of the Bankruptcy Code, but also the major facets of bankruptcy that influence financing transactions. The hidden message behind these materials is how to understand complex financial deal-making and how to integrate finance with law, in the context of bankruptcy."-- Law school casebook with two objectives. One is to equip law students with the methodology they will need to engage in an international intellectual property practice involving transactional work or litigation. The second is to expose students to the social, economic, and cultural considerations that underpin intellectual property law around the world. Features expertly edited cases and problems for classroom discussion. This casebook organizes contemporary foreign, as well as U.S., case law and literature to equip law students with the knowledge they need to engage in international intellectual property practice, in both transactional and litigation settings. Carefully selected materials also expose students to the social, economic, and cultural considerations that underpin intellectual property law around the world. Each field of law - copyright, patent, trademark, unfair competition, trade secrets, industrial design - is introduced by a comprehensive author's note placing the field in its international and comparative law context, and extensive notes on the cases and materials fill in relevant details, including currently and historically important topics. A substantially expanded teacher's guide offers step-by-step help to teaching every case and doctrine. Writing for Law Practice organizes documents into three sections that correspond to the three major modes of written communication in the law-"Litigating," "Informing and Persuading," and "Rule-making" - each with its own signature writing skills. The organization of this text is both realistic and helpful to student and teacher. Part One focuses on pleadings and motions, where concept is primary and expression secondary. Part Two covers letters, memos, trial and appellate briefs, and judicial opinions, which require clarity and perseverance as well as creativity. Part Three covers contracts, legislation, and wills, where conceptualization is inextricable from clear and precise expression. Among the advantages of this organization is that it gives the teacher much flexibility in course design. New features of the second edition include a skills chapter on effective Document Design and its role in reader comprehension; a section on Contracts on negotiation that aims to provide broader context for transactional drafting; expanded discussions of tone and narrative in the Pleadings and Persuasion chapters; expanded coverage of e-mail communication; a section on living wills and health care proxies in the Wills chapter; and new exercises and assignments throughout. Writing for Law Practice is intended for both "Advanced Writing" and "Introduction to Drafting" courses. Because "drafting" is a term without a single, universally agreed-upon meaning, "drafting" courses do not all cover the same documents. However, this text treats a broad range of documents and a broad range of skills, and so it is suitable for all of these upper-level writing courses. "This is our second semester teaching it and I find the book to be one of the best writing books I've ever read." --Nina Neal, Paralegal Program Chair, Central Piedmont Community College CasebookPlus Hardbound - New, hardbound print book includes lifetime digital access to an eBook, with the ability to highlight and take notes, and 12-month access to a digital Learning Library that includes self-assessment quizzes tied to this book, leading study aids, an outline starter, and Gilbert Law Dictionary. This book supplements Rendleman's Complex Litigation casebook. This casebook on Japanese Law has been specially designed for ease of use and theoretical versatility. Heavily-edited cases, statutes, and articles canvass a wide range of intriguing problems and theoretical perspectives. Professors will find that it facilitates a variety of analysis and approaches to a given question--whether sociological, anthropological, or based on law and economics. The book allows for in-depth coverage of a diverse range of substantive areas of law, from torts, criminal law, and contracts to employment and corporate law. The second edition of this casebook treats the subject of aggregate litigation as a coherent whole. The new authors have preserved the original focus while updating, revising and enriching the discussions of particular topics. The materials on class actions have been tightened and reorganized, reflecting recent judicial decisions that have made class actions harder to certify, and the materials on other procedural devices, including consolidations and arbitration, have been strengthened. The discussions contain more information about litigation strategies, judicial practices, financial considerations, and empirical findings. As before, this book fills three gaps in the market for teaching materials on the U.S. civil justice system. First, it establishes aggregate litigation as a cohesive field of procedural law, one that encompasses all devices for processing claims en masse, including class actions, multi-district litigations and other forms of consolidation, aggregate settlements, parens patriae lawsuits, bankruptcy reorganizations, and private arbitrations. Second, the casebook confronts forthrightly the reality of our civil justice system as one geared toward settlement, not the rare event of trial. From this vantage point, the casebook sees the processes for aggregate litigation as vehicles through which to achieve comprehensive, or broadly encompassing, resolution of related civil claims. Third, the casebook frames the legitimacy of preclusion in aggregate litigation by drawing, among other things, on aspects of private contract and public legislation. In so doing, the casebook encourages students to see cross-cutting connections with their other courses on such topics as contracts, corporations, and administrative law. This 750-page civil procedure casebook is structured so that it can be taught quickly but at a high level. The tightly-edited cases capture students' interest while teaching the material well. Notes are short but intellectually challenging. The book has enough materials to cover topics basically or in depth. The casebook introduces students to the themes running through civil procedure: efficiency and fairness, advantages and disadvantages of the adversarial system, real-life litigation strategies, and issues of federalism and separation of powers. The 4th edition has been updated to include not only the most recent Supreme Court cases, but new cases from the lower federal courts. The 2015 and 2016 cases fully account for the important 2015 amendments to the Federal Rules of Civil Procedure. In this thorough revision and update of a classic international law casebook, you will find a comprehensive introduction to the international law of today. The authors have written a highly teachable text that ensures students learn the foundations as well as the latest developments in international law--from the law of piracy to the law of cyberspace. The authors are noted specialists with years of experience in both the practice and teaching of international law. They believe this book will uniquely prepare students for the global practice of law. This is the 2011 supplement to Jeffries, Karlan, Low and Rutherglen's "Civil Rights Actions: Enforcing the Constitution," 2d Edition.
