The author draws on her father's account of the war and her extensive interviews with other veterans of the 92nd Division to describe the experiences of a naive southern white officer and his segregated unit on an intimate level. During the war, the protocol that required the assignment of southern white officers to command black units, both in Europe and in the Pacific theater, was often problematic, but Johnston seemed more successful than most, earning the trust and respect of his men at the same time that he learned to trust and respect them. Gene Johnston and the African American soldiers were transformed by the war and upon their return helped transform the nation. The 92nd Division of the Fifth Army was the only African American infantry division to see combat in Europe during 1944 and 1945, suffering more than 3,200 casualties. Members of this unit, known as Buffalo Soldiers, endured racial violence on the home front and experienced racism abroad. Engaged in combat for nine months, they were under the command of southern white infantry officers like their captain, Eugene E. Johnston. Take the "ultimate driving machine" out for a test drive before you buy! Comparable title; Illustrated BMW Buyer's Guide, 2nd ed (0-87938-754-8) The Light Tank M3 and M5, known as the General Stuart, was the first tank used by American forces in armored combat during WWII. Like its predecessor the M2A4, the Stuart was armed with a 37mm M5 main gun. It also carried up to five Browning machine guns and 7500 rounds of ammunition. The M3 version sported radial aero-engines, replaced in the M5 with smoother, cooler twin Cadillac automobile engines. The M5 also featured improved sloped armor and had the driver's hatches moved up

top. In the European Theater, where enemy armored vehicles were plentiful, the Stuart's weak main gun meant that it served primarily in cavalry and infantry support roles. In the Pacific, where enemy armor was less of a threat and close support was a necessity, the Stuart's maneuverability proved a valuable asset. Over 25,000 Stuarts and variants were produced during the war, and they eventually served in the armies of over thirty countries including the Soviet Union, India and Republic of China Army. A few continue in active service military today. Intended as a general purpose manual for the platoon leader, tank commander and crew, this 1944 War Department FM 17-68 field manual shows how to achieve efficient execution of mounted and dismounted action, and precision and speed in service of the weapon. Originally restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.
