Master and Commander Apr 27 2023 Set sail for the read of your life! Patrick O'Brian's Aubrey-Maturin tales are widely acknowledged to be the greatest series of historical novels ever written. Now these evocative stories are being re-issued in paperback by Harper Perennial with stunning new jackets.

Dandadan, Vol. 3 May 24 2020 A nerd must fight powerful spirits and aliens all vying for the secret power of his "family jewel," so who better to fight alongside him than his high school crush and a spirit granny?! Momo Ayase and Okarun are on opposite sides of the paranormal spectrum regarding what they'll believe in and what they won't. Their quest to prove each other wrong leads them down a

path of secret crushes and paranormal battles they'll have to participate in to believe! Okarun, a high school boy obsessed with supernatural phenomena, has lost his precious family jewels in a battle with Turbo Granny! His classmate Aira ends up finding one, and it awakens spiritual powers within her. Around this same time, a strange woman in a red dress appears at the school and attacks Aira, Okarun, and Momo! Who is she, and what's with her obsession with Aira?

Biology of Sport Jul 26 2020 *Biology of Sport* publishes reports of methodological and experimental work on science of sport, natural sciences, medicine and pharmacology, technical sciences, biocybernetics and application of statistics and psychology, with priority for inter-disciplinary papers. Brief reviews of monographic papers on problems of sport, information on recent developments in research equipment and training aids, are also published. Papers are invited from researchers, coaches and all authors engaged in problems of training effects, selection in sport as well as biological and social effects of athletic activity during various periods of man's ontogenetic development.

Hispanic Engineer & IT May 16 2022

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

Attraper Au Vol Dec 23 2022 The world of skateboarding meets architectural beauty Fred Mortagne is a self-taught French director and photographer who is internationally acclaimed

for his images of skateboarding and street photography. Attraper au vol (Catch in the Air) is the culmination of Mortagne's photographic career, from 2000 to 2015. A feast of lines and angles, his black-and-white compositions blend his subjects into their environments, offering an abstract perspective on architecture, geometry and the human figure. His work intrigues both skaters and nonskaters alike, as it emphasizes the esthetic beauty of skate and urban culture rather than pure performance (although the raw talent of his subjects is readily apparent). "As a young skate rat in the early nineties, I was super into watching skate videos, and very early I was sensitive to how the videos were made," he told an interviewer. "When the filming was good, I was super thrilled. This pushed me to begin filming my own clips with my friends, for fun ... for over 30 years, it has been the love of my life. Skateboarding has taken me to so many places--not just physically, but culturally and artistically." This book includes a foreword by the world-renowned photographer Anton Corbijn and an essay by legendary skateboarder Geoff Rowley, with whom Mortagne has worked extensively. Fred Mortagne, also known as French Fred, is a skateboarder, photographer and filmmaker living in France.

Ecohydrology & Hydrobiology Jun 24 2020 The international journal Ecohydrology & Hydrobiology (E&H) has been created to promote the concept of Ecohydrology, which is defined as the study of the functional interrelations between hydrology and biota at the catchment scale. Ecohydrology extends from the molecular level to catchment-scale processes and is based on three principles: • framework (hydrological principle) - quantification and integration of hydrological and ecological processes at a basin scale; • target (ecological principle) - necessity of enhancing ecosystem absorbing capacity and ecosystem services; and • management tool (ecological engineering) - the use of ecosystem properties for regulation the interplay between hydrology and biota. The journal encourages the submission of manuscripts which adopt an integrative approach to aquatic sciences, explaining ecological and hydrological processes at a river-basin scale or propose practical applications of this knowledge. It will also consider papers in other hydrobiological fields. Especially welcome are papers on

regulatory mechanism within biocenosis and the resistance and resilience of freshwater and costal zones ecosystems. There is no page charge for published papers. All submitted papers, written exclusively in English, should be original works, unpublished and not under consideration for publication elsewhere. All papers are peer-reviewed. The following types of papers are considered for publication in E&H: • original research papers • invited or submitted review papers, • short communications
